The Claimed Scores for the ARI DX Contest are now published on the Log Received Page - from the ARI home page, <http://www.ari.it/> click "Log Received". The ARI team wishes to thank Dave, KM3T and kkn.net for support. (Thanks, ARI HF Contest Manager, Bob, I2WIJ)

OPERATING TIP

Although one's state is not part of most VHF contest exchanges, there are many operators chasing state-level awards such as Worked All States who want to know your state along with the grid. Rather than add state to the exchange, why not add it to your CQ? For example, "CQ contest

from W5ZN in EM45, Arkansas." You may pull in a few more callers that way! (Thanks, Bennie K5KV)

==> TECHNICAL TOPICS AND INFORMATION

Trying to keep a straight path when deploying a Beverage antenna in heavy brush or undergrowth (see this blog by N2NL/KH2 <http://www.n2nl.net/?p=375> for an idea of the problem) is a lot easier with My Tracks <https://market.android.com/details?id=com.google.android.maps.mytracks&feature=search_result>, a free Android phone GPS app. (Thanks, Jos&#65533; CT1BOH)

Recent solar activity predictions have been dismaying to fans of 15 meters and up (while the low-band ops have been secretly cackling with glee). The most recent ARRL Propagation Bulletin ARLP024 <http://www.arrl.org/w1aw-bulletins-archive-propagation> contains a host of links about the reports and dissenting opinions. In the meantime, just get on the air and make contacts anyway!

Dave N3XUD enthusiastically endorses WinGrid <http://www.keplerian.com/> by W4SM as a great grid square tool. The free program calculates grid squares from latitudes and longitudes, the reverse, and calculates distances and headings from two sets of lat/long or grid squares. There are a number of other useful programs there, as well.

Knot-knot! Who's there? Alan K2ACK and his collection of Wikipedia links for useful rope tricks; the Figure Eight Loop <http://en.wikipedia.org/wiki/Figure-eight_loop> and the Figure Eight knot <http://en.wikipedia.org/wiki/Figure-eight_knot>, the Double Bowline <http://en.wikipedia.org/wiki/Double_bowline> (that poor rabbit must be going nuts), and the Butterfly <http://en.wikipedia.org/wiki/Butterfly_knot>.

So you finally bought that neat coax connector crimping tool and die set. But which to use for which connector? Here is a size chart <http://www.rfparts.com/picts/1505_chart.jpg> that might be of help in selecting the right crimper die for the right RF connector. There are also standard die sets on the RF Parts <http://www.rfparts.com/coax_accessories.html> and Tessco <http://www.tessco.com/products/displayProducts.do?groupId=576&subgroupId=40> websites. (Thanks, Bert VE3NR and Les W2LK)

Bill N5AB reports success in using an old-fashioned screen door spring at one end of an antenna wire, where the support rope meets the tree, to provide some flex for a wire antenna. He uses a length of rope between the antenna and the metal spring to prevent any undesired coupling between the two.

If you are designed an amplifier power supply, you might want to check out the PSU Designer Software <http://www.duncanamps.com/psud2/download.html> from Duncan Amplifiers. This will help insure that you've included all of the important factors

that affect supply performance. There are some high voltage supply design examples <http://www.ifwtech.co.uk/g3sek/in-prac/best-of.htm#psud> from G3SEK available, too!

Paul NA5N has a lot of excellent parts and building information on his website <http://www.aoc.nrao.edu/%7Epharden/hobby/Hobby.shtml>. When he's not hamming, he works at the National Radio Astronomy Observatory doing some REAL DXing!

Roger K8RI is building some adapter plates <http://www.rogerhalstead.com/ham_files/Adapter.htm> to mount Yaesu thrust bearings, which are metric, to Rohn 25 accessory shelves, which are not metric. This process is fairly easy to adapt to other similar needs.

Technical Web Site of the Week - From time to time someone poses the question as to why coax cables are mostly manufactured in either 75 or 50 ohm characteristic impedances. This article from Microwaves 101 <http://www.microwaves101.com/encyclopedia/why50ohms.cfm> nicely explains why, with both math and graphs. (Thanks, Fred WA7TZY)

==> CONVERSATION

Caught A Fish!

In the recent ARRL June VHF QSO Party, a special event occurred as Mark KM0A completed his Fred Fish Memorial Award <http://www.arrl.org/ffma> (FFMA), working his "last two" grid squares during the contest! This is only the fourth FFMA and quite an achievement! If you've ever been someone's "last state" or "last zone" or "last county", you know it can be almost as much fun on the other end. Here to tell you about it from the rover's perspective are Barry KS7DX and Dennis K7BV and their friend, Ken, who went to great lengths to put CM93 (almost entirely water) on the air - it was quite an adventure!

73, Ward N0AX

Firstly I'd like to thank all the folks that sent Dennis and I notes thanking us for doing the trip. It was an adventure to say the least and we were very happy to hand out the grid to so many people who needed it for FFMA. Hearing Mark KM0A calling early Saturday morning, giving him the grid and then hearing him say it was the last one he needed had to be the highlight of the whole trip. When we left on Wednesday he needed two and to find out we gave him the last was just unbelievable!

We arrived at Santa Rosa (in California's Channel Islands, grid CM93) on Thursday and proceeded to setup the stations and get the 6M7JHV 7-element Yagi antenna installed. Once it was installed we determined very quickly that it wasn't going to be very good. It was moving around a lot with the rolling of the boat and the constant wind so we took it back down and replaced it with our spare 3-element Yagi. Even that was

moving around a lot but with its wider pattern and shorter boom it was easier to move as the boat changed position. And the boat changed position a lot! We'd no sooner get the antenna pointing east and the boat would swing on the anchor and all of a sudden the antenna was pointing west or some other oddball direction! The winds and currents didn't do us any favors. Combine those factors with QSB on the band and you begin to understand why we were loud one minute and gone the next!

Once we had the 3-element up I started to check things out, set levels etc. and in doing so I started calling Jim KS7S on meteor scatter. As soon as the 1st TX sequence ended (using the WSJT software package - Ed.) and I was back in receive I heard Bruce KI7JA calling me! I immediately answered him and the pileup started! There were 3 or 4 stations at a time calling so as fast as I'd work one I had another ready to go. Looking at the log I was averaging 1 station every 5 minutes for the first hour. Not a great run-rate for SSB/CW but not too bad for meteor scatter. I quit shortly after that and Dennis took over mainly on CW for the rest of the evening.

Friday morning was again very good for meteor scatter and I added more to the log before Dennis took over on SSB and CW. Friday turned out to be our best day during the whole trip in terms of contacts. The band stayed open until well after midnight with lots of double hop to the east coast. When the band would start to dry up Dennis would switch to beacon mode and eventually someone new would call. What become abundant clear was that the majority of signals we were hearing came from stations with stacked arrays and power. And there we sat with a lowly 3-element waving in the breeze!

Saturday morning of course was the red-letter day with Mark KM0A being the first is the log on SSB. The opening was short lived into Missouri but I switched to ISCAT and worked a few in that mode with some SSB and FSK in between. Running WSJT V7 on FSK and V9 on ISCAT meant I could switch between modes quickly and that helped with the short openings. My last digital contact was with Doug VE5UF. After that I went to SSB and got ready to start the contest. Once the contest started it was tough to hold our frequency with so much activity. I had no way of knowing how great the Es openings were except by what I was working and what I heard other stations working. I ended up having to do S&P to be able to work anyone. Being called by some VE3's and some W1 and W2 stations was very cool though. Dennis took over on CW around 0045Z but found the band starting to fade for us. The weather had been deteriorating all day and according to NOAA wasn't going to get any better through the night. With the band conditions not great we decided to take a break and have supper and see how band conditions were later on. We never got the chance!

We had no sooner started to eat supper when the weather really turned on us. The anchor was holding but the seas were getting rougher and the winds were increasing badly. In fact the boat was rising and falling so much that the anchor chain would occasionally whip and jump the cogs in

the windlass. The latest NOAA weather forecast wasn't encouraging with forecasted winds gusting over 50 mph and seas running 8 to 11 feet. We decided rather quickly to, as the saying goes, get the heck out of Dodge!

Getting the anchor up and stowed took more time and effort than any of us thought it would take. After several attempts and a frustrating moment when it jumped its guide and had to be levered back into place it was finally stowed safely and we began heading for cover. By now it was 9:15 PM and too dark to find another anchorage so with the wind pushing us east we decided to head for Oxnard, CA. Finally we got behind the seawall of the Channel Island Harbor and a pilot boat came and directed us into a temporary slip for what was left of the night. It was now 4:30 AM. We over-nighted there Sunday and headed for home Monday morning. After stopping for fuel at Long Beach we finally made it back to Seal Beach around 5 PM.

Other than the weather and lack of propagation at times it was good trip and there are 300 or so folks that no longer need CM93. I've posted some pictures of the trip on Picasaweb <https://picasaweb.google.com/VE3CDX/GridCM93xwJune2011> - clicking a photo will make it bigger. Enjoy!

Very 73, Barry KS7DX, Dennis K7BV and Ken

==> CONTESTS

22 June through 5 July

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Field Day--Phone,CW,Digital, from Jun 25, 1800Z to Jun 26, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://www.arrl.org/contests>

QRP ARCI Milliwatt Field Day--Phone,CW,Digital, from Jun 25, 1800Z to Jun 26, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://www.qrparci.org/content/view/1518/118/>

NAQCC Milliwatt Sprint--CW, from Jun 22, 0030Z to Jun 22, 0230Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

SARL Top Band QSO Party--Phone,CW, from Jun 23, 0000Z to Jun 27, 0000Z. Bands (MHz): 1.8. Exchange: RS(T) and province or country. Logs due: 7 days. Rules <http://www.sarl.org.za/>

His Majesty King of Spain--Phone, from Jun 25, 1200Z to Jun 26, 1200Z. Bands (MHz): 1.8-28. Exchange: RS, serial or EA province. Logs due: Jul 15. Rules <http://www.ure.es/>

Marconi Memorial HF Contest--CW, from Jun 25, 1400Z to Jun 26, 1400Z. Bands (MHz): 1.8-28. Exchange: RST and serial number. Logs due: 30 days. Rules <http://www.arifano.it/contest_marconi.htm>

Canada Day Contest--Phone,CW, from Jul 1, 0000Z to Jul 1, 2359Z. Bands (MHz): 1.8-28, 50-144. Exchange: RS(T), Province/Territory or serial. Logs due: Jul 31. Rules <http://www.rac.ca/service/contesting>

070 Club Firecracker PSK31 Sprint--Digital, from Jul 2, 8 PM to Jul 3, 2 AM. Bands (MHz): 7. Exchange: RST and S/P/C. Logs due: Aug 2. Rules <http://www.podxs070.com/>

Venezuelan Indep Day Contest--Phone,CW, from Jul 2, 0000Z to Jul 3, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: Aug 31. Rules <http://www.radioclubvenezolano.org/concurso.htm>

DL DX RTTY Contest--Digital, from Jul 2, 1100Z to Jul 3, 1059Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Aug 10. Rules <http://www.drcg.de/>

DARC 10-Meter Digital Corona--Digital, from Jul 3, 1100Z to Jul 3, 1700Z. Bands (MHz): 28. Exchange: RST, serial. Logs due: 14 days. Rules <http://www.darc.de/ukw-funksport>

Ten-Ten Spirit of 76 QSO Party--Phone,CW,Digital, from Jul 4, 0000Z to Jul 10, 2400Z. Bands (MHz): 28. Exchange: Call, name, member number, S/P/C. Logs due: 15 days. Rules <http://www.ten-ten.org/oseason/oseason.html>

MI QRP July 4th Sprint--CW, from Jul 4, 2300Z to Jul 5, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, and QRPMI number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

VHF+ CONTESTS

ARRL Field Day--Phone,CW,Digital, from Jun 25, 1800Z to Jun 26, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://www.arrl.org/contests>

QRP ARCI Milliwatt Field Day--Phone,CW,Digital, from Jun 25, 1800Z to Jun 26, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://www.qrparci.org/content/view/1518/118/>

Canada Day Contest--Phone,CW, from Jul 1, 0000Z to Jul 1, 2359Z. Bands (MHz): 1.8-28, 50-144. Exchange: RS(T), Province/Territory or serial. Logs due: Jul 31. Rules <http://www.rac.ca/service/contesting>

MI QRP July 4th Sprint--CW, from Jul 4, 2300Z to Jul 5, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, and QRPMI number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-06-22
One day to early, but here holiday-trip until monday...
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** International Exhibition for Radio Amateurs - HAM RADIO **

24 June to 26 June 2011 - Messe Friedrichshafen (JN47)!!!
The joy of communicating with people from all over the world drew
amateur radio enthusiasts from all over Europe to HAM RADIO. For
three days, the 35th annual international amateur radio exhibition
was the center of the universe for 16,800 visitors. 185 exhibitioners
from 29 countries exhibited their products. Read more at:
http://www.hamradio-friedrichshafen.de/ham-en/index.php
Several people of the MMMonVHF Team will as well be there and ready
for your comments and critics... SOURCE: The MMMonVHF Team

** Joe, K1RQG Silent Key **

Just heard from Joe K5SO and yes we have lost one of our finest EME
people Joe K1RQG. For us that know Joe I can only say I am sorry for
the great lost 73 Joe God has taken one of the best. SOURCE: Ed WA3BZT
The Team of MMMonVHF will pass our deep sympathy and condolences
to his family. Rest in peace, Joe! SOURCE: The MMMonVHF Team

LATEST NEWS from Mike, K6MYC, dated 2011-06-21: PJ7EME IS THE 2M CALL
AND GHT EGRID IS FK88kb. I WILL BE STARTING NO LATER THATN MY MOONRISE
ON JUNE 26 AND PROBABLY RUNNING 1ST ON 144.125. WE SHOULD HAVE
INTERNET. I WILL BE RUNNING TWO 2MXP20 DUAL POLARITY YAGIS AND A NE
M2 2MHCP PREAMP. THE RIG IS A FT 857 AND WILL BE DRIVING OUR NEW 1K2
2M KW. WE HAVE ASKED FOR 500W PERMIT BUT IT HAS NOT BEEN GRANTED YET.
I TESTET THE FULL STATION OVER THE WEEKEND AND MADE 4 QSO. WITH VERY
LOW ACTIVITY. WAS HEARD BY A DL SINGLE 13 ELEMENT YAGI STATION AT
-26 AND HAD AUDIBLE SIGS FROM ALL THE 4 YAGIS STATIONS WORKED. I WILL
BE ON JULY 3 BUT THAT IS THE LAST DAY AS WE LEAVE EARLY ON JULY 4.
JIMMY (W6JKV) WILL BE ON 6M USING PJ76 WE MAY TRY SOME EME ON 6M AS
WELL BUT WILL BE CONCENTRATING ON TERRESTRIAL.

** DXpedition SOUTH SUDAN 2011 **

Welcome to SOUTHERN SUDAN 2011 DXpedition web site, where we'll give
you more information about our DXpedition. The Intrepid-DX Group and
the DX Friends have combined efforts to planning a multi-national
DXpedition to Southern Sudan to celebrate the birth of a new country.
it will take place over twenty days in july, 2011. All News:
http://www.dxfriends.com/SouthernSudan2011/
SOURCE: Info via RIO-DX-GROUP

** News From the K5N Team **

Hello to everyone....Danny-N5OMG lives in New Orleans very close to
EL58. Recently, he enlisted the aid of a boat captain that has over
50 years experience in those waters. Danny asked the captain to go
down to Burwood Island in EL58 and check it out for us. Danny wanted
an "eyes on" report so that we can decide what to do. The captain
came back and gave us the following information:
1)Most of the island where you need to be is under water,
2)The rest of the island is covered with mud(deposited by the
flooding river), and
3)The safe anchor area that we had for the boats has been washed away
The captain estimated that it would be at least 4 weeks until the
flood has gone down enough to reveal our operating spot and that even
if the operating spot was out of the water, it will still be covered
in mud. It is going to take a year or more of rains to wash the mud
off the island and reveal our operating area as a sandy beach.
These facts are not very nice. The team had a conference call and
we "cussed and discussed" the situation. Most reluctantly, we all
agreed that we will have to cancel EL58 for 2011. All of us wanted
to go to EL58-none of use wanted to cancel. However, we just cannot
cope with "under water" or "under mud" and no place to safely park
the boats. We are already planning / scheming for 2012. We are
looking at another exotic location....I am pulling for Tahiti....
others have reminded me that the South Pacific has no grids in FFMA.

** Castle of Piel, WW Loc IO64JB, on Air **

Artur M0PLK/p, Craig M6CAC/p, Jack M/SP7DPJ and Blazej (SWL) will be
active on the 24-26th June 2011 from the Castle of Piel (WCA G-00151
CASHOTA G151, WAB SD26, WW Loc IO64JB), located on Piel Island
(www.pielisland.co.uk/), Cumbria. They plan to work on 80 - 10 and
2 metres using CW/SSB and digital modes. QSL via their home callsigns
direct or bureau. SOURCE: [RN1CW] via ICPO Bulletin

** Special Call N4I from Core Banks Barrier Island qrv **

Eric W4OTN, Amanda KI4IWS, Robin WA4WPD, Bill KG4CXY (FISTS #7651), John KE4TZN and David KI4BKC will be active as N4I from Core Banks Barrier Island (IOTA NA-067, USi NC033S, WLOTA 0596), Pamlico County, North Carolina, between 29th July and the 1st of August 2011, including an entry in the RSGB IOTA Contest (30-31st July). Outside the contest they will be QRV on 80-10m CW and SSB. Operation on 6m and satellites is being planned as well. QSL W4OTN via the bureau or direct (QRZ.com). SOURCE: [rsgbiota.org] via ICPO Bulletin

---

** Activity on HF and 50 MHz from EI **

Martin G3ZAY, Dominic M0BLF and Tom M0TOC will be active as EJ/homecalls from the Aran Islands (EU-006) on 24-26 June, and from Inishbofin Island (EU-121) on 27-28 June. They will operate SSB and CW on the HF bands, but thwy will also check 6 metres.
SOURCE: 425 DX News #1050

** TY - Benin - qrv HF and 50 MHz **

A group of operators are planning to activate Grand Popo, Benin, between August 5-14th. They have the licenses in their hands and all the other permissions to enter and operate. Callsign will be TY1KS. Operators mentioned are Salvador/EA3QS, Giorgio/IZ4AKS, Fabri/ IW3SQY Francesco/IZ8GCE and Antonello/IT9YVO. Their DXpedition experiences are: 1A3A, 1A4A, 3A, 3B8, 3B9, 5R8KS, C31CT, E44M, HV5PUL, T70A, T70DXC, UK8AXA and others locations. Activity will be on all HF bands and 6 meters, using 3 three Elecraft K3s, and two Elecraft KPA500 new solid state amplifier. Due to the high demand for this country, the focus will be on the lower bands and the Digital modes, but also SSB and the higher band will be well worked especially during the TEP openings. QSL via IZ8IYX or by the OQRS (for direct/Bureau) and LoTW Their Web site is still under construction, but you can still preview it at: http://www.dxcoffee.com/ty1ks The group is looking for sponsors for this DXpedition. Details for funding this operation are available on their Web page. SOURCE: Sixitalia Weekly Info Page; June 14 - 20

** 6-11 July 2011 TF/VE2XAA By VE2XAA; 160-6m **

TF/VE2XAA will be qrv CW SSB RTTY; QRV in IARU
contest as TF4X. QSL for TF/VE2XAA via home call, TF4X via G3SWH.
SOURCE: Sergey, UT3UA via Bill/NG3G DX-News

** Howard WB4WXE return to St. Lucia / FK93 **

Howard, WB4WXE will be active as J68HS from St.Lucia (NA-108) from 25 June to 15 July. He will concentrate on 6 metres and, when that band is quiet, on 12, 17, 40 and 160 metres. QSL via homecall.

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next wednesday 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

73 de Guido "Guy" DL8EBW
on behalf of the MMMonVHF-Team

DXNL 1733 - Jun 22, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

J6 - ST LUCIA, NA-108
Howard,WB4WXE, will stay on St. Lucia (NA-108) from Jun 25 till Jul 15.
He wants to become QRV as J68HS mainly on 6m. If conditions are bad
there you can find him also on 12m, 17m, 40m or 160m. QSL via homecall.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
AH0CE (JE3NRO), KH0K (JE4SMQ), KH0UY (JO3FRH), KH0/KC2ZSG (JA3AQW),
KH0XD (JO3RKP), and WH0/WU2K (JA3TMM) will activate Saipan (OC-086)
in CW, SSB and digital modes on 80m-6m from Jun 24-26.
QSLs via JARL bureau or direct to their homecalls.

PJ2 - CURACAO, SA-099
Hawa,PJ2/DK9KX, Dieter,PJ2/DJ9ON, and Jan,PJ2/DJ8NK, will show up from
Curacao (SA-099, WLOTA LH-0942) between Jun 26 and Jul 7. Emphasis will
be put on 6m, but they will work in CW/SSB/RTTY also on other bands.
QSL cards should be sent to the appropriate homecalls.

PJ6 - SABA, NA-145
George,K5TR, Dick,K5AND, and Pat,W5OZI, will be active as PJ6D on 6m
from Saba (NA-145) from Jun 22 until Jul 6. They plan to work in CW
on 50106 kHz and in SSB on 50118 kHz.
For updates click on their website: http://dkhanson.com/pj6
QSL cards also via LoTW should be sent to K5AND.

T6 - AFGHANISTAN
Eric,K9GY, will be QRV as T6MO from Afghanistan for at least one year.
He works with a windowm antenna on 40-10m mainly during these times:
0130-0430 UTC, 0630-0830 UTC and 1130-1730 UTC.
QSL via K9GY, direct or via LoTW.

T8 - PALAU, OC-009
Taka,JF1BVG (T88ZA), Toshi,JP1IOF (T80T), and Toshi,JE1SYN (T8YN), are
going to hit the airwaves from Koror Island (OC-009) from Jun 24-27.

They plan to work with two stations in SSB, CW, FM, RTTY and PSK31 on
80m-6m. QSL cards should be sent to the appropriate homecalls.

ZD7 - ST HELENA, AF-022
Nigel,G3TXF, plans an activity from St. Helena (AF-022) signing ZD7XF
from Jun 22-30 when he is visiting Barrie, ZD7MY. A usual, Nigel works
only in CW on 160m-6m. QSLs via G3TXF, via bureau, direct or LoTW.
More information can be found on his homepage:
http://www.g3txf.com/dxtrip/ZD7XF/ZD7.html

9M8 - EAST MALAYSIA, OC-165
Some members of the "Amateur Radio Club Sarawak" are going to activate
Talang Talang Besar (Sarawak's Coastal Islands, OC-165) on Jun 25/26.
They will work as 9M8RC in CW and SSB on 80m-10m. QSL direct via 9M8MA.

GREECE, SPECIAL EVENT STATION
The "Special Olympics World Summer Games" will take place in Athens
from Jun 25 until Jul 4. The "Special Olympics" are the games for
People with intellectual disabilities. 7500 athlets from 180 countries
are expected to come to the Greek capital Athens.
SV0XAJ, SV0XAO, SV0XBA, SV0XBJ, SV2DCD, SV2GNC, SV2GWY, SV3DCX and
SV7JAR will activate the special event staion SX0A in CW, SSB and
digital modes on 160m-4m. QSLs via bureau, direct or eQSL to SV2GWY.
Moreover all Greek HAMs may use the special prefix SY2011.
More information about this and a special award can be found on their
website: http://sx0a.blogspot.com

POLAND, SPECIAL EVENT STATIONS
The European Basketball Championship of 2011 of the women, universally
referred to as EuroBasket Women 2011, will be the 33rd continental
championship taking place in Poland between Jun 18 and Jul 3.
The special event stations HF2011L (Lodz), HF2011B (Bydgoszcz) and
HF2011K (Katowice) will be QRV from the venues of this championship
from Jun 15 until Jul 15. A special award will be issued and can be
applied for with a fee of 10 EUR. The rules of the "Amateur Radio Award
EuroBasket Women 2011" can be found at: http://www.qrz.com/db/hf2011b
The QSL routes of the special event stations are listed below.

HF800Z will be on their air during the 800th anniversary of the city
of Zlotoryja until Jun 30. QSLs via bureau to SP6CES.
For more information click on: http://www.zlotoryja.pl/800-lecie

SILENT KEYS: Unfortunately Pierre,HB9QQ, passed away his key on Jun 11, at
the age of 80. Pierre was a pioneer in many fields. Other DXers who put
away their key forever were: Dennis C. Morris (K4ZJ),
Merlin D. Anderson (K8EFS), Mikhail A. Kudryashov (RA4CQ),
Sergey K. Rostenko (RJ3AR), Douglas E. Westover (W6JD),
Colin Hall (ZL3AFZ) and R.L. Pluck (ZL3PD)

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The special event station AT8VTM will be active during the "10th Inter-
national Museum Weekend 2011" from the "Visvesvaraya Industrial and
Technology Museum" in Bangalore until Jun 27.
For more information click on: http://www.vismuseum.org.in

UPCOMING CONTESTS

Jun 25/26: World Castles Weekend (see: http://www.wcagroup.org)
Jun 25/26: Ukrainian DX DIGI Contest
Jun 25/26: King of Spain Contest

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-006, EI, Arran Islands: EJ/G3ZAY, Dominic,EJ/M0BLF, and Tom,EJ/M0TOC will
be QRV from Arran in CW and SSB on all bands from Jun 24-26.
QSLs via homecalls (bureau/direct).

EU-008, GM, Inner Hebrides: A group of four is going to become active from
Islay between Jun 25 and Jul 1. They will sign GM0HIK on 50 MHz and
above on VHF up to 70cm. GM3IZD will be their callsign in HF.
QSL via G0HIK and G3IZD respectively (bureau/direct).

EU-028, I, Toscana Region group: IA5/IK2MLS will spend his holidays on the
island of Elba from Jun 26 until Jul 2 and wants to be QRV on 40m-10m.
QSL via homecall (bureau/direct).

EU-121, EI, Irish Coastal Islands: After staying on Arran EJ/G3ZAY,
EJ/M0BLF and EJ/M0TOC will be QRV also from Inishbofin on Jun 27/28.
QSL via homecall (bureau/direct).

EU-124, GW, Welsh Coastal Islands: MW0IDX/p will be QRV from Puffin mainly
in SSB on 20m only on Jun 27. He will take the kayak to the island,
so operation depends also on the weather. QSL direct or via bureau.

EU-158, SV, Peloponnisos Region group: Between Jun 25 and Jul 16 SV3/DJ5RT/p
will be active with QRP and vertical on 20m partly from Schiza Island,
but mostly from Sapientza Island. QSL direct via DJ5RT.

RAC Bulletin 2011-017E RAC Field Organization- ARES adopts Mission
and Vision statement.
2011-06-22

After many hours of discussion by the RAC Field Organization National
Secretariat, the Vice President Field Service Council and it's
Advisers a recommendation was made to our Section Managers concerning
the text of the RAC ARES Mission and Vision statements. Approval was
granted by them, and I am pleased to present the following:

RAC/ARES Mission - "The mission of the RAC/ARES is to be an
effective partner in emergency and disaster response by providing
emergency managers and responders with radio communications expertise,
capability and capacity, supplied by qualified and credentialed ARES
volunteer radio communicators."

RAC/ARES Vision - "To be valued* *for our knowledge and expertise in
radio communication by the organizations that we serve."

I believe that these statements reflect who we are and who we aspire
to be. I would like to thank each of you who gave freely of your
personal time and imagination in achieving this important milestone.

Amateur Radio Newsline(tm) Report 1767 - June 24 2011

Please note that this is an extended Newsline report running 30 minutes, 37 seconds and contains three breaks.

Amateur Radio Newsline report number 1767 with a release date of Friday, June 24 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio aids residents and firefighters as the giant Willow fire ravages parts of Arizona and New Mexico; a new ham radio emergency group emerges on Facebook, New York State enacts anti pirate radio law, ham radio does have a presence on the FCC's Technology Advisory Council after all and the ARRL holds a Riley good national convention in Plano, Texas. Find out what we mean on Amateur Radio Newsline(tm) report number 1767 coming your way right now.

**

RESCUE RADIO: HAM RADIO ASSISTANCE IN THE GIANT WILLOW WILDFIRE

The Willow fire, roaring through eastern Arizona since May 29th, burned across the state line into New Mexico last week. Norm Seeley, KI7UP, is in Scottsdale, Arizona, with what we know about ham radios contribution to the rescue and relief efforts:

--

According to a June 19th news release from Charlie Christmann, K5CEC, who is an ARRL Public Information Officer in New Mexico, evacuation orders for the town of Luna were put into effect as the fire threatened homes there. He notes that amateur radio operators are near the fire lines are providing updates to the State Emergency Operations Center via the MegaLink repeater system. MegaLink is a wide coverage intertied network of 21 repeaters owned and maintained by Paul Choc, WA5IHL.

Christmann says that the New Mexico command center is in the town of Reserve. That's about 20 miles southeast of Luna. He notes that Larry Bliemeyer, KE5VGM, the Communications Leader from Dona Ana County, Michael Scales K5SCA, his counterpart from Sandoval County and Jeff Crum, KB5SFV, who is a New Mexico Department of Homeland Security Emergency Manager are providing updates from the fire. Don Scott, N5UJT, another Department of Homeland Security Emergency Manager, is in the Santa Fe State Emergency Operations Center helping to coordinating

state resources.

Other hams are monitoring the fire information in case additional assistance is needed. These include David Thomas, KF5HSY in Sandoval County; Gary Surad, K5BIQ, in Bernalillo County, and Brad Sacca, KC5SKE, in Dona Ana County. They are backed up by numerous other radio amateurs across New Mexico who are reportedly available should additional evacuations be ordered or more communications resources be needed.

Meantime, from Tucson, Arizona, Keith Woody, WA1B, reports via QRZ.com that the fire in his area has been burning for the better part of two weeks. According to his posting there are hams monitoring the Eastern Arizona Amateur Radio Society or EAARS system nearly 24 hours a day. Messages have been passed in and out of the affected area and will likely continue for the next few weeks.

According to Woody, reports of the fire jumping roads and power outages as well as health and welfare messages have and are being passed. He notes that at the time of his posting that there were at least 3 active hams within three miles of the active fire line.

WA1B says that the command center has message forms and all contact information for radio amateurs who are available but that hams are being treated just like other folks when it comes to evacuation notices.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

With 20 to 30 mph sustained winds, gusts of 40 to 50 mph, and relative humidity in the single digits, the half-million acre fire easily jumps its containment lines. And even though some percentage of it has been contained, nobody can say for certain how big it will grow before it finally is brought under control. More on this story in future Amateur Radio Newsline reports. (K5CEC, WA1B via QRZ.com, published news reports)

**

RESCUE RADIO: NEW EMERGENCY SERVICES DX GROUP ON FACEBOOK

A new amateur radio group has been formed for hams who are also members of one of the various emergency services. Based in the United Kingdom, the group will initially be coordinated via the Facebook social networking site with membership open to retired or serving members of any of the emergency services. The group is free to join. Simply search for Emergency Services Amateur Radio DX Group on Facebook and sign up, or contact GM0GMN directly at his callbook address. (Southgate)

**

RADIO LAW FOLLOW-UP: AMATEUR RADIO REPRESENTED ON REESTABLISHED FCC TECHNICAL ADVISORY COUNCIL

A follow-up to last week's story about the re-establishment of the FCC's Technology Advisory Council for a two-year period. At that time we said we were not aware of any individual or group directly representing the interests of amateur radio that has been invited to serve on the panel. This, even though the recommendations it makes could eventually impact on the spectrum utilized by radio amateurs.

Well thanks to a note from ARRL Executive Vice President Dave Sumner, K1ZZ, we are happy to report that not only does the ARRL have a representative serving on the council, but that Greg Lapin, N9GL, is there now representing the League as he has for many years.

For those who may have missed last weeks report, the FCC's Technology Advisory Council is made up of various technical experts that help give the commission knowledge it needs to identify areas of innovation and develop policies to keep America competitive.

A complete list of those serving on the council can be found at tinyurl.com/3kl4qbc. Our thanks to K1ZZ for the list and for the information update. (K1ZZ)

**

RADIO LAW: NEW YORK STATE PASSES ANTI PIRATE RADIO LAW

The New York State legislature has passed a bill adding potential jail time to the possible penalties if someone is convicted of operating an illegal radio station. This as the legislation makes it a Class A misdemeanor to operate an unlicensed radio station in the AM and FM band anywhere in that state.

According to the text, the measure creates the crime of unauthorized radio transmission on either the AM or FM broadcast band. It also prohibits knowingly making a radio transmission on radio frequencies assigned and licensed by the Federal Communications Commission for use by AM and FM radio stations.

The measure is similar to laws in Florida and New Jersey, giving local authorities some say over what previously had been a federally preempted area of jurisdiction. While pirate radio stations have over the years been established just about anywhere, Florida, New Jersey and New York are among the states where the problem tends to be more acute.

If signed into law by Governor Andrew M. Cuomo, the new measure would take effect in 180 days. Personal two-way radio use would not be impacted by this new, New York State, anti pirate radio law. (Adapted from RW)

**

HAM RADIO NEW SPACE: ISTANBUL UNIVERSITY STUDENTS ANNOUNCE PLANS FOR NEW HAMSAT

Students at Istanbul Technical University in Turkey are working on a CubeSat ham radio satellite that will host a linear transponder for SSB and CW amateur radio communications.

Dubbed TURKSAT-3USAT the bird will carry a 50 kHz bandwidth 2 meter to 70 centimeter linear transponder, a beacon and telemetry downlink. Planners hope to launch this new bird into a Sun Synchronous orbit of around 680 kilometers sometime in early 2012.

This will be the Istanbul Technical University's first ever communication satellite. More on the project is in cyberspace at tinyurl.com/6hyxh7h. We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (Southgate)

RESCUE RADIO: METEOROLOGIST JAMES SPANN W04W CALLS FOR OVERHAUL OF NWS TORNADO WARNING SYSTEM

Veteran meteorologist James Spann, WO4W, is calling for an overhaul of the National Weather Service tornado warning system and a new commitment to broadcasters weather coverage across local regions. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

In a recent post on Birmingham, Alabama's ABC 33/40 weather blog, James Spann, WO4W, writes that tornado sirens, which have an 80 to 90 percent false alarm ratio, are outdated and overused. He says that getting these kinds of warnings over and over and over again creates an ocean of people that won't be paying attention when a real tornado emergency is in progress. He calls this a cry wolf syndrome that is very dangerous.

Spann also says local broadcast stations must commit to bringing audiences information valuable to their safety. He says that when there is a genuine tornado emergency, TV stations must have the guts to cut into regular programming and go with wall to wall weather coverage. He says that he was appalled to see a TV station in a top ten market opting to air the season finale with `Dancing With The Stars' when a tornado warning was up for the two major counties in the metro area this past spring.

James Spann has been reporting the weather for the Birmingham ABC affiliate, which is in the heart of "Tornado Alley," since 1996. He is

among the first television weather anchors to earn a Certified Broadcast Meteorologist status from the American Meteorological Society and is also one of the creators of Weatherbrains.com website which bills itself as the official netcast for people who love the weather.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles. Don.

--

James Spann is also the owner of the WO4W repeater atop Shades Mountain, Alabama, that serves the ham radio community in the greater Birmingham area. The complete article is on-line at http://tinyurl.com/5tt7hkm. One of James Spann's postings on this subject is at http://www.jamesspann.com/bmachine/post/wxtalk/3991/Scrap-Tornado-Sirens. Also see http://blog.al.com/spotnews/2011/06/james_spann_blasts_number_of_f.html for an in-depth look at this situation. (Adapted from TV Spy)

RESCUE RADIO: TOWER REPAIR MOVES WICHITA COUNTY TX. SKYWARN FREQUENCY

Wichita County, Texas, SKYWARN spotters are being asked to use a new frequency for a temporary period. Severe weather spotters using ham radio in and around Wichita Falls have normally usually used a repeater on 146.94 MHz however they are being asked to change to 147.140 until further notice.

Wichita County SKYWARN spokesperson Charlie Byers, KC5PHQ, told Texoma's Homepage.com news service that the change is expected to last until the tower on which the relay system can be repaired. Byers added that once the tower is repaired and the frequency assignment will return to normal.

Initially the repair was not expected to take this long. However weather conditions in the area including high winds have caused delays as workers are not able to climb the tower. (Homepage.com)

**

ENFORCEMENT: ADMITTED UNLICENSED FLORIDA BROADCASTER DINGED $15000 BY FCC

The FCC has slapped Fritzner Lindor of Orange Park, Florida with a $15,000 Notice of Apparent Liability for Monetary Forfeiture. This for what the FCC says was Lindor's apparent, willful and repeated violation of section 301 of the Communications Act of by operating an unlicensed radio transmitter on the frequency 94.7 MHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

In its May 16th release on the case, the FCC says that on June 8th and 9th, 2010, agents from the Enforcement Bureau's Tampa Office used direction-finding techniques to locate the source of radio frequency transmissions on the frequency 94.7 MHz to Lindor's Orange Park, Florida, residence. The agents observed an antenna mounted to a tree in Lindor's yard and traced a coaxial cable from the antenna into his home. On both days the agents determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license.

On June 10, 2010, agents inspected the unauthorized broadcast station in Lindor's residence while it was on the air. During the inspection, Lindor admitted to purchasing the transmitter and operating the station without a license. He also stated that he had been involved in broadcasting for about 19 years and knew that his actions violated the Communications Act.

Based on the evidence before it, the FCC has found that on three dates in 2010 that Fitzner Lindor apparently willfully and repeatedly violated section 301 of the Communications Ac. Also, that Lindor knew that his actions violated the Act, yet he still engaged in the conduct, thereby demonstrating a deliberate disregard for the Commission's requirements. As such, it concluded that Fitzner Lindor is apparently liable for a $15,000 forfeiture.

For the Amateur Radio Newsline, I'm Bruce Tennant. K6PZW, in Los Angeles.

--

As is normal in these cases, Lindor was given the customary 30 days to pay the forfeiture or to file an appeal. (FCC)

**

RADIO LAW: NEW BILL INTRODUCED TO CRIMINALIZE ILLEGAL STREAMING

Streaming copyright material may soon be against the law. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

A trio of Senators has introduced a measure that would make illegally streaming TV shows or movies a felony. The bi-partisan bill, designated as S. 978 was introduced by Senators Amy Klobuchar, John Cornyn and Christopher Coons. It came the same day that Sen. Patrick Leahy of Vermont re-introduced a bipartisan measure to give the government more tools to shut down Web sites that traffic in stolen intellectual property, including TV shows and movies.

It is already a felony to download or upload that content, so the bill would just extend that to streaming. This was a recommendation made by White House Intellectual Property Enforcement Coordinator Victoria Espinel. Espinel pointed out that under existing law, it is unclear that streaming copyrighted work can be subject to a felony penalties

because such penalties are predicated on the defendant either illegally reproducing or distributing the copyrighted work.

While, intuitively, streaming would seem to pretty clearly be distribution, there has been some legal question about that designation. This new law looks to clear up that point.

I'm Jim Davis, W2JKD.

--

The Obama administration has made protection, security and privacy of online content a priority given its push for universal broadband as a critical infrastructure component of the country's future. (Multichannel News)

**

RADIO LAW: TEXAS GOVERNOR VETOES TEXTING WHILE DRIVING BAN

Texas Governor Rick Perry has vetoed legislation that would have outlawed sending or reading text messages while driving. Lawmakers approved the texting ban last month, but Perry called it an "overreach" and "government effort to micromanage the behavior of adults."

Former House Speaker Tom Craddick had pushed the texting while driving ban He called it a public-safety measure. But the bill triggered more than a half-hour of debate on the House floor with opponents arguing the bill would amount to criminalizing drivers simply for receiving a text message while driving.

The Texas cities of San Antonio and El Paso already have laws forbidding texting while driving, and at least 30 other states have enacted similar statewide bans. (Texas.com)

**

HELPING HAMS: HANDI HAM CAMP - AUGUST 8 To 13

Turning to the ham radio social calendar, this years Handi Ham Camp will take place August 8th through the 13th at Camp Courage in Minnesota. And as a special incentive, those who earn their Technician Class Amateur Radio licenses at camp will be presented with brand-new Wouxun dual-band handheld radios. This, thanks to the support of a generous donor.

If you are not a Handiham member and are interested in joining the group, and attending this years Handi Ham camp, a link to request a membership application is on-line. You will find it in cyberspace at handiham.org/node/729. (Handi Hams)

**

PROMOTING HAM RADIO: HI DEF FIELD DAY VIDEO NEED

Also, if you are hearing this newscast prior to Field Day and if you own a high definition wide screen video camera, please be certain to record the festivities. This, for possible inclusion into one or more upcoming ARRL promotional and educational videos.

If you can shoot some video, please use a tripod and set your camera to record 16 by 9 wide screen at 1080i and 30 frames per second. If you get some good Field Day video please contact Allen Pitts at ARRL Headquarters by e-mail to w1agp at arrl dot org. He will get back to with instructions on how to get the video you shoot delivered to him. (ARRL, ARNewsline(tm))

**

NAMES IN THE NEWS: N4HY IN NEW DIRECTOR OF RESEARCH ROLE

Some names in the news. First up is former AMSAT North America Vice President of Engineering Bob McGwier N4HY, who has landed the role of Director of Research for the Hume Center for National Security and Technology. McGwier is well known in amateur radio circles for his numerous contributions to the amateur radio space program. The complete text of N4HY's appointment to this new position is on-line tinyurl.com/mcgwier (AMSAT)

**

NAMES IN THE NEWS: FCC CHAIRMAN SAYS ITS TIME TO WIPE THE FAIRNESS DOCTRINE OFF THE BOOKS

And according to a report in Broadcasting & Cable magazine, FCC Chairman Julius Genachowski has told Congress he supports striking the so-called Fairness Doctrine and a couple of similar laws from the Code of Federal Regulations.

The issue came up after Commissioner Robert McDowell pointed that, although the FCC ruled in 1987 that the doctrine was unconstitutional and unenforceable, it remained in the Code of Federal Regulations. This essentially means that it was still there if a future commission decided to enforce it. McDowell suggested that it was time to take it off the books, and other legislators agree.

For those to young to remember, the Fairness Doctrine required broadcast stations to air controversial issues of public importance and seek out opposing viewpoints. Also still on the books are parallel laws to the Fairness Doctrine providing for free response time for personal attacks and providing equal time for other candidates if a station endorsed someone in an editorial. The laws were repealed by the FCC in 2000. Now, FCC Chairman Genachowski wants to see all of it off the books. (RW)

WORLDBEAT: FRANCE BANS NEWSCASTS FROM PROMOTING FACEBOOK AND TWITTER

The French are at it again. In a move that will hinder news organizations ability to reach their audiences via social media, France has banned the use of the words Twitter and Facebook from radio and TV newscasts. This, unless they are directly a part of a news story.

News reports out of Europe say that broadcasting news anchors and other on-air talent are now forbidden to refer to popular social networking sites and the micro-blogging phenomenon, unless it is pivotal and relevant to a news item. As such, French radio and television stations will no longer be able to ask their audiences to follow or friend them on these services during newscasts.

Ryan Murphy, is the Digital Media Editor for the Radio and Television News Directors Association. He is quoted as saying that this controversial move is the result of a 1992 French government decree. One that states commercial enterprises should not be promoted on news programs. (excerpted from London Daily Mail)

**

WORLDBEAT: BIG CHANGES TO CB IN NEW ZEALAND

Some changes to the rules governing Citizens Band radio down-under. This with word from Zed-L-1-A-T-J that since June 2nd, New Zealand C-B operators can now use the Australian and United States style 27 MHz 40 Channel CB's as well as the New Zealand 26 MHz 40 Channel units.

Also, the New Zealand 476 to 477 MHz UHF Personal Radio Service that's known elsewhere as UHF CB has also just been updated. While existing 40 Channel 5 kHz deviation FM units are still ok to use, all future models will be 80 Channel units designed for a maximum of 2.5 kHz deviation. These new Personal Radio Service radios will have a total of 80 micro band audio deviation channels instead of the previous 40 narrowband FM ones. (ZL1TAJ)

**

WORLDBEAT: DANMARKS RADIO TO SHIFT PROGRAMMING TO LONGWAVE

Danish public-service broadcaster Danmarks Radio is shifting some of its programming from medium wave to longwave by months end. On June 16, a new 50 kW transmitter on 243 kHz was activated at the site in Denmark's western province. It will simulcast programming on the longwave channel until June 27th when it will end its medium-wave

broadcasts from the site on 1062 kHz. The existing medium-wave broadcasts use a 250 kW transmitter. Previously, Danmarks Radio used a 300 kW longwave transmitter at another site until it went QRT in February of 2007. (Danmarks Radio)

**

WORLDBEAT: FIVE PETITIONS TO STOP BUDGET CUTS TO RADIO NETHERLANDS

No fewer than five petitions against the upcoming budget cuts for Radio Netherlands Worldwide are currently making the rounds. This as announced by Iede de Vries of the Action Committee to avert the proposed financing cuts to the famed international broadcaster.

Employees of Radio Netherlands Worldwide Dutch service launched a petition several weeks ago against the management's plan to drastically reduce the station's Dutch activities in order to save 10 million euros a year. Last week a multilingual website was launched to get support from listeners and web users in other languages.

Now its become known that three more petitions have been launched. Mr. De Vries said that one is an initiative of former ambassadors of the Netherlands, while another has been launched by Dutch companies operating internationally. Both groups emphasize that Radio Netherlands Worldwide is important for the image of the Netherlands abroad.

Meantime, the Dutch Association of Journalists has also launched a petition among international news organizations. This one stresses in particular the role that Radio Netherlands Worldwide plays in promoting press freedom in the world.

The action committee is collecting the responses to the various petitions, and will hand these to the Lower House just before a vote on the cuts that was scheduled for June 27th. (Media Network)

**

HAM RADIO IN SPACE: FALCONSAT 3 CREATES OVER 200 NEW HAMS

Turning to ham radio space related news, word that the US Air Force Academy FalconSat-3 satellite, launched in 2007, has resulted in over 200 academy students becoming licensed radio amateurs.

FalconSat-3 was put into orbit on March 9, 2007 by the U.S. Air Force Academy in Colorado. It carries a 145 to 435 MHz digital store and forward transponder supporting data rates of 9k6, 38k4, or 76k8 running the pacsat file system so anyone with WiSP can copy telemetry.

Project OSCAR UK contacted Colorado Satellite to get the latest word on the satellite. They received an update below from Jim White who explained that the government band radios on Falcon-Sat-3 require a stable gravity gradient attitude to work properly. They have struggled with the attitude control since launch and it is not yet stable. Instead, the satellite is operating using its amateur band

radios and as a result a large contingent of cadets and faculty from the Air Force Academy have obtained Amateur licenses.

White says that FalconSat-3 is presently on during most day and evening passes over the Air Force Academy with a very strong downlink on UHF.

He adds that when FalconSat-5 was launched about 6 months ago and there was some thought that FalconSat-3would move to fully amateur service. However FalconSat-3 has proven to be such a useful learning tool that the decision was made to operate it along with FalconSat-5. Unlike its predecessor, FalconSat 5 carries no Amateur equipment. (Southgate)

**

DX

In DX, word that three S-V hams have announced plans for a VHF and UHF DXpedition to Crete. Using the call SY9VHF, the goal of the team from Greece is to operate from 50 through 1296 MHz plus a station on 10.368GHz. Modes will be SSB and CW. Operators so far are SV1BJY, SV8GKE and SV2HWR. Others may be added before the team takes to the air. Possible dates are June 29th to July 5th but that's not yet cast in concrete More information will follow shortly.

F4FUC will be active as J28UC from Djibouti starting in July and will continue through 2013. Operation will be on 40 through 10 meters using 100 watts into a vertical and a dipole. QSL via his home callsign.

SY2011BVM is a special event station in Greece that will be on the air through July 4th. This activity is to celebrate the Special Olympics Games in Athens. QSL via Bureau, eQSL or direct with a self addressed stamped envelope to SV7BVM.

ZR6DG and ZS6HB will be active as C92DG from the Timbavati Game Reserve in Tofo between July 14th and the 28th. Their operation will be on the High Frequency bands only. QSL via ZR6DG and look for photos of the operation to be posted on QRZ.com.

Lastly, six operators will be active from Guinea as 3XY1D between October 18th and November 1st. Operations will be on 160 through 6 meters using CW, SSB and the digital modes. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or via the bureau.

THAT FINAL ITEM: IT WAS A RILEY GOOD TIME IN PLANO

And finally this week, one could honestly say that the recent ARRL National Convention in Plano, Texas, could be billed as having been a Riley good show. Yes, we know that's kind of a play on words but we are saying because the special guest of honor was none other than retired FCC Special Counsel Riley Hollingsworth, K4ZDH. And speaking to a standing room only audience, Riley let the crowd in one some of the more fun methodology he used during his tenure as the regulatory agency's ham radio rules enforcer to quickly solve some problems before they became major headaches:

--

K4ZDH: "This is one where I learned that a wife or a girlfriend can be the most effective enforcement tool that we have and that's why I often sent tapes out to the derelicts as we called them. There was a 50 percent chance that the wife would get the mail and the tapes. And she would say ".gee, what in this package." (And he would reply) ".Nothing, it just came from the FCC." (She) "Well, what are these tapes for?" And invariably, she is going to listen to them and you can close that case out within a few weeks." (Audience laughter)

--

Riley then went on to tell of one case where his theory proved out better than expected:

--

K4ZDH: ".This happened the first year of enforcement and the first year I used to get so aggravated about what the bands sound like that it would often sour our weekend.

"So one Friday I decided to call and try to resolve something before it ruined my weekend. I just had a gut feeling that we could get it resolved over the telephone. So I called down; the wife answered and I asked for so and so the amateur operator. She said he's not there but asked what this was about. So against my better judgment I told her what was going on about the interference, and some of the language and so forth and of the complaints.

"And there was a pause that Ill never forget. And then she said: "Well he gets home around 6. And I can guarantee you that after 6:15 tonight that you will never have this problem again." (Audience laughter)

"We never heard from or about that guy (again). (More laughter)"

--

On a more serious note, K4ZDH took the time to praise two former young hams in the audience who have gone on to positions of leadership within

the ham radio community:

--

K4ZDH: "I finally have accepted that I get emotional about this topic and that's just the way it is so bear with me.

"11 year ago when I had the privilege of speaking to you at the Nutter Center in Dayton, I brought your attention to a 20 year old fellow named Brian.

"I first met Brian the year before in Albuquerque at a hamfest where he was teaching a class in (ham radio) Fox Hunting. You might notice that Fox Hunting is gaining international attention. I could tell at the time that he was a natural born teacher. I ran into him again at other places and he always impressed me.

"And at that dinner I said to take a good look at Brian and let's sincerely hope that the future of amateur radio is in the hands of people like Brian. If so, there's no doubt that Brian will do a better job of looking after our spectrum than we did. And I said to Brian, that when you are up on this stage 15 years from now that I hope that it isn't necessary, even one time, to use the term enforcement.

"And that same year an 11 year old girl named Andrea obtained an Amateur Radio License. And in the years after that I would often see her at ham (radio) events talking to youth groups and later becoming a contributing editor to QST magazine.

"In both these people I could see an enthusiasm for radio. And in the years afterward many times I privately hoped that they could become the future of amateur radio, but given the state of amateur radio at the time, it was a very far fetched wish.

"Well, we see that Brian Mileshosky is a League Director now for the Rocky Mountain Division and working for the Sandia National Labs.

"And we see that Andrea Hartlage is a Vice Director for the South-Eastern Division and that she is studying aerospace engineering at Georgia Tech. And if I embarrassed you its your own fault for being beautiful and smart. I can't control that" (Applause)

--

Riley spoke and took questions from the audience for the better part of an hour. And what we saw and heard in Plano, Texas was really a new Riiley Hollingsworth. He was no longer just the man from the FCC reporting on the state of Part 97 rules enforcement. Rather he was there as one of us, to share his personal feelings about his love of amateur radio. The crowd truly treasured every word. And to be honest, so did we. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award closes at midnight on June 30th. As this newscast goes to air that's less than a week away.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations to be postmarked is midnight your local time on June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. Again, the nominating form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks in warm and rainey Southern Mississippi, saying 73 and we thank you for listening.

==> + PUBLIC SERVICE: NORTH DAKOTA HAMS BRACE FOR FLOODING RIVER

As the Mouse River -- or Souris River -- rises, residents in Minot,
North Dakota, are under orders to immediately evacuate their homes. The
river -- which originates south of Regina, Saskatchewan, flows through
North Dakota and then heads north where it terminates in Manitoba --
has already started to flow into the streets of Minot. "We have
activated the North Dakota ARES® and RACES groups for support as of
today, June 22 at 12 noon (CDT)," said North Dakota Section Manager
Lynn Nelson, W0ND. "The mandatory evacuation is immediate and some
11,000 homeowners are told to leave now! The Mouse River is overflowing
the dikes and officials are planning on blowing the sirens shortly."
Read more here
<http://www.arrl.org/news/north-dakota-hams-brace-for-flooding-river>.

==> PUBLIC SERVICE: AMATEUR RADIO OPERATORS PROVIDE SUPPORT FOR
ARIZONA/NEW MEXICO WILDFIRES

The Wallow Fire, which began in Eastern Arizona on May 29, burned
across the state line into New Mexico on June 11. On Sunday, high winds
and low humidity helped the half-million acre fire to easily jump its
containment lines. According to Charlie Christmann, K5CEC, New Mexico
Amateur Radio operators are near the fire lines, providing updates to
the State Emergency Operations Center via the MegaLink repeater system.

<http://www.arrl.org/news/amateur-radio-operators-provide-support-for-arizona
-new-mexico-wildfires>.

==> + PUBLIC SERVICE: NEBRASKA HAMS NEEDED TO PROVIDE ACCESS TO 911
SERVICES

When 23,000 people in Lincoln, Nebraska lost their digital phone
service on the morning of June 22, local Amateur Radio operators were
called in to help provide local residents with a connection to the 911
dispatchers. According to ARRL Nebraska Section Manager Art Zygielbaum,
K0AIZ, those trying to call 911 via the digital phone system to report
emergencies were met with a recording that said "Due to network
difficulties, your call cannot go through."

"Lancaster County [Nebraska] Emergency Manager Doug Ahlberg
activated ARES® because Time Warner Cable lost a significant portion of
its digital phone service," Zygielbaum explained. "More than 30 ARES®
members were deployed along major roads throughout Lincoln and at major
intersections to help people who might need emergency services. The
outage lasted close to 12 hours." According to the Lincoln Journal Star
<http://journalstar.com/news/local/article_60e55f58-1f04-564b-acca-83fa8f4c56
63.html>,
the digital phone service was working early Wednesday evening on a
"rolling restoration" of 911 service. Time Warner said earlier its
10-digit calling issues were fixed.

This is the second time in 16 months
<http://www.arrl.org/news/telephone-outage-in-nebraska-no-april-fool-s-joke>

that radio amateurs have been asked to provide support due to 911 service disruptions in Nebraska. In April 2010, almost 40,000 people -- including Lincoln's government, business and emergency centers -- found out that they had no landline telephone service, as well as spotty cell phone coverage, thanks to an equipment malfunction at a Lincoln switching facility owned by Windstream Communications. According to news reports, residents of 12 counties were unable to contact 911 and dispatch centers used local radio amateurs to help provide communications support.

==> + PUBLIC SERVICE: ARRL, NATIONAL WEATHER SERVICE UPDATE MEMORANDUM OF UNDERSTANDING

The National Weather Service (NWS) has updated its Memorandum of Understanding (MoU) with the ARRL. The updated MoU serves "as a framework within which volunteers of the ARRL may coordinate their services, facilities and equipment with the NWS in support of nationwide, state and local early weather warning and emergency communications function." In May, ARRL President Kay Craigie, N3KN, signed on behalf of the ARRL, and in June, NWS Office of Climate, Water and Weather Services' Director Dave Caldwell signed on behalf of the NWS. The ARRL and the NWS have had a formal working arrangement since 1986. Read more here <http://www.arrl.org/news/arrl-national-weather-service-update-em-memorandum-of-understanding-em>.

==> ARRL FIELD DAY: W1AW ANNOUNCES 2011 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 25-26 -- are eligible to receive 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH on the West Coast) according to the schedule below. You must include an accurate copy of the message in your Field Day submission. The Field Day bulletin must be copied via Amateur Radio; it will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites. Read more here <http://www.arrl.org/news/w1aw-announces-2011-field-day-bulletin-schedule>.

==> ARRL FIELD DAY: GET ACTIVE ON SOCIAL MEDIA FOR ARRL FIELD DAY

The ARRL is encouraging hams to use social media sites, such as Facebook and Twitter, to promote their Field Day activities. ARRL Field Day begins at 1800 UTC on Saturday, June 25 and ARRL Media and Public Relations Manager Allen Pitts, W1AGP, would like hams to use Twitter to send a tweet announcing their Field Day activities two hours before the event begins: "We would like everyone to get on Twitter at 1600 UTC and send 'Meet me at Field Day at [your location] #ARRL #hamradio.' You can also re-tweet the messages of others. As Field Day progresses, continue to tweet, post status updates on Facebook and add pictures of your Field Day activities." You can follow the ARRL's Field Day activities on Facebook and Twitter. W1AW Station Manager Joe Carcia, NJ1Q, will be posting updates from W1AW on the ARRL's Facebook page

<http://www.facebook.com/ARRL.org> and on the W1AW Twitter account <http://twitter.com/w1aw>. You can also follow along on the ARRL's youth Twitter account <http://twitter.com/ARRL_Youth> and its Public Relations Twitter account <http://twitter.com/ARRL_PR>.

==> ARRL FIELD DAY: INTERNATIONAL SPACE STATION COULD BE ACTIVE FOR ARRL FIELD DAY

According to NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, the crew on board the International Space Station (ISS) could very well be on the air for ARRL Field Day, June 25-26. "The ISS will be supporting ARRL Field Day as long as mission events permit," Ransom told the ARRL. "The crew will activate one of the automatic modes (crossband or packet digipeater) to allow ground stations to use the ISS as a relay." Ransom said that the crew may also be available to support direct contacts: "The crew could operate either or both call signs -- RS0ISS and NA1SS -- and would send '2 Alpha DX.' Listen for them on the downlinks of 145.80 and/or 437.55 MHz." Read more here <http://www.arrl.org/news/field-day-from-space-international-space-station-could-be-active-for-arrl-field-day>.

==> + AMATEUR RADIO IN SPACE: NASA ASTRONAUTS AND ASTRONAUT CANDIDATES EARN AMATEUR RADIO LICENSES

Every few years, NASA selects women and men to join its astronaut training program. Out of the hundreds who apply, only a select few are chosen to become Astronaut Candidates. Their training runs for at least two years, and when it is over, the Astronaut Candidates become full-fledged astronauts and are assigned to upcoming missions. Part of the training is an optional Amateur Radio licensing class. Once licensed and in space, these astronauts can use Amateur Radio to communicate with people here on Earth.

According to ARRL ARISS Program Manager Rosalie White, K1STO, the latest cycle of classes is almost over. "During the week of June 6-12, Nick Lance, KC5KBO, presented a series of Amateur Radio license class lessons to seven NASA Astronaut Candidates who elected to take part in future ARISS educational activities," she said. "Following the classes, Nick conducted a license exam session on June 13 for those Astronaut Candidates who felt they were ready. On June 17, the FCC issued Technician class call signs to three Astronauts: Takuya Onishi, KF5LKS, Gregory Wiseman, KF5LKT, and Jeremy Hansen, KF5LKU. More Astronaut Candidates have expressed a desire to take the exam in the near future."

White said that on June 9, Astronaut Michael Hopkins, who studied on his own, passed his Technician exam as well. The FCC issued his new call sign, KF5LJG, on June 14. His future NASA assignment is Expedition 37 in 2013 on the International Space Station. Additionally, Astronaut Kjell Lindgren, KO5MOS, upgraded from the Technician to General.

"The ARISS Team is thrilled to see such great interest on the part of the Astronauts and Astronaut Candidates who are looking forward to supporting Amateur Radio educational activities through the ARISS platform, White said. Kudos to the ARISS Houston contingent who continues to help increase the number of astronauts who are Amateur Radio operators!"

==> ARRL HOSTS RFI WORKSHOP FOR UTILITY COMPANIES

On June 16-17, the ARRL hosted an RFI workshop for utility company employees. Led by Mike Martin, K3RFI, owner of RFI Services, the workshop was geared for those technicians, linemen and engineers who are responsible for solving RFI and TVI problems. Four participants from around the country made their way to Newington to take part in classroom and field instruction to learn how to best locate and solve these interference problems. Read more here <http://www.arrl.org/news/arrl-hosts-rfi-workshop-for-utility-companies>.

==> + AT THE WORKBENCH: HOMEBREW CHALLENGE REMINDER

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members. Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more.

For 2011, the ARRL has issued a challenge <http://www.arrl.org/homebrew-challenge> to build a transceiver in celebration of the (slow) return of sunspots. This challenge will be in two parts and hams can enter either or both options:

- Option 1: A single band 25 W SSB and CW transceiver for 10 or 6 meters, with a prize of $200.
- Option 2: A 25 W SSB and CW transceiver that can be switched between 10 and 6 meters, using one or two switches, with a prize of $300.

Instead of challenging entrants to make the transceiver at the lowest cost, the ARRL will instead challenge builders to provide the highest quality, best performance and most features within the cost target of $150 for Option 1 and $200 for Option 2. In addition to the cash prize, the winners of these challenges will have articles describing their designs in QST and will receive the usual page rate for the published articles. Additional entrants who meet the minimum requirements -- and have interesting design features -- may also be considered for QST or ARRL Web articles.

Entries for either option must be received at ARRL Headquarters no later than November 1, 2011. To be considered, each entrant must submit a working transceiver that is suitable for testing in the ARRL Lab and

for on-the-air judging by the ARRL staff judges. Documentation required includes a priced parts list indicating the source and purchase price of each part, an article draft including a design description, construction hints, alignment instruction, block diagrams and schematic diagrams. Photographs may be provided, but final magazine photos will be taken by ARRL staff.

For more information, including specific requirements and evaluation criteria, please visit the ARRL Homebrew Challenge web page <http://www.arrl.org/homebrew-challenge>.

==> QEX -- THE JULY/AUGUST 2011 ISSUE

The July/August issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/em-qex-em-the-july-august-2011-issue>.

==> ARRL SURVEY UNDERWAY

The ARRL has asked an independent research company specializing in survey research to conduct a survey of Amateur Radio operators. Readex Research <http://www.readexresearch.com/> -- headquartered in Stillwater, Minnesota -- has conducted similar studies for ARRL in the past, including QST readership studies and large national surveys. This most recent survey is being conducted by mail and e-mail, and includes representative populations of Amateur Radio operators from among US and international ARRL members, as well as non-member FCC licensees. While not every member will receive a survey, participation from those individuals who are selected is critical for the success of this project. Responses will be kept confidential and only used in tabulation with others; no data about survey participants -- including contact information -- will be shared with anyone. Please contact ARRL <http://www.arrl.org/contact-arrl> if you have any questions about the survey.

==> SUPPORT ARRL: ARRL AND COMBINED FEDERAL CAMPAIGN MARK DECADE OF PARTNERSHIP

For the past 10 years, the US Office of Personnel Management has designated the ARRL to participate in the 2010 Combined Federal Campaign (CFC <http://www.opm.gov/cfc/>). In that time, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated more than $170,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's

effort to represent its members and all radio amateurs.

Similar to the United Way, the CFC encourages individuals to pledge by payroll deduction to non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching ARRL's ability to serve its members and all of Amateur Radio. Those wishing to select the ARRL to receive all or part of their payroll deductions should designate organization 10099 when completing their CFC donor forms. Donations to ARRL can be designated for Diamond Club contributions, the ARRL Spectrum Defense Fund or the ARRL Education & Technology Program. Donors may also make unrestricted contributions to the League.

One important note: Since the CFC does not provide the ARRL with the names of individual donors, the ARRL Development Office would appreciate a copy of the donor form to ensure that each contribution is applied according to the donor's wishes and the contribution or pledge can be properly acknowledged.

==> SOLAR UPDATE

Tad "You make the Sun shine brighter than Doris Day <http://www.youtube.com/watch?v=pIgZ7gMze7A>" Cook, K7RA, reports: Over the past week -- June 16-22 -- the average daily sunspot number rose nearly 20 points to 55, while the average daily solar flux readings increased by nearly 9 points to 98.6. All geomagnetic indices declined slightly. For the past month, we've been looking nervously toward ARRL Field Day <http://www.arrl.org/fieldday> because a forecast from NOAA and USAF showed possibly unsettled geomagnetic conditions on Friday, June 24, and continuing through Field Day weekend. The forecast has evolved from troubling to frightening and back again. Early in June, the predicted planetary A index for June 24-26 was 18, 18 and 15. Then on June 7, it changed to 15, 15 and 10 -- a little better. Then a week later, things looked even more promising on June 14 at 15, 10 and 5. But on June 17, it was revised upward to 30, 15 and 5; a planetary A index of 30 indicates a geomagnetic storm. The next day on June 18, the forecast shifted to 25, 18 and 8, and on June 19 it changed again to 25, 18 and 10. June 20 saw a slight change to 25, 18 and 8 again, then on June 21, it shifted to 15, 40 and 25. An A index of 40 on the first day of Field Day sounds ominous. Then June 22 it changed again to 30, 10 and 10. Basically we would love to see the A index as low as possible, 5 or less would be wonderful. The latest news is that the solar wind from a coronal mass ejection (CME) occurring on the solstice is moving slower than originally thought, which means a weaker effect here on Earth. A planetary K index of 5 is expected when the storm arrives, now predicted at 0700 UTC on June 24, which is 35 hours before the start of Field Day, 1800 UTC on June 25. At 0640 UTC on June 23, the Australian IPS Radio and Space Services released a bulletin stating

that increased geomagnetic activity is expected on Jun4 23-24, due to the CME, but that the effect on June 23 is expected to be mild, with a small chance of isolated storm periods. Geophysical Institute Prague predicts active conditions June 24, unsettled to active on June 25, quiet to unsettled June 26-27 and quiet on June 28-30. The last forecast before Field Day <http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html> should be on Friday, June 24, released after 2100 UTC. The most recent forecast from USAF and NOAA has solar flux at 95 on June 23-25, 90 on June 26-30, 95 on July 1-2 and 93 on July 3. The predicted planetary A index for June 23-26 is 18, 30, 20, and 10, on June 27-28 is 8 and 5 on Jun 29 through July 1. Look for more information on the ARRL website on Friday, June 24. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Wham!'s Wake Me Up Before You Go-Go <http://en.wikipedia.org/wiki/Wake_Me_Up_Before_You_Go-Go>.

==> + HAM RADIO IN HOLLYWOOD: HOLLYWOOD TAKES LIBERTIES WITH AMATEUR RADIO IN NEW COMEDY

In Mr Popper's Penguins <http://www.popperspenguins.com/main.html> -- one of the newest films out this summer -- young Tommy Popper communicates with his father using what many reviews are calling ham radio. But while the Poppers are using a radio tuned to 21.2460 (15 meters SSB), this frequency was not available to US hams as a phone frequency in the 1976-78 time period, as shown in the movie. Neither do the Poppers use call signs. Instead, they use handles: Young Tommy is "Tippy Toe" and Mr Popper is "Bald Eagle." Mr Popper -- who, in one transmission, is in Marrakesh -- calls his son in New York City. There is no interference or static on the frequency; it seems they are the only ones on the band. While it is exciting to see Amateur Radio on the big screen, movies such as Frequency <http://www.imdb.com/title/tt0186151/> and Contact <http://www.imdb.com/title/tt0118884/>, and television shows such as Jericho <http://www.imdb.com/title/tt0805663/> and The Simpsons <http://www.imdb.com/title/tt0096697/> have presented Amateur Radio more accurately.

==> INTERNATIONAL NEWS: ARRL TO ATTEND HAM RADIO 2011 -- EUROPE'S LARGEST AMATEUR RADIO CONVENTION

Each year, ARRL sends a contingent of representatives to attend the largest Amateur Radio convention in Europe. Held in Friedrichshafen on the northern side of Lake Constance in Southern Germany, Ham Radio 2011 <http://www.hamradio-friedrichshafen.de/ham-en/index.php> will take place June 24-26. This is the 36th international Amateur Radio exhibition and the 62nd Lake Constance Convention of Radio Amateurs, sponsored by the Deutscher Amateur Radio Club (DARC <http://www.darc.de/>), which gave rise to the fair. The convention program includes 40 lectures, international and national meetings and

large stage presentations. A Ham Rally and youth tent camp will be centerpieces of activity for young radio amateurs attending the event.

ARRL Chief Technology Officer Brennan Price, N4QX, International Affairs Vice President Jay Bellows, K0QB, and Membership and Volunteer Programs Manager Dave Patton, NN1N, will represent the ARRL at Ham Radio 2011. Along with greeting international ARRL members and networking with other IARU Member-Societies, volunteers at the ARRL booth will receive applications and endorsements for ARRL awards, including the popular DXCC program. The ARRL -- as International Secretariat for the International Amateur Radio Union (IARU) -- will also host a meeting area for IARU officials and friends at the convention. IARU President Tim Ellam, VE6SH, IARU Secretary Rod Stafford, W6ROD and IARU President Emeritus Larry Price, W4RA, will represent that organization.

Last year's event drew 17,000 visitors, with 187 exhibitors from 32 nations. Photos from Ham Radio 2010 are posted on the ARRL Facebook page <http://www.facebook.com/media/set/?set=a.403183867407.181090.20069212407&l=b1f15840cd>.

==> + ARRL TO CLOSE IN OBSERVANCE OF FOURTH OF JULY

ARRL Headquarters will be closed in observance of Independence Day on Monday, July 4. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. League Headquarters will reopen Tuesday, July 5 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THERE'S STILL TIME TO ENTER THE 2011 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2012 ARRL Calendar.

- Deadline: Photos must be received at ARRL HQ by June 30, 2011.
- Subject: Must be directly related to Amateur Radio, and be in good taste. Extra points will be awarded for photos showing folks having fun with Amateur Radio. Photos will be judged on overall quality and composition.
- Requirements: Digital images or color prints accepted. A digital image printed on photo paper, however, doesn't work as well as a high-resolution file attachment. Digital images should be high resolution. A digital image up to 8 MB in size can be e-mailed to upfront@arrl.org, subject line "2011 Photo Contest." An image may also be burned to a CD and mailed to ARRL Photo Contest, 225 Main St, Newington, CT 06111. All entries must include caption information

describing where the photo was taken, along with a description of the subject of the photo, as well as the names and call signs of any persons shown. If you entered last year's contest, please do not resend the same photo for this year's contest. One entry per person.
- Miscellaneous: The decisions of the judges -- composed of QST editorial and production staff -- are final.

==> THIS WEEK ON THE RADIO

This week:

- June 24 -- NCCC Sprint Ladder
- June 25 -- VK/Trans-Tasman 160 Meter Contest (Phone)
- June 25-26 -- ARRL Field Day <http://www.arrl.org/fieldday>; Ukrainian DX DIGI Contest; His Majesty King of Spain Contest (SSB); Marconi Memorial HF Contest; ARCI Milliwatt Field Day

Next week:

- July 1 -- RAC Canada Day Contest
- July 2-3 -- Venezuelan Independence Day Contest; DL-DX RTTY Contest; PODXS 070 Club 40 Meter Firecracker Sprint (local time)
- July 3 -- DARC 10 Meter Digital Contest
- July 4-5 -- Michigan QRP July 4th CW Sprint
- July 4-10 -- 10-10 International Spirit of 76 QSO Party
- July 5 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 2 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecracker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma
- August 5 -- ARRL Midwest Division Convention <http://www.arrl.org/hamfests/midwest-division-convention>, Cedar Rapids, Iowa
- August 5-6 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-1>,

Austin, Texas
- August 5-7 -- ARRL Rocky Mountain Division Convention

GB2RS NEWS

Sunday 26th June 2011

The news headlines:

* Foundation Syllabus changes on 1 July

* AMSAT-UK at the UK Space Conference

* Distance learning advanced exam

The syllabus of the Foundation examination changes on 1 July. A new question on etiquette and dealing with abuse will be added, making 26 questions in total, with a pass mark of 19. Details were posted last year on the RCF examinations website, www.commsfoundation.org/rce.

AMSAT-UK will have a presence at the first-ever UK Space Conference being organised by the UK Space Agency. It takes place at the University of Warwick on 4 and 5 July. AMSAT-UK has been sponsored to have a small stand in the exhibition area and will be among some very illustrious company. The stand will be displaying FUNcube models and demonstrating the educational outreach possibilities. AMSAT-UK will be presenting short papers in the educational and CubeSat streams during the event. Further details of the event are at tinyurl.com/UKSpace2011.

Following the successful conclusion of their distance learning course with the Advanced exam, the Bath Radio Classes are planning to do it all over again. There have been a number of enquiries already, so the next virtual course will start in the week beginning 18 July. The aim is that students will sit the exam on Monday 5 December, either in Bath or at their local exam centre. There are no fees for the classes but students will need a copy of the RSGB Advance! textbook and will, of course, need to pay the exam fee of £37.50. Each week, students will receive guided reading instructions and revision questions to test recollection and/or understanding. Tutors will mark e-mailed answers and will provide worked answers in return. Tutors will also provide points of clarification on request. The material is supplemented by additional exercises and video demonstrations on YouTube. Further details can be had from Steve Hartley, G0FUW, who is QTHR, listed on QRZ.com and can be emailed via G0FUW@tiscali.co.uk. Steve would also like to hear from anyone that would be interested in becoming a remote tutor as he is trying to build up a network of mentors that can help share the workload, which is moderate. However, more hands will make light work and add some resilience into the system.

Edward Rippon, M0EPR is interested in starting up the Nottingham RAYNET group again. The group will be primarily for emergency communications. There will be training events taking place around Nottingham, providing communications for local authorities and for local events, horse trails, fun runs and the Santa train. The group will also promote amateur radio within the community. If you are interested, please contact Edward Rippon on 0797 449 1299 or email m0epr.sarc@yahoo.com. And now for the details of rallies and events for the coming week

Today, 26 June, the West of England Radio Rally will be held in the Cheese & Grain, Bridge Street, Frome, Somerset BA11 1BE. There will trade stands and an RSGB bookstall. Contact Shaun, G8VPG, on 01225 873 098.

The Bangor and District ARS rally is to be held on Saturday 2 July in Donaghadee Community Centre. Starting at 12 noon, admission is £2 and there are plenty of attractions including special interest groups, Bring and Buy and a good selection of radio and computer traders. Ian White, GM3SEK, of RadCom fame, is giving a presentation on Ferrite Cores and Baluns. More information, and a map, is available at www.bdars.com.

The 2nd Stockport Rally will take place on Saturday 2 July at Walthew House, Shaw Heath, Stockport SK2 6QS. Doors open at 10am, admission will be £1 and there will be trade stands as well as catering available. Details from Bernard, G3SHF, on 01625 850088, daytime & weekends.

The Barford Norfolk Radio Rally will be held on Sunday 3 July at Barford Village Hall & Green, Barford, Norwich NR9 4AB. It's 9 miles south west of Norwich, close to the A11 and A47. Doors open at 9am and admission is £1.50, with children admitted free. There will be trade stands and a Bring & Buy.

Now for the news of special events

Central Lancs ARC will be activating Hoghton Tower today, 26 June. This stately home, located in Preston, Lancashire, has been the ancestral home of the De Hoghton family since William the Conqueror. For more details go to www.cashota.co.uk.

Eden Valley Radio Society will be operating as GB2SAS from the Solway Aviation Society museum open day at Carlisle airport on Saturday 2 July. This year marks the 50th anniversary of the Solway Aviation Society and the 50th birthday of the museums' Vulcan bomber.

And now the HF DX news compiled from 425 DX News and other sources

Preston ARS is planning to run an IOTA station from St Kilda island on 28 to 30 June. This all depends on sea conditions as they will be travelling by their own boats. The callsign they plan to use is GS4SK. Further information will be available on QRZ.com.

A large team of operators will be active as BY1RX/4 from Furong Island, which is IOTA reference AS-160, from 2 to 9 July. They will operate CW, SSB and RTTY from four stations on 160 to 6m. QSL via BA4TB. More information at www.qrz.cn/as160.

PY2FN will be operational as PY0FO from Fernando de Noronha between 2 and 9 July. Activity will be on 160 to 6m, CW only. Logs will be uploaded to Logbook of the World. QSL via his home callsign, direct or via the bureau.

Paul, 2E1EUB will be active as 2M1EUB/P from the Isle of Harris and Lewis, Western Scotland on the AMSAT Oscar 7 satellite and others that may be in view from 2 July for 14 days. Check out qrz.com for more details. Now the contest news

The fourth 70MHz Cumulative contest takes place today, 26 June from 1400 to 1600UTC. The exchange is signal report, serial number and locator.

On 28 June there is the 50MHz UK Activity Contest from 1900 to 2130UTC, on all modes. Signal report, serial number and locator form the exchange.

Also on 28 June is the SHF UK Activity Contest from 1900 to 2130UTC. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

The real action on VHF begins with VHF NFD on 2nd and 3rd July. Apart from the various sections for portable stations of differing powers and complexities, as of 2009 there is also the Sweepers section. This was introduced to encourage fixed stations to work the portables and expanded in 2010. As a non- participating fixed station there's no reason why you shouldn't call CQ while the contest is in progress, because there will be a whole band of people looking for QSOs, especially during the quieter hours. The third 2m Backpackers runs for the last three hours of VHF NFD and continues for an hour after it ends.

And now the solar factual data for the period from the 13th to the 19th of June, compiled by Neil Clarke, G0CAS on the 20th of June.

First this week in the solar news are the latest smoothed monthly sunspot numbers, which for September, October and November are 19.6, 23.2 and 26.5 respectively. Recent media reports of studies released in the United States have suggested that the solar cycle may have gone into hibernation and that cycle 24, currently under way, may prove to be the last normal one for some time. These projections should not be taken as conclusive, but if they prove correct they point to dismal prospects for HF operators later this decade. Perhaps the best conclusion for the time being is that we would be wise to make the most of cycle 24 as it moves towards maximum in a couple of years time.

The solar disc had several sunspot groups visible every day. Solar activity was very low on the 18th and increased to moderate on the 14th

when a M1 class solar flare took place. On the remaining days activity was low when C class occurred. Solar flux levels initially increased from 87 units on the 13th to 104 by the 17th, but as the two largest sunspot groups decayed flux levels declined back to 99 units by the 19th and the 20th. The average was 99 units. The 90 day solar flux average on the 19th was 104, that's one unit up on last week. X-ray flux levels varied little day to day and averaged B2.5 units. Geomagnetic activity was mostly quiet but on the 17th increased to unsettled levels with an Ap index of 11 units. The cause of this was a glancing blow from a coronal mass ejection from the M1 flare on the 14th. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 580 kilometres per second on the 14th to 380 by the 19th. Particle densities were low throughout. Bz varied no more than minus 8 and plus 7 nanoTeslas for the period. Sporadic-E occurred on most days, notably the 17th when there was a strong 50MHz opening to the south-east United States and the Caribbean. There was a smaller opening to the north-east US and Newfoundland on the 18th. Two metres opened to Portugal, Morocco and the Canary Islands on the evening of the 17th.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be rotating out of sight. Solar activity at best is expected to be at low levels but on some days may decline to very low levels. Solar flux levels should decline and be around the 90 mark by next weekend. However as previously stated, it would only take one large active sunspot group to change all that. Geomagnetic activity could be slightly unsettled today due to the effects of a coronal hole. If not, then activity should be quiet every day unless an Earth directed coronal mass ejection takes place. MUFs during daylight hours at equal latitudes should be 21MHz for the south and 18MHz for the north. Darkness hour lows are expected to be around 13MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate should be about 15MHz. The best time to try this path will be between 0700 and 1000 hours. Also, during the late evening the long path good be open with slightly higher MUFs.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 26 June Hucknall Rolls Royce Amateur Radio Club is hosting a classic car show. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Monday 27 June Gloucester Amateur Radio & Electronics Society is holding an informal meeting. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 27 June South Birmingham Radio Society is checking rigs and aerials for field day. Contact Don, on 0121 458 1603.

On Monday 27 June South Normanton Alfreton & District Amateur Radio Club is having a mobile fox hunt. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 27 June Stratford Upon Avon District Radio Society is holding a 2m fox hunt, starting at the Home Guard Club. Contact G0CHO, on 01608 664488.

On Tuesday 28 June Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 28 June Loughborough & District Amateur Radio Club has an open forum on the use of aerial analysers. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 28 June Mid-Warwickshire Amateur Radio Society is having a picnic from 11am at Bidford-on- Avon. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 28 June Worcester Radio Amateurs Association is performing maintenance on the shack antennas. For more information email Rich Moles, 2E0MOL, via secretary@m0zoo.co.uk.

On Wednesday 29 June Lincoln Short-Wave Club is having a talk on the work of the RAIBC. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 29 June Midland Amateur Radio Society is planning for field day, holding training classes and a debrief of the weekend's 80th birthday celebrations. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 29 June South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 29 June Telford & District Amateur Radio Society is having a 2m DF and BBQ at the LWVH field. Contact Mike, G3JKX, on 01952 299 677. On Thursday 30 June Salop Amateur Radio Society is having a fox hunt. Details on the club website at www.salop-ars.org.uk.

On Thursday 30 June South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 1 July Coventry Amateur Radio Society is having a talk on the Projected Picture Trust. Contact John, G8SEQ, on 07958 777363.

On Friday 1 July Lincoln Short-Wave Club commences its weekend event for VHF National Field Day. More information from Pam Rose, G4STO, on 01427 788356.

On Friday 1 July South Birmingham Radio Society is loading its trailer for VHF NFD. Contact Don, on 0121 458 1603.

On Saturday 2 July Hucknall Rolls Royce Amateur Radio Club commences its weekend VHF NFD operation at Crich in Derbyshire. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Saturday 2 July South Birmingham Radio Society begins its weekend event for VHF NFD on site at Waysley Hills. Contact Don, on 0121 458 1603.

On Saturday 2 July Telford & District Amateur Radio Society starts its weekend event for VHF NFD at Long Mynd. All are welcome. Contact Mike, G3JKX, on 01952 299 677.

On Sunday 3 July Coventry Amateur Radio Society is running GB4BLC at the 30th Signal Regiment open day at Gamecock Barracks, Bramcote, Warwickshire. Contact John, G8SEQ, on 07958 777363.

NEWS FOR THE NORTH OF ENGLAND On Monday 27 June Angel of the North Amateur Radio Club is having a talk on operating procedure and best practice by Nancy Bone. All are welcome. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 27 June Bolton Wireless Club is holding a 2m direction finding field event, starting from the Britannia Hotel. For details, send an email to boltonwireless@gmail.com.

On Monday 27 June Sheffield Amateur Radio Club is making final preparations for VHF NFD. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 27 June South Manchester Radio and Computer Club is having a technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 27 June Thornton Cleveleys Amateur Radio Society is discussing VHF Field Day. Details on the web at www.tcars.org.uk.

On Tuesday 28 June Halifax & District Amateur Radio Society is meeting at the Church of the Good Shepherd at Mytholmroyd. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 29 June Hornsea Amateur Radio Club is holding its 3rd fox hunt. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 30 June Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 0787 608 5631. On Thursday 30 June South Manchester Radio and Computer Club is having talks on the PICaxe PIC & PIC Basic. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 1 July East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 2 July Sheffield Amateur Radio Club commences its weekend event for the VHF NFD Contest as G2AS/P at Wharncliffe. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

NEWS FOR NORTHERN IRELAND On Saturday 2 July Bangor & District Amateur Radio Club is holding a review of its 2010 rally. Contact Mike, GI4XSF, on 028 4277 2383.

NEWS FOR SCOTLAND On Tuesday 28 June Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 28 June Livingston & District Amateur Radio Society has Morse code practice. Details from Norman, on 07740 946192.

On Wednesday 29 June Ayr Amateur Radio Group is having a presentation about Bletchley Park, then starts its summer recess. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 29 June West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Friday 1 July Moray Firth Amateur Radio Society is having a talk by Practical Wireless editor Rob Mannion. There is an admission charge of
£5 which will include refreshments. Talk-in will be provided through GB3SS. More information from Barry, GM4TOE, by email to gm4toe@btconnect.com.

On Saturday 2 July Cockenzie & Port Seton Amateur Radio Club commences its weekend event for VHF Field Day. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 26 June Coalhouse Fort Amateur Radio Society is holding an open day. Contact John Parker, M1DUC, by email to coalhouserad1o@yahoo.com.

On Sunday 26 June East Kent Radio Society is having a meeting and picnic at Stelling Minnis. Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 27 June Felixtowe & District Amateur Radio Society is holding its rally. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 27 June Radio Society of Harrow is working amateur satellites at Old Reading. More information from Linda, G7RJL, on 0208 386 8586.
On Tuesday 28 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 28 June Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 28 June Dorking & District Radio Society is having a talk on electrical safety by Robin Page- Jones, G3JWI. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 28 June Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Wednesday 29 June Chesham & District Amateur Radio Society is holding a pedestrian DF hunt. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 29 June Havering & District Amateur Radio Club is holding a junk sale. More information from John, M0UKD, on 07890 222111.

On Wednesday 29 June Norfolk Amateur Radio Club has an informal, construction, shack and Bright Sparks evening. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 29 June Worthing & District Amateur Radio Club is putting GX3WOR on the air. Contact Phil, G4UDU, on 01903 816684.

On Thursday 30 June Bittern DX Group is holding its AGM at Pinewood Park. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 30 June Shefford & District Amateur Radio Society is planning for VHF NFD with Andy, G8ATD. Details from David, G8UOD, on 01234 742 757.

On Friday 1 July Crystal Palace Radio and Electronics Club is having a construction evening. Contact Bob, G3OOU, on 01737 552 170.

On Friday 1 July Mid-Sussex Amateur Radio Society is having a windmills evening, the hall is closed. Contact Peter, G4AKG, on 01444 239371.

On Friday 1 July Wey Valley Amateur Radio Group is holding its summer barbecue. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 2 July Bittern DX Group commences its weekend event for the RSGB VHF Field Day Contest.. Details from Linda, G0AJJ, on 01692 404154.

On Saturday 2 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Saturday 2 July East Kent Radio Society is having a BBQ at Paul Nicholson's house. Details from Karl Davies, M1DFM, on 01227 710120.

On Saturday 2 July Loughton & Epping Forest Amateur Radio Society is operating GB2NWA for the Air- Britain Fly-In at North Weald Airfield. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Saturday 2 July Lowestoft & District PYE Amateur Radio Club commences its weekend event for VHF Field Day as G8PIR/P. Details from Lee, 2E1LJL, on 01502 564242. On Saturday 2 July Shefford & District Amateur Radio Society starts its weekend event for VHF National Field Day. Details from David, G8UOD, on 01234 742 757.

On Sunday 3 July Felixtowe & District Amateur Radio Society is operating GB2FX at Landguard Museum, Felixstowe with Darrell Day. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Sunday 3 July Horndean & District Amateur Radio Club is having a club coach trip to Bath. Contact Stuart, G0FYX, on 023 9247 2846.

On Sunday 3 July Norfolk Amateur Radio Club is at the Barford Rally. Details from Chris Danby, G0DWV, on 01603 898678.

On Sunday 3 July Worthing & District Amateur Radio Club is holding its breakfast meeting in Goring. Contact Phil, G4UDU, on 01903 816684.

NEWS FOR THE SOUTH WEST On Monday 27 June Bristol RSGB Group is having its Christmas social at the new venue, The Compass, Tormarton. Details from Robin, G3TKF, on 01225 420442.

On Monday 27 June Exeter Amateur Radio Society is having a club night at the Moose Centre. More information from Nick, on 01363 775756.

WIANEWS WEEK COMMENCING June 26 2011.

"Peace, Environment and Natural Disasters".

e-QSO for the CB Service in VK denied

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 26 2011.

TIM THE TRACKER MAN

VK4TIM has been at it again and has successfully tracked down further
interference on VHF in Brisbane. He had had contact with ACMA advising him
that they had located a radiating personal computer at an address.

VK4TIM was unaware that it was a PC, but suspected that it was interference
caused by an unintentional radiator.

The PC was radiating over an area of Morningside, and was enough to interfere
with VK4RBN while driving past. The owners of the PC have been told to get
their PC repaired and not to operate it until it has been.

Our friends at theACMA offices are on our side and will assist us when we have
interference issues, although it is our duty to remain vigilant and pay
attention when we hear unusual things that aren't right, locate it and report
it.

(Tim VK4TIM)

PIRACY ON THE HIGH SEAS

mysailing.com has a worthwhile article for all our maritime mobile hams who are lucky enough to be roaming the high seas.

They seriously recommend avoiding countries and regions where piracy is rife (your insurance will generally exclude coverage there) and be cautious and educate yourself about areas with lower, but existing risks.

Areas of risk in our neck of the woods include Indonesia, PNG, Port Moresby.

They offer suggestions such as having a second wallet with small amount of cash, expired credit card and perhaps a cheap watch to give aggressive intruders.

Always lock hatches and ports when leaving the vessel and leave lights and music on if going ashore in the evening.

In questionable areas, it may be prudent to turn off your A.I.S. transmitter while underway.

Be modest in your appearance at all times, on deck and ashore.

Don't even consider purchasing firearms, but do purchase pepper spray.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

SARFEST - Sunday 7 August, ALL WELCOME, BE THERE.

All traders, sellers, buyers, gawkers, walkers, talkers, just come for the hell of it.

Set up is Saturday afternoon, 6 Aug.

Sunday 7 Aug, open for traders 0700K, others 0800K.

TRADERS INTENDING TO ATTEND ARE ASKED TO CONFIRM TO vk2src@sarc.org.au

All and any traders a are cordially invited to attend and sell your goods.

SARC will have a disposals table, plenty on it if you have things to sell but not enough for a table, sell them on the SARC table at 10% to SARC.

The Blue Mountains amateur radio club holds a HF NET ON 3.543 kHz on Tuesday night at 8pm, it also holds a 2 metre net on the club repeater 147.050 / 147.650, the repeater superimposes a 67Hz CTCSS subtone on Transmit for those who wish to use this feature.

A 123Hz CTCSS Subtone is required to access this repeater.

The Blue Mountains amateur radio club is holding its annual WINTERFEST on Sunday August 28th entry is $5 more details can be found by contacting the club.

(Danny Clark VK2FDCA)

Oxley Region Amateur Radio Club's annual Field Day.

Despite the wet and windy weather the event was a great success with 80 registrations and a full program of activities. Congratulations to Ashley VK2XSO of Tamworth on winning the coveted title of Foxhunt Champion.

The Tacking Point Surf Club Hall was an excellent venue.

The club's special event callsign VI40BOR which celebrates the club's 40th anniversary was activated during the Field Day weekend, and will be activated periodically until the anniversary on the 2nd of October 2011.

(vk2wi)

VK4 QNEWS

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Way back when milk was delivered un pasteurised, radio broadcasters largely depended on the telephone service for program relay to affiliated stations and from OB's. Then along came Sputnik and the amateur radio Oscars. Moving along, Australia got on board by launching its own commercial satellites. In the mean time amateur operators were pointing antennas at the sky and working the world using vhf through to microwave frequencies.

It was like magic when television footage circled the world in hours with the aid of satellite networks. Now actuality coverage of events is the norm rather than waiting for the aeroplane having to deliver cine film to illuminate previous radio and press reports.

In the mix of things, it was thought a good idea to relay broadcast material through satellites. It certainly provided benefits but as experience has shown, these extra-terrestrial relays are subject to fades from meteor showers and moisture attenuation.

The reliability of the old system was sacrificed, and as I understand it many of the networks have abandoned satellite relay for fibre-optic services.

I find it frustrating to lose programs on radio and/or TV because of rain falling on some remote ground station. Funnily the pay TV and the satellite internet services can be unaffected whilst I am hearing "we apologise for this break in service" messages. It demonstrates a lot of principles of signal propagation that we touched on when studying for our amateur tickets. Even the big boys don't get it right, at times.

I'm Geoff Emery and that's what I think....how about you.

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

Hi, this is VK4TPT, Ray Stockdale from MERG, the Maryborough Electronics & Radio Group in Queensland, and I've been thinking. (Oops! Sorry Geoff! That's your line!)

How many out there have, like me, a pile of radios, antennas, parts thereof and other assorted bits and pieces that you always planned to do something with but never got around to?

You know what I'm talking about. All that stuff in boxes under the bench, on top of the cupboard, under the house and just about everywhere else.

Here's an idea. Gather it together and come along to the Wide Bay Hamfest on Saturday the 16th of July at the West Scout Hall in Ariadne St. Maryborough.

Places are still available, either indoors or in the car-boot area.

Doors open at 07:00 for exhibitors, or 09:00 for general entry.

$5 will secure a place and include two persons.

You don't have anything excess to requirements? Maybe there is something you've been looking for years.

In which case, or, if you just like to look around, perhaps have a coffee and meet up with those Amateurs you have spoken to on air, come along.

Public entry is $5 per person.

Looking forward to meeting you there.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'Day again from the chilly north this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As reported a couple of weeks ago Gary VK4FD and Jeff VK4BOF, alias Snoopy and Charlie Brown, activated Etheridge shire using the TREC call-sign VK4WAT for the VK-Shires contest.

The intrepid duo setup at Mount Surprise and were on air in time for the start of the contest.

The bands were in good shape and provided many contacts into a large number of VK shires. They also managed to work 31 CQ zones which is a very good achievement considering there are only 40 CQ zones worldwide available to work.

The next TREC meeting will be held on Saturday the 25th of June at our clubrooms. If you are reading this early and are in the area please feel free to call by and say G'Day. A map showing the location of the TREC clubrooms is available on the WIA website in the radio clubs menu.

TREC members are gearing up for a five day communications support effort for the Far North Horse Endurance Riders. With early starts and temperatures hovering around 4 to 5 degrees it should prove to be lots of fun albeit a little chilly.

Well that's your lot for this week.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to the WIA news. Travel Well!

ACMA NEWS

Historic changes to CB radio

The Australian Communications and Media Authority (AMCA) has announced further amendments to the Citizen Band Service.

UHF CB Australia Director, Ray Oaff said the developments are the result of two year's work and includes more channels being available for the benefit of more than one million people in Australia each day.

His was one of 17 who made a submission. Most agreed with additional channels by reducing their width down to 12.5 kHz, relaxation of the telemetry and telecommand duty cycle, and allowing transmission of station identification and position information.

While a new equipment standard (AS/NZA 4365:2010) was released on 27 January, in defining a new 80 channel standard, the AMCA has now set 2017 as the end of the phase-in of narrowband.

Similar changes will occur in New Zealand. A few wanted legitimisation of e-QSO for the CB Service, but this has been denied.

(Jim Linton VK3PC)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Youngsters On The Air

The VERON website reports that in July-August youth teams will be going to Romania for a European Commission supported project called 'Youngsters On The Air'.

This Dutch team is led by Lisa Leenders PA2LS, other participating national teams are from Belgium, Bulgaria, Estonia, Latvia, Lithuania, Poland, Slovenia and Romania.

It's good to see many of the world's leading Amateur Bodies and societies really getting to the grass roots level and encouraging kids, after all they are our bloodline!

South Africa also pays tribute to "da kids" as Jason Daniels reports in a moment during the international news... Maybe time our WIA looked at this oft neglected area!

Schedule for Youngsters On The Air

SILENT KEY

It is with regret that we announce the passing of Bob Barnes VK2FRCS.

Bob was better known as the owner of RCS Pty. Ltd., a provider of printed circuit boards to amateur radio operators and the general electronic community as a whole, from the professional to the hobbyist.

A funeral service was held Friday 24th at Sefton.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Ham killer jailed

The BBC is reporting that a John Cooper has been convicted for the 1989 murder of Radio Amateur Peter Dixon and his wife Gwenda.

Read the full report by BBC news at the url in today's text edition of your WIA National News.

http://www.bbc.co.uk/news/uk-wales-south-west-wales-13538545

WHAT DO YOUNG SOUTH AFRICANS THINK ABOUT AMATEUR RADIO?

In an interview with 5 young radio amateurs between the ages of 11 and 17, they shared their views about amateur radio. It was transmitted in a special youth day broadcast which was on the air just before the Youth Day Sprint on 16 June.

You can listen to it on www.hamradio.org.za, the new website the SARL is developing with the focus on young people.

Limerick 2m repeater vandalised

The Limerick Radio Club's 2m repeater is off the air until further notice due to vandalism.

The services affected are the voice repeater function, IRLP and Echolink.

Club members are doing their utmost to restore the repeater as soon as possible.

Significant damage has been done which will incur additional unplanned expense on the club funds.

caught red-handed at a Florida radio station

Police in Brevard County, Florida had some help when it came down to tracking a copper thief: They had help from Clear Channel Radio.

Cocoa Beach, Florida's WMMV-AM (1350) was knocked off the air over the weekend when someone broke in and stole copper and other items from the transmitter.

What the burglar did not know was that Clear Channel had placed surveillance cameras at the site and they caught a number of images of the thief in action, including facial shots and some with the man carrying tools used in the

break-in.

The tapes were handed to police, who also did not have to look far to find the copper thief, who lived two doors away from the transmitter site!

All of the stolen property was recovered and returned to Clear Channel Radio

(RADIO.INFO)

Millions of folk have implantable medical devices, from pacemakers and defibrillators to brain stimulators and drug pumps; worldwide, 300,000 more people receive them every year.

Most such devices have wireless connections, so that doctors can monitor patients' vital signs or revise treatment programs.

But recent research has shown that this leaves the devices vulnerable to attack: In the worst-case scenario, an attacker could kill a victim by instructing an implantable device to deliver lethal doses of medication or electricity.

At the Association for Computing Machinery's upcoming Sigcomm conference, researchers from M.I.T. and the University of Massachusetts-Amherst (UMass) will present a new system for preventing such attacks.

The system uses a second transmitter to jam unauthorized signals in an implant's operating frequency, permitting only authorized users to communicate with it. Because the jamming transmitter, rather than the implant, would handle encryption and authentication, the system would work even with existing implants.

The researchers envision that the jamming transmitter - which they call a shield - would be small enough to wear as a necklace or a watch.

(TODAYS MEDICAL DEVELOPEMENTS)

2011 DAYTON HAMVENTION: CHECK OUT THE NEW PRODUCTS THAT DEBUTED AT DAYTON

One of the most exciting things at the Dayton Hamvention each year is the introduction of new products. This year was no exception. From HF transceivers to receivers to test equipment to station equipment, there was a plethora of new products just about everywhere you turned.

Read more and as we always say, the address is best read at wia.org.au in this weeks National News.

http://www.arrl.org/news/new-products-at-dayton-2011

==========

NEWS FROM ARNEWSLINE USA

SCIENTISTS SAY SOLAR CYCLE HEADED INTO LIMBO

For years, astronomers and space scientists have
been predicting the Sun would move into solar
maximum by around 2012. During this period there

would be many intense flares and lots of sunspot activity. Now they are thinking that the opposite may be happening and Amateur Radio Newsline's Michael Grebert, KJ4ZZV, has the details:

According to three studies released in the United States on Tuesday, June 14th, experts believe the familiar sunspot cycle may be shutting down and heading toward a pattern of inactivity unseen since the 17th century.

According to experts from the National Solar Observatory and Air Force Research Laboratory, the signs of this include a missing jet stream, quickly fading spots, and slower activity near the poles.

Frank Hill is the Associate Director of the National Solar Observatory 's Solar Synoptic Network. At a meeting of the American Astronomical Society's Solar Physics Division in Las Cruces, New Mexico Hill said that the fact that three completely different views of the Sun point in the same direction is a powerful indicator that the sunspot cycle may be going into hibernation.

As every ham knows, solar activity tends to rise and fall in 11 year cycles. The solar maximum and solar minimum each mark about half the interval of the magnetic pole reversal on the Sun, which happens every 22 years.

According to Hill, the current cycle, number 24, may be the last normal one for some time but the next one, cycle 25, may not happen for some time. He adds that this is important because the solar cycle causes space weather which affects modern technology and may contribute to climate change.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

Experts are now probing whether this period of inactivity could be a second Maunder Minimum. This was a 70-year period from 1645 to 1715 when hardly any sunspots were observed. For ham radio such a prolonged solar minimum would mean very little in the way of High Frequency DX for a very long time. The complete article titled Scientists Predict Rare Hibernation of Sunspots can be found using the shortcut of tinyurl.com/slowsun

NORWEGIAN HAMS PROVIDE FLOOD COMMUNICATIONS

Norway's national amateur radio society, the
NRRL, reports that radio amateurs have been
providing communications assistance following recent flooding in that nation.

The NRRL says that as a result of the flooding
and landslides in Oppland and Hedmark, the
telecoms company Telenor has had substantial
problems with its mobile phone network. Because
of the outages the Main Rescue Coordination
Centre for Southern Norway has requested assistance from NRRL.

Communications were set up between southern
Norway and Lillehammer. Repeaters around Oslo
have also been used. More about the situation in
Google translated English is on the web at tinyurl.com/NorwayNRRL

HAM RADIO PUBLIC RELATIONS: PROMOTING ARRL FIELD DAY 2011

The ARRL has released a new press kit along with
a set of two new Public Service Announcements to
publicize Field Day, 2011. The press kit
contains just about everything a club needs to
publicize Field Day and its own operations. But
it's the Public Service Announcements that will
likely get the most attention if you are willing
to download them, burn them to C-D's and drop off
copies at your local radio stations.

What do they sound like? Here's one of them. Take a listen:

Actual PSA

Yes that's Don Carlson, KQ6FM, whose voice you
regularly here on Amateur Radio Newsline. But
this week Don is in another role as spokesman for
the upcoming ARRL Field Day event. To get a copy
of the new Field Day promotional spots that Don
has created please take your web browser to
tinyurl.com/fielddaypsa and download the audio
file marked Field Day 2011. The complete ARRL
Field Day press kit itself is at tinyurl.com/fielddaypress

SIX Meter Repeater VK3RDD

The Gippsland Gate Radio and Electronics Club are currently overhauling their 6 m repeater VK3RDD located at Cockatoo. Albert VK3BQO and Geoff VK3ZGW have spent considerable time and effort designing a new repeater controller to replace the existing one..

The new controller can be adapted to fit into any new or existing repeater installation regardless of frequency.

This will be a major rebuild of VK3RDD which has been operating for many years of reliable service until recent times.

Upgraded TX/Rx equipment will also be included.

They expect their repeater to be back in operation in approx. 3 weeks and apologize to regular users for this essential outage.

Please direct any enquiries / comments to secretary@ggrec.org.au

On the air, keep an ear open for EF8M operating from the Canary Islands during the RSGB Islands on the Air Contest on July 30th and the 31st as a Multi-Operator, All-Band, High-Power entry.

Operators mentioned are RD3A, EA8CAC and UA5C.

QSL via UA3DX.

BROADCAST MONITORING SWL AND SCANNER NEWS

The US National Association of Shortwave Broadcasters

The NASB will team with Dallas-based transmitter maker Continental Electronics will host the first U.S. meeting of a High-Frequency Coordination Conference and Arab States Broadcasting Union conference, Sept. 12-16, in Dallas.

Officially the conference gathering of shortwave broadcast professionals is expected to pull approximately 100 delegates from 40 countries.

The NASB is encouraging US shortwave professionals to attend to make a good showing.

'This will be an excellent opportunity - to meet with the world's shortwave broadcasters, and to discuss some of the new platforms of delivery for such as the Internet, satellites, podcasts, etc.

Topics dealing with programming, audience research and others are also being planned for the agenda.

(IRTS)

Danish public-service broadcaster Denmark's Radio (DR) has shifted some of its programming from medium wave to long wave.

On June 16, a new 50 kW transmitter on 243 kHz was activated at their Kalundborg transmission site in Denmark's West.

DR will simulcast programming on the long wave channel until June 27, when it will end its medium-wave broadcasts from the site on 1062 kHz.

The existing medium-wave broadcasts uses a 250 kW transmitter.

Previously, DR used a 300 kW long wave transmitter at Kalundborg until February 2007. The channel has been entirely vacant in Europe since 2008 when Turkey ended long wave broadcasts.

INTRUDER WATCH - ENFORCEMENT ZONE

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

Inside Amateur Radio magazine for July

On last week's broadcast we covered the topics of the annual convention held this time in Darwin, the posthumous review of QSLing by Neil Penfold VK6NE,

now a silent key, and the cover story review ICOMs IC-9100 transceiver.

The reviewers reach the conclusion that the long-awaited IC-9100 contains must interest whether you are a lowbander, a HFer, a VHF/UHF FM operator, or microwaver, this radio will cover your needs.

This week we draw attention to the extensive writings of WIA President Michael Owen who details what the WIA Board of Directors has been doing for us all.

Well worth a read.

In DX news, we learn how David McAulay VK3EW regained the top spot on the Australian DXCC by getting QSL's from the four new DX entities with the changes to the former Netherland Antilles.

And continuing the DX theme is good news that the sunspot cycle is likely to peak by 2014, a run-down on the upcoming DXpeditions, plus lots more.

The VHF, UHF and Microwaves are well covered. There's timely reminder on the running of Gippsland Technical Conference, GippTech 2011.

AMSAT, ALARA and Shortwave Listening interests are included. Amateur Radio magazine, a WIA membership service is also available through selected news agents.

I'm Barry Robinson VK3PV and you are listening to VK1WIA.

Get ready for ARRISat-1 SSTV reception.

The ARISSat-1 FM downlink on 145.950 MHz includes live SSTV images as part of the cycling voice ID, select spoken telemetry values, and the international greeting messages.

One fun feature is that there are four SSTV cameras mounted on the spacecraft. On photos of ARISSat-1 you may have noticed black brackets on the outside of the spacecraft. These hold the mirrors that reflect the light onto the lens of the cameras. The software-defined-transponder will use the image data from the cameras to generate the SSTV downlink.

ARISSat's software will sequentially select a new or stored image from one the four cameras. There are two pre-recorded images as part of the sequence. The camera that took the picture can be identified by the colour of the call sign in the upper left of the SSTV image. The SSTV image will be sent down as FM audio SSTV in Robot 36 format on 145.950 MHz about every 140 seconds.

Here are some pointers to help you get your station ready to receive and display the SSTV pictures transmitted by ARISSat-1.

The RF downlink power on the 145.950 MHz FM downlink will be 250mW which is predicted to provide a link margin around 6 dB on an HT with a 'big whip' when the satellite is at 15 degrees elevation. This should be sufficient to receive SSTV pictures although you may need to orient the whip to line up the antenna polarization.

ARISSat-1 is not stabilized so the antenna orientation is unpredictable and a certain amount of fading will happen. The receiving link margin may be improved with a handheld beam.

UNIVERSITY SEEKS HAM RADIO ASSISTANCE IN SATURN MISSION PREPARATIONS

Ham radio has been invited to take part in the preparations for the upcoming exploration of the planet Saturn by remote satellites. This if a group of tiny Cornell University-developed satellites travel to the ringed planet sometime within the next decade.

The exploration will be done using tiny micro-sized chip satellites called Sprites.

As they flutter down through Saturn's atmosphere, they will collect data about chemistry, radiation and particle impacts while transmitting as beacons with 10 milliwatts of RF power.

Tests of the Sprites is ongoing. Three prototypes of these chip satellites were mounted on the International Space Station after the space shuttle Endeavour delivered them on its final flight.

During testing of these micro sized birds, the help of radio amateurs is required. If you would like to serve as one of those trying detecting this signal from one of the Sprites, please follow up by e-mail to zrm3.cornell.edu

JOTA 2011 theme announced

The theme of the Jamboree on the Air to be held on the 15-16 October is "Peace, Environment and Natural Disasters".

IARU International Coordinator for Emergency Communications, Hans Zimmermann F5VKP/ F/HB9AQS, said "This year's JOTA theme is an excellent opportunity to raise the awareness for the role of the Amateur Radio Service in disaster situations."

Hans believes we should all support this initiative by direct contact between the respective emergency communications groups and JOTA organisers.

World JOTA organiser of the World Scout Bureau, Richard Middlecoop PA3BAR, has asked for help to establish contacts between national JOTA organisers and emergency communications groups.

Information about JOTA/JOTI can be found at:
http://scout.org/en/information_events/events/jota/the_54th_jota_2011

Richard Middelkoop can be reached at RMiddelkoop@scout.org

(Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee)

Nighthawk happening now !

As the WIA news goes to air this morning some VK4 radio amateurs are wrapping up an overnight activity to provide vital communications support for Scouting youth members doing the hard slog through crocodile and taipan infested land.

The Kennedy Region Scouts 2011 Operation Nighthawk started on Saturday evening and only just finished a little while ago, today Sunday 26 with a course that traversed suburban Pallarenda and the rugged trails of the Townsville Town Common.

Over 90 youth members trekked through 5 radio checkpoints manned by Townsville Amateur Radio club members utilising VHF voice and data channels plus also using UHF to VHF cross-band repeating from vehicles to enhance operator portability and endurance.

Planning is already advanced for Kennedy Region Nighthawk 2012, if you reside Townsville way have a think about helping out with that event !

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

602. SARL NEWS - SUNDAY 26 JUNE 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-25 19:00:24 UTC
From: website@sarl.org.za
Message-ID: <20110625190008.C23F833C5F@panix2.panix.com>
Source record: 4392
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 26 JUNE 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. In the news today:

URGENT NOTICE TO ALL AMATEUR LICENSEES

THE SUN SHOWS WHO'S BOSS!

GEAR UP FOR THE ANNUAL SARL HF CONTESTS

RTA HEADS FOR DURBAN

HABEX BALLOON FLIGHT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

URGENT NOTICE TO ALL AMATEUR LICENSEES

While we have covered this announcement in previous SARL News bulletins and it is available on the web, the SARL is still receiving calls from radio amateurs who find that their callsign has been allocated to another person. We therefore repeat the earlier announcement:

ICASA has cancelled over 34 000 radio licenses that have remained unpaid for the past 365 days. This includes all amateur radio licenses that are unpaid. Check that you have paid your license and if you do not have a valid printed license or an official receipt call ICASA at 011 566 3313 or 011 566 3319 between 08:30 - 16:00 Monday - Friday. PLEASE HAVE YOUR LICENSE NUMBER HANDY. If your amateur license was cancelled call now and ICASA will re-instate it if you can prove payment. If you have not paid, do so now using the information and account number on your last license.

THE SUN SHOWS WHO'S BOSS!

The Sun is doing strange things. Last we carried a story that said that scientists some years ago predicted that the Sun would move into solar maximum by around 2012. During this period there would be many intense flares and lots of sunspot activity. Now they are thinking that the opposite may be happening. According to three studies released in the United States on Tuesday 14 June, experts believe the familiar sunspot cycle may be shutting down and heading toward a pattern of inactivity unseen since the 17th century.

But last week the Sun reacted with revenge. The first day of southern winter began with a solar flare. Magnetic fields above sunspot complex 1 236 erupted during the early hours of June 21st, hurling a coronal mass ejection (CME) almost directly toward Earth. The incoming CME does not appear to be particularly potent; nevertheless, the cloud could trigger polar geomagnetic storms when it reaches Earth on or about June 23rd. Makes you wonder! The original story can be read on www.sarl.org.za, select Amateur Radio TODAY from the left hand menu.

GEAR UP FOR THE ANNUAL SARL HF CONTESTS

On the 7th August the annual SARL HF contest will take place. Get ready now to take part in this annual premier event. This is followed by the SARL CW HF contest on August 28. Trophies are awarded to winners in various categories of both contests. Some of the trophies have a long history. It will be prestigious to have your name engraved on the base of the trophy and to receive the trophy and miniature shield at the annual awards banquet. Various lucky draw prizes will be awarded to each person entering a log with 10 or more contacts.

Listeners are also reminded of various other contests coming up. The 3rd leg of the QRP contest will be held on 16 July followed by the 4th leg of the Club contest on the 27th July.

On August 9 the SARL YL Sprint takes place. The winning YL will receive a large display of flowers and chocolates. There will also be a lucky draw for YLs who submit a log.

On the 21st August is the 3rd leg of the Digital contest.

The SARL HF and Contest Manager, Geoff Levey, ZS6GRL, said that it would nice to hear all the "new amateurs" taking part in these contests. "It is an enjoyable experience and is a good way of gaining confidence and making contacts for the various awards that are available. You have all done the hard work to pass the exam, so come and have some fun on the air."

Apart from the Lucky Draw prizes, it has been decided to also include some complimentary 1 year membership subscriptions to non SARL members who submit logs. Remember to stand a chance of winning a prize, you need to submit a log to the contest committee after each contest - it is "The "Right Thing To Do"

SARL WEB

The move to a new ISP has been more challenging than expected, mainly because of the many failures experienced during the past week by the current hosting company. Please bear with us. The current web will be transferred to a test site before finally being cut over. Once the process is completed you will be informed on SARL TODAY. The URL will however remain the same so no action is required from members and visitors to www.sarl.org.za.

RTA HEADS FOR DURBAN

The SARL Radio Technology in Action is heading for Durban on Saturday 30 July. It will be held at the School of Electrical, Electronics and Computer Engineering at the University of KwaZulu-Natal. The programme will be available on the SARL web from next weekend.

NEW MEMBERS

The SARL welcomes the following new members: ZS1MAC, Raymond Maclean; ZS1CBT, Rean Theron; ZS6CX, Glen Marshall and ZS3OBS, Sutherland Amateur Radio Club.

We trust you will enjoy your association with SARL. Your membership strengthens the voice of amateur radio in south Africa.

To date 534 members have renewed. The new year starts on July 1, please send us your renewal as soon as possible. Invoices were mailed a few weeks ago.

CLUB ACTIVITIES AND CLUB NEWS

HABEX

At the Klerksdorp Hamfest to be held on the 2nd July 2011, the HABEX group will be launching a balloon for the occasion.

The launch is scheduled for 08:00 and will be from the Klerksdorp airfield.

The payload consists of a controller that will be running APRS on 144,850. Also in the payload will be a cross band repeater and running APRS. This repeater replaces the Parrot repeater run during a previous launch and which was a great success. The cross band repeater RX is 145,850 and TX is 437,850. There are no tones.

The group is also planning to incorporate an HF beacon on 40 m as well as a further APRS unit transmitting on 144,800. However, these are still to be confirmed.

Unfortunately, with the Hamfest being run at a different location, there will not be the normal echolink and live streaming facilities of the past. The team will however endeavour to be on HF while mobile as well as the Cross Band repeater.

Listeners are welcome to call in as well as monitor the flight on www.aprs-za.com or www.aprs.fi.

To view more information on this project, please visit the HABEX web site at www.habex.za.net. The website will also be updated regularly during the course of the week leading up to the 2nd July.

At the AGM of the West Rand Amateur Radio club, held on 11 June 2011 in Weltevredenpark, the following members were elected to its new committee:

Chairman Phillip van Tonder, ZS6PVT Vice chairman Geoff Levey, ZS6GRL Secretary Rory Crouch, ZS6RBJ Treasurer Dave Cloete, ZR6AOC Members Remeo Nardini, ZS6ARQ

Nico Vorster, ZS6NJV

Johan van Vuuren, ZS6JVV

Heather Holland, ZS6YE

Jess Hawes, ZS6YOT SARL liaison and PIO Willem Weideman, ZS6WWJ Anode (newsletter) John Brock ZS6WL

Thanks to the retiring committee members and success to the new committee.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low to moderate levels. Sunspot 1 240, located in the southern hemisphere, is slowly showing some growth. Another new region appears to be forming in the northern hemisphere. There is currently no chance for strong solar flares. For the people doing their own frequency predictions the expected effective sunspot number for the week will be about 44.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m and also 15 m with some some sporadic openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

02 July - Klerksdorp Hamfest and HABEX balloon flight at 08:00. 16 July - 3rd leg of SARL QRP Competition. 27 July - 4th leg of SARL Club Competition. 30 July - RTA in Durban. 07 Aug. - SARL HF Phone Competition. 09 Aug. - SARL YL Sprint. 21 Aug. - 3rd leg of SARL Digital Competition. 28 Aug. - SARL HF CW Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a

web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 26th June 2011

Echo Ireland

The June edition of Echo Ireland will be delivered to members within the next few days. A quick preview of this issue shows that some clubs have been quite active in recent weeks.

Three clubs - Shannon Basin Radio Club, Skerries Radio Club and the Amateur Portable Group - report on their participation in "Mills on the Air", while both North Cork Radio Group and the Cork Radio Club have written about their involvement in International Marconi Day. Activities by South Dublin Radio Club, South Eastern Amateur Radio Group, Mayo Radio Experimenters and Lough Erne Amateur Club are also covered.

There is an interesting article on the ways in which the transmissions associated with the Automatic Identification System for shipping could be used for propagation studies, also more information on EI7HO's magnetic loop experiences and, of course, further excerpts from the "HX files" on Amateur Television.

DXing is well covered in the regular "HF Happenings" column - which includes some thoughts on recent propagation conditions as well as recent and future DXpeditions. And speaking of DXpeditions, Dave EI9FBB reports on his visit to Monaco, one of the rarest European DXCC entities.

Regulatory issues covered in this month's Echo Ireland include a report on the recent IRTS meeting with ComReg, the IRTS response to ComReg's Spectrum Strategy Consultation and the society's position on one of the agenda items at the forthcoming World Radiocommunications Conference - this is the item dealing with consideration of an allocation to the amateur service in the band 415 to 526.5 kHz.

June's Echo Ireland also has details of upcoming radio rallies, as well as recent and upcoming radio amateur weddings!

---

80 metres EI/EI Counties Contest

The June IRTS 80 metres EI/GI counties contest was on Sunday last. This is one of two IRTS 80 metres counties contests held each year, the other one being in January. The June event is traditionally the quieter of the two, which was certainly true this year.

Many counties were hardly represented at all, indeed Dublin was almost 'rare DX' for most of the three-hour long contest. Band conditions on the day were poor, with deep QSB and high background noise at times. In previous years, band conditions have picked up for the last hour of this contest, but there was no noticeable improvement as this year's contest drew to a close.

In spite of the indifferent weather, a number of portable stations were on the air - these included Mayo Radio Experimenters Network who operated from their home county, Oleg EI7KD who was portable in Dublin, Paul EI3ENB operating portable in Kilkenny and Joe EI7GY who was in the Slieve Blooms in Co. Offaly.

IRTS VHF/UHF Field Day

The IRTS VHF/UHF field day take place Saturday 2nd July and Sunday 3rd July 2011. The deadline for submission of log to contest manager is August 3rd 2011.

IRTS Committee Meeting

The next committee meeting will take place on Saturday 10th September in Portlaoise.

Introduction to Amateur Radio

The Mayo Radio Experimenters Network are holding a series of practical hands on open days throughout the summer months. The events will start at 13.00 approx (weather permitting) and will take place on the following dates: Sunday July 10th Sunday August 14th Sunday September 11th

Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The location for all events will be the car park at the Halfway House on the Castlebar to Westport Road. If you would like further details please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/eircom/dot/net) , email David Hatfield EI3ECB on ei3ecb/at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

The Northern Ireland HF Conference

The GI HF conference takes place Saturday 20th August 2011 in Technology Education Centre, Omagh, BT78 1FA. Registration takes place from 11am. More details from website: http://wtarc.co.uk/GIHFConference.aspx . The contact person is Philip MI�MSO.

Amateur Radio at the Tall Ships

Amateur Radio will be in use in Dunmore East at the tall ships on Sunday the third of July. If you think you will be in the area, AREN member or not, bring your handheld and give EI0NC a call on Southern Ireland Repeater Network. We will be acting as extra eyes and ears on the day for the other services, so all Amateur Radio operators are encouraged to participate. For more information contact John EI7IG at +353 86 8167310.

British Library makes Google search deal

Thousands of pages from one of the world's biggest collections of historic books, pamphlets and periodicals are to be made available on the internet. The British Library has reached a deal with search engine Google about 250,000 texts dating back to the 18th Century. It will allow readers to view, search and copy the out-of-copyright works at no charge on both the library and Google books websites. The library gets more than a million visitors a year.

Icann increases web domain suffixes

A global internet body has voted to allow the creation of new website domain suffixes, the biggest change for the online world in years. The Internet Corporation for Assigned Names and Numbers (Icann) plans to dramatically increase the number of domain endings from the current 22. Internet address names will end with almost any word and be in any language. Icann will begin taking applications next year, with corporations and cities expected to be among the first. "Icann has opened the internet's addressing system to the limitless possibilities of the human imagination," said Rod Beckstrom, president and chief executive officer for Icann.

DX News

There are several special callsigns on the air from now until 4 July in connection with the Special Olympics World Summer Games being held in Athens, Greece. Look out for SX0A, SY2011BVM and SY7SOG. .

Eric K9GY will be active from Afghanistan for the next year using the callsign T6MO. His most likely times of operation are given as 0130-0430z, 0630-0830z and 1130-1730z. QSLs go via the home call and logs will be uploaded to Logbook on th Air.

John F4FUC will operate as J28UC from Djibouti starting in July. He hopes to be there till 2013 and will be using vertical and dipole antennas on 40-10m.

Howard WB4WXE will be on the Caribbean island of St Lucia from 25 June till 15 July. He will operate using the call J68HS and asks for QSLs via his home call.

IOTA News from the Deutscher Amateur Radio Club 23 June, 2011 Island activities:

EU-006, EI, Arran Islands: EJ/G3ZAY, Dominic,EJ/M0BLF, and Tom,EJ/M0TOC will be QRV from Arran in CW and SSB on all bands from Jun 24-26. QSLs via homecalls (bureau/direct).

EU-008, GM, Inner Hebrides: A group of four is going to become active from Islay between Jun 25 and Jul 1. They will sign GM0HIK on 50 MHz and above on VHF up to 70cm. GM3IZD will be their callsign in HF. QSL via G0HIK and G3IZD respectively (bureau/direct).

EU-028, I, Toscana Region group: IA5/IK2MLS will spend his holidays on the island of Elba from Jun 26 until Jul 2 and wants to be QRV on 40m-10m. QSL via homecall (bureau/direct).

EU-121, EI, Irish Coastal Islands: After staying on Arran EJ/G3ZAY, EJ/M0BLF and EJ/M0TOC will be QRV also from Inishbofin on Jun 27/28. QSL via homecall (bureau/direct).

EU-124, GW, Welsh Coastal Islands: MW0IDX/p will be QRV from Puffin mainly in SSB on 20m only on Jun 27. He will take the kayak to the island, so operation depends also on the weather. QSL direct or via bureau.

EU-158, SV, Peloponnisos Region group: Between Jun 25 and Jul 16 SV3/DJ5RT/p will be active with QRP and vertical on 20m partly from Schiza Island, but mostly from Sapientza Island. QSL direct via DJ5RT. See also: http://www.qrz.com/db/dj5rt

---

BBC1 slips behind ITV1 in international coverage

The BBC's flagship domestic TV channel, BBC1, now shows less factual programming than its main rival, ITV1. That's the surprising finding of a new report 'Outside the Box' just published by the International Broadcasting Trust (IBT).

Danmarks Radio replaces medium wave with long wave

Danish public broadcaster Danmarks Radio (DR) is to close its 250 kW medium wave transmitter on 1062 kHz in Kalundborg, and has resumed broadcasting on long wave 243 kHz, but with a power of just 50 kW. As has been the case on medium wave, the programming on 243 kHz will be restricted to weather forecasts, communications for shipping and morning gymnastics.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 19th-June, through Sunday, 26th-June there were 215 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2V, VP6, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5R, MADAGASCAR. Eric, F6ICX, will once again be active as 5R8IC from Saint Marie Island (AF-090) between November 15th and December 17th. Activity will be holiday style operating CW, RTTY, and PSK63, and using 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters.

There will be no online log during his activity. QSL via his home callsign (QRZ.com). View pictures of his last trips at: http://f6kbk.free.fr/5r8ic/5r8ic.htm

5Z, KENYA. Sigi, DL7DF, will be on holiday with his XYL Sabine in Kenya between November 20th and December 3rd. He plans to be active as 5Z4HW and operate on all bands, 160-10 meters using CW, SBB, RTTY, PSK31 and SSTV as often as possible. The location is the Diani Beach at the coast-line of Kenyanear Mombasa. QSL via his home callsign, direct or by the DARC Bureau. For more details and updates, visit: http://www.dl7df.com/5z/index.html

6V, SENEGAL. Seb, F8IJV, will once again be active as 6V7Q from Le Calao resort in Senegal between October 22nd and November 11th. Activity will be on 160-6 meters, operating mainly on SSB, possibly some Digital and CW too. He plans to take an Acom 1011 amplifier with him this time. Seb will also be active during the CQWW DX SSB Contest (October 29-30th). QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW.

FP, ST. PIERRE AND MIQUELON. Victor, VA2WDQ, will be active as FP/VA2WA from Miquelon (IOTA NA-032) between July 7-11th. Activity will be on 160-6 meters using mostly CW with some SSB (on the 17/12m bands). His main goal is to participate in the IARU HF Championship (July 9-10th) as a Single-Op/All-Band/CW/Low-Power entry. He will use a Kenwood TS-590S and probably one small transistors PA. Antennas will be verticals. All logs will be uploaded to LoTW and eQSL once he returns home.

HK0/M, MALPELO ISLAND (Update). According to thier Web page, Jorge, HK1R, have made plans to use the vessel "SEA WOLF" to sail the team to Malpelo for the 2012 HK0NA DXpedition. This ship makes frequent authorized sailings to Malpelo for diving expeditions and has accommodations for 16 people in independent rooms with air conditioning and bathroom. The Web page states, "Based on the conversations with them and the visits schedule by the Environmental Authority which controls the Island Access our most probable sailing date will be February 15, 2012." The team currently consists of Jorge/HK1R (Team Leader), Jahm/HK1T, Pedro/HK1X, Franz/DJ8ZB, Bolmar/HK1MW, Jaime/HK1N, Alexis/YV5SSB/6, Olli/OH0XX, Pedro/HK3JJH, Gregg/W6IZT, Dr.San/K5YY and Bob/K4UEE. The current QSL info is as follows: "The HK0NA DXpedition will support an on-line QSL service. The details of this service will be published once finalized. We will also support QSL&#65533;ing direct and our QSL manager information will be published prior to our departure. We will not accept cards through the bureau. Request for cards to be returned via the bureau can be made via our online QSL service at no charge." For more details and updates, visit the HK0NA Web pages at: http://hk0na.wordpress.com

IOTA NEWS.....
AS-102. Operators BM5AAX, BV1EL, BV2DD, BV2KI, BV2KS, BV2NT, BX2AB, BX2ABL, BX4AF, BX5AA, JH3GCN and 9M6YBG will be active as BV100 from Kigmen Island, Taiwan, during the RSGB IOTA Contest

(July 30-31st). QSL via BV2KI. For QSL info, operating schedule, log and award information, please visit their Web site at: http://www.bv100.tw/EN

EU-038. Operators Rene/ON6OM, Eddy/ON6ZV and Martin/ON7EG will be active as PA/ON4IPA from Texel Island between July 2-8th. Activity will be on 160-10 meters using SSB, RTTY and PSK31-63-125. QSL via ON6ZV. For more details, see: http://www.qsl.net/on6om/pa-on4ipa-eu038

EU-048. Operators Remi/F0GHK, Michel/F1SRC, Jean-Yves/F4EHM, Mickael/ F4FFZ, Gwena/F4FHZ, Chris/F5CBQ and Jean-Fran&#65533;ois/F6DZD will be active as TM2BI from Belle Ile (DIFM AT015) between July 28th and August 2nd. Activity will be on 80-2 meters with an entry in the RSGB IOTA Contest (July 30-31st). QSL via F6KPQ.

NA-039/ Since the Russian Robinson Club members rescheduled (RRC)
NA-070. their DXpedition to St. Matthew Island (see NA-232) to 2012, Yuri, N3QQ, will now activate Adak Island (NA-039) starting July 28th, as KL7RRC, and also participate during the RSGB IOTA Contest (July 30-31st). If he can find transportation, Yuri will also go to Rat Islands (NA-070) and operate as KL7RRC/p until August 8th, weather permitting. Activity from both locations will be on 40-6 meters using CW and SSB. QSL via N7RO, EU stations via UA9OBA.

NA-152. Chuck, KL7OH, has plans to activate Sarichef Island between August 1-15th. He will use 100 watts into a Carolina Windom. Dates are subject to change.

NA-232. (New IOTA Rescheduled!) Yuri, N3QQ, and other Russian Robinson Club members who were expected to activate St. Matthew Island, Alaska, as KL7RRC this summer, have now rescheduled their operation in 2012 (July 25th-August 15th). According to their Web page, the team has received the official permission from U.S.F.W.S. to go the island. Tim, NL8F, in Dutch Harbour, is currently looking for alternative transportation options. They mention that they have several spaces available on the boat and if you would like to participate in the expedition to St. Matthew Island, please Contact Yuri Zaruba, UA9OBA via QRZ.ru or send E-mail to n3qq@NA-234.com. For more details and updates, visit: http://www.na-234.com

NA-242. Operators Rick/K6VVA and Mike/K9AJ will activate for the first time ever Point Lay Barrier Island as K6VVA/KL7 between July 22-26th. QSL route is ONLY via N6AWD (direct or by the Bureau) - DO NOT send QSLs to K6VVA!!! Activity will be primarily CW on 40/30/20/17 meters. Dates may change slightly depending upon local WX. The objective is a minimum of 3 days of activity within the indicated date range. There is a slight possibility for a brief NA-172 activation as K9AJ/KL7 right

after NA-242 before they leave the North Slope of Alaska.
Updates will be posted to the "Latest News" section of the
NA-242 Expedition Web site: http://www.k6vva.com/iota/na242
Due to the possibility of polar bears at NA-242, they have
purchased electric bear fences, bear spray, and must hire
one or more local "Bear Guards" with heavy firepower for
24/7 protection. This will be a dangerous and extremely
costly IOTA expedition -- due mostly to the air transport-
ation of equipment. NA-242 in July is "The Main Event"
after K6VVA warmup expeditions to NA-184 (April), NA-066
(May with NI6T) and NA-091 (June with W6NV).

J7, DOMINICA. Mike, VE2XB, will be active as J79XB from Dominica (NA-101)
starting July 6th for several weeks. Activity will be on all bands and
possibly 6m. QSL via VE2XB (QRZ.com address). ADDED NOTE: Mike informs
OPDX that he will be heading to FP-land in August or Sept with a beam
and an amp.

KH6BZF PROPAGATION FORECAST/REPORT (June 27th-July 3rd)....
Jun 27 HN-AN SOLAR REFERENCE KEYS
Jun 28 AN --------------------
Jun 29 AN BN - Below Normal
Jun 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 01 AN LN - Low Normal
Jul 02 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 03 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Currently, plans are being made for a DXpedition to
American Samoa (KH8) to take place between November 17-28th, inclusive
for the CQWW DX CW Contest (November 26-27th) possibly as a SOAB, Multi-
Single, or Multi-2 category. Callsign mentioned is K8A. Operators will
be Scott/W4PA (owner of VIBROPLEX) and others. According to DX Magazine,
KH8 American Samoa is now in the top 50 "Most Wanted Countries" in Europe
on CW, digital modes, and the low bands. North American low band demand
for KH8 will be substantial. According to DX Summit, the last spot on
160m for a KH8 operation was in 2006. The K8A operation will focus on
CW and digital mode operation with the intent of reducing the overall DX
demand from Europe and the need for low band counters in North America and
elsewhere. The contest operation is secondary to the overall DXpedition
goal of reducing worldwide CW and digital mode demand for KH8 as a DXCC
counter. More details should be forthcoming.

M0, ENGLAND (Special Event). Phil, G3SWH, will be active on CW only
using the special callsign M0RSE over the weekend of July 2-3rd. Activity

will be on all bands from 80-10 meters. All QSOs are welcome. There is more information available at: http://www.m0rse.org
Look for the logs to be uploaded to LoTW after the operation.

MARITIME DX FORUM (MDF). Just a reminder that the Martime DX Forum will take place in Halifax, Nova Scotia, between August 5-6th, with an outstanding program including: John/ON4UN, Reg/VE7IG, Scott/W3TX, Tim/VE6SH and George/G4GRN/VE1GRN. However, for the first time they are also offering an opportunity for those living outside Canada's Maritime Provinces, and unable to join them in person, to participate in a Webinar version of the MDF. The Webinar presentation will happen in real time and allow participants to hear the speakers, view their visual material, and see the activity at the venue. The Webinar software system allows on-line participants to ask questions and make comments. Those living in time zones where joining them in real time is difficult will be able to download the program and view it at a convenient time. Program and registration details are on their Web site at: http://www.halifax-arc.org/mdf

PACIFIC DX NET (Time Change). Bill, VK4FW, informs OPDX that the Pacific DX Net meets every Monday, Wednesday and Friday (UTC day) on 14183 kHz at 0730 UTC. Net controllers will be VK4AN and VK7XX. Other net controllers are required, so if you would like to help, please contact Eddie, VK4AN at: vk4an@pacific-dxers.com

PY0F, FERNANDO DE NORONHA (Update/Reminder). Marcelo, PY2FN, will be active as PY0FO from Fernando de Noronha (SA-003) between July 2-9th. Activity will be on 160-6 meters CW only. He will use a Crushcraft R8 for 40-6m and possibly dipoles for 160/80m. Suggested frequencies are: 1814, 3514, 7014, 10114, 14014, 18084, 21014, 24894, 28014 and 50094 kHz. QSL via his home callsign, direct or by the Bureau. Logs will be uploaded to LoTW. Visit Marcelo's Web site at: http://www.py0fo.com.br

PZ5P QSL STATUS (USA). Vladislav, UA4LU, reports that "it is impossible to deliver to the addressee" the many direct QSLs sent to him from the USA for Serge's, RX3APM, April PZ5P activity. No real reason was given. He states to all the guys in the USA, if you did not receive a direct QSL via UA4LU, to please E-mail him at <ua4lu@mail.ru> for possibly having your QSL sent via the Bureau system.

S79UFT QSL STATUS. Maurice, F5NQL, reports that Norbert, F6AXX, states all direct QSL cards for the recent S79UFT operation (March/April 2011), received up to June 19th, have been answered and mailed.

QSL RECEIVED VIA LoTW: 9M2/KM9D, D44TUO, HC6EP, J79FCG, MS0INT, P43E, PJ2BVU, PJ6D, RV6ALI, S51MA, SA1A, SX3B, T5X, V25DD, V31XX, V44KAI, YI1RZ, YV4DYJ and ZD7XF

QSLS RECEIVED VIA MAIL: 3D2A, 4A4A, 5M2TT, 9H1XT, BU2AI, CN8NK, CY0/K8LEE, CY0/N0TG, CY0/N1SN, DU9RG, F9IE/VK3/P, HH2/HB9AMO, HH2/PA5M, J79FCG, JD1BMH, KG4EM, TG9NX, TJ3AY, TL0A, V44KJ, V5/DK1CE, VK9NN, VP2EMR, VP5/AC8W, VP8DMH/P, VP8ORK and ZK2A

QSLS RECEIVED VIA THE BUREAU: 3V3S, 5I3A, 5N7M, 9J3A, 9K2/SP4R, AI5P/VK9N, C21DL, DP1POL, FK/AI5P, FO/DL3APO, FR/F5UOW, FS/K9EL, NU1AW/KH6, OJ0W, OX8XX, T32AJ, TF/DL2JRM, TO3R, V5/DK1CE, VK9XX, VP8DIF, YI9PSE, YJ0MXJ, YJ0PX, Z21DXI, ZK3OU and ZK3YA

SILENT KEY. Alan, VK4AAR, informs OPDX that Dan Holloway, VK8AN, became a "Silent Key" (SK) last Monday, June 20th. Dan has had serious illnesses over the last several years but passed away due to severe pneumonia. Alan states, "I was proud to be Dan's QSL Manager for his numerous IOTA Dxpeditions to various island groups in Australian coastal waters His major long lasting effort was to Troughton Island (OC-154), from the 1990's until he went QRT from there until his last paper log entry at 1240z, 9th September, 2003. Dan is survived by his widow, Marion and many friends, both hams and others. He leaves his many family members who still live in Santa Barbara, CA." OPDX and its readers would like to sent out our deepest sympathy to the family and friends of VK8AN.

T6, AFGHANISTAN. Steve, W6EOD, is on active as T6SH (not T6EOD as first thought) from the Helmand Province. Activity will has been on 40 and 20 meters CW only, and using a KX1 and wire vertical. Steve is expected to be there until November. QSL via K1BV.

TF, ICELAND. Oleksiy, VE2XAA, will be active as TF/VE2XAA between July 6-11th. Activity will be on 160-6 meters using CW, SSB and RTTY, plus include an entry in the IARU HF Championship (July 9-10th) as TF4X. QSL TF/VE2XAA via his home callsign, and TF4X via G3SWH.

TX5, MARQUESAS ISLANDS. An international team of operators will be active from Hatiheu, Nuku Hiva (OC-027) between October 19-30th. Activity will be on all bands and modes, including an entry in the CQWW DX SSB Contest (October 29-30th). Operations mentioned are on 160-010 meters (including 30/17/12m bands) on CW, SSB and RTTY, using 4 stations on the air at the same time on different bands and modes. The following callsigns will be used:
TX3T – Activity between October 16-19th and November 1-4th, will be from Papeete, Tahiti (OC-046) -- before and after their Marquesas operation.
TX7M – The main callsign for their activity between October 19th and November 1st, will be from Hatiheu, Nuku Hiva (OC-027), Marquesas Island.
TX5A – Their callsign for the CQWW DX SSB Contest from Hatiheu, Nuku Hiva (OC-027), Marquesas Island.

Operators mentioned are Oleg/R3FA (leader), Alex/UT5UY (co-leader), Michel/FO5QB, Sergey/UX0HX, Max/UZ1HZ, Alex/US0KW, Andy/UU4JMG, Alex/UX0LL, Andy/RK7A, Leo/UA7A and Andy/RA6LBS. QSL Manager is Eugene, RZ3EC. There are three options to QSL - Bureau (using the OQRS), direct to QSL Manager and LoTW (All QSO(s) data will be placed into LoTW after Expedition is over). There is a survey available on their Web page for bands/modes needs. The team is looking for sponsors. For more details, visit the TX7M Web page at: http://www.tx7m.com

VQ5, TURKS AND CAICOS ISLANDS. Operators Bill/KX4WW, Noll/W9RN and Doug/W4OX will be active as VQ5X during the CQ WW DX SSB Contest (October 29-30th). Operation class TBD. QSL via W4OX or LoTW.

XU, CAMBODIA. Hiroo, JA2VWG, is expected to operate as XU7DDD from Sihanoukville between now and June 28th. Activity will be mainly on the HF bands and SSB. However, he is taking a 6 meter antenna. QSL via JA2VWG direct only.

YJ, VANUATU. Andy, P29CS, is now active as YJ8A from Efate Island (OC-035) until July 17th. QSL via M0URX.

YN, NICARAGUA. Mike, AJ9C, will be active from here between November 24th and December 5th. Callsign will be announced later. Activity will be on 160-10 meters using CW, SSB and RTTY. He also plans to be in the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL via LoTW. Also, look for him to be in the ARRL 160m Contest.

> Is gav cut?
No, Gav is not.
She is not what one would call "normal."
She and Mark live is some sort of fantasy world were rocks have "spirits"
and role playing games have become reality to them.
Mark has been unduly influenced by his alleged "witch" wife and goes along
with her every whim. This is proof that Mark has no mind of his own and is
so weak-willed that he lacks the ability to make his own decisions..
If one were to read Gav's blog it is glaringly obvious that Gav, like Mark,
has several mental problems.

I wonder if Gav is still living in a seperate home?
Mark once admitted that she refuses to live with Mark and his invalid
father.

Mark? Hint. Clean up your house and change your Dad's diapers.

606. Weekly Highlights of Solar and Geomagnetic Activity, 20 - 26 June 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-28 21:30:07 UTC
From: SWPC.Webmaster@noaa.gov

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
20 - 26 June 2011

Solar activity was very low to low. Region 1236 (N17, L=167,
class/area Ehi/350 on 15 June) produced a long-duration C7/Sf at
21/0325 UTC associated with an Earth-directed full-halo coronal mass
ejection (CME). Activity was at very low levels during 22 - 26 June
with occasional B-class flares from Region 1236 as it gradually
decayed.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during 20 - 22 June. Fluxes increased to
normal to high levels during 23 - 24 June. A further increase to
moderate to high levels occurred on 25 - 26 June.

Geomagnetic activity was at quiet to unsettled levels during 20 - 21
June. Activity increased to quiet to active levels during 22 - 23
June, with minor to major storm periods at high latitudes, due to a
coronal hole high-speed stream (CH HSS). A CME passage (from the
halo-CME observed on 21 June) also occurred early on 23 June with a
sudden geomagnetic impulse observed at Boulder at 23/0258 UTC (22
nT). Activity decreased to quiet to unsettled levels during 24 - 26
June as CH HSS effects subsided.

Forecast of Solar and Geomagnetic Activity
29 June - 25 July 2011

Solar activity is expected to be at very low levels until 03 July
with the return of old Region 1234 (S16, L=246). Activity is then
expected to be low followed by a further increase to low with a
chance for isolated M-class activity as old Region 1236 rotates back
on the visible disk.

No proton events are expected at geosynchronous orbit.
```

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high levels during 29 June - 01 July. A decrease to normal to moderate levels is expected during 02 - 05 July followed by an increase to moderate to high levels during 06 - 07 July due to a CH HSS. Fluxes are expected to decrease to normal to moderate levels during 08 - 19 July. Fluxes are expected to increase to moderate to high levels during 20 - 23 July following the CH HSS.

Geomagnetic field activity is expected to be at quiet to unsettled levels during 29 - 30 June. A CH HSS is expected to boost activity to quiet to active levels during 01 - 03 July. Mostly quiet levels are forecast for 03 - 07 July as the CH HSS subsides. An increase to quiet to unsettled levels is expected during 08 - 09 July as another CH HSS disturbs the field. Quiet levels are expected from 10 - 16 July. Another recurrent CH HSS is expected to become geoeffective on 17 July bringing quiet to unsettled conditions. A further increase to active levels with a chance for isolated minor storm periods at high latitudes is expected during 19 - 21 July followed by quiet to unsettled levels on 22 July as the effects from the CH HSS subside. Quiet levels are expected from 23 - 25 July.

607. [DXNL] DXNL 1734 (Jun 29, 2011)

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-28 23:44:57 UTC
From: Robert Busch - DL7VOA <dl7voa@gmx.de>
Message-ID: <5917719531.20110629013845@dxhf.darc.de>

DXNL 1734 - Jun 29, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

EDITOR'S NOTE:

I have been the editor of the DX Newsletter for the past four and a half years and this work has always made me a lot of fun. I had good conversations with the readers and the feedback was mainly positive. Constructive criticism has been taken very seriously at all times and if possible I used it to improve the quality of the bulletin. Now, the time has come to focus on my other hobbies and to get back to my radio as well. However, I am still available occasionally as a vacation replacement.

I want to say thank you to all readers for your support, all YLs, XYLs and OMs for sending me information and also to my colleagues Fredy,DE0MST, and Ric,DL2VFR, without their help no IOTA info would be available in the DXNL, and last not least also to Rob,DL7VOA, who has translated the bulletin into English and distributed both the German and English bulletins always very reliably.

My successor will be OM Alexander Derichs, DG8KAD. Please support him with information just as you have supported me. Only then it is guaranteed that you can find the DX Newsletter on your station's table every week.
I wish Alexander good luck with this time consuming work servicing the DX community worldwide.

Vy 73 de Helmut, DL7MAE!

CU - AZORES ISLANDS, EU-003
Angelo,DM1AC, Carsten,DM1CG, and Joachim,DL9MS, will be active from the Azores Island Sao Miguel (EU-003) as CR2EME. They will work not only via EME but on all HF bands from Jun 29 until Jul 5. QSL via DL9MS.

EA6 - BALEARIC ISLANDS, EU-004
Michael,EA6/DL4ABO, will be QRV in holiday style working with QRP in

CW only from Mallorca (EU-004) from Jul 1-5. Listen for him on 20m and 17m during the evening hours. QSL cards should be sent to his homecall.

J2 - DJIBOUTI
John,F4FUC, will show up as J28UC starting in July and will stay in Djibouti until summer 2013. Activities are planned on 40m-10m using a TS480 with 100 watts, a vertical (20/15/10m) and dipoles for 40/20/10m. QSL via homecall.

OJ0 - MARKET REEF, EU-053
OJ0/SA5BJM (CW), OJ0/SA5BCG (digital/SSB), OJ0/SA0BJF (digital/SSB) and OJ0/SA5BDS (SSB) are going to become active from Market Reef (EU-053) on 80m-2m between Jun 30 and Jul 2. They are all members of the QRP radioclub SA2ME. Find more information at http://www.sa2me.blogspot.com

PY0/F - FERNANDO DE NORONHA, SA-003
Marcelo,PY2FN, will be QRV as PY0FO from Fernando de Noronha (SA-003) from July 2-9. He works only in CW on 160m-6m on following preferred QRGs (if necessary he works split and listens 2-5 kHz up):
1814, 3514, 7014, 10114, 14014, 18084, 21014, 24894, 28014, 50094 kHz.
Special emphasis will be put on the 6m band.
QSL via bureau, direct or LoTW to PY2FN.
See also: http://www.py0fo.com.br

SV5 - DODECANESE, EU-001
Bertl,DJ5MN, writes: "I am spending the holidays with my family on Rhodos from Jun 30 until Jul 10. I will work in CW and SSB on 160m-6m signing SV5/DJ5MN with 100 watts and a vertical for HF and 25 watts and yagis for 2m and 70cm. QSL only via the DARC bureau, I don't need your dollars."

T6 - AFGHANISTAN
T6SH is the callsign of Steve,W6EOD, who is based in the province Helmand until November. Steve works only in CW on 20m and 40m using a KX1 transceiver and a vertical. QSLs via bureau or direct to K1BV.

XU - CAMBODIA
Barry,ZL1DD, will stay in Sihanoukville from Jul 1-7 and hopes to hit the airwaves as XU7ADD.

YJ - VANUATU
YJ8A is Andy,P29CS, who activates Efate Island (OC-035) until Jul 17. QSLs also via bureau to M0URX.

5N - NIGERIA
Valery,5N6/YL2SW, is back in Nigeria since Jun 16 and will stay there until Jul 15. Besides working in CW and SSB he also wants to try RTTY. Valery has a very unstable power grid so it is not unusual that he disappears right in a QSO.
Please send your QSLs via bureau or direct to his homecall.
Russian stations should send their QSL via RV3MQ.

7Q - MALAWI
Malcolm,GM3TAL, is part of the "Scottish Scout New Horizons Expedition"
and will have his QTH at the Malawi National Scout Campsite near Zomba.
You can expect activities as 7Q7MH in CW/SSB on the high bands and 6m
during the month of July. QSLs unfortunately only direct via G0IAS.
See also: http://www.7q7mh.org

CANADA, SPECIAL EVENT STATION
The "Grand Opening" of the Aeradio fair and the historical museum in
Teslin/Yukon are celebrated by local HAMs with the special callsign
VY1T between Jun 29 and Jul 1. QSL via VY1EEN.

ENGLAND, SPECIAL EVENT STATION
Phil,G3SWH, is using the special event callsign M0RSE only in CW on
80m-10m on Jul 2/3. QSLs via bureau, direct or LoTW to G3SWH.

NORWAY, SPECIAL EVENT STATION
The special event station LJ2T is situated at the "Signals Museum" of
the Norwegian forces near Lillehammer. Activities will take place
in CW, SSB, FM and digital modes on 160m-70cm from Jun 30 until Jul 3.
QSLs via LA5EAA.

SILENT KEYS: Dan Holloway,VK8AN, wellknown IOTA DXpeditioner, passed away
after a long illness on Jun 20.
Other Silent Keys are: Francisco Campos Crespo (EA4BT),
Johnny Roche (EI5CJB), Paddy McGorman (EI7BS), Tim Haynes (G8PTP),
Erkki Korpelainen (OH1DG), Raimo Molarius (OH7QC) and
Desmond Roy Hearsum (W8PR).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 1: RAC Canada Day Contest
Jul 2: Concurso Internacional de Radioamadorismo "Comandos 2011"
(see: http://www.rep.pt)
Jul 2/3: Independence of Venezuela Contest
Jul 2/3: DL DX RTTY Contest
Jul 2/3: Original QRP Contest
Jul 3: DARC 10m Digital Contest Corona

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-137, BY, Zhejiang Province North Group: A large Chinese team will show up
as BY4QA/5 from Tantou Shan between Jun 30 and Jul 3. They will work
mainly in SSB but also in CW. QSLs via BD4QK (bureau/direct).

AS-160, BY, Shandong Province North West Group: BY1RX/4 will be QRV from the
rather rare IOTA group Fu Rong from Jul 2-9. QSL via BA4TB.

EU-008, GM, Inner Hebrides: For a short time 2M0LSR/m is working from Skye
on Jul 1. QSL via 2E0LSR (bureau/direct).

EU-010, GM, Outer Hebrides: 2E0LSR and 2E0DJR will be QRV as 2M0LSR/A from
North Uist from Jul 1-8. They also plan some trips to other islands
and will show up as 2M0LSR/p from South Uist and Eriskay (Jul 3) and
from Benbecula and Grimsay (Jul 4). QSL via 2E0LSR (bureau/direct).
See also: http://2e0lsr.wordpress.com

EU-034, ES, Hiiumaa/Saaremaa/Laanemaa County Group: DL1FT is visiting
Saaremaa from Jul 3-9 and wants to work as ES0FTZ from there.
QSL via DL1FT (bureau/direct). Check also: http://www.dl1ft.de

EU-055, LA, Sogn og Fjordane/Hordaland/Rogaland County group: LA9RY is QRV
mainly in SSB on 80m-2m from Stord until Jul 17.

EU-064, F, Pays de la Loire Region Group: F/G5XW is spending his holidays
in Noirmoutier from Jul 4-9. QSLs only direct, see QRZ.com.

EU-135, SM, Vasterbotten County Group: SF2X/p is working sporadically from
Ledskar from Jul 1 until Aug 1. QSL via SM5EFX (bureau/direct).

NA-099, KP4, Puerto Rico: N2EFN announced to become active from Culebra
between Jun 30 and Jul 1. QSL see QRZ.com.

NA-213, K, Alabama State group: K5KUA/4 is QRV from Dauphin from Jul 4-10.
QSL via K5KUA (bureau/direct).

OC-165, 9M8, Sarawak's Coastal Islands: The announced 9M8RC DXpedition to
Talang Talang Besar has been postponed until Jul 2/3. QSL only direct.

IOTA information

If you still need a confirmation from ZS0PI you can send your QSL via
bureau or direct to DJ4LK. The cards are credited for IOTA AF-070 now.
His address is: DJ4LK, Roland Hagmann, St.-Jakobus-Str. 8,
73494 Rosenberg, Germany

The IOTA 50th Anniversary Marathon (Jan 1, 2012 until Jan 31, 2013)
has been extended by a SWL part. The rules will be published on the
IOTA website of the RSGB soon: http://http://www.rsgbiota.org

==> + TEXAS HAMS INJURED AT FIELD DAY SITE

On the morning of June 26, two Texas radio amateurs -- Danny Caldwell,
AD5IP, of Kamay, and Mike Byrne, AE5CO, of Iowa Park -- received
electric shocks as they took down an inverted V antenna. According to
Wichita County Emergency Coordinator Larry Ballard, KE5KNV, the two
were taking part in Field Day as part of the Wichita Amateur Radio
Society (WARS <http://www.n5wf.org/>).

"The Wichita Amateur Radio Society decided to terminate the
participation in the exercise at 10 AM on Sunday, due to extreme heat
and gusty wind conditions," Ballard told the ARRL. "Danny and Mike were
injured while lowering the center pole of the inverted V dipole antenna
```

to the ground. They were knocked to the ground when a guy wire, or the antenna lead-in, was hit with very high wind gust that blew it into a high [power] line wire." According to reports from witnesses, winds were gusting up to 40 miles per hour.

Ballard said 911 was called immediately and a rescue van arrived in a matter of minutes. The Fire Rescue Team determined that the two men were stable and they were transported to United Regional Hospital in Wichita Falls. Caldwell received CPR at the scene and was air lifted to Parkland Hospital in Dallas. Byrne was transported to Parkland later by ambulance.

"This was the second year that the Wichita Amateur Radio Society had set up at Oscar Park in the City of Iowa Park for Field Day event," Ballard explained. "The antennas were located in the same location as the prior year, using the same safety practice of locating the antennas a safe distance from power lines and structures. The inverted V dipole antenna had yellow caution tape, marking guy wires and antenna end locations."

Ballard said that Byrne was released from the hospital on Monday, June 27 and was resting at home. Caldwell, who suffered more serious injuries, was released a day later.

==> + ARRL FIELD DAY: THERE'S STILL MORE TO DO FOR FIELD DAY!

The radios, antennas and the food might be put away after ARRL Field Day 2011, but there is still plenty of work to do to close the books on this annual operating extravaganza. According to ARRL Field Day Manager Dan Henderson, N1ND, the fun may be over, but many details need to be completed. "Thousands of Field Day entries will be received at ARRL headquarters over the next 30 days," he explained. "The focus now is doing what is necessary to make sure the individual and group Field Day summaries and submissions are handled accurately and efficiently." Read more here <http://www.arrl.org/news/there-s-still-more-to-do-for-arrl-field-day>.

==> + ON THE AIR: THE IARU HF WORLD CHAMPIONSHIP -- COMING TO A RADIO NEAR YOU

Radiosport fans are gearing up for the summer's biggest HF competition: the IARU HF World Championship. This 24 hour long contest is the highlight of the summer HF contesting season, affording plenty of opportunities to work DX from all around the globe on CW and SSB, as well as make QSOs with many IARU officials and Member-Society club stations. "The IARU HF World Championship is one of Radiosport's unique events," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's the only major contest that uses International Telecommunication Union (ITU) zones as part of the exchange, and the only contest that gives special multiplier status for IARU Member-Society stations and IARU officials." The IARU HF World Championship runs from 1200 UTC Saturday, July 9 through 1200 UTC Sunday, July 10. Read more here

<http://www.arrl.org/news/the-iaru-hf-world-championship-coming-to-a-radio-near-you>.

==> + AMATEUR RADIO IN SPACE: ISS SURVIVES NEAR MISS OF SPACE JUNK

Just after 8 AM (EDT) on Tuesday, June 29, the six residents of the International Space Station (ISS) climbed into two Soyuz space capsules as an unidentified object hurtled past them at a speed of 29,000 miles per hour, missing the space station by only 1100 feet. This was only the second time in the 10 year history of people living on the space station that the crew needed to take such precautions. If the station had been hit, the crew could have quickly undocked from the ISS and returned to Earth via the space capsules. Currently, there are four hams on board the ISS: Ron Garan, KF5GPO (NASA), Mike Fossum, KF5AQG (NASA), Sergei Volkov, RU3DIS (RKA <http://www.roscosmos.ru/main.php?lang=en>), and Satoshi Furukawa, KE5DAW (JAXA <http://www.jaxa.jp/index_e.html>). The other two cosmonauts -- Andrey Borisenko and Alexander Samokutyaev -- are not licensed. Read more here <http://www.arrl.org/news/iss-survives-near-miss-of-space-junk>.

==> + SATERN GETS NEW DIRECTOR

After serving as Director of the Salvation Army Team Emergency Radio Network (SATERN) for more than 23 years, Major Patrick E. McPherson, WW9E, is stepping down. Major Rick Shirran VE3NUZ, of Toronto, Ontario, has been appointed as the new Director. McPherson -- an ARRL member -- founded SATERN in June 1988. Shirran, who received his Amateur Radio license in 1975, served 12 years as a member of the Royal Canadian Navy as a Radio Operator and Communications Technician. He is a Commissioned Officer/Pastor in The Salvation Army Canada and Bermuda Territory. Prior to his appointment, Shirran served as the Emergency Disaster Services Director and SATERN Director for The Salvation Army in Canada and Bermuda Territory. Read more here <http://www.arrl.org/news/satern-gets-new-director>.

==> SUPPORT ARRL: MEET THE ARRL SECOND CENTURY CAMPAIGN COMMITTEE

At the end of April, David W. Brandenburg, K5RQ, of Osprey, Florida, agreed to chair the ARRL Second Century Campaign. This multi-million dollar campaign will focus on building the ARRL Endowment to further secure resources to fund the League's commitment to the future. One important focus of the campaign includes the development of a robust national program geared at young people, enabling them to experience and develop skills in scientific and technological discovery through Amateur Radio. Read more here <http://www.arrl.org/news/meet-the-arrl-second-century-campaign-committee>.

==> AT THE WORKBENCH: HOMEBREW CHALLENGE REMINDER

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members.

Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more.

For 2011, the ARRL has issued a challenge <http://www.arrl.org/homebrew-challenge> to build a transceiver in celebration of the (slow) return of sunspots. This challenge will be in two parts and hams can enter either or both options:

- Option 1: A single band 25 W SSB and CW transceiver for 10 or 6 meters, with a prize of $200.
- Option 2: A 25 W SSB and CW transceiver that can be switched between 10 and 6 meters, using one or two switches, with a prize of $300.

Instead of challenging entrants to make the transceiver at the lowest cost, the ARRL will instead challenge builders to provide the highest quality, best performance and most features within the cost target of $150 for Option 1 and $200 for Option 2. In addition to the cash prize, the winners of these challenges will have articles describing their designs in QST and will receive the usual page rate for the published articles. Additional entrants who meet the minimum requirements -- and have interesting design features -- may also be considered for QST or ARRL Web articles.

Entries for either option must be received at ARRL Headquarters no later than November 1, 2011. To be considered, each entrant must submit a working transceiver that is suitable for testing in the ARRL Lab and for on-the-air judging by the ARRL staff judges. Documentation required includes a priced parts list indicating the source and purchase price of each part, an article draft including a design description, construction hints, alignment instruction, block diagrams and schematic diagrams. Photographs may be provided, but final magazine photos will be taken by ARRL staff.

For more information, including specific requirements and evaluation criteria, please visit the ARRL Homebrew Challenge web page <http://www.arrl.org/homebrew-challenge>.

==> + SPACE WEATHER PREDICTION CENTER TO CONTINUE BROADCASTS ON WWV AND WWVH

In April 2011, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) informed the public that as of September 6, 2011, it would no longer broadcast its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. The ARRL has now learned that the SWPC has changed its mind and will keep broadcasting these messages

that inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Due to listener feedback, the SWPC is considering updating the broadcast; in addition to providing the current daily solar flux at 2800 MHz, the SWPC is evaluating adding more frequent observations at 2695 MHz. According to the SWPC website <http://www.swpc.noaa.gov/wwv/>, other improvements to the message content will also be evaluated.

==> ARRL SURVEY UNDERWAY

The ARRL has asked an independent research company specializing in survey research to conduct a survey of Amateur Radio operators. Readex Research <http://www.readexresearch.com/> -- headquartered in Stillwater, Minnesota -- has conducted similar studies for ARRL in the past, including QST readership studies and large national surveys. This most recent survey is being conducted by mail and e-mail, and includes representative populations of Amateur Radio operators from among US and international ARRL members, as well as non-member FCC licensees. While not every member will receive a survey, participation from those individuals who are selected is critical for the success of this project. Responses will be kept confidential and only used in tabulation with others; no data about survey participants -- including contact information -- will be shared with anyone. Please contact ARRL <http://www.arrl.org/contact-arrl> if you have any questions about the survey.

==> SOLAR UPDATE

Tad "Until the Sun comes up over Santa Monica Boulevard <http://www.youtube.com/watch?v=I6zIEfSxqkg>" Cook, K7RA, reports: The predicted Field Day geomagnetic storm never appeared, although conditions were unsettled leading up to last weekend. The planetary A index was 7 on Saturday and Sunday, while the mid-latitude A index numbers were 5 and 6. The average daily sunspot numbers for the week were down 13 points compared to the previous week, and average daily solar flux was off by more than 7 points. The predicted solar flux for the near term is quite a bit lower than recent numbers; the forecast shows solar flux at 87 for June 30-July 4, then 85 on July 5-7, 88 on July 8-9, 92 and 96 on July 10-11, and 100 on July 12-15. The expected planetary A index is 5, 8, 10, 12 and 8 on June 30-July 4, 5 on July 5-7, 7 on July 8-9, and 5 again on July 10-18. Look for more information on the ARRL website on Friday, July 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sheryl Crow's All I Wanna Do (Is Have Some Fun) <http://en.wikipedia.org/wiki/All_I_Wanna_Do_%28Sheryl_Crow_song%29>.

==> + AMATEUR RADIO AMOUR: DO WE GET BONUS POINTS FOR THIS?

When you think about ARRL Field Day, a few things come to mind:
food, radios, food, antennas, food and friends. And food. But one
couple took things a little bit further when they got married at their
Field Day site. Kevin Shissler, K1FQ, and Debra Hubbard, N1FQ, both of
Cherryfield, Maine, love Field Day so much that they decided it was the
perfect place to share their love for each other -- and for Amateur
Radio. Wearing their 2011 ARRL Field Day shirts, they tied the knot on
June 25 in Deblois, Maine at the shared Field Day site of the Ellsworth
Amateur Wireless Association (EAWA <http://eawa.org/>) and Narraguagus
Bay Amateur Radio Club. In April 2010, Hubbard donated 60 percent of
her liver to co-worker Jan Watson, and now Watson had her chance to
return the favor -- she officiated the wedding.

==> + ARRL TO CLOSE IN OBSERVANCE OF FOURTH OF JULY

ARRL Headquarters will be closed in observance of Independence Day
on Monday, July 4. There will be no W1AW bulletin or code practice
transmissions <http://www.arrl.org/w1aw-operating-schedule> that day.
League Headquarters will reopen Tuesday, July 5 at 8 AM Eastern
Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK ON THE RADIO

This week:

- July 1 -- RAC Canada Day Contest
- July 2-3 -- Venezuelan Independence Day Contest; DL-DX RTTY Contest;
PODXS 070 Club 40 Meter Firecracker Sprint (local time)
- July 3 -- DARC 10 Meter Digital Contest
- July 4-5 -- Michigan QRP July 4th CW Sprint
- July 4-10 -- 10-10 International Spirit of 76 QSO Party
- July 5 -- ARS Spartan Sprint

Next week:

- July 8 -- QRP Fox Hunt
- July 9 -- FISTS Summer Sprint
- July 9-10 -- IARU HF World Championship
<http://www.arrl.org/iaru-hf-championship>
- July 10 -- SKCC Weekend Sprint; ARCI Summer Homebrew Sprint
- July 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 2 -- ARRL Eastern Pennsylvania Section Convention

610. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2011-07-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1309500001@panix.com>
Source record: 4400
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Amateur Radio Newsline(tm) Report 1768 - July 2 2011

Amateur Radio Newsline report number 1768 with a release date of Friday, July 2, 2011 to follow in 5-4-3-2-1.

The following is a QST. A New York State representative introduces anti distracted driving legislation in Congress. Will it affect amateur radio? Also, Alberta Canada get a strange exemption from a new distracted driving law set to go into effect this fall, two people are held in connection with the death of a Wisconsin ham, the U-S Supreme Court to review the so-called safe harbor for children broadcasting rule and in the future the time on your clock may vary. Find out what we mean on Amateur Radio Newsline(tm) report number 1768 coming your way right now.

RADIO LAW: ANTI DISTRACTED DRIVING MEASURE INTRODUCED IN US HOUSE OF REPRESENTATIVES

Federal legislation to ban use of handheld phones and other mobile devices while driving has been introduced in the United States House of Representatives. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

According to published news reports, Representative Carolyn McCarthy of New York said the legislation titled the "Safe Drivers Act of 2011" would direct the Department of Transportation to set a national standard to prohibit drivers from using hand-held mobile devices, except in certain emergency situations. The legislation, as now proposed, states a handheld device would at this time not include voice-operated, vehicle-integrated, or hands-free devices that allow an individual to operate that device without the use of either hand -except to activate or deactivate a feature or function.

In addition to developing a national handheld ban, the legislation would also require the Department of Transportation to conduct a study on all aspects of distracted driving. In particular, the study would look at cognitive distraction which involves whether drivers can still be dangerously distracted while using mobile phones even when they are operated with hands-free devices or voice commands.

Within two years of the proposed law's passage, the Department of Transportation would be required to report on its findings and possibly tighten its restrictions even further on the use of all mobile device used in vehicles. States that did not comply with the Federal government's standard within two years would be penalized by having 25% of their federal highway funding withheld.

It's unknown whether or not the use of handheld push-to-talk microphones used by two-way radio users such as police, fire, delivery services, CB operators and hams would be exempted from McCarthy's proposed national ban.

For the Amateur Radio Newsline, I;m Bruce Tennant, K6PZW, in Los Angeles
--

The complete text of the proposal as currently written is available for download in pdf format at tinyurl.com/3w63f9t (Detroit Free Press, Infrastructurist.com, SFGte.com, others)

**

RADIO LAW: ALBERTA CANADA HAMS GET TEMPORARY EXEMPTION FROM DISTRACTED DRIVER LAW

Hams in Alberta Canada have received a kind of strange dispensation from a new distracted driver law set to take effect on September 1st. The new statute will restricts drivers from using hand-held cell phones, texting or doing emailing using electronic devices like laptop computers. It also bans drivers from using video games, cameras, video entertainment displays and programming portable audio players, entering information on GPS units, reading printed materials in the vehicle writing, printing or sketching, and performing any form of personal grooming.

However, Alberta hams and other operators of two-way radio gear have been granted a temporary reprieve. This, in the form of an exemption that says any an individual who holds a Canadian radio operator certificate issued under the Radiocommunication Act may drive or operate a vehicle on a highway while holding, viewing or manipulating a 2-way radio communication device.

So whats the catch? It comes in Section 5 of the new law. It says that for the purposes of ensuring that this Regulation is reviewed for ongoing relevancy and necessity, with the option that it may be re-passed in its present or an amended form following a review, this Regulation expires on June 1, 2016.

The bottom line: It appears as if Alberta Province ham radio operators and other licensed two-way radio users don't create problems for 5 years, the exemption may be extended for many years to come. (VE6TEQ, VA6GCT via QRZ.com)

**

RADIO LAW: TWO HELD IN CONNECTION TO MURDER OF WISCONSIN HAM

Two people are being held in connection with the murder of John Aegerter, WA9GAR, of Brookfield, Wisconsin. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Authorities in Brookfield, Wisconsin have ordered Tommy V. Douyette, held on $750,000 bail on suspicion of first-degree intentional homicide and Lynn M. Hajny held on $500,000 bail on suspicion of first-degree intentional homicide, party to a crime. This in the death of 63 year old John Aegerter, WA9GAR.

Aegerter's body was discovered by Brookfield police after officers were asked by one of his employees to go to his home check on him because he had not shown up for work. His body was found face down in the garage. His ankles were tied with a black electrical cord, and a white electrical cord was around his neck. A sleeping bag had been placed partially over the body. According to court records Aegerter may have been strangled or had his neck broken during the attack at his home in a dispute over money.

Authorities said that they could not comment on what led them to arrest Douyette and Hajny. However, court records indicate that Hajny's cousin called police and told them Hajny had telephoned her and told her she had killed someone. Sometime after that call, Hajny and Douyette showed up at the woman's home and said they had been at Aegerter's home. Hajny then told her cousin Aegerter was in the garage "dead with his feet tied," and that she had taken his house and car keys, $75 in cash from his wallet and his credit card. Hajny's husband, Albert, at one time was employed by Aegerter, and Hajny had asked him about money he owed her husband, court records state.

Friends of John Aegerter say that he was an intelligent businessman who collected antique radio transmitters and other communications equipment. Jack Hughes, identified in news articles as a fellow ham radio operator is quoted as saying that Aegerter was proud to have built up his own companies. That at age 63 was a workaholic who still climbed his towers to maintain them rather than hiring others to do it.

Another friend identified as Keefe John said WA9GAR developed one of the first mobile data communications systems used in police squad cars.

At airtime, formal charges against Doyoutte and Hajny were pending.

For the Amateur Radio Newsline, I'm Bill Pasterenak, WA6ITF, in the newsroom in Loa Angeles.

--

Authorities say that an autopsy was being conducted on Aegerter remains to determine the exact cause of death. Aegerter, who lived alone, owned a communications business and several radio towers used by cellular telephone, pager and two-way radio companies. More on this story is on

line at http://www.jsonline.com/news/waukesha/124418999. html (KM6X, K9KHJ, jsonline.com)

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WA2EHL repeater serving Burlington New Jersey.

(5 sec pause here)

**

ENFORCEMENT: FCC ISSUES NOTICE OF UNLICENSED OPERATION TO CALIFORNIA CORPORATION

A major shopping center in California has come under FCC scrutiny for allegedly operating a repeater without proper licensing. Don Wilbanks, AE5DW, has the details:

--

The FCC's Los Angeles Office has issued a Notice of Unlicensed Operation to the Irvine Company which operates the Irvine Spectrum Center in California. This, after the commission received information that an unlicensed repeater was operating on a frequency pair 462.5875 and 467.5875 MHz in the Irvine area.

Back on April 27th an agent from the FCC's Los Angeles office confirmed by direction finding that radio the signals were emanating from the Irvine Spectrum Center. An inspection determined that portable radios used by the maintenance staff were simultaneously retransmitted on 462.5875 MHz by a Motorola Radius repeater. The Commission's records show that no license had been issued for operation of a radio station at this location on 462.5875 MHz.

It should be noted that the frequencies 462.5875 MHz and 467.5875 MHz are only available for use under the Family Radio Service. The repeater at the Irvine Spectrum Center could not legally operate on FRS frequencies because it does not meet the FCC's technical regulations for F-R-S operation and therefore was not certified for use under the Family Radio Service rules.

The regulatory agency's notice warned the Irvine Company to immediately cease operation of the illegal repeater station. It also gave the Irvine Company 10 days from the June 3rd date of the Notice of Unlicensed Operation to respond and provide any evidence that it has any form of authority to operate on those frequencies as granted by the FCC.

Im Don Wilbanks, AE5DW, reporting for the Amateur Radio Newsline.

--

At airtime, any response made by the Irvine Center to the FCC has not been made public by either entity. (FCC)

**

RADIO LAW: US SUPREME COURT WILL REVIEW FCC AUTHORITY IN SAFE HARBOR PROGRAMMING CASES

The Supreme Court says that it will review the First Amendment fight over what broadcasters can put on the airwaves when young children may be watching television. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

A June 27th release says that the justices will re-examine appeals court rulings that threw out the Federal Communications Commission's rules against the isolated use of expletives as well as fines against broadcasters who showed a woman's nude buttocks on a 2003 episode of ABC's "NYPD Blue."

In a landmark 1978 decision, the court upheld the FCC's authority to regulate both radio and television content, at least during the hours when children are likely to be watching or listening. That period includes the primetime hours before 10 p.m.

For many years, the FCC did not take action against broadcasters for one-time uses of curse words. The policy stemmed from the 1978 decision that upheld the FCC's reprimand of New York radio station WBAI for airing a George Carlin monologue containing a 12-minute string of expletives in the middle of the afternoon. This is when the FCC created the so-called safe harbor hours prohibiting the airing this type of material when youngsters were likely to be listening to the radio or watching television programming.

The "NYPD Blue" episode led to fines only for stations in the Central and Mountain time zones, where the show aired at 9 p.m.. This was inside the safe harbor child-friendly hours than the show's 10 p.m. time slot in the East and 3 hour delay in the Pacific time zone.

Another part of the case that involves fleeting expletives involving the awards shows has been to the high court before. Three years ago, the justices narrowly upheld the policy, but in a ruling that pointedly avoided dealing with First Amendment issues. Instead, the court directed the appeals court to undertake a constitutional review.

The Obama administration objected that the appeals court findings in these cases had in essence stripped the FCC of its ability to police the airwaves on matters dealing with adult language that was not suitable for children's ears and not video that parents would likely find objectionable for youngsters to see. On the other side, the television networks claim that the FCC's long-time safe harbor for children who might see such programming policy is outdated. This is because it applies only to broadcast television, leaving unregulated

the same content if transmitted on cable TV or over the Internet.

For the amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching this case from Scottsdale, Arizona.

--

No date was given for arguments before the court to begin nor is it known how long it might take for the justices to render their opinion. (Published news reports)

**

NAMES IN THE NEWS: VE3NUZ NAMED NEW DIRECTOR OF SATERN

Some names in the news. First up is Major Rick Shirran, VE3NUZ, of Toronto, Canada, who has been appointed as the new Director of the Salvation Army Team Emergency Radio Network.

Major Shirran obtained his amateur radio license in 1975. He served 12 years as a member of the Royal Canadian Navy as a Radio Operator and Communications Technician. He is a Commissioned Officer and Pastor in The Salvation Army Canada and Bermuda Territory. Prior to his appointment, Shirran served as the Emergency Disaster Services Director and SATERN Director for The Salvation Army in Canada and Bermuda Territory.

Shirran replaces Major Patrick McPherson, WW9E, who founded the Salvation Army Team Emergency Radio Network back in 1988. (SATERN, ARRL, Southgate, Others)

**

NAMES IN THE NEWS: VE3FFK APPOINTED AS RAC ADVISOR TO NATIONAL FIELD SECRETARIAT

Mike Kelly VE3FFK has joined Radio Amateurs of Canada as an advisor to the RAC National Field Organization Secretariat. With a wealth of emergency preparedness knowledge and experience, Radio Amateurs of Canada says that Kelly is regarded as a much needed presence in the Ottawa area in dealing with both the Federal and Provincial governments on matters relating to Wireless Radio Interoperability.

According to the RAC press release, Kelly has had a long standing relationship with the Canadian Emergency Management College and is the "go to" guy to be registered for their training programs. He is also a regular volunteer at Radio Amateurs of Canada headquarters in Ottawa. (RAC)

NAMES IN THE NEWS: KM0A AWARDED ARRL FRED FISH MEMORIAL AWARD NUMBER 4

A word of congratulations to Mark Ammann, K-M-Zero-A of Florissant, Missouri who has been awarded the ARRL Fred Fish Memorial Award #4.

According to an announcement from Contest Branch Manager Sean Kutzko, KX9X, Ammann submitted the final batch of QSLs to ARRL about a week or so ago and the cards were approved by both Kutzko and ARRL Awards Branch Manager Bill Moore, NC1L. More information on the Fred Fish Memorial Award is on-line at www.arrl.org/FFMA (VHF Reflector, KX9X)

**

NAMES IN THE NEWS: W5KUB TO NETCAST 2011 HUNTSVILLE HAMFEST

And Tom Medlin, W5KUB, says that he will once again be netcasting live from the 2011 Huntsville Hamfest in Alabama on August 20th nand 21st.

This is a large hamfest that pulls many people from not only the South-Eastern states but also from across the entire United States. As is usual, Tom says that he will have prizes for his viewers. He adds that as this is an all indoor hamfest at the famed Von Braun Center, it should have perfect connectivity to enable him to stream the event with what he terms as great quality video.

Toms netcast from the Huntsville Hamfest complete with ongoing chat-room will be carried live at w5kub dot com. If you cannot be there in person, this is definitely the next best way to take part. (W5KUB)

HAM HAPPENINGS: ARNEWSLINE LOOKING FOR SPEAKERS FOR HAM RADIO TOWN MEETING IN TORRANCE CALIFORNIA ON SEPTEMBER 10

Amateur Radio Newsline will be hosting a 90 minute Ham Radio Town Forum on Saturday, September 10th at the 2011 Southwestern Division Convention. This will be a reprise of the highly successful "How to Make a Ham Radio Video in the 21st Century" conference held at the Dayton Hamvention several weeks ago.

We are currently looking for speakers from within the Southwestern Division or others who may be visiting the area and who work in the T-V or film industries to speak at this session. If you are interested in being a part of this session please contact us by e-mail to Newsline (at) arnewsline (dot) org.

This years Southwestern Division Convention runs from Friday, September 9th to the Sunday the 11th. The venue is the Marriott Torrance South Bay, 3635 Fashion Way, Torrance, California. More about it is on-line at www.hamconinc.org. We hope to see many of you there. (ARNewsline(tm))

EMERGING TECHNOLOGY: ALE HFN REACHES 4 YEARS OF CONTINUOUS OPERATION

The Global Automatic Link Establishment High Frequency Network has set a new time on the air record. This, by operating continuously on all international amateur radio shortwave bands 24 hours a day, 365 days a year for 4 years.

While crested to foster High Frequency interoperability between all types of organizations, agencies, individual ham operators and nets with a primary focus in international emergency communications, the service also has ample capacity for radio operators everywhere to use for ordinary calling and QSO's, including some DX'ing. And with about 2000 registered operators, the High Frequency Network covers a vast area of the planet.

All radio stations in this worldwide system scan the ham bands every 10 seconds, rapidly maintaining contact through short digital bursts of signals using a system known as Automatic Link Establishment or A-L-E. More information is on line at hflink.net (KQ6XA)

TECHNOLOGY TRYOUT: POWER COMPANIES TO EXPERIMENT WITH NOT HOLDING POWERLINES TO 60 HZ

If you are a United States radio amateur that depends on a powerline synchronized clock for logging and other station operations, you might want to look toward buying a stand alone unit that does not rely on the power at your outlet being precisely 60 hertz. This is because of an upcoming yearlong experiment with the nations electric grid could unsynchronize clocks that use synchronous motors to display the time.

Since 1930, electric clocks have kept time based on the rate of the frequency of the A-C electrical current that powers them. If the frequency changes from its usual 60 hertz rate, clocks run a little fast or slow. Power companies have long taken steps to keep the frequency as close to 60 hertz as is possible but the group that oversees the U.S. power grid, the Federal Energy Regulatory Commission, is proposing an experiment that would allow more frequency variation than it does now without corrections being made.

The North American Electric Reliability Corporation runs the nation's interlocking web of transmission lines and power plants. At a June 14th company presentation it spelled out the potential effects of the change. It said that synchronous motor driven clocks or any timing device that uses the 60 Hertz powerline as a time base to lock to can be off by ba signifigant amount. On the East Coast clocks could run as

much as 20 minutes fast over the year. Clocks West Coast are only likely to be off by 8 minutes during the 12 month long test.

The test is tentatively set to start in mid July. More on this upcoming experiment with the time of day can be found on line at tinyurl.com/3h6lfcn and tinyurl.com/3uzut3g along with other on-line news websites. (Various)

HAM RADIO IN SPACE: JULY 15 DEADLINE TO SCHEDULE ARISS CONTACTS

In ham radio space related news, word that NASA is seeking formal and informal education institutions and organizations in the United States, individually or working together, to host an Amateur Radio on the International Space Station, or ARISS, contact. This, between the dates of January 15 and July 15, 2012.

To maximize these radio contact opportunities, NASA is looking for organizations that will draw large numbers of participants and integrate the contact into a well-developed education plan.

During the first six months of 2012, crew members aboard the International Space Station will participate in prescheduled amateur radio contacts in addition to random operation. These scheduled radio contacts are approximately 10 minutes in length and allow students and educators to interact with the astronauts through a question-and-answer session.

An ARISS contact is a voice-only communication opportunity via amateur radio between astronauts and cosmonauts aboard the space station and classrooms and communities. ARISS contacts afford education audiences the opportunity to learn firsthand from astronauts what it is like to live and work in space. Due to the nature of human spaceflight, organizations must demonstrate the flexibility to accommodate changes in contact dates and times.

Interested parties should contact Teaching From Space to obtain information related to expectations, content, format, audience, proposal guidelines and forms by sending an e-mail to JSC-TFS-ARISS@mail.nasa.gov or by calling 281-244-2320. The deadline to submit a proposal is July 15th. More information is on-line at tinyurl.com/6fc2lzn (NASA, ARISS)

DX

In DX, PY2FN will be active as PY0FO from Fernando de Noronha through July 9th. Operations will be on 160 through 6 meters on CW only. Logs will be uploaded to Logbook of the World QSL via his home callsign, direct or by the Bureau.

F8IJV will be active as 6V7Q from the Le Calao resort in Senegal between October 22nd and November 11th. Operations will be on 160 through 6 meters, operating mainly on SSB, possibly some Digital and CW. Log will be uploaded to Logbook of thew World. QSL via his home callsign, direct or via the bureau.

Lastly, VA2WDQ, will be on the air portable FP from Miquelon Islland between July 7th and the 11th. Activity will be on 160 through 6 meters using mostly CW with some SSB. His main goal is to participate in the IARU HF Championship on July 9th and 10th. All logs will be uploaded to Logbook of the World and to eQSL once he returns home.

Above from various DX news sources

**

THAT FINAL ITEM: 13 COLONIES EVENT CELEBRATES AMERICA'S BIRTHDAY

And finally this week, from now through July 5th, you'll have a special opportunity to look for and work a group of amateur radio stations operating from the 13 original American colonies. You'll be able to score some nice QSL cards and a great certificate for your effort, too. We get more from Philadelphia, the birthplace of American liberty, from Amateur Radio Newsline's Mark Abramowicz, NT3V, with all the details:

--

Yes, the Fourth of July holiday weekend is a long and busy time.

But if you have a couple of spare minutes, maybe a few hours, there is an operating event worth your time.

It's the annual 13th Colonies special event.

Ken Villone, KU2US, is the event manager...

"We added more operators and more modes," Villone says. "We're doing CW, we doing side-band, we're doing PSK-31.

"In fact, we have one club that's just specifically is going to be operating on PSK-31. "And, this year is the first year that we will have all of the satellites representing the 13 colonies states. So a clean sweep of the colony states on the birds is a possibility. But it's going to be really hard to do this."

To emphasize the theme of "Independence," Villone says stations will be on the air during the event from Philadelphia.

"It's the whole patriotic theme of the event, the time that it's going to take place during the Fourth of July week," Villone says. "And, also, the Holmesburg Amateur Radio Club fit right in beautifully with the theme because of the Independence Hall."

Bob Josuweit WA3PZO is helping to coordinate the Holmesburg club's operations... "We'll have several stations on the air in a Field day-type operation, actually operating from people's homes," Josuweit says. "But, we'll be rotating bands and modes during the course of the holiday so that we can all enjoy part of the holiday with our families but still to keep the call sign on the air and work as many people as possible."

Josuweit says this is the first year Philadelphia will be directly represented in the event...

"After all, that's where the Declaration of Independence was signed and created," Josuweit says. "And, we'll be using our club call sign of WM3PEN, we affectionately know for William Penn, the founder of Philadelphia."

Event coordinator, Ken Villone says, you don't have to be a contester to work the event. He compared operations to the ARRL's Sweepstakes event. But, in this case, he cautions, it may require some patience...

"The person who wants to contact us, basically will probably have to work through pile-ups because it's very hard to find where we are just by going through the frequencies and hunting," Villone says. "So you have to really be on top of everything and all of our operators basically, they pick their own time and their own frequency to operate.

"There's no set of rules for that. So, it's basically like the same way that you would operate on the ARRL event."

Villone says check the DX Clusters and links for callouts. And, if you work a Colony station, he'd love to see you post it there so others can get in on the fun.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

**

For more information about the 13 Colonies, event, check out the website www.13colonies.info (NT3V)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from

the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, we have to announce that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now closed. The cutoff date for paper nominations to be postmarked was midnight, September 30th your local time. Electronically filed nominations had to be time-stamped the same.

It will likely be about three weeks before we have the name of this year's Young Ham of the Year Award recipient. As soon as the judging committee completes its work, we will announce whomever it is that they have chosen on a future Newsline report.

Meantime, our thanks to those of you who took the time to nominate a young radio amateur this year. As we all know, today's young hams will be tomorrows leaders and the people who will carry on the traditions of our hobby.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

WIANEWS WEEK COMMENCING July 03 2011 FROM THE WIRELESS INSTITUTE OF AUSTRALIA
FOR WEEK COMMENCING JULY 3 2011.

Sometimes when news arrives we check the date, in case it's meant for April One!

This story is one of those!

It's about a DXpedition requiring the services of polar bear guards,
electrically charged bear fences and "Polar Bear Spray".

This is the first-time IOTA activation of Point Lay Barrier Island IOTA NA-242.

July 22 - 26 July (2011) CALLSIGN: K6VVA/KL7

QSL ROUTE: ONLY via N6AWD (Direct or Bureau)

NA-242 is primarily CW on 40/30/20/17m.

Due to the possibility of polar bears at NA-242, they have purchased electric
bear fences, bear spray, and will hire one or more local "Bear Guards" with
heavy firepower for 24/7 protection.

WEBSITE: http://www.k6vva.com/iota/na242

(Rick, K6VVA The Locust via Southgate)

South Australian newspaper "Border Watch" is reporting on what they say is a "Remarkable rescue".

Two men have been lucky to survive nearly four hours in icy waters after their boat capsized off the coast of Port MacDonnell on Saturday afternoon.

The two Geelong men, both aged in their 50s, were rescued 14km off the coast of Port MacDonnell after a wave swamped their five-metre vessel.

Miraculously, the men managed to dive under the capsized boat and recover an emergency beacon before clinging to the vessel.

The pair were able to transmit an emergency message to Australia Search and Rescue (AusSar) services in Canberra, which in turn alerted emergency services in South Australia.

However, the vessel sank shortly after the signal was sent, leaving both men clutching to an esky in the freezing water as it became dark.

The rescuing craft's captain said "the men were in a poor state when they were pulled aboard. They were suffering very badly from hypothermia".

Are you interested in any way with VHF, UHF or microwave bands? Then perhaps you should consider attending the annual GippsTech technical conference, held each year in July at Churchill.

This year, it looks like they have a very full program across the 2 days.

Saturday lunch will be a spit roast, with vegetarian options (if pre-booked).

Sunday lunch will be pizza, with vegetarian and gluten free options (if pre-booked).

The Saturday evening Conference Dinner will again be at the Morwell Club, with a smorgasbord main course and buy your own drinks at the bar.

Register NOW!

Download the form from http://www.vk3bez.org/ and follow the links to GippsTech.

Registrations need to be in TODAY - No guarantee of food for those who register after Today Sunday 3 July.

(sourced to a release by Peter VK3PF)

This is Jack VK3WWW with an update for the 8th IARU Region 3 ARDF Championships.

I expect you are all aware by now of the date but if you are not they will be on from 23rd through to the 28th of September.

Things are really hotting up now with many of the International teams busy organising entry visas and air transport. One of the interesting things is the popularity of the event in China. Recently I received a request from the Chinese Radio Sports Association CRSA if they could send extra competitors not

just a couple but 40 extra competitors. In places like China, ARDF has been very popular for a long time. It is even an elective sport in some schools.

When I first started out in ARDF financial backing and selection for a Chinese team was done at a government level. Later on the Government only subsidised a little bit of the costs and now I expect they all pay there own way like we do.

How things change.

The 8th IARU Region 3 ARDF Championships will be in the Maldon, Bendigo and Castlemaine region so competitors will get to really see some of our natural bush.

Our Australian team is not confirmed yet as most of the usual VK competitors are busy organising the event. If you are interested in Competing, Spectating or even better Volunteering I would love to hear from you.

For more information about the event check out the event website www.r3.ardf.org.au

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The Remembrance Day Contest for 2011, is on the weekend 13-14 August.

The RD will commence at the same time as in previous years, that is 0800 and run until to 0759 UTC the following day.

Although an overwhelming majority of people at the AGM open forum in Darwin supported a revision of the starting time, it was not possible to have a discussion with the contest manager before the rules had to be placed with the publications team in time for inclusion in July Amateur Radio magazine.

With the establishment of the proposed Contest Committee, all contest rules will be reviewed and where practical will be standardised. "

cheers and thanks

Bob
VK6POP
WIA Director

Good Morning fellow amateurs and short wave listeners.

This short report was submitted by Chris VK5CP, unfortunately he was unable to prepare an audio file in preparation for this weeks broadcast and has asked me to present the report on his behalf.

As this is Chris's first report he wanted me to tell you a little about himself. Chris became interested in radio during the CB craze in the 1970's. At that time Chris was finishing High School and mobile phones had not been invented yet. Radio was a fun way to communicate and talk to people on the other side of

the globe. Chris passed his Novice exam in 1978 but had to wait until 1993 in order to find John Kelleher VK3DP to assist him conquer the code. With the help of Rob Charmicheal and Jim Linton, Chris got his combined call in 1993. Chris's practical radio knowledge has been acquired using the trial and error method which has involved letting the smoke out a number of components. With the assistance of his colleagues at the Amateur Radio Experimenters Group in Adelaide his skills are slowly expanding. Chris has been a WIA Board Member just over a year.

On the Queens Birthday long weekend Chris travelled to Mount Gambier to brave the cold damp world of fox hunting with the South East Radio Group. A record number of 11 teams from VK3 and VK5 participated in a weekend of fox hunts including the inaugural Wayne Kilpatrick Memorial Night Fox Hunt.

Much fun was had walking around Crater Lake waving 3 element 2 metre yagis, receivers squealing away searching for 10 tiny hidden transmitters as a confused public looked on. Then the car based hunts commenced, the first fox was a 80W 70cm signal emanating from a 10 element yagi in a Victorian Forest! Some took a direct route and got bogged, our team got bogged trying to rescue the bogged competitors. The night hunt was a long distance affair which finished near midnight. I felt for the poor foxes freezing in the forest waiting to be found.

On Sunday we had some sunshine and attended a nice Hamfest with a good variety of stalls and saw a homebrew competition of a very high standard.

After another day of hunts, the SERG team put on a fantastic BBQ and handed out certificates to the successful competitors with VK3 scoring strongly.

The weekend was a good opportunity to catch up with the VK3 and VK5 foxhunting fraternity and meet the SERG members who are doing their bit to encourage new entrants to our hobby. It was a well managed event, keep up the great work SERG!

73 de Chris VK5CP (presently portable Olympic Dam)

HAMS ACROSS AUSTRALIA.

VK1

There is currently an unknown signal interfering with the 2m Ginini repeater which historically occurs to this repeater (and sometimes the Bulls Head repeater) around this time of year.

This is causing the repeater to time out - periodically coming back up when the interfering signal drops beneath the receiver threshold, but effectively making the repeater unusable.

As there is nothing CRARC can do at this point, I am afraid it is a case of hurry up and wait!

(Glenn vk1nut)

local news email qnews-vk-subscribe@yahoogroups.com
VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

Just to restate a point that I have made before; it has been the capacity of the radio amateurs that I have known, over the years, to share their interest in this hobby. This is the point that I have made that we will grow our membership more by the enthusiasm of individuals than by any other means.

To step back a little - it is the skills and experience of many people that bring the web pages, the magazines and news broadcasts to us. It is the capacity of individuals to work together that builds our clubs and interest groups. It is the enjoyment of the activities that stimulate our grey cells that enables us all to tell the story which will engage a budding enthusiast to join the hobby.

Just remember that many of us manage to do some jobs well but each of us is an individual who has strengths that we can share. It can be as important to exhibit proper operating procedure as it is knowing how to mark out the lines that allow cutting material for a home brew project. It can be as important to bring some-one into a working shack and demonstrating how to do certain things as it is to take a photo for the club newsletter.

In other words, each of us have the opportunity to do what those who preceded us did for us, share our hobby. Have you told some one about amateur radio,

this week?

I'm Geoff Emery and that is what I think.....how about you?

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

The Central Queensland Amateur Radio Association Inc is going from strength to strength with our membership growing. Jack VK4JRC has organized a digital training day at the Rockhampton Heritage Village on how to use the SignaLink external USB soundcard on digital mode's for member's and interested parties, Jack has also been running hf test's on the Mount Morgan Dam with his plastic titanic. The plastic titanic is a plastic canoe with an electric motor fitted and it incorporates a HF radio and a HF and 6 metre antenna.

Plan's are well underway for the light house weekend at Seahill Lighthouse and we have a foundation licence weekend coming up in July. Plan's are also underway for an annual event for the club to be held in October.

Jack VK4JRC gave us a very interesting presentation at our last meeting on his trip to Lord Howe island. It is amazing what you can do with little equipment and how you can utilise the environment without harm to you or the environment.

The club meets the second Sunday of each month at the French Sport's Club at 6pm for a meal and chat prior to the meeting starting at 7pm. Ray VK4HOT will be giving us a presentation at the July meeting on the subject of making hydrogen for his car.

This text was written by Dave, VK4DJC and spoken by Adam, VK4MTJ on behalf of the Central Queensland Amateur Radio Association Inc.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

After a few weeks of illness and work commitments, I am back to tell you of the goings-on at the Redcliffe club.

One of our club members Reverend John, VK4BZ, has left to be with his battalion in Afghanistan and should be back early next year. John decided not to take any ham gear with him and currently trying to find a friendly American ham in the location who could assist but as yet no luck.

Last Monday night the AGM was held with some 47 members present. Peter VK4TAA retired as secretary after some 7 years in the job and the new secretary is Roger, VK4ZLQ. Peter VK4EA also retired as treasurer and Chris, VK4ANI is the new treasurer. David VK4DC remains as club president.

Two welcomed visors to the meeting were VK3XPD, VK5DK who were visiting the area and were most welcomed by club members.

About 2 weeks ago the club participated in an fund raiser at Bunning's which ended early in the afternoon with heavy rain and a washout of the crowds but

the club was able to raise some $900. The club hopes to get another booking later in the year to do it all again but this time without the rain.

The next club technical talk is on the 3rd Monday in July and it will be John, VK4YJV, and the topic will be basic Metallurgy. In August it will be James, VK4TJF, on RFI, In September, Kevin, VK4UH, Norfolk Island Expedition and in October, Bob, VK4ZB, on PIC controls and software.

Training continues at the club with a second foundation course to be held before the end of the year, a Standard License course with 7 candidates has started and is progressing well and an advanced course is running and is scheduled to be completed about September with 7 candidates.

The club will be holding its first working bee at the club house on July 16 and the plan is to replace the guttering on the road side of the club house.

The club was been advised that the convener of the competition can no longer carry out this function after this year. Accordingly he had asked for expressions of interest to carry on this position. The Executive committee considered that as this club had regularly participated in the competition that we should volunteer our services. Kevin VK4UH advised that he with the assistance of the club, would volunteer to be the convenor.

So now it's back to the rest of QNEWS and it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'Day again from the chilly north this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

During the past week TREC members have been providing communications support and check point manning for the Far North Equestrian Riders Association on the Atherton Tablelands. This was a 5 day horse endurance event with over 50 riders taking part. They traverse a variety of terrains, mainly savannah scrub, with some very steep ascents and descents. 146.500 (CH.50) is the primary frequency used with the VK4RTA repeater being used as a secondary frequency. It gives members experience in setting up field antennas and relaying traffic back to the base station VK4WAT/p. Some check points were only accessible by 4WD vehicles.

The weather was wet and cold necessitating warm clothing and lots of cups of hot soup. The event finished on Saturday and was completed successfully with no casualties both to the riders and the radio operators.

TREC held a well attended meeting last Saturday with many interesting topics being discussed. Chris VK4YCG bought along his brand new Spectrum Analyser for Show and Tell.

Well that's your lot for this week.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to the WIA news. Travel Well!

Geoff Emery, VK4ZPP from MERG is inviting us all to the Wide Bay Ham Fest on 16th July.

This is the third year the Maryborough Electronics and Radio Group has held the Ham Fest. We have a range of tables available both inside and outside the hall. Both new and pre-loved equipment will be available on the day and the food is being prepared and sold by the local Scout Group.

If you wish to book a table for Saturday 16th July, please contact MERG, Inc via http://www.wia.org.au affiliated clubs or directly to Ray Stockdale, VK4TPT, QTHR. The hall will be open to exhibitors from 7a.m. on the morning.

If you want to come and have a cuppa and a chat, catch up on friends and score a bargain - then find your way to the Maryborough West Scout Hall.

There is ample parking and the hall is wheel chair accessible. So if you are in the area, we would love to see you at the Wide Bay Ham Fest, Maryborough West Scout Hall, Ariadne Street, Maryborough at 9.00 o'clock Saturday 16th July next.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Jon VK2JDB from the ORANA region Amateur Radio Club says their club has been invited us to attend a Scouts meeting on Monday 1st August. This to enable the radio club to give the entire meeting, from 7-9pm a full demonstration of the wonderful world of amateur radio.

The propose a brief PowerPoint Display on amateur radio with particular emphasis on safety and a few rigs set up for use. Luckily there is a tower right next to the Scout hall.

This will be great practice prior to JOTA in October.

Details:
1st Dubbo Scout Group
Cnr Talbragar & Fitzroy Sts., Dubbo
Monday 1st August
7pm - 9pm

Please reply if you can attend and if you can supply any equipment. Since our next meeting (AGM) is the Saturday prior to the Scouts meeting, it doesn't give us any time to prepare. Is it possible for the members wanting to attend the Scouts meeting to get together mid July to organise ourselves?

Cheers,
Jon
(orana region ar club)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

BBC Radio 5 Live and Radio 5 Live Sports Extra are conducting an experiment for the Wimbledon tennis tournament, user-customizable audio feeds where the ratio of crowd noise to commentary can be tweaked to suit the individual listener's preference.

Those who want to hear more analysis and description can move the slider on the online NetMix Player in one direction, or in the opposite direction to add more court-side atmosphere.

The NetMix Player feeds, available in Windows and Macintosh versions, are only available during live coverage of matches Centre Court.

One year of the Moon in 2.5 minutes

A time lapsed video from the Goddard Space Flight Centre Scientific Visualization Studio, uses data from the Lunar Reconnaissance Orbiter and compresses one month into 12 seconds and one year into 2.5 minutes.

You'll see how the Moon "wobbles" in its orbit, the changes in libration, and axis tilt and the Moon's phases

NEWS FROM ARNEWSLINE USA

NEW EMERGENCY SERVICES DX GROUP ON FACEBOOK

A new amateur radio group has been formed for hams who are also members of one of the various emergency services. Based in the United Kingdom, the group will initially be coordinated via the Facebook social networking site with membership open to retired or serving members of any of the emergency services.

The group is free to join.

Simply search for Emergency Services Amateur Radio DX Group on Facebook and sign up, or contact GM0GMN directly at his call book address.

ISTANBUL UNIVERSITY STUDENTS ANNOUNCE PLANS FOR NEW HAMSAT

Students at Istanbul Technical University in Turkey are working on a CubeSat ham radio satellite that will host a linear transponder for SSB and CW amateur radio communications.

Dubbed TURKSAT-3USAT the bird will carry a 50 kHz bandwidth 2 meter to 70 centimetre linear transponder, a beacon and telemetry downlink. Planners hope to launch this new bird into a Sun Synchronous orbit of around 680 kilometres sometime in early 2012.

This will be the Istanbul Technical University's first ever communication satellite. More on the project is in cyberspace at tinyurl.com/6hyxh7h

FRANCE BANS NEWSCASTS FROM PROMOTING FACEBOOK AND TWITTER

In a move that will hinder news organizations ability to reach their audiences via social media, France has banned the use of the words Twitter and Facebook from radio and TV newscasts. This, unless they are directly a part of a news

story.

News reports out of Europe say that broadcasting news anchors and other on-air talent are now forbidden to refer to popular social networking sites and the micro-blogging phenomenon, unless it is pivotal and relevant to a news item. As such, French radio and television stations will no longer be able to ask their audiences to follow or friend them on these services during newscasts.

Ryan Murphy, is the Digital Media Editor for the Radio and Television News Directors Association. He is quoted as saying that this controversial move is the result of a 1992 French government decree. One that states commercial enterprises should not be promoted on news programs.

June Long Weekend (vk4 time) VK Shires Contest.

Registrations up for the International Lighthouse and Lightship Weekend

It began in 1998 with 40 countries represented by 158 registrations. Around 50 countries will join this annual fun event when it occurs on August 20 and 21 this year.

With the 14th annual ILLW less than two months away entries are up 10% up on last year, with top numbers being Australia in the lead on 44, followed by the USA with 41 and Germany at 37.

>From the beginning and still running strong are Argentina, Australia, Belgium, Canada, Denmark, England, Finland, France, Germany, Iceland, Ireland, Italy, Netherlands, New Zealand, Norway, Northern Ireland, Poland, Portugal, Puerto Rico, Scotland, Sweden, USA and Wales.

New countries this year are Azerbaijan and Thailand. Other smaller countries such as the Isle of Man, Lebanon, Namibia and St Lucia are in the mix.

Organiser Kevin Mulcahy VK2CE says he's hoping to have close to 500 entries this year as the unique event continues to grow in popularity.

It is not a contest, runs for one weekend only and there are no strict rules just guidelines. Check out the website ILLW.NET for more information

(Jim Linton VK3PC)

Illawarra Amateur Radio Society in VK2.

They will be manning the Point Perpendicular lighthouse at Jervis Bay.
The solar lighthouse installed in 1993 will be turned off for the weekend
and the grand old light built in 1899 will be relit.

Once again, this icon will guide ships safely along the NSW south coast
shipping lanes. The club station VK2AMW will be in the lighthouse keepers'
cottage for the duration of the event.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Hellenic Amateur Radio Association of Australia out to Lord Howe Island VK9HR.
24th July to 2nd August 2011.

Morse celebrations

Members of the Japan A1 Club will activate the following special callsign until
December 31st:

8J1MORSE, 8J1MORSE/2, 8J1MORSE/3 etc,
according to the district from which they are active from. Activity is to
celebrate 220th anniversary of Samuel Morse's birthday.

Operations will be mainly CW, with some SSB (to explain the novices how to
join the CW community). Some special awards are also available too.

QSL by the Bureau

Logs will be uploaded to LoTW as well.

For more details, the English rules and information are available at:
http://8j1morse.a1tokai.net

DL0YLWM Women's Football World Cup

The Deutsche Amateur Radio Club is sponsoring an award to celebrate
the 2011 Women's Football World Cup.

Between 1st June and 31st July, the special station DL0YLWM and YL district
stations will be on the air.

The first two weeks of Amateur Radio Special Event activity for the Women's
Soccer World Cup in Germany, produced more than 51,000 QSOs with the
YL-specific stations in the online log.

Full details at www.darc.ce, search on the website for DL0YLWM.

In DX, the Intrepid-DX Group and the DX Friends plan to activate the Southern
Sudan as a new country on or after July 9th. At airtime members of the two
groups report that they are in consultation with representatives of the new
Southern Sudan Government, the International Telecommunications Union and the
International Amateur Radio Union working on making arrangements.
More on this proposed operation will be posted on-line at
www.dxfriends.com/SouthernSudan2011

Text message alerts boost 'ham' radio contacts

Radio amateurs now have a helping hand in their quest for contacting rare or distant radio stations.

Although it "goes against the grain" promoting a service that charges other hams in this predominantly volunteer service, DX Station is an innovative SMS text message service that alerts radio amateurs when the sought-after radio station's signal is spotted on the radio dial.

The use of real-time text messages gives paid up subscribers to DX Station a competitive advantage, since they can hopefully contact the distant radio station before their colleagues join the fray.

A reduced fee trial is offered for just the first month of subscription.

Radio Foxtrot 100

There's a new radio station on the web, and this one is aimed at amateur radio enthusiasts.

With a mixture of music, chat and ham radio items, Radio Foxtrot 100 is the brainchild of Anthony, EI9GMB, from Dundalk in Co.Louth, Ireland.

Tony says the station is aimed at amateur radio operators and listeners alike, and is on-the-air 24 hours a day, seven days a week.

So, click the link and give it a try - Radio Foxtrot 100

BROADCAST MONITORING SWL AND SCANNER NEWS

Thousands sign petitions of support for RNW

More than 11,000 people have signed a petition to preserve Radio Netherlands World wide's Dutch-language broadcasts.

Iede de Vries, Chairman of the Action Committee, says that in addition there are about 7000 signatures from listeners who depend on programmes in one of the other nine languages.

There are also separate petitions from former ambassadors, business and journalistic organizations. Mr De Vries will lead a delegation from RNW who will hand the petitions to the Dutch parliament on Monday, prior to the debate about the substantial cuts in public broadcasting, including RNW.

Mr De Vries says several hundred people from around the world have also sent a personal letter to the Lower House. He says a lot of support has been received from the more than 3,000 partner stations worldwide that carry RNW programmes. He says he suspects that many MPs don't know about many of the things that

RNW does, and advocates a postponement of the decision, allowing the broadcaster to inform MPs about the consequences of the cuts.

On Friday, the government announced that the current budget of 46 million euros would be reduced to just 14 million euros, a cut of 70 percent which will mean the loss of up to 250 jobs.

A reminder that a special live programme in Dutch will be on the air from The Hague today (27 June) at 0600-1200 UTC on the following outlets:

107.5 FM (In and around the Plein in The Hague next to the Dutch parliament building)

1296 AM medium wave (For the Netherlands, Belgium and Luxembourg)

Shortwave 5955 and 9895 kHz (West, Central and SW Europe)

Shortwave 13700 kHz from 1000 UTC (SW and SE Europe)

BBC World Service receives millions to increase Arabic broadcasts.

The BBC World Service is getting a funding increase to the tune of £2.2 million per year over the next three years.

This comes after the government broadcaster's funds were slashed last year, forcing it to announce the cancellation of 5 of its 32 language broadcasts and reduced service on others.

The money will go to boost the Arabic language programs. An additional £9 million is being reallocated to save the Hindi shortwave service, which was slated to be shut down.

The Arabic language service is getting more attention both from the UK government and people in the region because of the ongoing unrest there. The Hindi service also has a huge number of listeners.

The BBC World Service broadcasts on TV, mobile, and online, but in many regions its shortwave broadcasts are still crucial. While listening to shortwave may seem old fashioned, in many Middle Eastern countries the Internet is censored or gets shut off completely during times of unrest. Also, many people in the developing world have a shortwave radio, but little access to the Internet.

The six crew of the International Space Station had to scramble for cover this week when a piece of space debris bore down on the orbiting station.

They temporarily took shelter in the Russian spacecraft, Soyuz, when the lump of space junk zoomed in on the station, the Russian Interfax news agency said.

It missed them by 250 metres - a hairsbreadth in space terms.

The team returned to the station after the debris junk passed by.

The station was not able to adjust the orbit to avert a possible collision because it detected the space junk too late, the agency said.

QSLogBook goes live!

The Social Networking site for Amateur Radio Enthusiasts QSLogBook is the next niche social network, geared towards the Amateur Radio World.

While QSLogbook does allow users to post news and information it is a site that is mainly set up to allow users from around the world to communicate and to send each other frequencies and call sign information.

There are a number of tools that make social networking easier when using QSLogBook. Not only can users view their contacts (called "friends"), they can also see contacts that are linked to their friends. In this way, it is possible for users to see their entire extended social network.

British Library makes Google search deal

Thousands of pages from one of the world's biggest collections of historic books, pamphlets and periodicals are to be made available on the internet.

The British Library has reached a deal with search engine Google about 250,000 texts dating back to the 18th Century.

It will allow readers to view, search and copy the out-of-copyright works at no charge on both the library and Google books websites.

CBS says there are a million free tracks available today on its site MP3.com

Its Interactive Music Group has embarked on a campaign to promote the newly redesigned 14-year-old site. The campaign will run into late July. .

CBS took over MP3.com as part of its 2008 purchase of CNET. The announcement of the relaunch of MP3.com came from CBS Interactive Music Group head David Goodman. It calls MP3.com "the original online source for free legal music downloads" and said its emphasis would remain on emerging and indy artists.

Features on MP3.com include a free MP3 of the day, label of the week, "On the Scene" editorial feature and dedicated artist radio stations from sister CBS service Last.fm

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts,
please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

GB2RS NEWS

Sunday 3rd July 2011

The news headlines:

* Spectrum Management responses to DCMS

* South of England news reading

* Malta gets 500kHz

In the past ten days, the Society has responded to the Department of Culture, Media and Sport on a consultation seeking opinion on the release of 500MHz of spectrum by 2020 and an open letter that seeks to review communications for the digital age. Both responses from the Society can be seen at www.rsgb.org/spectrumforum/consultations/index.php.

It was announced recently on GB2RS that the South of England news reading on 3640kHz would have to terminate due to a lack of newsreaders. However, some members have now come forward offering to read for the 0900 LSB schedule. One of the volunteers is Alison, G8ROG, who is the RSGB Regional Manager for London and the Thames Valley. Accordingly, Alison will set up a net on 3640kHz, plus or minus QRM, this Sunday, 3 July, at 0900 local time and invite volunteers to call in. She will hold a second net at 0900 on the following Sunday, 10 July. Volunteers are asked to join one of the nets, when propagation can be checked out and a news reading rota drawn up. Full details of the GB2RS News Service can be found in the Members' Only section of the RSGB website. RSGB members who wish to offer their services are asked to complete the form at the Volunteers tab and send it to the GB2RS News Manager, Gordon Adams, G3LEQ, whose details appear on the document. Hopefully, we may soon be able to announce a re-instatement of this service for 80 metres listeners in the South.

We have heard that Maltese radio amateurs may apply for a temporary permit for 500kHz operation. The permit is operational until the end of 2011 but could be extended if approved by WRC next year. Application forms and the National Frequency Plan many be viewed at www.mca.org.mt.

Advance notice now. West Tyrone Amateur Radio Club is organising a new event this year. The GI HF Conference will take place on Saturday 20 August in the Technology Education Centre, Omagh, BT78 1FA. Registration will be from 11am. Speakers will include Carlos Eavis, G0AKI, from the RSGB, speaking on IOTA and Paul O'Kane, EI5DI, speaking

on DXpeditions and SD Logging. Check out http://wtarc.co.uk/GIHFConference.aspx for more details.

Students at Istanbul Technical University in Turkey are working on a CubeSat amateur radio satellite that will host a linear transponder for SSB and CW amateur radio communications. Dubbed TURKSAT-3USAT, the bird will carry a 50kHz bandwidth 2m to 70cm linear transponder, a beacon and telemetry downlink. Planners hope to launch this new bird into a Sun synchronous orbit of around 680km sometime in early 2012.

The ARRL Headquarters will be closed in observance of Independence Day on Monday 4 July. There will be no W1AW bulletin or code practice transmissions that day. League Headquarters will reopen Tuesday 5 July at 8am Eastern Daylight Time. And now for the details of rallies and events for the coming week

The Barford Norfolk Radio Rally will be held on 3 July at Barford Village Hall & Green, Barford, Norwich NR9 4AB, 9 miles south west of Norwich, close to A11 and A47. Doors open at 9am and admission is £1.50, with children admitted free. There will be trade stands and a Bring & Buy.

AMSAT-UK will have a presence at the first ever UK Space Conference being organised by the UK Space Agency. It takes place at the University of Warwick on 4 and 5 July. Further details of the event are at http://tinyurl.com/UKSpace2011.

Next Sunday, 10 July the Cornish RAC 48th Mobile Rally will take place at Penair School, Truro, Cornwall, TR1 1TN. Doors open at 10.30am and admission is £2. There will be trade stands and a Bring & Buy. Details from Steve on 01209 844939.

Now for the news of special events

Worcester Radio Amateurs Association will be operating from the Stourport-on-Severn Steam Rally over the weekend of 8 to 10 July. The steam rally itself is an established and popular attraction and always attracts a good crowd. A warm welcome will be extended to all visitors. The website address for the rally is www.stourportvintagesteamrally.co.uk.

Pontefract & District Amateur Radio Society is operating a number of special event stations. Until 8 July, GB0PLF will be on the air for the Pontefract Liquorice Festival. The station is located at Carleton Community Centre, leading up to the festival. On 9 July, GB0PH will be on the air for Pontefract Heritage. The station will be located at Pontefract Castle for a fun day at the Castle, organised by Pontefract Heritage Group. Then on 10 July, GB0PLF will be on the air again, with a new NOV to operate in Pontefract town centre on the actual day of the Liquorice Festival.

And now the HF DX news compiled from 425 DX News and other sources

Marcelo, PY2FN will be active as PY0FO from Fernando de Noronha, which is IOTA reference SA-003, until 9 July. He will operate CW only on 6 to 160m. Please QSL via his home callsign, either direct, via the bureau or Logbook of the World.

ZR6DG and ZS6HB will be active as C92DG from the Timbavati Game Reserve in Tofo between 14 and 28 July. Their operation will be on the HF bands only. QSL via ZR6DG.

Eric, K9GY will be active from Afghanistan for the next year using the callsign T6MO. His most likely times of operation are given as 0130-0430, 0630-0830 and 1130-1730UTC. QSLs go via his home callsign.

John, F4FUC will operate as J28UC from Djibouti starting in July. He hopes to be there till 2013 and will be using vertical and dipole antennas on 40-10m.

Howard, WB4WXE will be on the Caribbean island of St Lucia until 15 July. He will operate using the call J68HS and asks for QSLs to be sent via his home callsign. Now the contest news

This weekend will be busy on the VHF bands because VHF NFD takes place until 1400UTC today, 3 July. Apart from the various sections for portable stations of differing powers and complexities, as of 2009 there is also the Sweepers section. This was introduced to encourage fixed stations to work the portables and expanded in 2010. As a non-participating fixed station there's no reason why you shouldn't call CQ while the contest is in progress, because there will be a whole band of people looking for QSOs, especially during the quieter hours. The third 2m Backpackers runs for the last three hours of VHF NFD and continues for an hour after it ends.

The 5th Polish Straight Key Contest also takes place today, 3 July from 1800 to 2000UTC. It is straight key only contest and open to all amateurs. The rules, in English, can be found at www.sp5ppa.org.

Monday, 4 July, sees the CW leg of the 80m Club Championships take place from 1900 to 2030UTC. The exchange is signal report and serial number.

The following day, 5 July, it's the 144MHz UK Activity Contest from 1900 to 2130UTC. Using all modes on the 2m band, the exchange is signal report, serial number and locator.

Next weekend, it's the IARU HF World Championship from 1200UTC on the 9th to 1200UTC on the 10th. The UK HQ station GR2HQ will be active and looking for as many QSOs as possible on as many bands and modes as possible with as many people as possible. You don't have to be taking part in the contest to call GR2HQ; the operators will be delighted to work you and also pass you around the bands and modes, to help you work towards one of the free certificates that are available. The exchange is signal report and ITU zone, which for the UK is 27.

And now the solar factual data for the period from the 20th to the 26th of June, compiled by Neil Clarke, G0CAS on the 27th of June.

The solar disc had sunspot groups visible every day. Most groups were small and quiet, however, one group produced the only C class solar flare of the period on the 21st. This was a long duration flare and associated with the flare was a coronal mass ejection. Solar flux levels remained around the mid 90s all week and the average was 94 units. The 90 day solar flux average on the 26th was 102, that's two units down on last week. X-ray flux levels averaged B1.8 units and varied little day to day. Geomagnetic activity was just at unsettled levels most days. The Ap index on the 23rd was 18 units which was the most disturbed day. This was the result of a coronal hole and the effects from the coronal mass ejection from the 21st. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 370 to 700 kilometres per second by the 23rd. Speeds then declined to 490 kilometres per second by late on the 26th. Particle densities were low throughout but did increase to 10 particles per cubic centimetre on the 21st and the 22nd. Bz varied between minus 9 and plus 8 nanoTeslas on the most disturbed day and between minus and plus 4 nanoTeslas on the quieter days. Probably HF propagation was slightly below predicted levels due to the continued unsettled geomagnetic conditions. Radio aurora was reported on the 22nd and 23rd, but was confined to high latitudes and it was not the best week that we have had for Sporadic-E.

And now the solar forecast. First, for the benefit of those you read this on the internet at the RSGB website from a Friday onwards, the forecast covers the period from the Sunday the date of broadcast on GB2RS to the following Saturday. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at very low levels on most days. Solar activity and sunspot numbers over recent weeks have been in decline. How long will this quiet phase last before the next upsurge in activity takes place, who knows, but when it does end the chances are there will be very little warning. Solar flux levels are expected to decline and be in the 80s for most of the week. Geomagnetic activity should be quiet for the next couple of days before a weak coronal hole disturbance arrives around midweek and lasts till the weekend. On its last rotation the most disturbed day saw an Ap index of 14 units. This coronal hole developed back in March and this is its fifth rotation. MUFs during daylight hours at equal latitudes should be around 20MHz for the south and 17MHz for the north. Darkness hour lows should be about 13MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate will be around 27MHz. The optimum working frequency with a 90 per cent success rate will be 21MHz. Even though the path will be open earlier the best time for the highest MUFs will be between 1700 and 2100 hours. Sporadic-E is expected to take place on most days with opening up to and including 144MHz are still possible.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

** MMMonVHF MS prediction update for july **

Shower activity in July is concentrated around the end of the month.
Most remarkable shower this month is Southern Delta-Aquariids, peaking
July 30th. This medium-ZHR shower is characterized by relatively faint
meteors, but its maximum can be quite broad, leading to similar ZHR
from July 28th to 30th. Take also advantage of very good Sporadic
Meteors rates: Sporadics rates are now approaching annual maximum,
which will take place in late summer. Have a look to shower predictions
for July 2011 at our MMM MS Propagationpage: www.MMMonVHF.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** IARU V-U-SHF Contest 2011 2nd-3rd july **

As well as in past years, Matej, OK1TEH, did setup a list of stations
participating at IARU V-U-SHF Contest 2011 2nd-3rd july. For details
please do refer the following http://www.darkside.cz/qrv.php
SOURCE: Matej, OK1TEH at OK2KKW webpage

** SPORADIC E saison, inputs to MMMonVHF and Observation 2011 **

In case of an ES opening on 144 MHz please remember to send all your
QSO in a short Log to MMMonVHF - HOW? Please go to the MMMonVHF forum
www.mmmonvhf.de/minibb/index.php?action=vthread&forum=11&topic=80
and read about our "call for reports". The text will be available

in several languages. or use direct the input at:

http://www.mmmonvhf.de/es.php >>> click on "Send your Report"

Remember please that we are going to publish ONLY 144 MHz Logs - if we get input for 6m, 4m or 3m reports we do use it for the headline. As you all know, the most necessary at a SPORADIC E Opening will be to be at the right time at the right place. As well every of us will have some "warning" systems for the time between May to August.

Jeremy, W7EME, back at Belize as V31JA from EK55
LATEST NEWS from Jeremy, dated 2011-07-01: Horrible jungle here. Vines and trees everywhere always touching on long Yagi. Very dense canopy. Very difficult to even move antenna. Today at Noon local was

104 degrees F and 100% humidity with raining. I work only a few
stations. I may resume after moving station east a few hundred feet.
Strong Meteor pings from PJ7EME :) Log is updated at:
http://www.w7eme.org/v31ja.html GL Eu contest on 2nd July but please
check for me Eu stations. Today I also run my clock a few seconds
fast to help me filter many stations calling. I apologize if this
cause anyone decode problems. My lovely wife is wanting to go Cuba
very bad. We may go on 3rd or 4th July, I will post if not qrv.

Holiday 2011 - ICELAND - TF/G4ODA
Ii¿½m pleased to be able to report that Paul, G1GSN, and I are returning
to Iceland this year. We had hoped to be there in June but because of
issues with the ferry (beyond our control) that did not prove possible
so now we will be there in August. As always this is to be a holiday
with radio rather than an expedition so we will not be spending all
of the time on the radio. On previous trips we have taken our tents
leaving a lot of room in the Land Rover for radio. This time however
we will be going in my new camping vehicle (see photo) which will be
used for sleeping/cooking and as the shack so we will take less radios
this time. In addition the roof rack is smaller than on my other Land
Rover which affects the length of aerials and poles that can be
carried. The plan is to be QRV on 50MHz, 144MHZ and (thanks to
Icelandic Authorities kindly issuing to me a 4m permit) 70MHz. Given
the time of year when we will be there and the number of contacts made
on 6m on previous trips the main effort will be on 2 and 4m.

** KC8QVO qrv 50, 144, 432 MHz from EN39 **

I am just letting everyone know that I will once again be making my
trek to EN39. The trip is from July 2-10. I do not know how much I

will be operating this year. I am toning down my operation a little bit. In past years I have run all 3 bands - 50, 144, 432mHz. However, 6m seems to be the only band that gets any activity so I am confining my operating to only 6m this year. This will ease on set up as well. I will be able to raise the 6m beam much easier alone than all of the antennas. I am not sure if I will even use my rotator this year. I may just revert back to the old "armstrong method" - no rotator, (heavy) bracket, and cable to worry about = faster set up/tear down.
SOURCE: Steve, KC8QVO via VHF Reflector

** TI7/K2DBK Operation 10-17 July 2011 **
Greetings, I will be operating from Costa Rica 10-17 July 2011 as TI7/K2DBK. My location will be in the northwest part of the country near the city of Liberia in the Guanacaste region. I will be on vacation with friends so this will be a "holiday-style" operation with operating mostly taking place in the late afternoon local time. I will be operating SSB only 10m-20m and possibly 6m if conditions permit using 100w and a Buddipole. QSL via my home call.
SOURCE: Bill NG3K DX-News

** 6V, SENEGAL, qrv HF and 50 MHz **

Seb, F8IJV, will once again be active as 6V7Q from Le Calao resort in Senegal between October 22nd and November 11th. Activity will be on 160-6 meters, operating mainly on SSB, possibly some Digital and CW too. He plans to take an Acom 1011 amplifier with him this time. Seb will also be active during the CQWW DX SSB Contest (October 29-30th). QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW. SOURCE: Ohio/Penn DX Bulletin #1016

** IOTA Operation from EU-048 **

Operators Remi/F0GHK, Michel/F1SRC, Jean-Yves/F4EHM, Mickael/F4FFZ, Gwena/F4FHZ, Chris/F5CBQ and Jean-Franï¿½ois/F6DZD will be active as TM2BI from Belle Ile (DIFM AT015) between July 28th and August 2nd. Activity will be on 80-2 meters with an entry in the RSGB IOTA Contest (July 30-31st). QSL via F6KPQ. SOURCE: Ohio/Penn DX Bulletin #1016

** IOTA Activity from NA-039 **

Since the Russian Robinson Club members rescheduled (RRC) NA-070. their DXpedition to St. Matthew Island (see NA-232) to 2012, Yuri, N3QQ, will now activate Adak Island (NA-039) starting July 28th, as KL7RRC, and also participate during the RSGB IOTA Contest (July 30-31st). If he can find transportation, Yuri will also go to Rat Islands (NA-070) and

operate as KL7RRC/p until August 8th, weather permitting. Activity from both locations will be on 40-6 meters using CW and SSB. QSL via N7RO, U stations via UA9OBA. SOURCE: Ohio/Penn DX Bulletin #1016

** EVENTSTATION for the "Special Olympics World Summer Games" **

The "Special Olympics World Summer Games" will take place in Athens from Jun 25 until Jul 4. The "Special Olympics" are the games for People with intellectual disabilities. 7500 athlets from 180 countries are expected to come to the Greek capital Athens. SV0XAJ, SV0XAO, SV0XBA, SV0XBJ, SV2DCD, SV2GNC, SV2GWY, SV3DCX and SV7JAR will activate the special event staion SX0A in CW, SSB and digital modes on 160m-4m. QSLs via bureau, direct or eQSL to SV2GWY. Moreover all Greek HAMs may use the special prefix SY2011. More information about this an da special award can be found on their website: http://sx0a.blogspot.com SOURCE: CQ Six - 50 MHz DX News #20110625

** PJ2 qrv again on HF and 50 MHz **

Jan DJ8NK, Dieter DJ9ON and Hans DK9KX will be active as PJ2/homecalls from the island of Curacao (IOTA SA-099, WLOTA 0942, Grid Loc. FK52) between 26th of June and the 7th of July 2011. QRV mainly on 6 metres (50.144 MHz), with some HF operation. QSL via home calls, direct or bureau. SOURCE: [NG3K] [DX-ENG] ICPO Bulletin (24 June-01 July 2011)

** TF4X qrv begin of July in HF and 50 MHz **

Thor, TF4M, Otradalur in Arnarfjï¿½rï¿½ur, Iceland (IOTA EU-021, WLOTA 2975, WW Loc. HP85FP), from 6-11 July 2011. QRV on 160-6m CW, SSB and RTTY, including an entry in the IARU HF Championships (9-10 July) using the callsign TF4X. QSL TF/VE2XAA via home call. QSL TF4X via G3SWH. SOURCE: [NG3K] via [DX-ENG] ICPO Bulletin (24 June-01 July 2011)

** Island of Miquelon in the Air **

Victor, VA2WDQ, will be active as FP/VA2WA from 7-11 July 2011 from the island of Miquelon (IOTA NA-032, DIFO FP-002, WLOTA 1417, WW Loc. GN17TC). He will be staying at the the ham-friendly Motel Miquelon. The main goal is participating in the IARU HF Championship (SOAB CW LP) on July 9-10, 2011. Victor will be active mostly on CW and a bit on SSB on WARC bands before and after the contest. Also there are plans to try 160m during night time and 6m during a day if there will be good conditions. The equipment will be Kenwood TS-590S and probably one small transistors PA. Antennas will be verticals. QSL via VA2WDQ, direct or bureau. All logs will be uploaded to LoTW and eQSL once returned home. SOURCE:[DX-ENG] ICPO Bulletin (24 June-01 July 2011)

Members of the "Veteran Club of the Signals Soldiers of the Norwegian
Armed Forces" will activate the historical callsign LJ2T again from
"The Signals Museum of the Norwegian Armed Forces" near Lillehammer
between June 30th and July 3rd. Activity will be on all bands between
160m and 70cm using CW, SSB, FM and the Digital modes. Like last year,
there are plans for activity on 4 meters (70 MHz) from this QTH locator
JP51ED. QSL via LA5EAA. For more info, see: www.qrz.com/db/LJ2T
SOURCE: [OPDX Bulletin] via [DX-ENG] ICPO Bulletin

** India on 50MHz: VU2RBI **

Bharathi VU2RBI is the first station on 50MHz. She has SSB experience
on HF but now she works on CW in order to help as many stations to work
VU as possible. Her slow speed but self confident CW capability is
combined with the SSB experience that can be heard on the recording of
our yesterday QSO. During recent JA and EU openings she had so many
callers that often they were difficult to handle. From today she will
split around 50,090 +- QRM and expects callers to send call signs not
more than twice. She asks not to request schedules because her
intention is to work everybody if possible. Please send QSL card to
QRZ.COM address but do not send IRC because it canï¿½t be traded in
posts in India but green stamps that she would utilize not only for
responding back but developing her station. Now she has a barefoot
IC706 and a 5 element Dunax DK7ZB antenna that she plans to supplement
with a PA and erect to a new and higher mast.

SARL NEWS - SUNDAY 03 JULY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

GREAT YL DXer SILENT KEY

It has been learnt that one of the world's greatest YL DXers, Dianna Killeen, KB6NAN, became a Silent Key on 6th April 2011. She had been credited with many DXCC honors, took part in several DXpeditions to rare locations and acted as QSL manager for several TOP DXers.

She will be sadly missed by DXers and friends, worldwide.

(PAUSE)

In the news today:

AMATEUR RADIO EXAMINATION PROCESS AGREED

URGENT NOTICE TO ALL AMATEUR LICENSEES

SARL MEMBERSHIP AND THE FORUM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

AMATEUR RADIO EXAMINATION PROCESS AGREED

The SARL and ICASA have revisited the Radio Examination Moderation Process. After each examination an SARL appointed moderator verifies the examination results and checks that all the marks are correctly computed and verifies that all questions are correctly marked. In a multiple choice examination the answer is either right or wrong. The examiner has no discretion. There are however at times marginal cases where the candidate scores a very high mark in one section but just misses to score the required minimum of 50% in the other section. It is in cases like this that the moderator reviews the answer papers and

makes a recommendation to ICASA. In the last examination there were a few marginal cases which were relooked at and recommendations were made to ICASA which resulted in a few candidates now having passed. These candidates were informed of the process and the outcome.

The SARL is often asked to supply the percentage marks and not just the symbol. The SARL has discussed this with the authority but ICASA has decided to keep to the current arrangement of only supplying a candidate the symbols and not percentage marks.

URGENT NOTICE TO ALL AMATEUR LICENSEES

For the past few weeks we have repeated the following news item several times. The SARL is still receiving queries from radio amateurs about their licenses. Please share the following information with your radio amateur friends or point them to www.sarl.org.za.

ICASA has cancelled over 34 000 radio licenses that have remained unpaid for the past 365 days. This includes all amateur radio licenses that are unpaid. Check that you have paid your license and if you do not have a valid printed license or an official receipt call ICASA at 011 566 3313 or 011 566 3319 between 08:30 - 16:00 Monday - Friday. PLEASE HAVE YOUR LICENSE NUMBER HANDY. If your amateur license was cancelled call now and ICASA will re-instate it if you can prove payment. If you have not paid, do so now using the information and account number on your last license.

SARL MEMBERSHIP AND THE FORUM

Following a AGM resolution non members will no longer have access to the forum. This was implemented on 1 July. The full process will only be completed during July.

The SARL last month mailed membership invoices and members have responded well. The membership payment was due on 1 July. Members who have not paid will receive a message when they log onto the website. The data base that facilitates this is updated on a weekly basis. If you have paid and still get the message that your membership is still outstanding, wait 10 days and if it still appears when you log on, call the office at 011 675 2393 during office hours.

There may be several reasons why your payment was not credited to your account, often because on the bank transfer the name and/or callsign was not entered. The SARL receives many electronic transfers that cannot be identified. Please make sure that you give your name and or callsign on the electronic transfer document.

While the SARL encourages members to renew as soon as possible, the final cut off date is 31 August. On 1 September, if your membership is still unpaid, access to the members only pages of the web is blocked and also the access to the forum. Please renew promptly. We thank members who have already done so. We appreciate your support of the SARL and Amateur Radio.

A YEAR OF THE MOON IN 2½ MINUTES

And a new on-line time lapse video of the Moon produced by the Goddard Space Flight Centre's Scientific Visualization Studio compresses one month into 12 seconds and one year into 2,5 minutes. Constructed, using data from the Lunar Reconnaissance Orbiter spacecraft, the video shows how the Moon wobbles in its orbit, the way that it changes in libration and axis tilt and its numerous phases. You will find the video at YouTube by taking the shortcut of tinyurl.com/3ffmhbe.

COMPETITION NEWS

DX ON 1,8 MHz?

>From the desk of the SARL Awards Manager:

Most South Africans would not regard 1,8 MHz as a DX band. The majority of operators who are active on the band may never have heard a DX station there.

Raoul Coetzee, ZS1REC, has just proved them wrong. He has received a DXCC certificate for proving that he has contacted more than 100 countries on the band! Raoul became only the fifth South African and the first ZS1 to achieve the milestone.

Raoul operates from a small city lot, just a quarter wavelength in diameter. He uses wire antennas and modest power. However, a shrewd understanding of propagation and a lot of perseverance make up for the modest station. Raoul works in the electronics industry and has been active since the 1980s. He operates very little on other bands, and sticks mostly to Code.

ZS4 SPRINT RESULTS

The Sasolburg Radio Club is happy to report the results for the ZS4 Sprint. 15 logs and 1 check log were received. Top honors go to ZS4BFN with 114 points. Second is Marius Preston, ZS4MP, with 97 points. Third is Jaco le Roux, ZS3JLR, with 52 points. Congratulations to you.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at very low to low levels. Both Sunspots 1 242 and 1 243 are growing in the northern hemisphere and a 3rd sunspot appears to be forming in between them. There may be a chance for a C-Class flare.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be about 25.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m. There will be little chance of 15 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 July - 3rd leg of SARL QRP Competition. 27 July - 4th leg of SARL Club Competition. 30 July - RTA in Durban. 07 Aug. - SARL HF Phone Competition. 09 Aug. - SARL YL Sprint. 21 Aug. - 3rd leg of SARL Digital Competition. 28 Aug. - SARL HF CW Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

In this Issue

Sad news about Jamie Pye ZL2NN

HQ Info-Line Editor:

Ham radio on the International Space Station - Robert Duncan:

Housekeeping

Hamilton Market Day:

Jamie Pye ZL2NN - SK

It is with much sadness we advise of the death of Jamie Pye, ZL2NN, on Saturday 2nd July after a short illness. We all experience the shock of his passing together with the Pye family. There will be more on Jamie's great contribution to our hobby and our Association in later issues.

Jamie's funeral will be held at the Kingswood Funeral Home, (Cnr King and Cairo Streets

Upper Hutt) on Wednesday 6th July at 2pm.

In lieu of flowers the family have asked for donations to the New Zealand Spinal Trust, Private bag 4708, Christchurch, New Zealand Charities Commission #CC43195

HQ Info-line Editor

Debby Says.

HQ Info-line has had to urgently find a new temporary editor. Jamie would be the first to make sure 'the show must go on', therefore I have undertaken the role of editor of HQ Info-line in the interim, until a more suitable replacement can be found.

For those who regularly contribute articles to HQ Info-line, I would appreciate if you could forward them to me nzart.hq@clear.net.nz, by Friday morning, prior to publication on the assigned fortnightly dates. The dates currently on the web will not change.

I need to be able to collate all articles and forward to Alan Wallace ZL1AMW, who has stepped in to ensure the distribution of this publication is

maintained. Alan is also looking after the NZART web site, so if you have any queries or concerns in this regard, please contact Alan on webmaster@nzart.org.nz

SMART

Wednesday 22nd June saw the release by Radio Spectrum Management of the E X & Y call signs. What this means is that these call signs can now be allocated to an individual or Club, on application to me, or any other approved Radio Examiner. A list of these people can be found on either the NZART or RSM web sites.

Interestingly, while much has been publicised about the release date of these call signs, very few appear to have been applied for.

There is no change to the One letter call signs. They can still only be allocated for a 12 month period, unless evidence of continued use with contesting or field days can be supplied prior to the expiry date, then reallocation of the call can be made. Otherwise there is a 6 month stand down for the holder and they may not reapply for the same call during this time.

>From the desk at HQ.talk soon Debby ZL2DL

Ham radio on the International Space Station - Robert Duncan:

A subject I follow closely is NASA's space shuttle programme and ham radio on the international space station ARISS. A story I felt would be of some interest to radio hams in Australia and NZ.
July 8th is the scheduled final space shuttle launch and NASA engineers have(for the first time) installed a camera on the external fuel tank which will transmit live pictures of its destructive burn up on re-entry.
The live FM transmitted signal will be on 2272.5mhz at 10 watts and will burn up over the Pacifc Ocean over the East Coast of New Zealand. Entry interface (EI) will begin at 400.000ft over Southern Australia and can be seen with the naked eye.
So those in amateur television in the south pacific area may see some great video.
More on this story can be found on this link.

73 de M0ODV Robert Duncan

Introduction to Amateur Radio

The Mayo Radio Experimenters Network are holding a series of practical hands on open days throughout the summer months. The events will start at 13.00 approx (weather permitting) and will take place on the following dates:

Sunday July 10th

Sunday August 14th

Sunday September 11th

Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The location for all events will be the car park at the Halfway House on the Castlebar to Westport Road. If you would like further details please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/eircom/dot/net) , email David Hatfield EI3ECB on ei3ecb/at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

Amateur Radio at the Tall Ships

Amateur Radio will be in use in Dunmore East at the tall ships on Sunday the third of July. If you think you will be in the area, AREN member or not, bring your handheld and give EI0NC a call on Southern Ireland Repeater Network. We will be acting as extra eyes and ears on the day for the other services, so all Amateur Radio operators are encouraged to participate. For more information contact John EI7IG at +353 86 8167310

DX News

Steve W6EOD is QRV as T6SH in Helmund Province, Afghanistan until November next. He is operating on 20 and 40m CW with a KX1 transceiver and vertical. QSL manager is K1BV.

Andy P29CS is at present active as YJ8A on the island of Efate in the DXCC entity of Vanuatu. This one counts as OC-035 for the Islands on the Air Award programme. He is there until 17 July and QSLs go via M0URX.

Valery YL2SW is back in Nigeria as 5N6/YL2SW. Power is somewhat unstable at his QTH He plans to be there till 15 July and QSLs go via the home call.

Victor VA2WDQ is travelling to the islands of St Pierre and Miquelon from 7 - 11 July and will take part in the IARU HF Championship which takes place on 9 - 10 July. He will use the callsign FP/VA2WDQ. His logs will be uploaded to Logbook of the World.

Dmitrij RW6AML will be on Waya Island , Fiji from 6-17 July. He will be active as 3D2ML on both CW and SSB. QSLs go to his home call.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-June, through Sunday, 3rd-July there were 215 countries active. Countries available: 3A, 3B8, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6Y, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK0M, VP2V, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS. Zoli, HA5PP, will once again be active as 5B/HA5PP during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via HA5PP. There may be some 6m activity outside of the contest.

7Q, MALAWI (Update to OPDX.1014/Reminder). Malcolm, GM3TAL, has been issued the callsign 7Q7MH and is currently operating from the Malawi Scout Site at Makwawa. Activity will be on 20/17/15/10m and, possibly 6m. Modes will be CW and SSB. He is also planning to monitor the Scout Net frequencies. QSL via G0IAS DIRECT ONLY, with sufficient funds for a return. The cards are already printed so NOBODY will have to wait for a card which will be sent as soon as Allan, G0IAS, has the logs from Malcolm. For more details about the Scottish Scouting DXpedition to Malawi, see: http://www.7q7mh.org

8N, JAPAN. Icko, JA1BPA, reports that 7 JARL HQ stations in various regions of Japan will be on the air during the 2011 IARU HF Championship (July 9-10th). Each station may be heard on other bands than specified below outside the contest during the week of July 3rd. All QSOs will be QSLed automatically via the Bureau. Here are the details of the 7 JARL HQ contest stations:

Callsign	Band[s] (during the Contest)	Location
8N1HQ	15 meters CW	Kimitsu City, Chiba
8N1HQ	160 meters CW, 10 meters CW	Minato Ku, Tokyo
8N2HQ	80 meters CW	Mihama Town, Chita Gu, Aichi
8N3HQ	40 meters CW, 10 meters SSB	Kobe City, Hyogo
8N3HQ	20 meters CW	Miki City, Hyogo
8N4HQ	80 meters SSB, 40 meters SSB,	Okayama City, Okayama
	15 meters SSB	
8N8HQ	20 meters SSB	Iwamizawa City, Hokkaido

8Q, MALDIVES. Cesare, I0WDX, will be active as 8Q7CC from Furanafushi Island (AS-013), North Male Atoll, Maldives, between November 2-12th. He informs OPDX that he will be active on 20-6 meters, including the WARC bands, using an Icom IC-7000 into a Cushcraft R6000 vertical antenna. For 40 meters he will try to use an inverted V if he has enough space on his water bungalow. He mentions, "Do not know yet if I will be active on CW and RTTY, however, I'll try, but would not incur the wrath of my girlfriend because it's vacation days, hi hi hi. However there is still a long time and I will try to arrange." QSL via his home callsign. Lastly, Cesare states (on Sunday, July 3rd), "This morning I received an E-mail from Mr. Maussouma (from the Ministry of Telecommunications of Male) in which informed me that the call assigned to me is 8Q7CC."

C2, NAURU. Pekka, OH2YY, hopes to be active using the requested callsign C21YY between July 11-20th. Activity will be SSB only using a 2-element tribander beam and dipole antennas for 40/17/12m. QSL via his home callsign.

DXNL EDITOR RETIRES. Helmut Schlaffer, DL7MAE, editor of the German "DX Newsletter" announced this past week that he is retiring after 4 and a half years. The OPDX would like to wish Helmut the best and thank him for his hard work over the past years in providing the DX community with DX information. His successor will be Alexander Derichs, DG8KAD.

E4, PALESTINE (Update/Callsign). Peri, HB9IQB, who has been granted a license by the Ministry of Telecommunications & Technology in Ramallah,

now plans to be active as E44PM instead of the previously announced callsign E4/HB9IQB. Activity is to take place around the second and third week of December 2011. For more details, see OPDX.1013 or visit the following Web page for more details and updates at: http://www.hb9iqb.ch/palestine.html

FY, FRENCH GUIANA. Jean-Pascal, F5TND, is active as FY5LH from French Guiana until July 29th, 2012. He has had the FY5LH license since 2008. Activity has been on 40-10 meters using SSB, RTTY and PSK. This past week he was on 15 meters RTTY. QSL via F5KDR.

IARU CONTEST AIDS (Zones and Maps). Darek, SP6NVK, invites all of the participants of the IARU Contest to use his helpful service which includes all the information about:
"ITU Zones and Maps" -- http://www.itu.hamatlas.eu
"ITU Zones Service" -- http://www.hamatlas.eu

IOTA NEWS.....
EU-012. Members of the "Worked All Britain Awards Group" will be active as GS4WAB and GS7WAB from Fair Isle between August 16-22nd. The group intends to be operational from Fair Isle's rare WAB squares HZ16, HZ17, HZ26, HZ27. Fair Isle is the only piece of land within the very rare HZ 100 km Ordnance Survey Grid Square. GS4WAB will be established at the South Lighthouse on the island, while GS7WAB will be used for portable activations on other parts of the island including the North Lighthouse. QSL via G4IAR, by the Bureau or direct. If direct, please enclose self-addressed envelope (SAE) and 2 USDs. UK stations send self addressed envelope (SAE) and 2x first class stamps please. For more details about the WAB, see: http://www.worked-all-britain.co.uk

EU-050. Lucio, IK8EJN and possibly other operators from ARI Termoli will be active as IL7A from the Tremiti Islands during July and August. QSL via IK8EJN.

EU-119. Operators Valery/RW3WW, Andrei/RA3WJ, Andrey/RD3WC, Alexey/RW3QNZ and Igor/RG3K will be active as RC3W/1 from Morzhovets Island during the RSGB IOTA Contest weekend (July 30-31st). Morzhovets Island lies only a few km above the Arctic Circle. QSL via RW3WWW.

EU-125. Operators Martin/DC8MH and Michael/DL4ABO will be active as 5P7T and 5P7N, respectively, from Fano Island (WFF OZFF-004) between September 9-11th. Fano is a Danish island in the North Sea off the coast of southwestern Denmark, and is the northern most of the Danish Wadden Sea Islands. The island is 16 km long and 5 km wide and it is located just off the coast from the city of Esbjerg to which it is connected by ferry. Its population is about 3,200 people. Activity will be on the HF bands using CW and SSB. They will have two stations: Icom IC-756PROII and Kenwood TS-570DG. Antennas

are: Kite antenna with CG-3000 Tuner and monoband GP for
40/30/20/17m. QSL via their home callsigns.

EU-062. (Update) Operators Mek/SP7VC and Waldi/SP7IDX will be active
as LA/SP7VC and LA/SP7IDX, respectively, from Vega Island
between July 23rd and August 2nd. Activity will be holiday
style (they plan to do some fishing). They plan to have 2
stations on the air: One for the HF bands and the other for
the 50 MHz (Grid Square JP65BQ). Operations will be 80-6 meters
using SSB and RTTY. They will also be in the RSG IOTA Contest.
Equipment will consist of: IC-7000, TS-450, HEX beam, R-7
vertical, 6 element yagi for 6m, 500w amp for HF and 6m. QSL
via their home callsigns, by the Bureau, direct and also LoTW.
Visit Mek's Web page at: http://www.sp7vc.pl

NA-085. Members of the Kennehoochee Amateur Radio Club (W4BTI) will
activate special event station K4L on an IOTA/Lighthouse
DXpedition from St. George Island (ARLHS USA-1057, USA 140,
USI FL075S, Grid EL791n) between October 5-9th. Visit the
club's Web page at: http://www.w4bti.org/index.html

NA-091. Rob, VE7RSV, is currently active as VE7RSV/P from Broughton
Island (CISA BC-026) located in the Broughton Archipeligo
just east of Port McNeil towards the Mainland. He states,
"I am currently working there on a 8 day shift rotation with
6 days off. Using a FT-857 with a G5RV antenna about 35 feet
high and will be on most days and weekends when time permits.
I prefer to QSL direct and will respond to any requests with
no return postage required. I am good in the RAC Bureau and
will respond to eQSL requests if anyone needs, but I am not
set up on eQSL for my IOTA operation."

NA-145. Joe, K5KUA, will be active as K5KUA/5 from Galveston Island
(USI TX001S, Galveston County, Texas) between July 29th and
August 1st. He will participate in the RSGB IOTA Contest (July
30-31st) as a Single-Op entry. Activity will be on all HF
bands, propagation permitting. QSL via his home callsign,
by the Bureau or direct.

KH4, MIDWAY ISLAND. Joe, KH4/W5FJG, states this past week, "I wanted to
give you all an update on the Midway Island operation. First, I am sorry
I haven't been on the air much the past two weekends. Work has taken up
much of my free time. Things should change next weekend. A new rig is on
its way! A Yaesu FT-1000 Mark V was just purchased and should arrive on
the Island in a few weeks time. We are in the process of obtaining an RF
Amp in the 1KW range. There is a possibility we will hold a special event
on July 4th between Midway Island and the USS Midway on either 15 and or
20 meters. Will provide more details on this as we work them out with the
USS Midway Museum station. The R-5 Vertical has been taken down. We are in
the process of trouble shooting the antenna. We continue to have high SWR
on 20, 17 and part of the 15 meter bands. As of now we continue to work
using the home brew 20m dipole. I wish to thank all of you who have donated

or offered to donate equipment to support us on Midway. Once we get the Mark V and an amp, we should have all the equipment we need to begin to work some pile ups. We can't wait. See you all on the bands soon.....
73 de KH4/W5FJG"

KH6BZF PROPAGATION FORECAST/REPORT (July 4-10th)....
Jul 04 AN SOLAR REFERENCE KEYS
Jul 05 AN --------------------
Jul 06 AN BN - Below Normal
Jul 07 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 08 HN LN - Low Normal
Jul 09 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 10 HN-AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PLEASE NOTE (Update): "The ARRL Letter" reports this past week --
"In April 2011, the Space Weather Prediction Center (SWPC) informed the public that as of September 6, 2011, it would no longer broadcast its geophysical alert message on WWV and WWVH. The ARRL has now learned that the SWPC has changed its mind and will keep broadcasting these messages that inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Due to listener feedback, the SWPC is considering updating the broadcast; in addition to providing the current daily solar flux at 2800 MHz, the SWPC is evaluating adding more frequent observations at 2695 MHz. According to the SWPC website, other improvements to the message content will also be evaluated."

LX, LUXEMBOURG. Members of the Luxembourg Amateur Radio Society (LX0RL) will once again active the R.L. HQ station, LX0HQ, in Eisenborn during the IARU World HF Championship between July 9-10th. There will also be two other LX0HQ stations on the air from two different locations during the contest:
LX7I - Eschdorf (Luxembourg DX and Contest Club LX9DX)
LX1TI - Bascharage
Photos of the LX0HQ stations will be available after the contest on their Web sites <www.rlx.lu> and <www.lx2a.com>. A live webcam will be available during the contest at the LX7I QTH on <www.lx2a.com>. This year 22 operators will be active from 9 Stations (6 at LX7I, 2 at LX0RL and 15m SSB at LX1TI) at 3 QTHs. Operators mentioned are Ron/DL3BPC, Wilko/PA3BWK, Holger/DL5KUT, Andy/DC3RJ, Mich/LX1KQ, Marc/LX1DUC, Andre/LX1AM, Carlo/LX1TI, Philippe/LX2A, Norbert/DJ7JC, Kai/DL3HAH, Frank/DL8LR, Henning/DK9LB, Marco/DJ4MH, Andy/DK5ON, Mike/DF3VM, Chris/DL7CS, Will/DF4PD, Gerd/DF9TS, Detlef/DK3QZ, Matthias/DJ8OG and Hubert/DJ8VH. The

Logbook will be uploaded to LoTW and you can request a Bureau QSL via <lx0hq@rlx.lu> (no need to send a card via Bureau!). QSL via LX2A (New QSL Manager coordinator since 01.07.2009).

PJ4, BONAIRE. Once again the Provins ARC F6KOP team will activate another location, and this time it will be Bonaire (SA-006, WLOTA L1279) as PJ4C. Activity is schedule for January 2012 with 24 operators and six stations on 160-10 meters. More details are expected to be forthcoming. This is the team that activated TJ9PF from Cameroon this year.

PT155, BRAZIL (Special Event). Look for special event station PT155FD to be active between now and July 30th. Activity is to commemorate the 155th anniversary of the first Official Fire Department in Brazil (Rio de Janeiro State). Operation will be SSB on 10/15/20/40 meters. QSL Manager is PS7AB (by the Bureau, direct, or send an E-mail to ps7ab@yahoo.com
and he will send your QSL via the Bureau. For more information, visit: http://www.ps7ab.com.br/pt155fd.htm

ST0, SOUTHERN SUDAN (Update). Paul, N6PSE, sent out the following on July 2nd (Press Release #4): "DXpedition to Southern Sudan -- In just a few short days, the people of Southern Sudan will declare their independence from Sudan and will become the new Republic of Southern Sudan.
Vice President of South Sudan, Dr. Riek Machar Teny has announced that admission as a member state of the United Nations will take place on July 14th, 2011.
The DX Friends and the Intrepid-DX Group continue to monitor the UN General Assembly and Security Council votes and are moving forward with our plans for a large multi-national DXpedition to take place soon after the UN admission occurs.
Equipment has been procured and is being staged for rapid delivery to Juba, the new capitol of Southern Sudan. Team members have applied for their visas and we are awaiting them now.
We have held several successful meetings with representatives of the Government of Southern Sudan. We have been issued an amateur radio license for the purpose of this DXpedition. The Government of South Sudan is very supportive of our plans to visit Juba and to help them celebrate the birth of their new country.
We plan to soon be in the new capital of Juba and to be ready to start our DXpedition after admission by the UN. We will have 18 operators operating 24X7 on seven active stations.
At this time, we are seeking Foundation, Club and Individual Sponsors to help us defray the costs of carrying out this very important DXpedition.
Our official website is http://www.dxfriends.com/SouthernSudan2011/
Thank you, The Intrepid-DX Group and The DX Friends."
http://www.dxfriends.com/
http://www.intrepid-dx.com/

ADDED NOTES: As you can see, the U.S. is not the only nation to celebrate their independence (July 4th) this week, but the Southern Sudan will also celebrate theirs on July 9th. After the celebration, the "News Sudan Vision" reports that the United Nations Security Council will first vote to endorse the Republic of Southern Sudan to become a member of the U.N. on July 13th. The United Nations Security Council will then bring it

before the General Assembly on July 14th. The Southern Sudan is then expected to be the 193rd member/nation of the U.N.. Word has it that once this happens, the International Telecommunication Union (ITU) will issue an international dialing code within 48 hours of their membership into the U.N., and will also provide an ITU prefix block. Stay tuned!

SV9, CRETE. Ron, WB2GAI, will once again be active as SV9/WB2GAI/P between August 29th and September 30th. This will be his fourth DXpedition to Chania, Crete (EU-015). Activity, as always, will be on CW and on 80-10 meters. Ron still has the logs for his 2001, 2005 and 2009 operations. DX stations, if you need a QSL, respond via the Bureau. USA stations, QSL direct.

T6, AFGHANISTAN (Press Release). Paul, N6PSE, sent out the following on June 29th: "Many in the amateur radio community have asked us about our reaction to the attack and bombings at the Kabul Intercontinental Hotel: The Intrepid-DX Group is saddened to learn of the attack and bombings at the Kabul Intercontinental Hotel. This hotel was to be the venue for the now cancelled DXpedition that was planned for May 4th to May 16th, 2011.
The hotel General Manager, Mr. Yousuf Hakimi and his staff were very supportive and welcomed our plans to do a DXpedition from their hotel. The hotel's height on a prominent hilltop made for a spectacular radio location. In early April, we shipped our DXpedition equipment to the hotel. Since we cancelled the DXpedition, Mr. Hakimi and his staff were cooperative in helping us recover the bulk of our equipment.
We cancelled our plans to conduct the DXpedition on the morning following Osama Bin Laden's death. We were to fly to Kabul that very morning. It is just this type of attack that we feared in reprisal for Bin Laden's death. We had hoped that things might stabilize in Kabul and that someday we could resume our plans for a DXpedition, however attacks such as this make those plans unsound and less likely.
We will continue to focus on activating the soon to be new country of The Republic of Southern Sudan.
Thank you, Paul Ewing-N6PSE -- The Intrepid-DX Group"

TI7, COSTA RICA. David, K2DBK, will be active as TI7/K2DBK from Costa Rica between July 10-17th. He states that he will be in the northwest part of the country near the city of Liberia in the Guanacaste region. This is a vacation with friends, so activity will be holiday style with most of his operation to take place in the late afternoon local time. Activity will be SSB only on 20-10 meters and possibly 6 meters, if conditions permit, using 100 watts and a Buddipole system. QSL via his home callsign. For more details and updates, watch David's following links: http://k2dbk.blogspot.com http://k2dbk.com twitter: @k2dbk

TM98, FRANCE (Special Event). Look for special event station TM98TF to be active between now and July 14th. Activity takes place during the start and first stage of the 98th cycling race "The Tour de France", by the Vend&#65533;e area hams (West France) on all HF bands, and possibly other bands, on CW, SSB and the Digital modes. QSL via F6KUF, RC Vend&#65533;en,

either direct or by the Bureau.

V3, BELIZE. Colin/KU5B will be active as V31UB between August 5-10th. Activity will be 80-6 meters, possibly 160m, using CW, SSB and the Digital modes. Look for him in the NAQP CW Contest (August 6-7th). QSL via LoTW, or to KU5B.

VK9L, LORD HOWE ISLAND. Members of the Hellenic Amateur Radio Association of Australia will activate Lord Howe Island (OC-004) as VK9HR between July 23rd and August 2nd. Activity will be for ten days with an international team of ten operators operating CW, SSB and RTTY, and on 160-6 meters. Operators mentioned are Tommy/VK2IR (Team Leader), John/VK3YP, Peter/VK2NN, Raffy/VK2RF, Bruce/VK2KLM, Ed/VK2ARE, Don/N4HH, Alex/OZ7AM, Les/W2LK and Saul/K2XA. QSL via EB7DX. The operation's Web site is: http://www.vk9hr.com

W4, UNITED STATES (Special Event). The Coastal Amateur Radio Team (CART) of Bryan County, Georgia, has the honor of providing communications for the Ft. McAllister Sport Fishing Club's Wounded Warrior Fishing Rodeo on August 20th. CART will also run a special event station, W4W, from 2000z, August 19th, to 2000z, August 21st, in honor of our wounded warriors. Operation will be on 20 meters, SSB and CW. QSL AF4MI, direct with SASE.

YJ, VANUATU. Chris, VK3QB, will once again lead a team of operators to Port Vila on Efate Island 9OC-035), Vanuatu, and be active as YJ0VK between September 30th and October 12th. Operators mentioned are Chris/VK3QB, Luke/VK3HJ, Ian/VK3BUF, Dianne/VK3JDI, Lee/VK3GK, Tom/NQ7R, Ben/N6MUF and Andy/M0HLT. Bands/modes of activity were not yet announced, but last operation they focused on the HF bands (with special attention to the 30/17/12 meter bands). They do plan to have three stations on the air as often as possible. QSL via VK2CA, direct or by the Bureau. LoTW log upload will be available on completion of operation. For update, visit the YJ0VK Web page at: http://yj0vk.odxg.org/yj0vk2011/default.html

ZD8, ASCENSION ISLAND (Update/Delayed). German operators Wolf/DK1IP, Rainer/DL7OR, Gerd/DJ4KW, Arno/DL1CW and Werner/DJ9KH were expected to be active as ZD8D from Garden Cottage, Ascension Island (AF-003), between July 24th and August 9th (see OPDX.1009), but have now push their operation back until possibly October. The delay is due to heavy rainfalls in late April which damaged the street to Garden Cottage (their planned operating site). They have changed their plans and will now use a guesthouse in Georgetown which they state "is not ideal. We have to rely on our fiber-glass poles, as there are no trees etc... We are afraid, that we will be handicapped on 160 and 80m, but we will do our best, of course." For updates, visit their Web page at: http://www.zd8d.de/index.php?home

ZG3, GIBRALTAR (Special Event). Look for Mike, ZB3M, to be active as ZG3M between September 5-11th. He is using this special prefix to celebrate "Gibraltar's National Day" which takes place on September 10th. QSL via the address on QRZ.com.

IARU HF World Championship 2011

To IARU Region 2 Member Societies:

The coming weekend, July 9th and 10th, the 2011 version of the IARU
HF World Championship will take place.

The objective of this SSB and CW contest is to contact as many other
amateurs, especially IARU member society HQ stations, around the world
using the 160, 80, 40, 20, 15 and 10 meter bands. It is open to all
radio amateurs around the world.

We invite IARU member societies to actively participate with their
HQ stations.

The rules for this year's contest can found here:
http://www.arrl.org/iaru-hf-championship

#
Highlights of Solar and Geomagnetic Activity
27 June - 03 July 2011

Solar activity was very low for 27 June to 02 July and increased to
low levels for 03 July. Region 1236 (N17, L=167, class/area Ehi/350
on 15 June), which rotated around west limb on 26 June, produced
most of the activity on 27-28 June. Regions 1242 (N17, L=056,
class/area Dso/90 on 29 June), 1243 (N16, L=351, class/area Cao/80
on 02 July), and 1244 (N16, L=024, class/area Dso/60 on 03 July)
dominated activity for 29 June - 02 July with occasional B-class
flares. Region 1244 became the dominant flare producing region on 03
July with a C2/Sf at 1244 UTC. The region also produced a long
duration B9/Sf at 03/0024 UTC which was associated with type II and
type IV radio sweeps as well as a partial halo CME centered over the
southwest limb.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels for 27-30 June but dropped to background levels for
01-03 July.

Geomagnetic field activity was predominantly quiet for 27-30 June.
Quiet to active levels were observed on 01 July due to a high speed
stream from a coronal hole. Quiet to unsettled levels prevailed for
02-03 July with some isolated active periods at high latitudes as
the high speed stream slowly subsided. The high speed stream was
weak with peak velocity around 450 km/s; enhanced activity intervals
corresponded to somewhat enhanced negative Bz intervals (e.g. around
-5 to -7 nT late in the day on 30 June and early in the day on 03
July).

Forecast of Solar and Geomagnetic Activity
06 July - 01 August 2011

Solar activity is expected to be very low to low for most of the
outlook interval. There may be an increase in background levels for
```

10-21 July with the return of old Region 1236 on 10 July which may also increase activity to low levels. There is a chance that new, rapidly emerging flux regions could increase activity to moderate levels at any time during the outlook period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at background levels initially. An increase to high levels is expected around 20 July and lasting through 26 July in response to a recurrent high speed stream. Background levels are expected to return for 26 July - 01 August.

Geomagnetic field activity is expected to be quiet to unsettled for 6-8 July. Quiet levels are expected for 09-19 July. An increase to unsettled with a chance for active periods is expected for 18-21 July in response to a recurrent high speed stream. Quiet levels are expected to prevail for 24 July - 28 July. Another increase to unsettled levels is expected for 29-30 July due to another recurrent high speed stream, with quiet levels returning for 31 July - 01 August.

4W6A TIMOR-LESTE (EAST TIMOR) DXPEDITION (SEPTEMBER 16-26th, 2011).
<http://www.4w6a.com> PRESS RELEASE NUMBER 4 • July 5th, 2011:
The 4W6A team welcomes Bernd L•nger, VK2IA, as the seventh and final member of the DXpedition. Bernd has joined the DXpedition in order to help balance the requirement for CW operation. He brings a wealth of DXpedition and contesting experience from Europe and the Asia-Pacific area.
Also joining the team, although not in Timor-Leste itself, are Col McGowan, MM0NDX, and Kev Haworth, M0TNX. Col, who is the founder and editor of the DX World website [http://dx-world.net], has been appointed as pilot while Kev will be the assistant QSL manager to Tim, M0URX. Col will be responsible for providing feedback to the team on Atauro Island. He may be contacted at dxer59@gmail.com
CDXC (Chiltern DX Club • the UK DX Foundation), the RSGB DXpedition Fund, the German DX Foundation, the Northern California DX Foundation, the European DX Foundation, the Nippon DX Association and the Northern Illinois DX Association are the latest DX clubs and foundations that are kindly providing financial support for the DXpedition. The team is very grateful to all DX groups, companies and individuals who have offered sponsorship. All are listed with thanks on the 4W6A website at http://www.4w6a.com/sponsors.html If you or your DX club also wish to help, there is a "Donations" page on the 4W6A website. Payments may be made by credit or debit card and you do not need to have a PayPal account yourself in order to make a donation.
4W6A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East Timor), from 16 to 26 September 2011. Activity will be on all bands 10 to 160 metres, using CW, SSB and RTTY. The QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the

operation or, if possible, even during the DXpedition. QSLs may also
be requested using the QSL request form on the website.

YOUNGSTERS TAKE CONTROL OF FINLAND'S 20M SSB IARU HQ STATION AT RADIO ARCALA, OH8X, (Helsinki - July 6th, 2011). "Working OH2HQ may land you not only another HQ multiplier but may give you a good feeling and reinforce your faith in the future of Amateur Radio - so look for these four guys with their well prepared and balanced effort in their first serious contest.

Mari, (YL) 18, OH2FPK, is a true mother figure of the group, radiating sympathy and empathy, but also ready to guide the gang to the best possible results. Mari can fight for her frequency if needed as she is one of the nation's best for her age in a Japanese martial art called taido. Mari is targeting for a meteorological profession and she can communicate with you in both English and Russian.

Leevi, 17, OH2FHN, is the group's superb CW operator but also the team's technical expert. Leevi is a seasoned antenna builder and feels at ease working with electronics. He was just rewarded with a Bencher paddle to bring his CW to new heights. Leevi is comfortable with teaching the group as he conducts amateur radio courses, specializing in the technical part.

Joona, 13, OH2FPG, is the youngest member of the team but well experienced to communicate with people both on radio and in person thanks to his participation in several ham radio promotional exhibits. Joona is quite outspoken and deals with the group's IT needs with his extensive knowledge as another bright youth. Joona can handle the multitudes with his good command of English.

Joel, 13, OH2FHI, is multi-talented and has coupled his burgeoning contesting interest with a focus on music as his way of life. When the IARU contest starts, Joel may blow a few sounds on the air from his accompanying trumpet. Joel is a true powerhouse and lots of fun as an expert, young team-builder with his humor and ready wit. English is Joel's mother language.

So, this team has a very balanced skill set to do well at Radio Arcala's Northern outpost faced with all the expected and unexpected challenges. They plan to do a series of internal 2-hour runs to sort out their rates and then target for the best score along with maximum learning experience while exploiting their current skill levels to meet a variety of needs for achieving the highest possible QSO total.

The Finnish Amateur Radio League (SRAL) is the Finnish national IARU society with more than 4300 OH members while Radio Arcala is an alliance of dedicated Finnish contesters with the aim to increase awareness of competitive amateur radio and related concepts among today's youth through Arcala's extreme and novel approach. There is no doubt that these youngsters get a kick out of turning the mammoth 40-ton antenna constructions and driving the contest machine from the airplane-like Arcala cockpit. Radio extreme at its best. Check out the Radio Arcala website at <www.radioarcala.com>

N.B.

Pictures (JPEG) of the four young operators are available on request.

```
------------------------------
((( 73 de Jarmo, OH2BN )))

ZD8, ASCENSION ISLAND (Correction). German operators Wolf/DK1IP, Rainer/
DL7OR, Gerd/DJ4KW, Arno/DL1CW and Werner/DJ9KH will be active as ZD8D
from Garden Cottage, Ascension Island (AF-003), between July 24th and
August 9th (see OPDX.1009). The dates have not been changed as first
thought only their location on the island due to the heavy rainfalls in
late April which damaged the street to Garden Cottage (their planned
operating site). They have changed their plans and will now use a guest-
house in Georgetown which they state "is not ideal. We have to rely on
our fiberglass poles, as there are no trees etc... We are afraid, that
we will be handicapped on 160 and 80m, but we will do our best, of
course." For updates, visit their Web page at:
http://www.zd8d.de/index.php?home

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

July 6, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- A Long Summer's Day - IARU HF Championship
- North American QSO Party - RTTY Style
- New ACOM Amp at Friederichschafen
- Clock of the Long Now
- Bulgarian HF Blog
- 6 Meter Stat Summary
- Belly Up to the Grounding Bar
- Lets Talk Taps
- It's ALL Multiop

NEW HF OPERATORS - THINGS TO DO

The annual midsummer night's dream of the IARU HF World Championship is
a lot of fun with its summertime propagation (watch 20 at night!),
24-hour format (think the Le Mans road race), and dual-mode operating.
It's an exciting change and a good opportunity to keep your skills
sharp after Field Day. The following weekend features several digital
contests to try, as well!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Bill N5RKD notes that the Chinese radio telescope mentioned last time
will be 500 meters across and Arecibo is 305 meters across.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

July 9-10

- IARU HF World Championship
- SNS and NS Weekly Sprints--CW (Jul 8)
```

- FISTS Summer Sprint--CW (Jul 8)
- Straight Key Weekend Sprint--
- QRP ARCI Summer Homebrew--CW

July 16-17

- North American QSO Party RTTY
- CQ WW VHF Contest
- CWops Monthly Mini-CWT Test (Jul 13)
- DMC RTTY Contest
- Feld-Hell Telephone Sprint
- Russian Radio Team Championship
- CQC Great Colorado Gold Rush--CW
- Run For the Bacon - Monthly--CW (Jul 18)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Bob W5OV just got back from the big Friederichschafen hamfest in Bavaria and posted a big photo album <http://nj-bob.smugmug.com/Professional/FN2011/17704529_nhx2cm> of new products, shots of the goings-on in the Array Solutions booth, beautiful pictures of the countryside, and so forth. The most notable new item was a solid-state 800-watt amplifier from Acom. It apparently includes a tuner and sounds very attractive. No word on availability in the US.

The August issue of the RSGB's Radcom will feature The Joy Of Contesting 2.0 by well-known DXer and contester Mark M0DXR. It's a good read and makes a good example of how competitive operating - i.e. radiosport - makes a very attractive entry to ham radio. (Thanks, Tim K3LR)

Regarding the new Russian prefix assignments mentioned in the previous issue, Joe W4TV notes a potential problem. "Most contests recognize the ARRL DXCC list as the basis for multipliers. The DXCC List treats some of the areas mentioned as being in Europe as Asiatic Russia." Joe advises waiting for some action by the DXCC Manager before making any changes in your CTY files.

Felipe PY1NB has recently created a set of statistics tools on the DX Watch <http://www.dxwatch.com/> website that uses spotting network data. The tools include Top Spots Per Band and Continent <http://www.dxwatch.com/statistics/top_spots.php>, Top Self-Spotters <http://www.dxwatch.com/statistics/top_self_spotters.php>, and an interesting Lid Fest <http://www.dxwatch.com/statistics/lidfest.php>. I guess there is no shortage of data for that last one!

Fred KE7X has written a new book about the Elecraft K3, "The Elecraft K3: Design, Configuration, and Operation <http://www.ke7x.com/home/guide-to-the-k3>." Even if you are not a K3 owner but are interested in this top-flight radio, Fred's presentation make for great radio reading! (Thanks, Ken K0PP)

Here's an interesting website <http://www.itworld.com/software/176647/decoding-compliance-certification-icons> that helps you figure out what all those strange logos are that seem to be plastered all over every piece of electronics. We all recognize the Underwriter Labs mark, but those others? They must mean something, right? Bueller? I assume NOM doesn't mean "good to eat"!

The largest number of transmitters I encountered in a Field Day exchange this year was 25 for the W3AO "humungotron" effort. Always WAY up there, receiving that exchange never fails to raise an eyebrow or bring on a stare of disbelief on the other end of the QSO as the possibilities are considered. If you'd like to have a look at what such an effort entails, have a look at N3ALN's photo album <http://www.n3aln.com/W3AOFD2011.htm> from the weekend. It makes me tired just to look at it! Even is 25 seems like a big number, consider doubling it to 50! The W3AO team hit that mark in 2004 and you can watch the operation on the video, "The Last BIG Field Day" that can be purchased from Amateur Radio Video News <http://arvideonews.com/> (ARVN) for a reasonable cost. (Thanks, Tim K3LR and Gary KN4AQ)

Web Site of the Week - In this faster-faster-faster world, something with a mission of going slow, slower, slowest certainly is attention getting! Such is the Clock of the Long Now <http://www.10000yearclock.net/index.html> - a clock designed to tick once every year for 10,000 years! (The cuckoo is really, really patient...) The Long Now Foundation just received an investment from Jeff Bezos and may be able to start building the clock <http://www.wired.com/gadgetlab/2011/06/10000-year-clock/all/1> "soon", although I suppose that's a relative term!

WORD TO THE WISE

Invitation - the August 21st Rookie Roundup <http://www.arrl.org/rookie-roundup> will be using RTTY for the first time. New hams may be more familiar with computer technology and so may be naturally interested in digital contesting, more than voice or Morse. Why not invite a new ham over to take part? Now is the time to make the invitation so that it can be worked into the busy summer months.

==> SIGHTS AND SOUNDS

Dennis W1UE has a blog <http://lzhffd11.blogspot.com/> underway from the Bulgarian LZ HF Championship <http://www.bfra.org/qrp> that ran on July 2nd. Several US teams took part and as of editing this issue, the final finishing places haven't yet been announced.

EME'ers are well-acquainted with the various "wobbles" of the Moon as it travels along its orbit. Here's a visualization <http://www.universetoday.com/86613/one-year-of-the-moon-in-2-5-minutes/> in the form of a time-lapse video from the Goddard Space Flight Center. It uses data from the Lunar Reconnaissance Orbiter to compress one month into 12 seconds and one year into 2.5 minutes. (From the AMSAT

<http://www.amsat.org/> Weekly Bulletin, ANS-177)

Cory WA3UVV found a scrolling license plate frame <http://www.youtube.com/watch?v=H-oZHXBHmtU> online. He suggests trying messages such as "Follow me to Field Day". With a ham license plate, it could be a novel form of PR for Amateur Radio!

Another space-related animation <http://tinyurl.com/6bx2g3r> depicts key events of NASA's Mars Science Laboratory mission, which will launch in late 2011 and land a rover, Curiosity, on Mars in August 2012. Sooner or later these are going to have a ham radio on them and then will they count as a multiplier? (From the AMSAT <http://amsat.org/> Weekly Bulletin, ANS-184)

Field Day operators who dealt with the wrath of Donner and Blitzen this past weekend may wish to take a gander at this art installation <http://www.diaart.org/sites/page/56/1375> and consider the possibilities!

Old-time QSL aficionados will enjoy this very cool story about Otto Eppers <http://www.arrl.org/otto-eppers-making-waves>, a guy who drew the cartoons for a bunch of those old cards.

==> RESULTS AND RECORDS

Curt K9AKS has been keeping 6 meter stats and he reports that of the fourteen stations who worked at least 280 grids in any year on 6 meters, eight did so in 2011. Four more stations followed with at least 268 grids in 2011. The very highest totals, 337, 314 and 310, however, were achieved in 2010. In fact, the highest thirteen grid totals (over 280) were all worked in either 2010 or 2011. A couple of pretty good years on six - very widespread openings brought high grid totals. Eight stations claimed over 1200 QSOs on 6 this year, but none over 1500 where the top four all time totals still reside. Four of the top ten all-time QSO totals are claimed for 2011. The trends are clear; in years with good conditions, grid and QSO totals will continue to rise.

All of the results, certificate and plaque winners for the 2010 Ontario QSO Party <http://www.va3cco.com/oqp/results/index.htm> are now available on the OQP website. PDF certificates are available and plaque winners will receive their prize by mail. A special thanks to compiler-in-chief, Bob VE3KZ. (Thanks, Don VE3XD)

OPERATING TIP

It has been observed that many Field Day operators tended to run their pileups like a traffic net. For example, a caller would be acknowledged without giving an exchange, leading to an extra round of communications in every contact. For example,

- CQ FD KO0A
- [pileup]
- W1ABC go ahead

- KO0A de W1ABC 1A EMA
- W1ABC 2A MO
- QSL
- TU FD KO0A

While this is OK on a directed net, it's not efficient during Field Day. Similarly, calling a station and giving the full exchange is a way to check into a traffic net but doesn't work well otherwise. So we have some mentoring to do about effective technique. If you don't think this is a significant waste of time, consider having to say the extra back-and-forth 1000 times in a row before you could begin regular operation!

==> TECHNICAL TOPICS AND INFORMATION

Jim W6RMK reminds us of the ubiquitous and inexpensive "grounding bar <http://www.acehardwareoutlet.com/ProductDetails.aspx?SKU=34820>" used inside a circuit breaker box. Each bar has plenty of holes with clamp screws on each one. Used with an anti-oxidation compound, these make great grounding busses for radials and ground wires.

And as far as laying those radials...why dig when your lawn will bury the radials for you? Cut your grass very short - then within hours lay the radials by hand, held down by galvanized landscape pins (a short piece of galvanized wire bent double works just fine) and with the end of each wire wrapped around a pin pushed deep. Set the mower a bit higher for the next few cuttings. Water to keep the sod growing at a fast rate - if needed. In four weeks or so all radials will self-bury and be gone under the sod. After five years the radials are down about 6 inches - all on their own. (Thanks, Tim K3LR)

Here's a video tour <https://www.base2.us/index.php?page=ac> of a professional PC board manufacturer (Advanced Circuits). If you ever wanted to know just how it's done, take this tour and listen to the explanation!

Microwave Journal just ran an informative article on the materials used to make cables <http://www.mwjournal-digital.com/mwjournal/201106/?pg=42&pm=2&u1=friend>. Food for thought!

Julius N2WN had to pull some ground rods while relocating a couple of verticals. He uses copper tubing but this would work with rods too. Take a pipe wrench and gently break the rod loose by twisting back and forth. Once loose, apply a slight upward pressure and basically "unscrew" the rods from the ground.

The current issue of Nuts and Volts <http://www.nutsvolts.com/> magazine includes a "Bat Detector" ultrasonic receiver. What does this have to do with radio? It contains a nice discussion of heterodyning in a different context, for one thing. Also, the use of ultrasonics could create an interesting parallel to radiosport, using different frequency ranges and a simple ultrasonic transmitter, no licenses required!

Technical Web Site of the Week - Tapped antenna loading coil design is aided by two online calculators. The first one <http://www.chemeng.ed.ac.uk/people/jack/radio/software/loading.html> estimates the coil inductance value for a given frequency, radiator length, and position of the coil along the radiator. The second <http://ecosse.org/jack/radio/software/newcoil3.html> gives you the number of windings you'll need for a given coil diameter, length, and given inductance value. (Thanks, Pete W1PNS)

==> CONVERSATION

It's ALL Multi-op

Wasn't Field Day fun? Even for the dyed-in-the-wool single-ops, the annual Field Day cooperative adventures and misadventures are a great antidote to the "all by myself" perspective. I think that's one reason why yesteryear's great W1ICD QST covers of June and July were so resonant with so many. Team building and planning, followed by the inevitable collision with reality, are such a deep part of Amateur Radio. And if it can be humorous and fun along the way, well, who's to quibble with that?

Sitting around in one of the few remaining dry spots on Saturday night with the rest of the night owls of the St Charles Amateur Radio Club (KO0A) and waiting for the barrage of thunderstorms to pass us by, it was an opportunity to share some stories and a few laughs. Some of us were brand-new to the game and others old hands, but we were all sharing a common goal and had our shoulders to the same wheel. There were many hands to share the set up and just as many to take it all down again on Sunday. The memories of that weather-filled night won't distinguish between Tech, General, and Extra.

John Sluymer, VE3EJ, in his recent CQ Contest Hall of Fame acceptance speech stated as much by recounting just how many of his achievements depended on more than just himself. So many times through the speech, he came back to "again, multiop." Although recognized for his personal achievements, John richly deserves his position on the HOF list even more because of his acknowledgement that all of us get here with many helping hands.

Even if we send in our logs as "Single-Op" in a contest, it's more than likely that more than one person was involved in getting a station going. Family members pitch in - or help make space in your life for you to do the work. Antenna-raising work parties - think "Seven Beams for Seven Brothers" - are as fundamental a part of ham radio as you can get. And then there are the after-meeting-meetings when tips and tricks and troubleshooting techniques are traded.

No, there's little in our stations that is truly a single-op effort. Certainly, it would be a lonely hobby without all of you out there. Thanks for helping your fellow hams and almost-hams and going-to-be-hams. Maybe Marconi did it himself but even Guglielmo needed a pair of ears on "the other end" to receive that first

trans-Atlantic "S".

73, Ward N0AX

==> CONTESTS

6 July through 19 July 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

IARU HF World Championship--Phone,CW, from Jul 9, 1200Z to Jul 10, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and IARU zone. Logs due: 30 days. Rules <http://www.arrl.org/contests>

SNS and NS Weekly Sprints--CW, from Jul 8, 0200Z to Jul 8, 0300Z. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

FISTS Summer Sprint--CW, from Jul 8, 2000 EDT to Jul 8, 2400 EDT. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, name, FISTS number or pwr. Logs due: 30 days. Rules <http://www.fists.org/>

Straight Key Weekend Sprint--CW, from Jul 10, 0000Z to Jul 10, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

C2 - NAURU, OC-031
OH2YY hopes to be active in SSB signing C21YY from July 11-20. He will
be using a 2 ele tribander and dipoles for 40/17/12m. QSL via homecall.

GD - ISLE OF MAN, EU-116
The group of MD/DK1SG, MD/DJ4AK, MD/DL1SPH, MD/DH1SBB, MD/DG7SF,
MD/DG5SBK, MD/DG1SBU, MD/DL6SBN, MD/DC5SAN, MD/DO9BC, MD/DO5MZ,
MD/DO2TGO plus two SWLs, are going to hit the airwaves in CW, SSB,
RTTY und PSK on 160m-6m from the Isle of Man (EU-116, WLOTA LH0449)
from Jul 7-14. Listen for them on the usual IOTA frequencies +/- QRM.
All QSOs will be confirmed via bureau (via homecalls) automatically.
The team will join the IARU HF World Championship on Jul 9/10 as MD9Y.
For MD9Y QSL only direct via GD3YUM. See also: http://do9bc.de

J7 - DOMINICA, NA-101
J79XB is the callsign of Mike,VE2XB, on Dominica (NA-101) where he
plans to stay for the next weeks starting on Jul 6. He will work on
all HF bands and maybe also on 6m.
After that Mike plans to activate St. Pierre & Miquelon (FP) in August
or September. His QSL route can be found on QRZ.com.

JX - JAN MAYEN, EU-022
Stan,SQ8X, is the leader of the JX5O DXpedition to Jan Mayen taking
place from Jul 6-14. He will be accompanied by Pete,SQ9DIE, Tomek,SQ9C,
Vicky,SV2KBS, Bjoern,SM0MDG, Leszek,NI1L, Bernie,HB9ASZ, and Jon,TF3ZA.
They want to work with two or three stations at the same time on all
bands except 80m/160m (no DX conds in summer) mainly in CW and RTTY/PSK
but also in SSB.
QSLs should be sent direct to SQ8X, Stan, Box 8, 38-600 Lesko, Poland.
QSLs (bureau or direct) can be requested also via the OQRS system on:
http://janmayen2011.org

LY - LITHUANIA
LY53SOP will be activated for the Sea of Peace award by Saulius,LY5W,
from Jul 1-31. QSL via LY5W, Saulius Zalnerauskas, Box 1081, Kaunas,
LT-49005 Lithuania.

ST0 - SOUTH SUDAN
The Intrepid-DX Group and the DX Friends are planning a multi-national
DXpedition to South Sudan which will declare its independence on Jul 9.
They have talked with the designated government of South Sudan and they
also plan to install amateur radio in the country. They will apply for
a new prefix from the ITU. Operations will commence in Juba on Jul 9.
The team includes following OPs: Dave,K3LP (co-leader), Roberto,EA2RY,
Antonio,EA5RM (co-leader), Paul,N6PSE (co-leader), Hrane,YT1AD,
Manolo,EA7AJR, Krassy,K1LZ, Jose,EA7KW, Bob,N6OX, Flo,F5CWU,
Jun,JH4RHF, Bernard,F9IE, Dmitri,RA9USU, Fabrizio,IN3ZNR, Al,K3VN,
Valery,UT7CR, Bill,N2WB, and Dave,AH6HY.
Their pilote stations are Chuck,AA6G, (got USA), Toshi,JA1ELY (JA),
Col,MM0NDX (for EU).
See also: http://www.dxfriends.com/SouthernSudan2011
http://www.dxfriends.com or http://www.intrepid-dx.com

SV9 - CRETE ISLAND, EU-015
OM Claude,HB9CRX, and his XYL Doris are spending their holidays in
Kissamos from Jul 11-27. Claude will work with QRP signing SV9/HB9CRX
in CW on 30m-10m. QSL via HB9CRX.

TF - ICELAND, EU-021
Oleksiy,TF/VE2XAA, is working from Iceland (EU-021) in CW, SSB and RTTY
on 160m-6m from Jul 6-11. He will use the callsign TF4X in the upcoming
IARU HF Championship Contest on Jul 9/10.
QSL for TF4X via G3SWH, all other cards should be sent to his homecall.

TI7 - COSTA RICA
David,TI7/K2DBK, will be QRV from Costa Rica from Jul 10-17. His QTH
will be in the northwest part of the country near the city of Liberia
in the Guanacaste region. David will be on vacation with friends so
this will be a "holiday style" operation with operating mostly taking
place in the late afternoon local time. He will work only in SSB on
10m-20m and possibly 6m if conditions permit. QSL via homecall.
His address: http://k2dbk.blogspot.com or http://k2dbk.com
twitter: @k2dbk

V4 - ST KITTS AND NEVIS, NA-104
John, W5JON, will be on the air again as V47JA from Calypso Bay on
St. Kitts (NA-104, CQ Zone 8, Grid FK87pg) between Jul 12 and Aug 2.
He will work in SSB on 80m-6m and also in the CQWW VHF Contest and the
RSGB IOTA SSB Contest. His XYL Cathy,W5HAM, will be active on the bands
as well signing V47HAM. All QSLs via W5JON.

ZF - CAYMAND ISLANDS, NA-016
Bob,W5UQ, and Bill,W5SJ, will be QRV as ZF2UQ and ZF2EZ from Jul 11-18.
They plan to take part also in the CQWW VHF Contest (Jul 16-17) mainly
on 6m. Listen for them mostly in CW and only some SSB on the HF bands

outside of the contest. QSL via W5JAY (see QRZ.com).

FRANCE, SPECIAL EVENT STATION
The special event station TM98TF will be QRV in CW, SSB and digital
modes on all bands during the Tour de France from Jul 1-14.
QSLs via bureau or direct to F6KUF.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 9: FISTS Sprint Contest
Jul 9-10: IARU HF World Championship
Jul 10: QRP-ARCI Summer Homebrew Sprint

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-010, GM, Outer Hebrides: At the end of their visit in the northwest of
Scotland 2E0LSR and 2E0DJR may show up from Baleshare und Berneray on
Jul 5 and maybe also from Vallay on Jul 7. Their call will be 2M0LSR/p.
QSL via 2E0LSR (direct/bureau). See also: http://2e0lsr.wordpress.com

EU-016, 9A, Dalmatia South group: 9A/SM0R will show up from different places
on Hvar from Jul 10-15. QSL via SM0RUX (direct/bureau).

EU-055, LA, Sogn og Fjordane / Hordaland / Rogaland County group: LA1QDA
will be QRV in CW and SSB on 80m-6m from his summer QTH on Store Sotra
from Jul 11-31. QSL via LA1QDA (direct/bureau).

EU-057, DL, Mecklenburg-Vorpommern State group: DM8TA is working in SSB
mostly on 20m from Ruegen until Jul 13. QSL via bureau.

EU-128, DL, Schleswig-Holstein State East group: DF8HS will be QRV from
Fehmarn from Jul 9-29. QSL via bureau.

IOTA TRIP: G3ZHL, G3YKI and G8IBO are on a sailing trip and plan to activate
several islands in the north and west of Scotland as GM3ZHL/p from
Jul 9-22. QSL via GM3ZHL (bureau) or G3ZHL (direct).

627. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.misc
Date: 2011-07-07 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1310018700@panix.com>
Source record: 4267
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-07-07
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** SPORADIC E saison, inputs to MMMonVHF and Observation 2011 **

In case of an ES opening on 144 MHz please remember to send all your
QSO in a short Log to MMMonVHF - HOW? Please go to the MMMonVHF forum
www.mmmonvhf.de/minibb/index.php?action=vthread&forum=11&topic=80
and read about our "call for reports". The text will be available
in several languages. or use direct the input at:

http://www.mmmonvhf.de/es.php >>> click on "Send your Report"

Remember please that we are going to publish ONLY 144 MHz Logs - if
we get input for 6m, 4m or 3m reports we do use it for the headline.
As you all know, the most necessary at a SPORADIC E Opening will be
to be at the right time at the right place. As well every of us will
have some "warning" systems for the time between May to August.

** New beacon transmitting in WSPR mode from EA1 **

Hi all. Let me give you some good news: A new solar powered beacon
is active from EA1 in CW on 144.425 owned by EA1HBX. Also, since July
2nd a new beacon is operative on 432 Mhz in ROS mode. These beacons
are high enough to give surprises.. and we're ready to feed them with
new and better antennas. The WSPR beacon on VHF is now in the right
QRG: 144.489 and has a GPS attached for a better accuracy. All details
here (google translation available): www.ea1uro.com/balizas.html
reports to rst"at"ea1uro.com - 73s Fernando, EC1AME

SOURCE: tnx to Dirk, ON5GS, direct to MMMonVHF

** The 144 MHz EME NewsLetter - Current Issue July 2011 **

Since 2003 DF2ZC publishes the 144 MHz EME NewsLetter. This is
a free service for the EME community. Bernd, DF2ZC, informed us
that the latest edition of the EME-Newsletter is now available
at: http://www.df2zc.de/newsletter - EMENL201107 [1.441 KB] 73

** 4L1AN on 6m (as well EME) in month july **

Tom K5BM could not be present to help during moonset Monday, because he needed to be with his son who is quite ill. Also for that reason, they had to dismantle the EME station and return early to Tiblisi where better care could be obtained for Tom's son. They are sorry that they were unable to provide additional contacts, but health and safety had to take priority. 4L1AN hopes to be able to obtain additional temporary 6m license approvals in the future after he completes construction of his own amplifier, so future 6m EME operations from 4L may be possible. Many thanks to K5BM and 4L1AN for their tremendous effort and sacrifices to make the first 6m EME contacts from that DXCC!
SOURCE: Lance Collister, W7GJ, via Magic Band EME Group

** JX, JAN MAYEN qrv HF and 50 MHz in July **

Stan, SQ8X, reports that he has received an email from The Norwegian Post and Telecommunications Authority (NPT) granting ham radio license - and permission to transmit from Jan Mayen Island (IOTA EU-022, WLOTA 1454, WFF LAFF-047, Grid Loc. IQ50). JX5O will be a group callsign used during the Jan Mayen International DXpedition scheduled for 6-14th of July 2011. Operators include Stan SQ8X (team leader), Vicky SV2KBS/LA7VPA, Bernhard HB9ASZ, Leszek NI1L, Bjorn SM0MDG, Tom SQ9C, Pete SQ9DIE and Jon TF3ZA.The DXpedition will focus on 30-6 metres, and their main modes will be CW and RTTY/PSK, with some SSB if conditions are good enough to operate as much as they wish to. QSL direct to QSL SQ8X, or use the OQRS. Website: janmayen2011.org/
SOURCE: [dx-world.net] via ICPO Bulletin (01 - 08 July 2011)

** J7 - DOMINICA, NA-101, qrv HF and 50 MHz **

J79XB is the callsign of Mike,VE2XB, on Dominica (NA-101) where he plans to stay for the next weeks starting on Jul 6. He will work on all HF bands and maybe also on 6m. After that Mike plans to activate St. Pierre & Miquelon (FP) in August or September. His QSL route can be found on QRZ.com. SOURCE: DXNL 1735 (Jul 6, 2011)

** Kea Island , KM27, in the Air on HF, 50 and 144 MHz **

Nick, SV1CEI, will be active as SV1CEI/8/p from Kea Island (GIOTA SAS-036, IOTA EU-067, MIA MG-053, WLOTA 1806, Grid Loc. KM27) in July and August. He will operate CW and some SSB, and be be QRV holiday style on the HF bands, and on 6 and 2 metres if conditions

allow. QSL via home call.
SOURCE: [425 DX News] via ICPO Bulletin (01 - 08 July 2011)

** Maldives, 8Q, activated by Cesare, I0WDX on HF and 6m **

Cesare, I0WDX, will be active as 8Q7CC from Furanafushi Island, North Male Atoll, Maldives, between November 2-12th. He informs OPDX that he will be active on 20-6 meters, including the WARC bands, using an Icom IC-7000 into a Cushcraft R6000 vertical antenna. For 40 meters he will try to use an inverted V if he has enough space on his water bungalow. He mentions, "Do not know yet if I will be active on CW and RTTY, how ever, I'll try, but would not incur the wrath of my girlfriend because it's vacation days, hi hi hi. However there is still a long time and I will try to arrange." QSL via his home callsign. Lastly, Cesare states (on Sunday, July 3rd), "This morning I received an E-mail from Mr. Maussouma (from the Ministry of Telecommunications of Male) in which informed me that the call assigned to me is 8Q7CC."
SOURCE: Ohio/Penn DX Bulletin #1017

** Belize qrv HF and 50 MHz **

Colin, KU5B, will once again be active from Placencia (WW Loc. EK56TM) Belize, as V31UB from 5-10 August 2011, including an entry in the North American CW QSO Party (6-7 August). QRV on 80-6m, 160m possible SSB CW and digital modes. QSL via LoTW or direct to KU5B.
SOURCE: [NG3K] via ICPO Bulletin (01 - 08 July 2011)

** Dodecanese, SV5, qrv HF and up **

Bert spending the holidays with his family on Rhodos from Jun 30 until Jul 10. I will work in CW and SSB on 160m-6m signing SV5/DJ5MN with 100 watts and a vertical for HF and 25 watts and yagis for 2m and 70cm QSL only via the DARC bureau, I don't need your dollars.
SOURCE: DXNL 1734

** Market Reef, OJ0, HF and 50 MHz **

Max ON5UR, Marc ON8AK, Jelmer PA5R and Dervin PD9DX will be active as OJ0UR from Market Reef on 13-20 August. QSL via M0URX, direct or bureau (QSLling instructions at www.m0urx.com). The web pages for the expediton can be found at www.united-radio.be
SOURCE: Sixitalia Weekly

** 5B, CYPRUS, in the Air **

Zoli, HA5PP, will once again be active as 5B/HA5PP during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via HA5PP. There may be some 6m activity outside of the contest. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1017

** Andy, N8OFS back in the Caboose on 50 MHz **

Andy N8OFS, writes; Howdy gang... I'll be back in the Caboose for the CQ WW VHF 2011 Contest... Same reliable setup, Kenwood TS-60 to 29.4ft of LMR-400 to the "Dominator" 5/8 wave Vertical @ 29.5ft Parked calling on 52.525 FM Broadcasting Live and Direct from the big Caboose at the beloved AC&J Railroad in EN91or... The only small snag is that again I'll only be able to be on the air for the first 25 out of the 27 total Contest hours. July 16 1800Z to July 17 1900Z SOURCE: tnx to Andy, N8OFS, direct to MMMonVHF

==> + 2011 SECOND MEETING OF THE ARRL BOARD OF DIRECTORS SET FOR JULY
15-16, AGENDA ANNOUNCED

ARRL policy is made by its Board of Directors. The 15 voting members
of the Board are the Directors who are elected by the ARRL members in
their respective divisions. The Board meets in January and July,
usually in the Hartford area. ARRL members also elect Vice Directors
who may attend the meetings. ARRL Directors and Vice Directors are
volunteers who work hard to represent the ARRL in their divisions, to
represent the members who elect them on policy issues and to conduct
the committee work that is so important to good decision-making. This
month's Board Meeting activities will begin on Thursday, July 14 with
meetings of two standing committees, the Administration & Finance (A&F)
```

Committee and the Programs & Services Committee. Each is made up of five Directors and a Vice Director, with the treasurer serving as an additional member of the A&F Committee. Read more here <http://www.arrl.org/news/2011-second-meeting-of-the-arrl-board-of-directors-set-for-july-15-16-agenda-announced>.

==> FCC NEWS: FCC ISSUES CITATION TO CANADIAN COMPANY FOR MARKETING UNAUTHORIZED DEVICES IN US

On July 6, the FCC issued a Citation to New Generation Hobbies of Woodbridge, Ontario, Canada, for marketing unauthorized radio frequency devices in the United States that operate on restricted frequencies. This is in violation of Section 302(b) of the Communications Act and Sections 2.803 and 15.205(a) of the FCC's rules. In the Citation, the FCC advised New Generation Hobbies to "take immediate steps to come into compliance and to avoid any recurrence of this misconduct. As explained [in the Citation] and as provided in the Communications Act, future violations of the Rules in this regard may subject [the] company to substantial monetary penalties, seizure of equipment and criminal sanctions."

The FCC acted in response to a complaint alleging that New Generation was marketing certain video transmitters that operate on restricted frequencies in the 2.4 GHz band. In September 2009, the FCC sent a Letter of Inquiry to New Generation. At that time, the FCC Spectrum Enforcement Division observed that New Generation was marketing two 2.4 GHz transmitters on its website: the LawMate 500 mW 2.4 GHz transmitter and the LawMate 1 W 2.4 GHz transmitter. The Amateur Radio Service is allocated portions of the 2.4 GHz band on a primary basis. Read more here <http://www.arrl.org/news/fcc-issues-em-citation-em-to-canadian-company-for-marketing-unauthorized-devices-in-us>.

==> + HAM RADIO IN HOLLYWOOD: ANOTHER HOLLYWOOD BLOCKBUSTER FEATURES AMATEUR RADIO

The summer of 2011 is replete with big movies, ranging from action-adventure flicks to comedies to coming-of-age dramas. And already this summer, Amateur Radio has played a part in not one, but two movies. In Mr Popper's Penguins, ham radio was featured, albeit incorrectly, on the big screen. And now Super 8 -- a film set just outside Dayton, Ohio in 1979 -- uses Amateur Radio in a crucial scene. Super 8 revolves around a group of six middle-schoolers who witnesses a mysterious train crash in the fictional town of Lillian. Soon after the crash, the Air Force arrives and strange things start happening in the small town. The kids, a group of young film makers (hence the title of the movie) begin to investigate the creepy phenomena. Read more here <http://www.arrl.org/news/another-hollywood-blockbuster-features-amateur-radio>.

==> ARRL HOSTS WEBINAR ON AMATEUR RADIO RESPONSE TO HURRICANES

The ARRL will host a webinar from 8-9:30 PM (EDT) on July 7 to present information about the 2011 hurricane season and the Amateur Radio response. This webinar was organized by ARRL Directors N3LLR, K5MC, W4OZK and K5RAV. The program will offer presentations from representatives from the National Hurricane Center and WX4NHC, the VoIP Hurricane Net, the Hurricane Watch Net and the ARRL. Webinar registration is open to all, but will be of particular interest to those amateurs in hurricane-prone areas. If you are interested in emergency communications and hurricane preparedness and response, you are invited to attend this online presentation. Read more here <http://www.arrl.org/news/register-for-upcoming-webinar-on-amateur-radio-response-to-2011-hurricane-season>.

==> + CHECK OUT THE AUGUST ISSUE OF QST

The August issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

When you support your vertical antenna from the top, you open up a lot of possibilities. That's what Bob Glorioso, W1IS, found when he decided to support his monopole antenna from the top and do away with ground radials. Find out how he did it in his article "A Suspended Quarter Wave 40 Meter Wire Vertical Monopole." William E. Johnson, W0MS, takes a new twist on a classic QRP transmitter in his article "A Modified MouseFET Low Power Transmitter." You, too, can build this updated version of a classic HF CW low power transmitter.

Boy Scouting and adventure go hand-in-hand, so it's no wonder that Boy Scout Troop 6 of Monument, Colorado had a blast GeoFoxing in the Rocky Mountains. GeoFoxing combines Amateur Radio Direction Finding -- also called foxhunting -- with geocaching. Assistant Scoutmaster Stu Turner, W0STU, found a terrific way to involve youth in Amateur Radio. Find out how you can do the same in his article "GeoFox Radiosport Rally." Join QST Editor Steve Ford, WB8IMY, as he takes readers along to the 2011 Dayton Hamvention® and the 2011 ARRL National Convention in Plano, Texas. Ford also checks out some of the newest Amateur Radio products that debuted at Hamvention.

QST Technical Editor Joel Hallas, W1ZR, takes a look at the Ten-Tec Model 599AT Eagle HF and 6 meter transceiver in this month's Product Review. He says that this rig "brings together a very good receiver in a compact footprint HF and 6 meter transceiver with minimal menus and controls." Hallas also checks out the Ten-Tec 777 DX PRO headset. He says this headset is "the perfect choice for an operator looking for a comfortable high-quality boom mic headset that can provide fine sounding audio without the need for external equalization."

Nate Moreschi, N4YDU, delivers the results of the 2011 ARRL International DX CW Contest. Calling it "an intense competition," Moreschi said that there were several records broken in the contest, as well as many tight races. For instance, in the W/VE Multioperator/Multi

Transmitter category, the first place team won by only 28 QSOs and 8 multipliers. "Over a 48 hour period, that's just more than half a contact per hour and less than two tenths of a multiplier per hour - pretty close," Moreschi explained.

Of course, there are the usual columns you know and expect in the August QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your August issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of June -- looks at ARRL Field Day, reviews the ARRL's formal working agreements with served agencies, getting ready for WRC-12, preparing online courses, hosting workshops for utility company employees, seeking input from members regarding VHF/UHF contest participations, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-35>.

==> + SPACE WEATHER PREDICTION CENTER TO CONTINUE BROADCASTS ON WWV AND WWVH

In April 2011, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) informed the public that as of September 6, 2011, it would no longer broadcast its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. The ARRL has now learned that the SWPC will keep broadcasting these messages that inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Due to listener feedback, the SWPC is considering updating the broadcast; in addition to providing the current daily solar flux at 2800 MHz, the SWPC is considering adding more frequent observations at 2695 MHz. According to the SWPC website <http://www.swpc.noaa.gov/wwv/>. other improvements to the message content will also be evaluated.

==> SOLAR UPDATE

Tad "The Sun is shining down <http://www.youtube.com/watch?v=PCVgxAplRoA>" Cook, K7RA, reports: The average daily sunspot numbers for the past week dropped less than a point -- from 42 to 41.6 -- compared to the previous week, while the average daily solar flux was down more than 5 points to 86.2. The predicted solar flux for the near term is lower than of late, with values for July 7-13 at 84, 82, 84, 86, 88, 90, 92, and then 90 on July

14-17, then 88 on July 18-21. The predicted planetary A index for July 7-12 is 8, 10, 5, 5, 7 and 7, followed by 6 on July 13-18. This is followed by a rise in geomagnetic activity on July 19-24, with planetary A index at 7, 8, 12, 15, 10 and 7. The latest smoothed sunspot number prediction <http://www.swpc.noaa.gov/weekly/pdf/prf1870.pdf> on page 13 shows the numbers for December 2010 through December 2011 slightly lower. Last month's prediction showed smoothed sunspot numbers for that period at 30, 34, 38, 41, 45, 49, 54, 59, 63, 66, 68, 71 and 74. The latest has the values for those same months changed to 29, 32, 36, 39, 43, 47, 52, 57, 61, 64, 66, 69 and 72. The reason that in July we see last December's number change is because the smoothed sunspot number represents an average of data over one year. The data for approximately six months after December 2010 wasn't completely known until the end of June, and each successive month after that contains one more month of predicted data, instead of data that is actually measured. Look for more information on the ARRL website on Friday, July 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Bowling for Soup's Greatest Day <http://en.wikipedia.org/wiki/Bowling_for_Soup>.

==> + ARRL RECOGNIZES: KAZIMIERZ "KAI" SIWIAK, KE4PT, WINS JUNE QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for June is Kazimierz "Kai" Siwiak, KE4PT, for his article "Is There an Optimum Height for an HF Antenna?" Congratulations Kai! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the July issue today.

==> THIS WEEK ON THE RADIO

This week:

- July 8 -- QRP Fox Hunt
- July 9 -- FISTS Summer Sprint
- July 9-10 -- IARU HF World Championship <http://www.arrl.org/iaru-hf-championship>
- July 10 -- SKCC Weekend Sprint; ARCI Summer Homebrew Sprint
- July 13-14 -- CWops Mini-CWT Test

Next week:

- July 16 -- Feld Hell Sprint
- July 16-17 -- DMC RTTY Contest; CWops Mini-CWT Test; CQ Worldwide VHF Contest; North American QSO Party (RTTY)
- July 17 -- CQC Great Colorado Gold Rush
- July 18 -- Run for the Bacon QRP Contest

- July 21 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 15-17 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>, Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>, Oklahoma City, Oklahoma
- August 5-6 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-1>, Austin, Texas
- August 5-7 -- ARRL Rocky Mountain Division Convention <http://www.arrl.org/hamfests/rocky-mountain-division-convention-1>, Taos, New Mexico; ARRL Midwest Division Convention <http://www.arrl.org/hamfests/midwest-division-convention>, Cedar Rapids, Iowa
- August 20 -- ARRL West Virginia State Convention <http://www.arrl.org/hamfests/west-virginia-state-convention-1>, Weston, West Virginia
- August 20-21 -- ARRL Alabama State Convention <http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest>, Huntsville, Alabama
- August 21 -- ARRL Kansas State Convention <http://www.arrl.org/hamfests/kansas-state-convention-1>, Salina, Kansas
- August 28 -- ARRL Western Pennsylvania Section Convention <http://www.arrl.org/hamfests/western-pennsylvania-section-convention-1>, New Kensington, Pennsylvania
- September 9-11 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>, Torrance, California
- September 11 -- ARRL Great Lakes Division Convention <http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest>, Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamfest>, Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention

<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington

Amateur Radio Newsline(tm) Report 1769 - July 9 2011

CLOSED CIRCUIT ADVISORY

The following is a closed circuit advisory and is not necessarily for air. I'm Amasteur Radio Newsline Producer Bill Pasternak here to bring you up to date on two important items.

First a big shout out of thanks to all of you who have so far give from your heart through your donations made to the Newsline Support Fund. If you don't take into account the annual expenses that we incur each year in presenting the Amateur Radio Newsline Young Ham of the Year Award, we are pretty much OK through about late October. So unless there is some major calamity, of ongoing funding drops to a drizzle, you likely won't hear us making any further general funding requests till years end. And as I've said so many times before, we much prefer to devote this time to reporting the news instead of asking for contributions so that we can continue to bring you the news.

And some more good news. A few weeks ago we announced that we might have to cancel this years Young Ham of the Year Award because there looked to be no viable nominations. Well, once again some of you responded and as a result we now have a small plethora of good nominations for the judging committee to sift through and on Saturday, August 20th, a young ham from somewhere in the United States or Canada will be honored with the Young Ham of the Year Award at a presentation that will be made at the Huntsville Hamfest in Huntsville, Alabama.

The only question right now is weather or not Newsline will be able to send a representative from our Los Angeles headquarters due to the high cost of air fare this year. As noted, thanks to your generosity we have almost enough funds to keep us to near the end of the year. What we do not have, and what we must raise is about $750 to cover staff airfare and hosting the mini banquet for the recipient and his or her family. So once again we are turning to you to help fill that financial void.

As you know, your tax-deductible donations can be made on-line using Pay-Pal. Just go to our website at www.arnewsline.org and click on the button that says "Make A Donation." Or you can send it by regular mail to the address you will hear at the end of this weeks newscast. Whichever way you choose, the all-volunteer staff here at the Amateur Radio Newsline say thank you for believing in us and for supporting the work that we do.

That ends the closed circuit advisory. I'm Bill Pasternak, WA6ITF. Now here is Jim Davis, W2JKD, with this weeks report.

**

Amateur Radio Newsline report number 1769 with a release date of Friday, July 9 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio will help celebrate the birth of a new nation, Malta gives its hams a temporary 500 Kilohertz allocation, Portugal OK's 60 meter operation, and that old light bulb in Northern California celebrates its 110th birthday. Find out the details are on Amateur Radio Newsline(tm) report number 1769 coming your way right now.

(Billboard Cart Here)

**

BREAKING DX NEWS: NEW NATION OF SOUTH SUDAN EXPECTED ON THE AIR SHORTLY

Ham radio will be a part of the birth of a new nation. The Intrepid-DX Group and the DX Friends plan to activate the Southern Sudan as a new country almost immediately after it gains its independence from The Sudan on or after July 9th. We have the latest from Amateur Radio Newslines Norm Seeley, KI7UP.

--

According to a press release from the DXpedition planners, South Sudan Vice President Dr. Riek Machar Teny has announced that admission of his newly created country as a member state of the United Nations will take place on July 14th. The release goes on to say that the DXpedition plans to be in the nation's capital of Juba and to be ready to start operations right after the South Sudan is granted admission to the UN.

If all goes as expected, the UN Security Council is expected to bring the matter before the General Assembly on Thursday, July 14th. Once through the formal approval process the Southern Sudan is then expected to be the 193rd member nation of the U.N.. And once this happens, the International Telecommunication Union will issue an international telephone dialing code as well as an ITU callsign prefix block within 48 hours.

At airtime members of the two groups report that they are in consultation with representatives of the new Southern Sudan Government, the International Telecommunications Union and the International Amateur Radio Union working on making final arrangements. Once on the air there will be eighteen hams operating 24 hours a day, 7 days a week with seven stations on the air at any given time.

Waiting for this new country to come on the air, I'm Norm Seeley, KI7UP, reporting from the other side of the world in Scottsdale, Arizona.

--

More on this operation will be posted on-line at www.dxfriends.com/SouthernSudan2011. We will have more DX news for ou later on in this weeks Amateur Radio Newsline report. (Various DX news sources)

**

RESTRUCTURING: MALTESE HAMS GET TEMPORARY 501 To 504 KHZ BAND

Malta is the latest country to allocate amateur radio operations at 600 meters. This with word that the latest version of the Maltese National Frequency Plan contains an entry for 501-504 kHz.

However, there are several caveats. Maltese amateur stations using this frequency band shall not exceed a maximum effective radiated power of 10 Watts. They also must not cause harmful interference to any other services operating in the same or adjacent frequency bands.

All transmissions in this band are to be limited to experimental or research work only. The allocation of this spectrum to the amateur service in Malta is valid only through this coming December 31st. (IARU Region 1)

**

RESTRUCTURING: PORTUGUESE HAMS GET ADDITIONAL 60 METER FREQUENCY

Portuguese radio amateurs have been allocated an additional frequency at 5 MHz in the 60 meter band. This as the Portuguese telecommunications agency Anacom assigns 5288.5 kHz in addition to the already authorized frequencies of 5371.5 kHz and 5403.5 kHz. All three frequencies are on a secondary non interference basis. Special 60 meter propagation study permits are being issued to Portuguese hams for up to a year. (IARU Region 1)

**

RADIOSPORTS: IARU HF WORLD CHAMPIONSHIP 2011 - JULY 9 AND 10

And if you are hearing this newscast before the July 9th and 10th weekend and are wonder what all the activity on the High Frequency bands is all about, then welcome to the 2011 version of the IARU HF World Championship.

The objective of this SSB and CW contest is to contact as many other amateurs, especially I-A-R-U member society headquarters stations, around the world as possible. This, using the 160, 80, 40, 20, 15 and 10 meter bands.

This contest is open to all radio amateurs around the world. Complete rules are on-line at arrl dot org stroke iaru-hf-championship. (IARU)

**

RESCUE RADIO: SEPTEMBER IS NATIONAL PREPAREDNESS MONTH

September 2011 has been designated as National Preparedness Month. This is an annual event sponsored by the Ready Campaign in partnership with Citizen Corps and known as the NPM Coalition. NPM Coalition membership is open to all individuals as well as all public and private sector organizations for free. Numerous ham radio organizations are already members of this group. The objective of National Preparedness Month is to encourage Americans to take simple steps to prepare for emergencies in their homes, businesses, and communities. By joining, both individuals and organizations agree to promote emergency preparedness during September. More information is on the web at tinyurl.com/arn-prepare (NPM Coalition release)

ENFORCEMENT: RADIO SUPPLIER CITED BY FCC FOR PROGRAMMING UNAUTHORIZED FREQUENCIES

The FCC has issued an official Citation to Flatcode Communications, Inc. of the Bronx, New York. This for programming into a transmitter frequencies for which the operator was not authorized in violation of section 90.427(b) of the Commission's Rules.

On March 15, 2011, agents from the Enforcement Bureau's Philadelphia Office conducted an investigation and found that Flatcode had programmed radio transmitting equipment for the Sheraton Four Points Hotel in Allentown, Pennsylvania with the General Mobile Radio Service frequency 462.550 MHz for which the Sheraton was not authorized. A representative for Flatcode later admitted to the FCC agent during a telephone conversation that Flatcode programmed the Sheraton's two way portable radios.

Now, in its June 28th release of the Citation, the FCC has said that Flatcode should take immediate steps to come into compliance and to avoid any recurrence of this misconduct. It said that future violations of the Rules in this regard could subject Flatcode to substantial monetary penalties, seizure of equipment, and criminal sanctions. Its added that monetary forfeitures of up to $16,000 for each violation or each day of a continuing violation and up to $112,500 for any single act could be imposed. (FCC)

**

RADIO LAW: LIGHTSQUARED VS GPS - ROUND 3

Its round three between LightSquared and the United States users of the Global Positioning system. This as the broadband provider says it will make concessions to the Global Positioning System user community to mitigate any possibility of interference. Amateur Radio Newsline's Jim Damron, N8TMW, has more:

--

As previously reported, LightSquared, is the Virginia-based company that hopes to build a nationwide wireless broadband network in spectrum directly adjacent to that used by the Global Positioning Sysytem. And now LightSquared is proposing to modify its network planning so as not to interfere with G-P-S systems.

The company says that it plans to move some of its operations to a different slice of spectrum and to transmit signals at lower power levels. His, to hopefully ensure that its network will not interfere with the Global Positioning System that relies on nearby wireless spectrum.

LightSquared outlined its intentions amid mounting concern that its new network would cripple G-P-S systems used for everything from aviation to public safety to military operations. The announcement follows the recent release of government test results showing that trial transmissions from LightSquared's wireless system interfered with G-P-S receivers used by the Coast Guard and NASA. Also that they caused Federal Aviation Administration G-P-S receivers and similar receivers used by state police, fire and ambulance crews to lose reception.

In January the Federal Communications Commission gave LightSquared approval to build a nationwide wireless network that would compete with super-fast systems being rolled out by AT&T and Verizon. The FCC sees the LightSquared network as part of a broad government push to bring high-speed Internet connections to all Americans. But it also now says that it will not permit LightSquared to begin rollout of its service until all potential interference problems with G-P-S have been solved.

I'm Jim Damron, N8TMW, reporting

--

More information on the future of the proposed LightSquared rollout should be forthcoming shortly. (RW)

**

RADIO LAW: FCC ISSUES FREEZE ON TV STATION REQUESTS TO MOVE CHANNEL ASSIGNMENTS

The FCC has issued a freeze on TV station requests to switch digital channel assignments. The move comes as the commission starts to contemplate how to reallocate 120 MHz of spectrum from the broadcast band to wireless broadband, and move the remaining broadcasters to make room for that wireless service.

The regulatory agency originally froze channel changes back in 2004 as it set up the first Digital TV table of channel allotments. It then lifted that freeze in 2008. Now it faces another channel-shifting operation to free up spectrum for broadband use. Because it now needs evaluate its reallocation and repacking proposals and their impact on the Post-Transition Table of DTV Allotments, the fCC says that it is appropriate to freeze the acceptance of additional rulemaking petitions to change channels at this time.

The FCC last year began the spectrum reclamation process with a rulemaking proposal on channel sharing. It also touched on reclassifying the broadcast band for shared use by wireless providers, and helping improve VHF Digital TV reception.

In a turn-about from the analog world, it is the UHF, not VHF band, that is prime Digital TV spectrum. This is particularly true in urban areas where UHF's ability to penetrate walls makes it less vulnerable to signal fade when used with indoor antennas. (B&C)

**

RADIO ON THE RADIO: HAM NATION AUDIENCE KEEPS GROWING

The audience for the Bob Heil, K9EID, hosted Internet TV show Ham Nation is growing. THius, as the show heads toward its third month on Twit TV. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the latest on this broadband phenomenon:

--

Now about 2 months in, "Ham Nation", a netcast on amateur radio, is going strong. I

n case you haven't heard, Bob Heil, K9EID and Gordon West, WB6NOA host the weekly hour long show on ham radio via the TWiT network. TWiT, which stands for This Week in Tech, is an offshoot of the now defunct ZDTV, later known as TechTV and it's lead host, Leo Laporte.

Laporte, also known as the `chief twit", approached Heil about ham radio and the possibility of doing a show after discovering his microphones, which are popular not only with professional musicians, broadcasters and amateur radio operators, but also netcasters and podcasters.

Leo, who is studying for his Amateur Radio license, is no stranger to the hobby. Wayne Burdick of Elecraft and Laporte were roommates way back in their school days, so this bug has been in the back of his head for some time. In fact, the new state of the art TV studios that Laporte is building will prominently feature a ham radio station.

So far Ham Nation has had some pretty impressive guests. Joe Walsh, WB6ACU of Eagles fame wrote and performs the Ham Nation theme song. Larry Junstrom, K4EB, the bass player for the southern rock band 38 Special was a recent guest as well as the super Field Day crew of W3AO, who this year broke a 30 year record for Field Day contacts.

There's something for everyone, ham and non ham in Ham Nation, and from the people I saw in the chat room during the most recent show, amateur radio is getting exposed to a new and exciting audience. One who perhaps before seeing Ham Nation thought of us only as weird guys squirreled away in our basements with old, antiquated gear. As we all know, such is hardly the case, and now a whole new segment of the public is getting to know just how much fun and cutting edge Amateur Radio really is.

You can see Ham Nation every Tuesday at 9pm Eastern, 6pm Pacific. If you miss the live show audio and video archives are available for online viewing or downloading. Point your browser to twit.tv/hn. You'll like what you see.

>From south Mississippi, Don Wilbanks, AE5DW for the Amateur Radio Newsline.

--

FORECASTING: SPACE WEATHER PREDICTION TO CONTINUE ON WWV AND WWVH

The Space Weather Prediction Center has changed its mind and will continue offering its service as a part of broadcasts offered by time standard stations WWV and WWVH.

You may recall that back in April the Center announced that it would cease providing the broadcast add-on service effective as of September 6th. That announcement was reportedly greeted with heavy negative feedback from the users of the service who came to rely on these broadcasts for alerts dealing with solar storms mid-latitude A and K indices and the like.

Now, in a news release on its website, the Space Weather Prediction Center says that it is no longer planning to discontinue the broadcast of its synoptic Geo-Alert products on WWV and WWVH and will continue to provide this service for the foreseeable future. It adds that additional updates to the content are underway as a result of the listener feedback process. The full announcement is on-line at swpc.noaa.gov/wwv. (NOAA)

HAM HAPPENINGS: HAM RADIO FREDRICHSHAFEN ATTRACTS 16,300

The 2011 Ham Radio convention in Friedrichshafen, Germany took place the weekend of June 24th to the 26th as many hams on this side the Atlantic were enjoying Field Day. This annual event has become known as Europe's answer to the Dayton Hamvention in the U-S-A and Japan's famed Ham Fair.

Taking place at a venue on picturesque Lake Constance, this year's Ham Radio attracted 184 exhibitors and 16,300 visitors. Attendees came from all over the world. In addition to the German amateur radio community, other countries represented included Italy, Malaysia, Japan, Qatar the United Kingdom and the United States.

During the event 124 young people were given a demonstration of amateur radio. Some even tried soldering and playing with the Morse code. A video captures the flavor of Europe's largest amateur radio event, narrated in German, is on-line at tinyurl.com/arn-europe-ham (Southgate)

CHANGING OF THE GUARD: NZART INFOLINE EDITOR ZL2NN - SK

Some sad news to report. World that New Zealand Amateur Radio Transmitters Infoline editor Jamie Pye, Zed-Ll2lNlN, became a Silent Key on Saturday July 2nd following a short illness. His funeral was scheduled to be held on Wednesday, July 6th. In lieu of flowers the family have asked for donations to the New Zealand Spinal Trust, Private bag 4708, Christchurch, New Zealand Charities Commission #CC43195 (NZART)

**

ON THE AIR: 2E1EUB TO TAKE TO THE BIRDS FROM RARE GRIDS

U-K satellite enthusiast Paul Robinson, 2E1EUB, will be activating some rare Grid Squares on several amateur radio satellites over the next few weeks. In a post on the AMSAT bulletin board he says that he will drive some 600 miles to the Outer Hebrides where he was to catch a ferry to the island of South Uist, and then moving to Harris and then Lewis Islands.

Robinson says that he will put as much time as possible operating A-O7 mode A and B plus FO29 and several other ham radio birds. This will be a 14 day operation that he hopes will also include several other stops. QSL go to 2M1EUB at his QRZ.com address. (Southgate)

**

EMERGING TECHNOLOGY: STUDYING THE KONDO EFFECT

Science Daily reports that a Princeton University researcher and his international team of collaborators have used lasers to peek into the complex relationship between a single electron and its environment. Amateur Radio Newsline's Michael Grebert, KJ4ZZV is here with the rest of the story:

--

The research is being lead by Hakan Tureci who is an assistant professor of Electrical Engineering at Princeton Uniuversity in New Jersey and brings fresh insight to the study of the Kondo problem. This is a phenomenon first observed in the 1930s, when researchers were surprised to find that resistance to electricity flowing through certain metals increases at very low temperatures. Normally, resistance through metals decreases as temperature is lowered, but that was not the case with these metals.

The phenomenon was explained 30 years later by Japanese scientist, Jun Kondo, as resulting from the presence of cobalt or other magnetic impurities in the metals. Scientists have further realized that the Kondo effect results from a relationship between electrons known as "entanglement" in which the quantum state of one electron is tied to those of neighboring electrons, even if the particles are later separated by considerable distances. In the case of Kondo effect, a trapped electron is entangled in a complex manner with a cloud of surrounding electrons.

Researchers have been intrigued by the Kondo effect in part because understanding how a trapped electron becomes entangled with its environment could help overcome barriers to quantum computing, which could lead to far more powerful computers than currently exist.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

WORLDBEAT: SARL AND ICASA AGREE ON TESTING COMPROMISE

The South African Radio League and telecommunications regulator the Independent Communications Authority of South Africa have revisited the Amateur Radio Examination Moderation Process.

Right now, at each examination an SARL appointed moderator verifies the examination results, checks that all the marks are correctly computed and verifies that all questions are correctly marked. In a multiple choice examination the answer is either right or wrong. The examiner has no discretion.

There are however at times marginal cases where the candidate scores a very high mark in one section but just misses to score the required minimum of 50% in the other section. It is in cases like this that the moderator will now review the answer papers and makes a recommendation to the Independent Communications Authority of South Africa.

According to the SARL, in the last examination session there were a few marginal cases which were reviewed and recommendations were made to the telecommunications regulator. This in turn resulted in a few candidates now having passed the exam. (SARL)

**

ON THE AIR: CELEBRATING THE CENTRAL NEBRASKA BBQ STEAK FRY

On the air. the Central Nebraska Amateur Radio Club will be operating a special event station A-G-Zero-L from 1800 to 2400 UTC daily from July 28 to the 30th. This operation is being held to commemorate the club-sponsored annual hamfest and BBQ Steak Fry held at Victoria Springs State Recreation Area near the city of Anselmo. Frequencies to listen out on are 7.250, 14.055, 14.250 and 21.335 MHz. A special QSL card is available by sending a SASE to AGOL, 8900 Riverdale Road, Plattsmouth, Nebraska, 68048. (KOAIZ)

**

ON THE AIR: CELEBRATING THE FIRST FIRE DEPARTMENT IN BRAZIL

Also, be on the lookout for special event station PT155FD to be active between now and July 30th. This operation is to commemorate the 155th anniversary of the first official Fire Department in Brazil. Stations will be using this special call on 40, 20, 15 and 10 meters on SSB only. The QSL Manager for ths operation is PS7AB. Cards can go to him either direct or via the bureau. Electronic QSL's go to ps7ab (at) yahoo (dot) com.

**

DX

In DX, A group of operators from Italy are planning to activate Grand Popo, Benin, between August 5th and the 14th. Callsign will be TY1KS. Activity will be on all H-F bands and 6 meters, using 3 three Elecraft K3 transceivers and two Elecraft KPA500 amplifiers. Due to the high demand for this country, the focus will be on the lower bands and the Digital modes, but also SSB and the higher band will be well worked especially during the TEP openings. QSL via IZ8IYX or Logbook of the World.

F6ICX, will once again be on the air as 5R8IC from Saint Marie Island between November 15th and December 17th. Activity will be holiday style operating CW, RTTY, and PSK63. There will be no online log during his activity. QSL via his home callsign as found on QRZ.com.

ZR6DG and ZS6HB will be active as C92DG from the Timbavati Game Reserve in Tofo between 14th and 28th July. Their operation will be on the High Frequency bands only. QSL via ZR6DG.

W1NEK has announced he will be operating portable from Iraq through mid-August. His activity will be voice only his afternoons and evenings. QSL as directed on the air.

Lastly, DL7DF will be on holiday in Kenya between November 20th and December 3rd and plans to be active as 5Z4HW. Listen out for him on 160 through 10 meters using CW, SBB, RTTY, PSK31 and SSTV. QSL via his home callsign, direct or via the DARC Bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: THAT 110 YEAR OLD BULB STILL HAS US IN ITS SPELL

And finally this week, a follow-up to a story that we first aired some ten years ago. Its about a light bulb. A very old light bulb that keeps a Northern California fire station out of the dark. Here's Amateur Radio Newsline's Bruce Tennant, K6PZW, with the details:

--

A light bulb hanging in the Livermore Pleasanton California Fire Department has been burning steadily for exactly 110 years.

Lynn Owens, who's in charge of the "light bulb centennial committee", says that how it stays lit remains something of a mystery. He says that it's a 60-watt bulb but it only gives off only about four watts of light. Even so, but nobody knows why it keeps burning.

According to the lamp's website, the bulb is actually a somewhat different style bulb from what other manufacturers of the day produced. It was invented by Adolphe A. Chaillet and made by the Shelby Electric Company. It was donated by Dennis Bernal to the Livermore Volunteer Fire Department and this past June 18th was its 110th year of continuous illumination. This is a fact documented extensively by Guinness World Records.

One possible answer may be the way in which it was constructed. In a 2010 interview with the Daily Mail, bulb protector Steve Bunn ascribed the light's success to good old fashioned engineering. In the Shelby bulb, a coiled filament burned brighter and lasted longer than the Edison bulb -- this as evidenced by the longevity of the Livermore Pleasanton centennial bulb which celebrated its 110th year of nonstop duty back on June 18th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, a few hundred miles south of the Livermore Pleasanton fire station reporting from Los Angeles.

--

According to Owens, scientists from around the world have come to look at the bulb but why its lasted this long is still a mystery. You can visit it vicariously on the world-wide-web at www.centennialbulb.org.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). WIANEWS WEEK COMMENCING July 10 2011.

WIA Directors Ewan VK4ERM, Bob VK5POP and Peter VK3MV join us.

Language experts wanted for IARUMS Monitoring Service.

ARRL Field Day and Bands of Gold.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JULY 10 2011.

Last week I mentioned the lack of WIA news and in particular club news, well
that has drawn from a couple of clubs and old what we called 'divisions' a
hear hear! So now it's up to those clubs to start skiting

A MAJOR item which is a GREAT initiative of theACMA, comes from the VK3 Club
FAMPARC and is written up in the clubs monthly newsletter."

"Mark Tell from the Australian Communications and Media Authority has been busy
conducting a series of face to face presentations with the radio amateur
community. The first presentation was held at the club rooms of the Frankston
and Mornington Peninsula Radio Club and the second presentation at the
Southern Peninsula Radio Club or SPARC.

Each of these presentations included an interesting PowerPoint slideshow
through which Mark explains the important work of the ACMA, each of the

presentations were followed by a questions and answer session where amateurs put their questions to Mark from the ACMA.

These are a series of presentations conducted by the ACMA's Mark Tell, with the next presentation due to take place at the August main meeting of the Eastern and Mountain District Radio Club, it will take place on Friday the 5th of August at the Willis Room, Whitehorse council office Maroondah Highway Blackburn opposite Harvey Norman, arrive at 7:30 with the meeting starting at 8:00pm.

As with all EMDRC club meetings visitors are encouraged"

Peter VK2US wrote to nationalnews@wia.org.au us through the week,

"Not to sure if this is worth a mention but following last weeks broadcast in which I heard of eQSO usage on UHF CB I went looking and hit the ACBRO home page:

http://www.acbro.org/index.htm

Most interesting was the statement:

Finally the final nail in the coffin for ACBRO membership is the new Amateur Licence now called the Foundation Licence which has been in for over 3 years. Now, most of the radio people who really are the true radio lovers have got their Foundation Licence. This entitles them to use an amazing amount of radio spectrum, all of the 80m and 40m band 15m and all of the 10m band as well as the 70cm UHF band and all of the 2M VHF as well although they are limited to only 10 watts it is amazing how far you can get with the right antennas, in fact the whole world. If someone new comes along and is interested in radio then CB is not in the race. Just recently at an ACBRO committee meeting we had 9 people attend and 8 had there Amateur Licence and are all involved in Radio Clubs to do with Amateur Radio."

Personally I'm a big fan of the whole 'F' call as it has livened up the airways considerably. In fact my only complaint is that these guys get 4 letters in their call, an issue for packet to be sure, but they can choose from so many more really cool call signs than us old timers. Like VK4FOUR or VK2FEED or VK8FOOD or 2FISH or 1FOOL or 2FOWL or- Well you get the idea.

(Peter J VERNON VK2US)

Ham radio far from over or out

This is the headline from a special newspaper report on amateur radio that appeared in Thursdays Age Newspaper. The Age is Melbourne's biggest and most popular newspaper with 200 thousand copies in print each day.

The article by Katie Cincotta appears on page 15 and 23 of Digital Life in the green guide section of The Age, contains interviews with Doug Macarthur VK3UM, Jack Bramham VK3WWW, Jim Linton VK3PC, Edward Seeto VK3LIP and Richard Holmes VK3TXD each talking about their experiences with the hobby.

The article begins to explore many facets of he hobby, Doug Macarthur talks about his experiences with moon bounce and the value of amateur radio during bushfires and times of emergency, Jack Braham explains foxhunting and making contact with astronauts on the ISS. The Foundation licence and entry into the hobby is covered by Jim Linton VK3PC and Edward talks about the involvement of amateur radio in his school. The article is well worth a read and GREAT promotion for our hobby.

Well done to all those who were interviewed by Kate and who contributed to the report.

The URL to the web edition of the article is in this weeks news and direct to www.theage.com.au/digital-life/ham-radio-far-from-over-or-out-20110706-1h135.html

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The Remembrance Day Contest for 2011, is on the weekend 13-14 August.

The RD will commence at the same time as in previous years, that is 0800 and run until to 0759 UTC the following day.

Although an overwhelming majority of people at the AGM open forum in Darwin supported a revision of the starting time, it was not possible to have a discussion with the contest manager before the rules had to be placed with the publications team in time for inclusion in July Amateur Radio magazine.

With the establishment of the proposed Contest Committee, all contest rules will be reviewed and where practical will be standardised. "

cheers and thanks

Bob
VK6POP
WIA Director

WIA Awards Scheme

Now this is urgent late breaking news which was obviously only made known to the WIA within the past few hours but the WIA has less than a week to find a replacement for the current awards manager!

Mal Brooks - VK3FDSL writing on wia front page news is asking for help on behalf of WIA Director Chris, VK5CP.

"wIA Members and existing Awards Committee Members are invited to register interest in taking over our awards scheme with the Director responsible for the Awards Scheme, Chris VK5CP vk5cp@wia.org.au by 14 July 2011.

The new Awards Manager will work with Eddie VK4AN during a handover period to be determined and take on full responsibilities by 30 August 2011

(or earlier by agreement)."

wia.org.au

Winter in the Shack

Greetings from the WIA, this is WIA Director Ewan VK4ERM, with some winter thoughts.

Now that the chills of winter are here for most of us; yes, contrary to popular belief it does get chilly in VK4; isn't it a good time to get into your shack, check your test equipment, clean the soldering iron and attend to those 'Round To It' amateur radio projects? Especially those that are half completed or not in their final state or enclosure.

How often do we, as radio amateurs, take a design and construction project we set ourselves to the conclusion of the proof of concept phase, park it in a box on the shelf, and look for the next challenge? Well, my hand is up!

We could attend to the completion of those projects and try to resist the temptation of starting a new one that has been niggling our minds for the past months, or longer in many cases. Generally we like to work on our own, cloistered in our shacks, solving the intricacies of design, construction and testing but is this the best thing to do?

Unless you are in an isolated area devoid of other amateurs, there is always the option of inviting one or more amateurs to an evening in your shack to discuss design and construction ideas and then put them into practise. It doesn't have to be confined to your project but can, and perhaps should, include theirs as well. Tea, coffee, biscuits and the mandatory chocolate cake are sure to be welcome during the evening.

And why should we restrict such evenings to other Radio Amateurs of our ilk and vintage, young or old? Such activities are ideal for encouraging those with a budding interest in our hobby to enjoy the camaraderie and learning opportunity our hobby has to offer. Remember the people you introduced to the hobby and encouraged to successfully complete their Foundation Licence? Have you unintentionally abandoned them and their interest? Well, now is the time to re-establish the links and invite them to a Shack Evening with others so they can become immersed in the knowledge and experience of others with the opportunity to ask questions and maybe get some hands on construction involvement.

No other amateurs in your area? Remember the interested local passer-bys who were intrigued by your antenna and asked questions of your hobby? This is your opportunity to invite them to your shack to see it in operation and become involved with what you are designing and constructing, without great technical descriptions.

Put kindling on their smouldering interest and further inflame their Amateur Radio interest. The off-air banter in a shack of like minded people and interested people generates a warm and happy atmosphere where everyone can feel welcome and accepted as they learn about the hobby, and share ideas and

experiences in Amateur Radio.

So, who are you going to invite to your Shack Evening this winter?

This has been Ewan VK4ERM for the WIA Board.

HAMS ACROSS AUSTRALIA.

Jeff Johnson vk4xjj is walking across Australia to raise Money for NETS
(Newborn Emergency Transport Service).

Jeff is now roughly half way across the country and he is looking for contacts
from stations in the west on 14.090 USB at 0630 UTC.

Jeff will also be on 7.045 LSB at 0730 UTC, Jeff then moves to 14.090 at
approximately 0740 UTC.

Jeff is becoming a weak signal in the eastern states and is looking for support
on these schedule times from stations in the west.

Grahame vk2fa has supplied us with several URLs re Jeff's Walk.

QNEWS - VK4

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

In January, this year, the Federal Government released a paper seeking comments on having a national regulator for the Not For Profit Sector. This follows work from the Productivity Commission and an election promise.

www.fia.org.au/.../Federal_Government_ScopingStudy_NFPRegulator_...

This week saw a momentous decision from the Federal Court in the action taken by the Australian Securities and Investment Commission against the directors of Centro Properties. It was held in this judgement that directors have a duty to make their own decisions and not just depend on external information, such as auditor's reports.

www.asic.gov.au/asic/asic.../09-202AD+ASIC+commences+proceed...

It is a little hard to determine the full importance of these two acts. It has been suggested that ASIC which has some experience in regulating NFP bodies, would be the right choice to regulate the sector. There is a murky trail of legal precedence from company law through to responsibilities of people engaged in their local incorporated club. However, for me, when putting it together, we can no longer have committee members who just keep the seat warm.

Commonsense says we want people doing their best in running our clubs.

I'm Geoff Emery and that's what I think....how about you?

vK7RNE falls silent.

The wild stormy weather of recent weeks has claimed another victim. VK7RNE, the north-eastern repeater located on Tower Hill, unexpectedly went off the air recently. The cause was immediately apparent to the inspecting ground-crew on its arrival at the scene. The shed that housed the repeater was found lying on its side, along with all its contents, some way down the mountain.

It had literally been knocked off its perch by the wind.

The radio equipment has been recovered but we understand that there are no plans at present to reinstate the repeater.

This sorrowful event thus brings about the close of a chapter in the repeater history of VK7. VK7RNE has long provided a useful service to that part of the State and was a tribute to Paul VK7KPG and his small group that first installed and then maintained the facility over the years. Sadly, some of the group are now silent keys.

Annual licence fee in recent years has been met by the North West Tasmanian ATV Group.

SILENT KEY

Sadly we've heard that News West Guru for many years, Dennis VK6KAD has passed away.

We received the news via his brother in law John VK6KOJ.

It's all a bit sudden. Even though we knew he had been quite sick, he was attending dialysis regularly and he gave no indication that there was any immediate threat.

WIA Director Bob Bristow VK6POP reports

"Dennis John Muldownie, VK6KAD died in Perth on Thursday 30th June 2011.

Dennis was well known and respected in Amateur Radio in Western Australia.

His most widely known contribution was in his role as broadcaster of the WIA National News, and compiler, presenter and broadcaster of the VK6 NewsWest weekly news. Dennis served in this capacity for nine years, until in late 2010 his health deteriorated and he was unable to continue.

Dennis was recognized for his contribution to the WIA news service at the 2010 WIA AGM where he was presented with a President's Commendation.

Dennis had a passion for things military, probably a hangover from his National Service days. Some years ago, Dennis used the NewsWest broadcasts to promote the RD contest, culminating in Western Australia having the best turnout of operators in Australia for this contest. Through his continued enthusiasm, W.A. has been able to maintain its position at the front of the R.D. contest.

Dennis has also been involved for many years in training and assessing people for their Amateur License, and many people have commented on the encouragement and information that he was able to give them.

Dennis has been involved in Amateur Radio in Scouting for several decades, including coordinating JOTA in VK6, and helping provide activities and training for Scouts.

Dennis would always turn out for working bees, repeater re-starts, committees etc, taking positions of responsibility as required. He continued to do so until his health declined to a point where he was unable to do much, except, in his own words, to barrack for those doing the work. Dennis was known for his quick wit and broad general knowledge.

Dennis will be missed in Western Australian Amateur circles, however he will be remembered.

Dennis' funeral is tomorrow, 11th July at 0230 UTC in Perth.

Farewell, Dennis, VK6KAD, silent key."

Another News Man passes.

Jamie Pye ZL2NN - SK

NZART, New Zealand's national amateur radio society, have reported the death of their editor and webmaster, Jamie Pye, ZL2NN.

They say: It is with much sadness we advise of the death of Jamie Pye, ZL2NN, on Saturday 2nd July after a short illness.

Jamie's funeral was held at the Kingswood Funeral Home Upper Hutt on Wednesday 6th July.

NZART Website:
www.nzart.org..nz

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO

Amateur Radio Assessments and training

Persons in the N/West Area of VK7 interested in Training and Assessments for all classes of Amateur Radio Licenses are advised that the Club can provide these requirements and much more.

Maybe someone wishes to upgrade. Well the NWT ATVGroup has the appropriately trained personnel with Facilitators from the Radio and Electronics School who can attend to all requirements should candidates so desire.

For more information, please contact Tony VK7AX, or the Club.

Contact details can be found on the Club Web Site or the WIA site under VK7 Clubs.

http://www.vk7ax.id.au/atvgroup/

(Tony VK7AX, President - North West Tas. ATV Group)

A few weeks back we made mention of the great work of our European friends and that of the South African's in promoting a REAL thrust of encouraging youth to our bands.

Hot on the heels of those societies comes news that David W. Brandenburg, K5RQ, of Osprey, Florida is chairing the ARRL Second Century Campaign.

One important focus of the campaign includes the development of a robust national program geared at young people, enabling them to experience and develop skills in scientific and technological discovery through Amateur Radio.

Well done ARRL!

www.arrl.org/news/meet-the-arrl-second-century-campaign-committee

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

US Federal legislation to ban use of handheld phones and other mobile devices while driving has been introduced in the United States House of Representatives.

According to published news reports, Representative Carolyn McCarthy of New York said the legislation titled the "Safe Drivers Act of 2011" would direct the Department of Transportation to set a national standard to prohibit drivers from using hand-held mobile devices, except in certain emergency situations.

It's unknown whether or not the use of handheld push-to-talk microphones used by two-way radio users such as police, fire, delivery services, CB operators

and hams would be exempted from McCarthy's proposed national ban.

US POWER COMPANIES TO EXPERIMENT WITH NOT HOLDING POWERLINES TO 60 HZ

If you are a United States radio amateur that depends on a power line synchronized clock for logging and other station operations, you might want to look toward buying a stand alone unit that does not rely on the power at your outlet being precisely 60 hertz.

This is because of an upcoming yearlong experiment with that nations electric grid could un-synchronize clocks that use synchronous motors to display the time.

Since 1930, electric clocks have kept time based on the rate of the frequency of the A-C electrical current that powers them. If the frequency changes from its usual 60 hertz rate, clocks run a little fast or slow.

The Federal Energy Regulatory Commission, is proposing an experiment that would allow more frequency variation than it does now without corrections being made.

The test is tentatively set to start mid month.

Wireless still safe in Canada

Health Canada disputes claims by the World Health Organization that wireless Internet networks may cause cancer.

"While there is limited evidence that RF energy may cause cancer in humans, it is not conclusive and more research is required," the department said in a statement.

"Health Canada does not plan to update its exposure guidelines based on the IARC classification."

==========

WEIRD AND WONDERFUL

AMATEUR RADIO AMOUR: DO WE GET BONUS POINTS FOR THIS?

When you think about ARRL Field Day, a few things come to mind:

food, radios, food, antennas, food and friends. And food.

But one couple took things a little bit further when they got MARRIED at their Field Day site.

Kevin Shissler, K1FQ, and Debra Hubbard, N1FQ, love Field Day so much that they decided it was the perfect place to share their love for each other -- and for Amateur Radio.

Wearing their 2011 ARRL Field Day shirts, they tied the knot at the Field Day, swapping the 20 meter band for a band of gold.

And as an aside, In April 2010, N1FQ donated 60 percent of her liver to A co-worker Jan Watson, and now Jan (a HAPPY Jan) had her chance to return the favour --

She officiated the wedding.

The RSGB are active using 'GR2HQ'

Finland 20m SSB IARU HQ station OH2HQ

Although no word from WIA on any Australian involvement, the Luxembourg HQ station is on-the-air for IARU World HF Championship.

HQ station, LX0HQ, and there are two other LX0HQ stations on the air from two different locations during the contest:

LX7I
LX1TI

7 Japan Amateur Radio League HQ stations in various regions of Japan are on the air during the 2011 IARU HF Championship.

8N1HQ 15 meters CW Kimitsu City, Chiba
8N1HQ 160 meters CW, 10 meters CW Minato Ku, Tokyo
8N2HQ 80 meters CW Mihama Town, Chita Gu, Aichi
8N3HQ 40 meters CW, 10 meters SSB Kobe City, Hyogo
8N3HQ 20 meters CW Miki City, Hyogo
8N4HQ 80 meters SSB, 40 meters SSB, 15 meters SSB Okayama City, Okayama
8N8HQ 20 meters SSB Iwamizawa City, Hokkaido

International Lighthouse & Lightship Weekend heats up

In yester-year the coastline had lighthouse protection, now well surpassed by modern satellite navigation.

The radio amateurs operating portable from those locations, on the third weekend of August helps keep the spirit of the lighthouse alive.

Several countries with a relative small coastline do surprisingly well, by activating as many of the accessible lighthouses as possible.

Of those countries that relied heavily on lighthouse protection on the past, Australia remains in the lead with 49 followed by the USA on 45, but usual leadership contender Germany has only 38 entries so far.

More than 300 entries are expected for lighthouses and lightships from now onwards with around 50 countries to be involved.

The Illawarra Amateur Radio Society has advised that "Lighthouses of Australia", a non-profit organisation which aims to create a higher profile for lighthouses, will be in attendance to relight the old diesel powered Point Perpendicular Light for VK2AMW.

For full details and on-line registration for the weekend of August the 20th and 21st check the website ILLW.NET which has been recently been revised and well worth a visit.

(Jim Linton VK3PC)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

DX on 1.8MHz

Most people would not regard 1.8 MHz as a DX band.

The majority of operators who are active on the band may never have heard a DX station there.

ZS1REC, has just proved them wrong.

He has received a DXCC certificate for proving that he has contacted more than 100 countries on the band, only the fifth South African and the first ZS1 to achieve the milestone.

ZS1REC operates from a small city lot, just a quarter wavelength in diameter. He uses wire antennas and modest power. However, a shrewd understanding of propagation and a lot of perseverance make up for the modest station.

4W6A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East Timor),
from 16 to 26 September 2011. 10 to 160 metres CW, SSB and RTTY.
QSL manager is M0URX, direct via the bureau, or LoTW.

BROADCAST MONITORING SWL AND SCANNER NEWS

Townsville V8 info is available on the web at tarc.org.au

The Townsville Amateur Radio club has again put together a great
Team Frequency Listing for the 2011 V8 Supercars Townsville Event.

Government reaffirms 2015 analogue shutdown date

The UK Government appears to be committed to the 2015 date for the switch-off
of all national analogue AM and FM broadcast stations.

In the recently released Digital Radio Action Plan they say:

The Government recognises the industry desire to reduce the burden of
dual-transmission through an early switchover. There are also benefits to
consumers of a quicker transition to digital radio and the certainty this can
bring, including a reduction in the price of digital receivers through greater
economies of scale.

The Action Plan supports a switchover date of 2015 as a target which all parts
of the industry can work towards.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an
intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

The WIA monitoring system is looking for amateurs, or their family members and
friends that have linguist skills. While receiving monitoring reports of
intruders on to our HF bands, is very helpful, some phone communications are
in foreign languages that once identified can assist with the location and
possible identification of the intruder.

So if you have skills particularly in Asian or Middle Eastern languages and dialects we would like to hear from you.

Please connect the WIA Monitoring System Coordinator by email to
vk3mv@wia.org.au
or by following the links on the WIA website under "Members Services" for more details.

W5KUB TO NETCAST 2011 HUNTSVILLE HAMFEST

Tom Medlin, W5KUB, says that he will once again be netcasting live from the 2011 Huntsville Hamfest in Alabama on August 20th and 21st.

This is a large Hamfest that pulls many people from not only the South-Eastern states but also across the entire United States. As is usual, Tom says that he will have prizes for his viewers.

He adds that as this is an all indoor Hamfest at the famed Von Braun Centre, it should have perfect connectivity to enable him to stream the event with what he terms as great quality video.

Toms netcast from the Huntsville Hamfest complete with ongoing chat-room will be carried live at w5kub dot com

ARISSat-1 delayed until August?

Alexander Samokutiaev, flight engineer of the International Space Station's expedition 28, informed about the planning for the upcoming Russian EVA in his blog in Roscosmos web.

According to Russian cosmonaut, the EVA is slated for August, pending the launch of the shuttle scheduled for July 8.

Alexander will work outside the ISS with his colleague Sergey Volkov. The cosmonauts are to perform several ISS RS refurbishing tasks, as well as to launch small satellite Kedr.

Russian cosmonauts onboard the International Space Station switched on small spacecraft Kedr on April 12, in order to commemorate the jubilee of Yury Gagarin's mission.

Small spacecraft Kedr developed under the RadioSkaf experiment bears the name adopted by Yu.A. Gagarin call sign in his historical flight, namely Kedr. The satellite's signal will be transmitted at radio amateur frequency of 145.95 MHz. Kedr has radio amateur call sign RS1S.

RadioSkaf is implemented in the framework of UNESCO's student space education program.

Kedr will transmit different signals, images, and recorded talks of famous Russian Scientists.

REWIND

Wanted.

Technical information or any personal recollections of the PMG radio stations linking Stanley in Tasmania to Tanybryn near Apollo Bay, operational in the 1960s.

Please contact Winston VK7EM.

03 6437 2582 or E mail wnickols@westnet.com.au

Winston is in the process of collecting information on this early radio link that provided a back-up role for an under-sea telephone cable between Tasmania and Victoria.

The building in Stanley was commonly known as 'The Green House' and is now the kiosk for 'The Nut' chairlift.

He remembers being shown over the station in the 1960s (by Reg Bulman VK7RL, Frank Richelme, both SKs).

It seems to have operated around 40Mhz and used rhombic antennas on top of 'The Nut'. The Victorian station was at Tanybryn near Apollo Bay.

If any amateur remembers these stations and could provide information this would form a valuable record of an historic radio link.

GB2RS NEWS

Sunday 10th July 2011

The news headlines:

* Olympic tests on 70cm

* Satellite Beginners Workshop

* Railways on the Air 2011

Following the first tests in June, the RSGB has now received an update that additional tests for the Olympics affecting 70cm will take place in the Weymouth and Portland area between Wednesday 20 July and Saturday 13 August. These are expected to take the form of spot frequency transmissions in the range 431 to 432MHz, as well as a small number of telemetry channels in parts of 432, 433 and 436MHz. All amateurs are requested to respect these tests and not interfere with them. Information is also available at www.rsgb.org/olympics.

AMSAT-UK will be holding a Satellite Beginners' Workshop at 4pm on Friday 29 July to teach newcomers how to get started in amateur radio space communications. With some satellites you can communicate using little more than a standard dual-band FM handheld. Others use SSB or CW and permit intercontinental DX communications using the VHF/UHF bands. The Beginners' Workshop will be run by Dave, G4DPZ and Carlos, G0AKI and takes place at the Holiday Inn, Guildford, GU2 7XZ. Look for the RSGB GB4FUN vehicle in the car park. Details are on the AMSAT-UK website www.uk.amsat.org.

Railways on the Air 2011 will take place on the weekend of 24 and 25 September. As last year, the suggested frequencies for the event are 3.65, 7.12 and 14.12MHz, but participants are requested to avoid any interference with RSGB news reading. Anyone is encouraged to register if they are working an historic railway site, it doesn't have to be a famous one or indeed one operating trains, just a site that has a railway heritage. Registration and general enquiries can are through the website www.rota.m0php.net.

The National Hamfest will take place at the Newark & Notts Showground again this year on 30 September and 1 October. The RSGB & Lincoln Short Wave Club are pleased that the ARRL are attending from the USA again this year. Joining them will be the German companies Spiderbeam, Tecadi and Czech company Mastrant as well as all the major manufacturers and dealers in the UK. Advance tickets are available from the National

Hamfest website, www.nationalhamfest.org.uk.

In June 2011 the Portuguese administration Anacom assigned 5288.5kHz in addition to the already authorised frequencies of 5371.5 and 5403.5kHz on a secondary and non interference basis. The special propagation study permits are being issued for a year.

The first provisional programme for the RSGB Convention is now available on the RSGB website. Taking place at Horwood House near Milton Keynes over the weekend 7 to 9 October, the lecture programme is well underway. You can see the confirmed lectures on a wide range of subjects from low frequency to light communications, which will be updated as more talks are confirmed. Check out www.rsgb.org/rsgbconvention. The Royal Naval Amateur Radio Society has launched its new website. All amateurs and anyone with an interest in maritime radio, especially those who have served or are serving in the Royal Navy, Royal Marines and other navies throughout the world, are invited to visit the site at www.rnars.org.uk. The site is under continuous improvement and visitors are invited to suggest additional features to enhance the site. This can be done on the home page using the link under the main photograph.

The team from Wakefield and District Radio Society will be QRV from the Holy Island of Lindisfarne, which is IOTA reference EU 120, off the Northumberland coast, from 15 to 18 July. They will be using the callsign GB1HI. Transmission times will vary and, as it qualifies for IOTA, will utilise the IOTA frequencies between 6 to 80m wherever possible, plus or minus QRM. As well as SSB it is hoped to do some data modes. The QSL route is via M0OXO and all information is available on QRZ.com. Visitors are welcome but please bring your licence and a club card wherever possible. The team will be sited on the approach road to the castle.

And now for the details of rallies and events for the coming week

Today, 10 July, the Cornish Radio Amateur Club's 48th Mobile Rally will take place at Penair School, Truro, Cornwall, TR1 1TN. Doors open at 10.30am and admission is £2. There will be trade stands and a Bring & Buy. Details from Steve on 01209 844939.

The McMichael Rally and Boot Sale will take place on 17 July at Reading Rugby Club, just off the A4 east of Reading. There is free car parking and admission is £2. Traders and special interest groups will be in attendance and a car boot sale area is available. The gates open at 9.30am. Details from Pete, G8FRC on 01189 695697.

QRP in Country will take place on 17 July at Upton Bridge Farm, Long Sutton, Langport TA10 9NJ. There is still plenty of space available for those individuals or Clubs who would like to put on a display or have a stand. The Bath Buildathon team, led by Steve Hartley, G0FUW, will be supervising construction and George Dobbs, G3RJV will be attending and commenting on a `Show & Tell' display, so please bring along lots of

homebrew things for all to see. Rob Mannion, G3XFD, Editor of PW, the RSGB and other QRP personalities will be there. Entry is free and details can be found at www.walfordelectronics.co.uk.

Northumbria Amateur Radio Club is holding a Bring and Buy sale on 23 July starting at 10am. Everyone is very welcome to come along. If anyone is interested in selling items details should be forwarded to the club secretary Roy, G0AXJ by email to roymccluskey@hotmail.co.uk or telephone 0741 2659 150 as soon as possible. For full details please visit the NARC website, www.g4aax.org.uk where you will find appropriate links associated with this event.

Bletchley Park's annual Polish Day takes place on Sunday 17 July. It will celebrate the important contribution made by three Polish mathematicians for their work on the breaking of Enigma. Bletchley Park will also be remembering other Polish contributions and involvement in World War. The day will include Polish dancing, food and displays, themed talks and a Spitfire fly-past by the Battle of Britain Memorial Flight. Now for the news of special events

Pontefract & District Amateur Radio Society is operating GB0PLF on 10 July from Pontefract Town Centre for the Liquorice Festival. On 16 and 17 July the club will put GB1AVR on the air for the Ackworth Vintage Rally, operating from Watertower Field, Ackworth.

Borders Amateur Radio Society will be holding a special event station at Birgham Village Fete, located in the village playpark on 16 July. Operating on the HF bands and 2m on CW and SSB, the callsign will be GB4BBR.

Sutton Coldfield Radio Club is hosting a special event station GB4MVF on 16 July at Middleton Village Fete, Church Lane, Middleton B78 2AW from 2pm till 5pm. Further information from Rob Bird on 01827 288483. Visitors are welcome.

And now the HF DX news compiled from 425 DX News and other sources

Andy, P29CS is at present active as YJ8A on the island of Efate in the DXCC entity of Vanuatu. This one counts as OC-035 for the Islands on the Air award programme. He is there until 17 July and QSLs go via M0URX.

Dmitrij, RW6AML will be on Waya Island, Fiji until 17 July. He will be active as 3D2ML on both CW and SSB. QSLs go to his home callsign.

Malcolm, GM3TAL is taking part in the Scottish Scouts New Horizons expedition to Malawi until 25 July and plans to be active as 7Q7MH from the Malawi National Scout Campsite at Makwawa. Look for activity on 20, 17, 15, 10 and possibly 6 metres, using CW and SSB. QSL via G0IAS, direct only. The website for the expedition is at www.7q7mh.org.

Dante, IK5ASN will be active as 9A8ASN from the island of Cres, which is IOTA reference EU-136, from 12 to 30 July. He will be on 20 and 40

metres SSB, CW, RTTY and PSK31. QSL via his home callsign, preferably using the bureau.

Now the contest news

This weekend, it's the IARU HF World Championship, which finishes at 1200UTC today, the 10th. The UK HQ station GR2HQ will be active and looking for as many QSOs as possible, on as many bands and modes as possible, with as many people as possible. You don't have to be taking part in the contest to call GR2HQ; the operators will be delighted to work you and also pass you around the bands and modes, to help you work towards one of the free certificates that are available. The exchange is signal report and ITU zone, which for the UK is 27.

Tuesday 12 July is the 432MHz UK Activity Contest from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

13 July sees the SSB leg of the 80m Club Championship take place between 1900 and 2030UTC. The exchange is signal report and serial number. Sunday 17 July sees the Low Power Contest taking place from 0900 to 1600UTC. Using the 3.7 and 7MHz bands, CW only, the exchange is signal report, serial number and power. Also that day, from 1000 to 1600UTC is the 70MHz trophy. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 227th of June to the 3rd of July, compiled by Neil Clarke, G0CAS on the 4th of July.

For the first six months of 2011 there was only one day when the solar disc was spotless, that was on the 27th of January.

Solar activity was very low except for the 3rd when the only C class solar flare of the period took place which increased activity to low. Solar flux levels varied between 86 and 89 units and the average was 87 units. The 90 day solar flux average on the 3rd was 100 units, that's two units down on last week. The year started with the 90 day solar flux average at 84 units and then increased steadily to peak at 110 units at the beginning of May. Since then levels have declined sharply to 100 units. X-ray flux units averaged B1.1 units and varied little day to day. Geomagnetic activity was quiet every day except for the 1st which increased to unsettled levels with an Ap index of 13 units. This was in response to a small coronal hole. The average for the period was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second to 450 by the 1st. Particle densities increased to 15 particles per cubic centimetre on the 1st, the remaining days densities were low. Bz varied between minus 2 and plus 5 nanoTeslas on the quietest day and between minus 10 and plus 8 nanoTeslas on the most disturbed day.

VHF Sporadic-E was reported daily up to 70MHz and some locations enjoyed a good opening to the Caribbean and South America on the evening of the 30th and a smaller one on the 1st. A few stations

reported a Scottish-type aurora on the afternoon of the 1st.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Without the appearance of any large active sunspot groups, solar activity is expected to be at low levels on some days. Solar flux levels should be around the 100 mark throughout the period. No influence from any coronal holes is expected this week so geomagnetic activity should be quiet every day. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows are expected to be around 13MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path from the UK will be between 1200 and 1800 hours. Sporadic-E should take place on some days with openings up to 144MHz possible. As always the favoured times for Sporadic-E are mid mornings and early evenings, but not exclusively.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

On Tuesday 12 July Worcester Radio Amateurs Association is holding an open meeting, to which all are welcome. For more information email Rich Moles, 2E0MOL, via secretary@m0zoo.co.uk.

On Wednesday 13 July Bolsover Amateur Radio Society is having a DF test night. Details from Alvey Street, G4KSY, on 01246 827135.

On Wednesday 13 July Lincoln Short-Wave Club is starting an antenna workshop on constructing homebrew antennas for HF, VHF and UHF. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 13 July Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 13 July South Kesteven Amateur Radio Society is having a questions and answers evening where specialists will do their best to answer any questions on radio related topics. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 13 July Telford & District Amateur Radio Society is having a debrief on NFD and checking scores etc. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 14 July South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 15 July Coventry Amateur Radio Society has the third round of the G2FDC 2m DF Trophy. Contact John, G8SEQ, on 07958 777363.

On Friday 15 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 16 July Lincoln Short-Wave Club continues its antenna workshop and is putting GB2CWP on the air at East Kirkby. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 16 July Sutton Coldfield Amateur Radio Society is running a stall in the village hall for Middleton village fete, postcode B78 2AW. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Sunday 17 July Hinckley Amateur Radio Society is taking part in the Low Power Contest. Details from John, M0JAV, on 07836 731544.

NEWS FOR THE NORTH OF ENGLAND On Monday 11 July Angel of the North Amateur Radio Club Come is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 11 July Bolton Wireless Club is having a talk on walking the Pennine Way by Tom, M1EYP & Jimmy, M3EYP. For details, send an email to boltonwireless@gmail.com.

On Monday 11 July Sheffield Amateur Radio Club is having a practical evening with G3PHO to make your own balun. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 11 July Thornton Cleveleys Amateur Radio Society is having a talk on oscilloscopes by Mick, G4EZM. Details on the web at www.tcars.org.uk.

On Tuesday 12 July Halifax & District Amateur Radio Society is meeting at the Old Post Office public house. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 13 July Hambleton Amateur Radio Society is having a talk on valve theory by Tony, G8FLV. More information from Tony Wilson, G3MAE, on 01609 881530.

On Wednesday 13 July Hornsea Amateur Radio Club is taking part in the 80m CC SSB and watching a DVD. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Thursday 14 July Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 14 July South Manchester Radio and Computer Club is holding an antenna Clinic. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 14 July Wakefield & District Radio Society is on the air and holding a committee meeting. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 15 July East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 16 July Wakefield & District Radio Society commences its 3 day DXpedition to Holy Island. Contact Ken, 2E0SSQ, on 07900 563117.

On Sunday 17 July Hornsea Amateur Radio Club is taking part in the Low Power Contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

NEWS FOR NORTHERN IRELAND Greenisland Electronics Amateur Radio Society has announced that it is not meeting on Monday 11 July. The club will be meeting on the 1st and 3rd Monday of the month for the remainder of July and August.

NEWS FOR SCOTLAND On Tuesday 12 July Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 12 July Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946192.

On Thursday 14 July Aberdeen Amateur Radio Society is closed. More information from Lewis, GM4AJR, on 01224 575 663.

On Saturday 16 July Borders Amateur Radio Society Borders will be running a special event station at Birgham Village Fete. More information from Danny, 2M0CDO, on 01890 882850.

NEWS FOR THE SOUTH EAST and EAST ANGLIA A reserve GB2RS newsreader is needed to assist with reading the news at 1900 hours on 145.525MHz FM in the Chislehurst and Crayford area of North Kent. A reader is also required at 2000 hours to read via the 70cms Bromley repeater GB3OK on 430.900MHz FM. Volunteers need to be members of the RSGB and should contact the GB2RS News Manager Gordon Adams, G3LEQ, on 01 565 652 652 or e-mail gb2rs@ntlworld.com.

On Sunday 10 July Loughton & Epping Forest Amateur Radio Society is at the Scouts' Donkey Derby. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Monday 11 July Coulsdon Amateur Transmitting Society is having a talk on Radio Susy by John, G8MNY. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 11 July West Kent Amateur Radio Society Club is holding an EGM and a natter night. More information from Les, G6UBM, by email to westkentars@googlemail.com.

On Tuesday 12 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 12 July Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 12 July Harwell Amateur Radio Society has its summer DF hunt. Contact Malcolm, G8NRP, on 01235 524844.

On Wednesday 13 July Chelmsford Amateur Radio Society is holding a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 13 July Chesham & District Amateur Radio Society invites members to bring their own radio equipment along. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 13 July Harwich Amateur Radio Interest Group is holding a Scrap Heap Challenge with Matt, 2E0XIS and MOZZO. Details from Kevan, 2E0WMG, on 07766 543784.

On Wednesday 13 July Havering & District Amateur Radio Club is holding a barbecue at Fairkytes Arts Centre. More information from John, M0UKD, on 07890 222111.

On Wednesday 13 July Norfolk Amateur Radio Club is having an informal and construction evening pls taking part in the RSGB CC SSB contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 13 July South Essex Amateur Radio Society is putting its HF station on the air on SSB, CW & Data. Contact Norman, M0FZW, on 01268 692776.

On Wednesday 13 July Southgate Amateur Radio Club is having a talk on the introduction of digital cordless phones by David, M0XDS. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 13 July Worthing & District Amateur Radio Club is holding a discussion evening. Contact Phil, G4UDU, on 01903 816684.

On Thursday 14 July Bittern DX Group is having an informal Club meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404154. On Thursday 14 July Echelford Amateur Radio Society is having a talk on the GB3VHF story by Chris Whitmarsh, G0FDZ. Contact John, G4GSC, on 01784 451898.

On Thursday 14 July Edgware & District Radio Society is watching The Spies who lost The Battle of Britain. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 14 July Horsham Amateur Radio Club is having a social evening at The Royal Oak, Wineham. Details are on the web at www.harc.org.uk.

On Thursday 14 July Lowestoft & District PYE Amateur Radio Club is having a club night at shack. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 14 July Reading & District Amateur Radio Club is having a talk on radio at the London 2012 Olympics by Tom Grady, G6IGA. Details from Pete, G8FRC, on 01189 695 697.

On Friday 15 July Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371.

On Friday 15 July Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 16 July Bittern DX Group is at Banningham Village Fete. Details from Linda, G0AJJ, on 01692 404154.

On Saturday 16 July Loughton & Epping Forest Amateur Radio Society is holding its annual summer get- together at Aylmers Farm, Old Harlow. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Saturday 16 July South Essex Amateur Radio Society is operating GB2IYC for the Island Yacht Club fun day regatta. Contact Norman, M0FZW, on 01268 692776.

On Saturday 16 July Sutton & Cheam Radio Society is operating special event station GB4MVF at Middleton village fete, postcode B78 2AW, from 2 until 5pm. More information from John, G0BWV, on 020 8644 9945.

On Sunday 17 July Chesham & District Amateur Radio Society is attending the McMichael Car Boot Sale at Sonning, near Reading. More details from

Terry, G0VFW, on 01442 831 491.

On Sunday 17 July Lowestoft & District PYE Amateur Radio Club is taking part in the RSGB Low Power Field Day. Details from Lee, 2E1LJL, on 01502 564242.

On Sunday 17 July Newbury & District Amateur Radio Society is participating in the Low Power Contest. For more information contact Rob, G3LMW, on 01635 862737.

On Sunday 17 July Norfolk Amateur Radio Club Radio has an informal family day by the seaside at West Runton North Norfolk, including taking part in Low Power Field Day. Details from Chris Danby, G0DWV, on 01603 898678.

On Sunday 17 July Reading & District Amateur Radio Club is running the McMichael Radio Rally at Reading Rugby Club, Sonning. Details are on the web at www.radarc.org.

On Sunday 17 July South Essex Amateur Radio Society is operating G4RXE at Canvey Railway and Model Engineering Club. Contact Norman, M0FZW, on 01268 692776.

NEWS FOR THE SOUTH WEST On Sunday 10 July Cornish Radio Amateur Club is running the Cornish Rally at Penair School. Details from Steve, G7VOH, on 01209 844939.

On Monday 11 July Exeter Amateur Radio Society is having a club night at the Moose Centre. More information from Nick, on 01363 775756.

On Tuesday 12 July Mid Somerset Amateur Radio Club is having a barbecue with beer, natter and a bring and buy sale. Contact Nick, M6NJB, on 01749 346320.

On Tuesday 12 July Plymouth Radio Club is having a demo of slow scan pictures over HF and VHF onto a laptop. Details from Chris, M0ZCP, on 07834 767 161.

On Thursday 14 July Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844939.

On Thursday 14 July South Bristol Amateur Radio Club is having a talk on thermionic valves. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 14 July Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317750.

On Thursday 14 July Yeovil Amateur Radio Club is having a talk by G3MYM on propagation, band by band. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 15 July Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday 17 July Bristol RSGB Group is running a Bring and Buy at G3PCJ'sQRP in the Country, Long Sutton, Langport. Details from Robin, G3TKF, on 01225 420442.

On Sunday 17 July Taunton & District Amateur Radio Club is attending `QRP in the Country. Contact William, G3WNI, on 01823 666 234 for more information.

SARL NEWS - SUNDAY 10 JULY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

HABEX A SUCCESS REPORTS TEAM

ANOTHER HOLLYWOOD BLOCKBUSTER FEATURES AMATEUR RADIO

DURBAN RTA TO FEATURE AN UPDATE ON ARISSAT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

HABEX A SUCCESS REPORTS TEAM

The High Altitude Balloon Experiment launched from the Klerksdorp Airfield on 2 July was a great success. The balloon lifted off shortly after 08:00 CAT and headed in an easterly direction. All payload systems operated successfully with all the chase vehicles being able to track the APRS packets being transmitted from the respective units. During the early part of the lift, the balloon averaged an ascent rate of 16,2 km/h slowing to a more pedestrian speed of 11 km/h for the remainder of the flight. Horizontal ground speeds peaked at 183,59 km/h with a final altitude recorded on ZS6ERB-9 of 33 661 m.

Overall the launch was a success with the team very happy with the results. There are some issues to be rectified and the team will be back in the not too distant future to test those. The launch was part of the Klerksdorp Hamfest activities.

The payload consisted of 4 independent units. First in line was a controller board which was specifically designed and built by the HABEX group. The controller is able to accept a combination of either 8 inputs or outputs in either digital or analogue mode. Also built onto the board is its own APRS tracking unit and PIC unit which can

communicate with ground stations via an on board VHF radio.

Next in the payload string was a second APRS tracking unit and Cross Band repeater which was used extensively during the flight for both team contact as well as general contacts. Below the repeater was a CW beacon transmitting on 7,020 and lastly a video camera with a third APRS unit.

The main objective of the 2 July launch was to establish that the APRS components being used on the controller board functioned properly at altitude. In previous flights, the GPS unit stopped operating around 12 000 m due to restrictions in its operating altitude.

Once the controller has proven itself, various experiments can be taken to altitude without the additional weight of back up APRS units which have been used in the past.

More information, photographs and a video can be found on www.habex.za.net.

ANOTHER HOLLYWOOD BLOCKBUSTER FEATURES AMATEUR RADIO

Super 8, a film set just outside Dayton, Ohio in 1979 -- uses Amateur Radio in a crucial scene. The story revolves around a group of six middle-schoolers who witness a mysterious train crash in the fictional town of Lillian. Soon after the crash, the Air Force arrives and strange things start happening in the small town. The kids, a group of young film makers (hence the title of the movie) begin to investigate the creepy phenomena.

One of the kid's dad is Deputy Lamb. After the Sherriff mysteriously disappears, Deputy Lamb takes over and holds a town-wide meeting to help allay the fear. One woman thinks that all the strange goings-on are the work of the Soviet Union. But when Deputy Lamb calls on Mr McCandless to ask a question, the man complains that he is hearing strange transmissions on his amateur radio. As soon as Mr McCandless mentions amateur radio, the residents at the meeting just ignore him.

But when Deputy Lamb privately questions Mr McCandless, he tells the deputy that he can no longer listen to 13,201 (no reference is made to kHz or MHz) due to the strange noises he is hearing. Deputy Lamb mentions this to another deputy, and that deputy says he can bring in his scanner and voice inverter from home so they can monitor the frequency. After the rigs are set up, the deputies overhear vital information about what the Air Force is trying to hide.

While credit has to go to Super 8 set decorator Fainche MacCarthy for finding a radio of the right era, the "scanner" that the deputy brings in is a Heathkit Seneca VHF-1, a 2 and 6 metre CW and AM transmitter. Introduced in 1959, this rig complemented Heathkit's TX-1 Apache transmitter, RX-1 Mohawk receiver and KL-1 Chippewa linear amplifier.

Super 8 premiers in South Africa at Sterkinekor cinemas on 29 July 2011. To watch a trailer visit http://www.sterkinekor.com/#/trailer/3125/Super 8/.

DURBAN RTA TO FEATURE AN UPDATE ON ARISSAT

The programme of the Radio Technology in Action Symposium scheduled for Durban on 30 July will include an update on ARISSAT, the replacement of SuitSat 2. ARISSAT is expected to be launched from the International Space Station at the end of July or early August during a spacewalk by the Russian Cosmonauts on the ISS. Eddie Leighton, ZS6BNE, will present on RaDAR, a presentation that attracted a lot of interest at the RTAs in Cape Town and Port Elizabeth. In the technology slot John Willescroft, ZS6EF, will talk about FPGA's and their application. The full programme is available on www.sarl.org.za, select RTA from the left hand menu.

NEW MEMBERS

The SARL welcomes the following new members: ZSL1028, Hendrik du Plessis, ZS6XXX, Andries Nortje and ZSL1029, Nico Coetzee.

MEMBERSHIP RENEWALS

707 Members have thus far renewed their membership. Membership became due on 1 July 2011. Members are urged to pay their fees as soon as possible. If making a bank transfer or bank deposit please ensure that you indicate your name and callsign. We value your continued support.

COMPETITION NEWS

ZS4 SPRINT RESULTS UPDATED

The ZS4 Sprint results made available last week has been queried and updated by the competition committee of ZS4SRK. Congratulations to Pieter Human, ZS6PA, for the third place which he now occupies due to his confirmed 62 points.

RESULTS OF THE TOP BAND CONTEST held from the 23 - 27 June 2011.

It is still clear that amateurs do not read the contest rules before taking part in contests. Apart from wrong call signs, some did not change frequency after making a contact.

8 logs and 1 check log were received. Stats from the logs show that 43 stations were on the air. No contacts were made from Div 3. There were 6 stations that operated CW and SSB.

The results are as follows

1st ZS6LH - Lukas Holtzhausen 145 points 2nd ZS6UT - Ed Willers 127 points 3rd ZS6PVT - Phillip van Tonder 118 points

The winner of the Lucky draw prize is Keith Liddle, ZS6AGF.

Congratulations to the winners. The full results will be published in HF Happenings.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at very low to low levels. Sunspot 1 243 is producing B-Class and C-Class flares as it continues to rotate across the visible solar disk in the northern hemisphere. A couple of new sunspots have formed towards the northeast limb and one of these was numbered 1 245 on Thursday. There is not yet a chance for strong solar flares around this region.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be less than 25.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m. There will be little chance of 15 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 July - 3rd leg of SARL QRP Competition. 27 July - 4th leg of SARL Club Competition. 30 July - RTA in Durban. 07 Aug. - SARL HF Phone Competition. 09 Aug. - SARL YL Sprint. 21 Aug. - 3rd leg of SARL Digital Competition. 28 Aug. - SARL HF CW Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

NZART Headquarters Infoline SPECIAL Issue 28s
10th July 2011
NZART Website: <http://www.nzart.org.nz> www.nzart.org.nz

Jamie Pye ZL2NN, Silent Key

Saturday 2nd June 2011

First licensed as ZL2TGP in 1966, became ZL2NN in 1970. Jamie had many achievements throughout his life in amateur radio, to name a few:

Locally:

- Member of the original design team for the first Mt Climie VHF Repeater

- Upper Hutt Branch Secretary in 1974

- Awarded the first "Branch 63 Merit Award" for the design, construction and commission of the Mt Climie 10 Metre Beacon

- Proposed and Constructed a 6 Metre Beacon

- Elected Branch President in 1980

- Throughout the 80's tutored many radio classes and held a 100% pass rate.

- Made Life member of Upper Hutt Branch

Nationally

- Elected to NZART Council 1983 - 1993

- Secretary to first Frequency Management Working Group (FMWG) forerunner of FMTAG

- Continued to produce many repeater and beacon maps and band plans for Call Book

- Responsible for several major revisions of the Basic Radio Training Manual

- In 2001 after a severe accident, becoming wheelchair bound he continued in administrative duties for NZART

- Awarded Life membership of NZART in 2005

- Appointed as Editor of HQ Info-line in 2006

- Appointed as Webmaster in 2008, a position he held until his passing

- Moderator of NZART Reflector

- Produced all certificates awarded to amateurs in New Zealand

- Maintained the Who's Who Directory of NZART Council & Officers

Internationally

- Appointed IARU Overseas Liaison Officer in 1981

- Member of the IARU Region 3 committee

- Attended many IARU conferences

- IARU Region 3 Beacon Coordinator

- Editor & contributor of many IARU papers

- Developed monitoring software for the IARU Beacon programme

-

To quote Terry Carrell ZL3QL another of the IARU committee.Jamie in his usual way and on so many occasions pulled the team together with his firm stance for the Association and his humoured approach to tasks.

Jamie not only greatly contributed to amateur radio, but passionately enjoyed his hobby. He and his XYL the late Gael ZL2SZ attended many NZART and VHF conferences. He was active with mobile operations both HF and VHF. Jamie was a keen enthusiast for the original Galbraith Frequency Counter, and modified it very early to use TV subcarrier for frequency locking accuracy.

On a number of occasions Jamie won the Frequency Measuring Contest and was involved with organising this event.

Jamie is survived by his son Jim ZL2PU, and daughters Elsa and Jan, who also held listener calls in their earlier years.

Jamie a great colleague, friend and amateur, you gave so much to this hobby and will be sadly missed. I thank you for your commitment and dedication and join with many others in celebrating the many wonderful memories you leave us.

73's & 88's

Debby ZL2DL

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 10th July 2011

Contests in July

Just two clubs were heard during the VHF/UHF Field Day last weekend: Network Southern Area Radio Experimenters Club and Dundalk Amateur Radio Society. A number of individual call signs were also spotted during the contest.

The Islands On The Air contest takes place from 12:00 UTC on Saturday 30th July to 12:00 the following day. There is normally plenty of support for this contest from EI and GI stations. We know that Ark EI9KC and friends are planning to operate from Great Blasket Island for the contest and we understand that a number of other offshore island activations are also planned; we would be pleased to hear more details of these for inclusion in future news bulletins.

There is a somewhat unusual contest on Sunday 17th July - the RSGB Low Power Contest. Contest entrants can use a maximum of 10 Watts, and operation is on CW (of course!) on the 40 metre and 80 metre bands. The contest runs from 09:00 to 16:00 UTC, with a one-hour break from 12:00 to 13:00 - presumably for a well-deserved lunch. This contest has attracted a few entries from EI and GI in recent years.

Have a look at www.irts.ie/contests for links to these and other contests.

South Dublin Radio club.

Tuesday 28th of June there was a demonstration of the usefulness of a spectrum analyzer at South Dublin Radio Club. An explanation of how such an instrument could be used for tuning filters and checking the level of harmonics was given with the help of various club members. While such an instrument may not be in the budget of the average person, access to such an instrument, even an older version can make kit building and homebrew much easier.

Mayo Radio Experimenters Network

MREN will hold their annual radio rally on Sunday November 20th 2011. More details from www.ei7mre.org.

GI HF Conference

The West Tyrone Amateur Radio Club (WTARC) Omagh are holding a HF Conference on Saturday 20th August 2011. This Conference comes following the very successful DigiCon 09 Conference back in September 2009.

A range of speakers from around GI, EI and G will be in attendance to share their various perspectives on aspects of HF operation. There will also be in attendance Traders such as, Tyrone Amateur Electronics (TAE) and JBT (Jim Bob) along with exhibits from the RSGB and the IRTS.

The Event is supported by Practical Wireless, TAE, JBT, IRTS and RSGB. So come along for what will be a Fun Day Out for all the family. The town of Omagh has a range of top class shopping along with a wide range of other tourist attractions
http://www.omagh.gov.uk/culture_leisure_and_tourism/

We look forward to seeing you there. For details of the Venue etc go to http://wtarc.co.uk/GIHFConference.aspx

NOAA / Space Weather Prediction Center

SWPC is no longer planning to discontinue the broadcast of its synoptic Geo-Alert products on the WWV and WWVH radio stations. SWPC plans to continue this service for the foreseeable future.

Additionally, updates to the content of this product are underway as a result of the feedback process. For example, in addition to providing the current, daily solar flux at 2800 MHz, we are evaluating adding more frequent observations at 2695MHz. Other improvements to the message content will also be evaluated. Stay tuned to this site for the latest status on these updates.

For additional comments or questions, please email us at swpc.wwv /at/ noaa.gov.

Launch of Astra 1N satellite postponed until late July

SES has announced that the launch of its new Astra 1N satellite has been postponed due to an anomaly that occurred during the final launch count-down on 1 July, 2011. It is intended to first provide interim replacement capacity at the orbital location of 28.2° East. The satellite will subsequently be moved to 19.2° East.

DX News

UA9YAB is QRV from now until 18 July as JT0YAB in Mongolia. For those chasing the Worked All Zones Award it is worth noting that Mongolia is in Zone 23 which is one of the rarer zones. In addition the prefix JT0 is one of the rarer prefixes from JT-land.

The island of Nauru in the central Pacific is not often heard on the bands. This coming week Pekka OH2YY will be active as C21YY until 20 July. He will use SSB only and QSLs go via his home call.

Dave ZR6DG will be in Mozambique from 14-28 July and will sign C92DG. He plans to be active on the bands as time allows. QSL info is via his home call.

The unusual callsign E76ARDF will be in use from now until 20 July from Bosnia-Herzegovina. This is in connection with the 6th Balkan Amateur Radio Direction Finding Championship. It is expected that 120 amateurs from 9 countries will take part in the event.

Another one for the prefix hunters is PT155FD which is commemorating the 155th anniversary of the founding of the first Brazilian Fire Department in Rio de Janeiro. The station will be QRV till 30 July and QSLs go via PS7AB.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1018
BID: $OPDX.1018
July 11, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N2OO, NG3K & ADXO, N4AA & QRZ DX, W5SJ/4, N6PSE, KH6BZF, K8GI, K8YSE, KF8UN, W8GEX (60m News), W0GJ, Algarve STAR DX Team, AT International, CO8ZZ, DL1SBF, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, G3VKW, HP1AC, I1JQJ/IK1ADH & 425 DX News, IZ2LSC, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PS7AB, RSGB IOTA Web Site, SM1TDE, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-July, through Sunday, 10th-July there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/m, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V8, VE, VK, VK0M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

6V7, SENEGAL (Possibly C5). Luc, F5RAV, will once again be active next year (2012) from La Somone between February 25th and March 6th. He will be operating from Jean-Francois, 6W7RV, QTH as 6V7T. Activity will probably be the same as last time -- on SSB and PSK31, and on 160-10

meters (including 17 and 12m with a dipole only). He will also once again be in the French REF SSB Contest (February 25-26th) and the ARRL DX SSB Contest (March 3-4th). QSL via only direct to his home callsign. See details on QRZ.com. Also, visit his BLOG page at: http://f5rav.free.fr ADDED NOTE: Luc will also try to be active as C56/F5RAV (or possibly another callsign) from Banjul, The Gambia (C56), between the two weekends (February 27th, and March 3rd, 2012) with some other operators from Europe.

9H, MALTA. Operators Tommy/DL8KX and Andy/DD8ZJ will be active as 9H3KX from Gozo Island (EU-023, MIA MM-004, WLOTA 0046) between October 8-14th. Activity will be on the HF bands using CW and SSB. QSL via DL8KX, by the Bureau or direct.

9Y, TRINIDAD AND TOBAGO. Jim, N6TJ, will once again be active as 9Y4W during the CQWW DX CW Contest (November 26-27th) as Single-Op/All-Band entry. QSL via DL4MDO.

CQ73, PORTUGAL. Members of the Algarve STAR DX Team will be active as CQ73O between July 11-17th during the Faro International Moto Meeting. Activity will be on all bands and modes. Operators mentioned are Luis/ CT1CQK, Jose/CT1EHX, Toze/CT1GFK, Mike/CT1IUA, Anderson/CT2IUK, Lili/ CT2KAL and Pedro/CR7ABW. QSL via CT1EHX. For more info, pictures and online log, go to: http://algarvedx.com

E5, NORTH AND SOUTH COOK ISLANDS. Bill, N7OU, informs OPDX that he will be active from the following this year:
Southern Cook Islands - From Rarotonga Island (OC-013) between October 17th and November 7th; as E51NOU; CW only; on
80-10m; during his spare time as work allows;
QSL via N7OU.
Northern Cook Islands - From Manihiki Atoll (OC-014) between November 8-22nd; callsign TBA; CW only; on 160-10m;
Single-Op DXpedition; focus on EU; QSL via N7OU.

EJ3, IRELAND (IOTA Op). Members of the Galway Radio Experimenters Club (EI4GRC) and the Shannon Basin Radio Club (EI2SBC) will be on air from Inishbofin Island (EU-121) for the RSGB IOTA Contest (July 30-31st) as a Multi-Op/Mixed-Mode/Low-Power entry using the callsign EJ3Z. This is their second year of joining forces for this contest. Inishbofin is a small island 9km off the west coast (53.37 North - 10.14 West). On the days leading up to the contest, members will be active using their own callsigns on HF and VHF; also watch out for EJ4GRC. Inishbofin Grid Sq. is IO43VO. Operators mentioned are Pat/I9HX, Niall/EI4CF, Anthony/EI6GGB, Mike/EI2EO, Tony/EI3HA, Fergus/EI6IB, Ronan/EI8IH, Brian/EI8IU, Mark/EI6JK, Des/EI5GT, Tom/EI3ER, Adrian/EI7DMB, Michael/EI4AL and Enda/EI2II. For more information on the island, see: http://www.inishbofin.com

GS, SCOTLAND (Lighthouse Op!). Geoff, G0PFH, will be heading to Scotland to activate a trio of lighthouses between July 25-29th. Geoff will be activating the following ARLHS SCO lighthouses utilizing the Halifax club callsign GS2UG: Killantringan Lighthouse (SCO-111)

Port Patrick Lighthouse (SCO-177)
Southerness Lighthouse (SCO-223)
Geoff is uncertain as to the order the lighthouses will be activated, but the preliminary information is available on QRZ.com under the callsign GS2UG. This info will be updated as his plans become firm. Please be sure to read and follow the QSL instructions.

IOTA NEWS.....
EU-031. Operators John/IK8LIU, Francesco/IK8WEJ, Vincenzo/IZ0FKE, Oreste/IZ8EDJ, Aurelio/IZ8EGM, Rosario/IZ8KNW, Dario/IZ8LKL, Fabio/IZ8OJG and Giuseppe/IZ8UZF will be active as IC8L from Licosa Island (IIA SA 001, ARLHS ITA 089, WAIL CA 020, WLOTA LH 3342) on July 24th. QSL via Aurelio, IZ8EGM.

EU-052. Operators Panos/SV3DCX, Kostas/SV8BUS, Michalis/SV8GKE and Pantelis/SV2HWR will be active as SZ8L from Meganisi Island during the RSGB IOTA Contest (July 30-31st) as a Multi-Op/ Mixed-Mode/High-Power entry. QSL via SV8GKE.

EU-081. A French-Belgium group will be active as TM5SM from Saint Marcouf Island (WLH LH0060, DIFM MA0001) between August 11-15th. Operators mentioned are Jean-Bernard/F4RTE, Jean-Claude/F5IL, Jacques/F5JY, Jean/F5NKX, Denis/F5RJM, Alain/ F6BFH, Benoit/F8PDR and Francois/ON4LO. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via F5RJM, direct or by the Bureau.

NA-067. Operators Karl/W4CHX, Marty/W4MY and Paul/AA4XX will be active as AA4XX from Harker's Island, NC, during the RSGB IOTA Contest (July 30-31st) as a Multi-Op/All-Band (80-10m)/Mixed-Mode entry. QSL via LoTW.

NA-143. (Not NA-145 as mentioned in OPDX.1017) Joe, K5KUA, will be active as K5KUA/5 from Galveston Island (USI TX001S, Galveston County, Texas) between July 29th and August 1st. He will participate in the RSGB IOTA Contest (July 30-31st) as a Single-Op entry. Activity will be on all HF bands, propagation permitting. QSL via his home callsign, by the Bureau or direct.

NA-154. Operators Barry/VE1TRI, John/VE1CDD, Alan/VA1MM, Fraser/VE1WO and Robert/VE1PQ will be active as VC1Z during the RSGB IOTA Contest (July 30-31st) as a Multi-Op/Mixed-Mode/High-Power/ 24-Hrs entry. QSL via VE1CDD.

NA-070/
NA-232. Yuri, N3QQ, announced this past week that the St. Matthew Island (NA-232) operation is back on for 2011. Yuri has managed to team up with Mike Horn, well-known South African and Swiss explorer, whose vessel is now in Kodiak. Yuri is planning to arrive in Dutch Harbor on July 14th. Tim, NL8F, is expected to join them, as well as Yuri, UA9OBA. Activation is expected to take place between July 19-22nd, depending on Mike's schedule

and the weather. For more details and updates, watch:
http://www.na-234.com
For more info on Mike Horn and his 4 year Pangaea Expedition,
see: http://www.mikehorn.com
ADDED NOTE: The NA-070 operation is now called off due to the
change of plans.

OC-142. (Update) Operators Paul/VK4FPDW, Derek/VK4MIA, Mike/VK4QS and
Graham/VK4FGCC will be active as VI4FI from the Sandy Cape
Lighthouse (AU0043) on Fraser Island during the International
Lighthouse-Lightship Weekend (August 20-21st). Activity will
be on all HF bands "SSB ONLY" from 80-10 meters. Suggested
frequencies are:
80m - 3600 kHz (For VK Foundation & Standard Licences)
3795 kHz (For The World)
40m - 7180 kHz
20m - 14260 kHz
17m - 18145 kHz
15m - 21295 kHz
12m - 24945 kHz
10m - 28495 kHz
All frequencies will be +/- 5-10kHz in case of QRM. QSL via
VK4MIA, direct (see QRZ.com), direct or by the Bureau (NO eQSL).
Visit their Web page at: http://www.sandycape2011.com

SA-035. Members of the Caracas DX Group will be active as YW5LR from
Los Roques Islands (SA-035) between July 13-18th. Activity is
in celebration of the Venezuelan Navy Day (July 24th). The 15
team operators will be on all bands and modes. QSL via DM4TI.

KH6BZF PROPAGATION FORECAST/REPORT (July 11-17th)....
Jul 11 AN SOLAR REFERENCE KEYS
Jul 12 AN --------------------
Jul 13 AN BN - Below Normal
Jul 14 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 15 HN LN - Low Normal
Jul 16 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 17 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

N2, UNITED STATES (Lighthouse Op!). Members of the Old Barney ARC will
be operating as N2OB from the Barnegat Lighthouse (USA-039) on Long
Beach Island (NA-111), NJ, on August 6th, from about 1300-2100z. Rain
date is August 7th. There will be two stations set up with activity
primarily on 20 and 40 meters SSB. QSL via N2OB.

NCDXF PRESS RELEASES.....
NW6P RETIRES - Glenn Johnson, W0GJ, NCDXF Vice President, sent out the following on July 4th: "Effective immediately Tom McShane, NW6P, has resigned as a director and the secretary of NCDXF. Tom has been on the board of directors and its secretary for over 15 yrs. Tom suffered a serious stroke on January 25, 2011, and has been recuperating since then. Tom felt that his stroke rehabilitation would be a full time job for a number of months. The NCDXF board and officers wish Tom continuing great success in his recovery. He will be missed."

SOUTHERN SUDAN - Glenn Johnson, W0GJ, NCDXF Vice President, sent out the following on July 6th: "The Northern California DX Foundation (NCDXF) is pleased to announce a major grant to the Intrepid DX Group <http://www.intrepid-dx.com/> and the DX Friends <http://www.dxfriends.com/>
who have joined together to activate the new entity of the Republic of Southern Sudan. Licensing is imminent and operation could begin in the next few days.
<http://dx-world.net/2011/press-release-south-sudan-dx-friends-intrepid-dx-group/>"

OA4, PERU. NODXA member Byron, KF8UN, will be in Peru between July 22nd and August 16th, and plans to be active as OA4/KF8UN. He states that he plans to work 20 meters, devoting August 8th, to amateur radio, but will be on casually at other times. Byron will check in as often as possible with the YL International Single Sideband System Net on 14332 khz. He will also try to operate mobile when possible. QSL via his home callsign.

OH0, ALAND ISLAND. Eric, SM1TDE, will be active as OH0/SM1TDE from Eckero in the Aland Islands (EU-002) group between July 21-24th. Activity will be holiday style. Look for him around 2 kHz from the bandedges on CW on 80-10 meters. QSL via the bureau, and later LoTW.

PJ5, SINT EUSTATIUS. Gerd, DL7VOG, announced that he will be active as PJ5/DL7VOG from Sint Eustatius Island (NA-145) starting the middle of November through the beginning of December. His three week operation will also include the CQWW DX CW Contest (November 26-27th). Activity will be on 160-6 meters using mainly CW and RTTY, but he will have a microphone with him just case someone really needs a phone QSO. As always, Gerd will be using his IC-706MK2G (this time with an amp) into an HF9VX for 80-6m and an inverted "L" (on a 15m fiberglass pole) for 160m. QSL via his home callsign, Bureau is preferred.

PJ7, SINT MAARTEN. Operators Travis/AF6WU and Kjerstin/KJ0DVA will be active as PJ7/homecalls from Sint Maarten (NA-105, WLOTA 0711) between August 11-15th. Activity will be mostly SSB on 20/17/15 meters. QSL via LoTW or direct via AF6WU. U.S. stations please send one first class stamp. International stations send 1 USD or 1 IRC. PLEASE NO SASE. Bureau QSLs or cards with no return postage will get a delayed reply or probably through the Bureau.

PQ3, BRAZIL (Lighthouse Op!). Orlando, PT2OP, will be active as PQ3C from Chui Lighthouse (ARLHS BRA-024, DFB RS-13) between July 17-20th.

Activity will be on 40-10 meters SSB. QSL via PT2OP, direct (see QRZ.com) or by the Bureau.

QSL INFO AND NEWS.....
QSL RECEIVED VIA LoTW: 4O3A, 7P8AA, 8R1K, B7P, C6A/N5KM, EA3GHZ, EV1R, FM5CD, FS/K9EL, JG7MFN, KH6MB, OL5Q, ON5PO, PJ6D, PR1T, PZ5RA, SP8AJK, SV5/G0TSM, VA2OP, VE3AXW, VE9DX, ZB2X and ZS8MI

QSLS RECEIVED VIA MAIL: 3D2A, 4J3M, 5M2TT, 9L5MS, CX5BW, EG5CI, F1BBU (SAT), IS0/WH0Q, J28JA, JD1BMH, K8LEE/CY0, LY3BH, N1SNB/CY0, N0TG/CY0, P29VCX, P29VLR, PJ2T, SP5EWY, ST2EB, SV2ASP/A, T31A, TG9AHM, TG9NX, TJ9PF and ZA/I2GPT

QSLS RECEIVED VIA THE BUREAU: HB0/PC5A and HP1/IZ6BRN

SILENT KEY. Keith, G3VKW, informs OPDX that Henry Lewis, G3GIQ, became a "Silent Key" (SK) July 7th, in a hospital in Barnstable Devon. Henry had recently left London and moved to Devon. OPDX and its readers would like to send out our deepest sympathy to the family and friends of G3GIQ.

ST0, SOUTHERN SUDAN (Update). The Southern Sudan is now the world's newest country as they celebrated its independence on Saturday, July 9th, with a flag-raising and a swearing-in ceremony for the new president in the capital Juba. The special ceremony was attend by U.N. Secretary General Ban Ki-moon and several other world delegates. On Friday, the U.N. Security Council approved a new peacekeeping force for South Sudan. The United Nations Security Council will endorse the Republic of Southern Sudan to become a member before the General Assembly on July 14th. The Southern Sudan is then expected to be the 193rd member/nation of the U.N. The ARRL should recognize this new country once they obtain UN admission. Meanwhile, Paul, N6PSE, reports that the Intrepid-DX Group and the DX Friends/Tifariti Gang is expected to activate this newly created country. They have had several meetings with this new government and they have obtained a valid license for this DXpedition. A team of 18 international operators are hoping to make 100,000 contacts over fourteen full days of operation on each amateur band and mode. If exact days for their operation are announced during the week, look for a special bulletin to be sent out. Stay tuned! For more details and updates watch: http://www.dxfriends.com/SouthernSudan2011

T32, EAST KIRITIMATI. Giovanni, I5JHW, will be active as T32JB from the Captain Cook Hotel on Christmas Island (OC-024) between August 17-24th. Activity will be holiday style on CW, SSB and RTTY, using an IC-718 and a 7-band vertical antenna. QSL via I5JHW. ADDED NOTE: Giovanni is actually on a family vacation which also includes Fiji (3D2HW) and New Caledonia (possibly his renewed callsign FK/I5JH), but the main operations will be on Christmas Island. For more details, visit his Web page at: http://i5jhw.weebly.com

T48, CUBA. Once again, members of the "Federaci&#65533;n de Radioaficionados de Cuba" in Las Tunas, will activate the contest callsign T48K during the

upcoming CQWW VHF Contest (July 16-17th) as a Multi-Single entry. They will be on 6 and 2 meters from Grid Locator FL10mw, which was previously activated on 6 meters during the June QSO Party. This activity will be the very first time ever on 2 meter/CW/USB. QSL via DK1WI.

V6, MICRONESIA. Aaron, W6ANM, will be active as V63FAA from Kosrae (OC-059) between July 26-29th, and Pohnpei (OC-010) between July 30th and August 4th. Activity will be focused on 40 and 20 meters using CW and SSB. A contact can be scheduled via the E-mail address on QRZ.com for any HF band. QSL via LoTW or direct to W6ANM (please include SASE). A new Web page is now available with details about his schedule, QSL info and online log, at: http://home.comcast.net/~V63FAA-2011/site/?/home

W2, UNITED STATES (Lighthouse Op!). Members of the Old Barney ARC will be operating as W2T from the Tucker's Island Lighthouse (USA-911) in the Tuckerton Seaport <www.tuckertonseaport.org> between August 13-14th, from about 1300-2100z each day. There will be two or three stations set up with activity primarily on 40/20/17 meters SSB. QSL via N2OO. Visit the Old Barney ARC Web page at: http://www.obarc.org

XE3/XF3, MEXICO (IOTA Op). Andrea, IZ2LSC, will be active as XE3/IZ2LSC between July 26th and August 8th. Activity will be holiday style on 30-6 meters using CW, SSB and the Digital modes. He will also make a side trip to activate IOTA NA-045, Isla Mujeres, as XF3/IZ2LSC between August 9-14th. Andrea informs OPDX that "According to RSGB IOTA website the Island has been credited to only 30.5% of participants." QSL via EB7DX, by the Bureau or direct, as well as LoTW. For more details, visit the Web page at: http://www.timpy.it/xf3

ZF, CAYMAN ISLANDS. Just a few more days to work Ann, W6NN, as ZF2LL from Grand Cayman Island (NA-016) as her last day is July 12th. Activity has been on 20 and 15 meters SSB. QSL via her home callsign, direct or by the Bureau or LoTW.

ZF, CAYMAN ISLANDS. Operators Bob/W5UQ and Bill/W5SJ will be active as ZF2UQ and ZF2EZ, respectively, between July 11-17th. They will be based at the "Cayman Amateur Radio Society" (ZF1A) club station. Operation will be primarily CW with an emphasis on 6 meters. Bill will operate Single-Op in the CQWW VHF Contest (July 16-17th). Bill states, "It is planned to be fun and relaxing - dits, dahs and beach!" Send QSLs for both callsigns to Jay, W5JAY.

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
04 - 10 July 2011

Solar activity was at very low to low levels during the period.
Solar activity began at very low levels through 06 July. On 06 July,
a 23 degree long filament, centered near N25W60, was observed
lifting off. An associated CME (573 km/s plane-of-sky speed) was
observed, but was not Earth-directed. Low levels returned on 07 July
when Region 1243 (N15, L=353, class/area Dai/100 on 06 July)
produced a C1/Sf at 07/0242 UTC. Four C-class flares were observed
on 08 July, the largest a C3/1n at 08/1331 UTC from Region 1247
(S18, L=269, class/area Dai/040 on 10 July). There was a long
duration B4 x-ray event at 09/0028Z UTC from Region 1247. Associated
with this event was a filament eruption located near Region 1247
that produced an asymmetric, partial-halo CME first visible on LASCO
C2 imagery at 09/0125 UTC. Activity returned to very low levels for
the remainder of the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels on 04 July. Flux levels increased to moderate on 05 -
06 July and further increased to high levels on 07 - 08 July. The
period ended with flux at moderate levels.

Geomagnetic activity ranged from quiet to active levels during the
period, with an isolated minor storm period observed early on 05
July due to a nighttime substorm. From 04 - 08 July, activity was
primarily at quiet to unsettled levels with isolated active periods
observed on 05 and 06 July. An increase to quiet to active levels
occurred on 09 - 10 July due to the onset of another CH HSS.

Forecast of Solar and Geomagnetic Activity
13 July - 08 August 2011

Solar activity is expected to be at very low to low levels during
the forecast period.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 12 - 14 July due to enhanced wind speeds from the currently geoeffective CH HSS. Normal levels are expected to return from 15 - 19 July before increasing to moderate to high flux levels again 20 - 27 July after an anticipated period of elevated solar wind speeds associated a second recurrent CH. Flux values should return to normal levels 28 July - 02 August, before another brief period of moderate to high levels on 3 - 4 August. Normal levels are expected to prevail for the remainder of the period.

Geomagnetic field activity is expected to be at quiet to unsettled levels on 13 July due to CH HSS effects. Unsettled to active conditions with the chance for a minor storm is expected to begin on 14 July and persist for a day or two due to the anticipated arrival of the CME from 1103 UTC on 11 July. Mostly quiet conditions should return 16 - 17 July. An increase in activity ranging from quiet to active levels is forecast for 18 - 23 July due to another geoeffective HSS from a recurrent negative polarity CH. Conditions are forecast to be mostly quiet from 24 July - 03 August, with the exception of more CH HSS effects expected 27 - 29 July and 31 July - 02 August. Each of these events should each produce mostly unsettled and possibly even brief active conditions. Mostly quiet conditions are forecast to return on 03 August, before a SSBC from negative to positive polarity is expected on 04 August, when mostly unsettled conditions should occur in advance of yet another CH HSS that is expected to produce mostly unsettled conditions for the remainder of the period.

645. [DXNL] DXNL 1736 (Jul 13, 2011)

Newsgroup: rec.radio.amateur.misc
Date: 2011-07-13 22:19:07 UTC
From: Robert Busch - DL7VOA <dl7voa@gmx.de>
Message-ID: <82367559437.20110714001508@dxhf.darc.de>
Source record: 4285

DXNL 1736 - Jul 13, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Alexander Derichs, DG8KAD
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C9 - MOZAMBIQUE
Dave,ZR6DG, will be active as C92DG from Tofo/Mozambique on Jul 14-28.
Plans are "to do two DX sessions a day" along with Helge,ZS6HB.
QSL via ZR6DG.

CO - CUBA, NA-015
Radio Club Las Tunas will take part in the CQWW VHF Contest (Jul 16-17)
as T48K, on 6m and 2m, from Grid Square FL10mw. QSL via DK1WI.

CT7 - PORTUGAL
Special event station CQ73O will be active on July 11-17 for the
30th International Motorcycle Rally in Faro, Portugal. QSL via CT1EHX.

DL - GERMANY, EU-128
Look for Stefan,DF8HS/p, to be active from Fehmarn Island (EU-128) on
July 9-29. QSL via homecall, bureau preferred.

LA - NORWAY, EU-055
Helge,LA1QDA, will be active from Store Sotra (EU-055) on July 11-31.
He will be QRV on 80m-6m. QSL via homecall, direct or bureau.

OH0 - ALAND ISLANDS, EU-002
Eric,SM1TDE, will be active holiday style as OH0/SM1TDE from Eckero on
Aland Islands (EU-002) on July 21-24. Look for him around 2 kHz from
the band edges on 80m-10m CW. QSL via the bureau and LoTW.

OZ - DENMARK, EU-172
Chris,DL4FO, will be active as OZ/DL4FO from Tuno Island (EU-172) on
July 17-29. He will operate mainly CW on the HF bands and 6 metres.
QSL via homecall, direct or bureau.

PY - BRASIL
Orlando,PT2OP, will be QRV as PQ3C from Chui Lighthouse (ARLHS BRA-024)
on July 17-20. He will be active on 10m-40m.

QSL via PT2OP, direct or bureau.

VE - CANADA
Alain,F5LMJ, will be active in his spare time as VE2/F5LMJ/p from
Canada (mainland) in July. He will operate CW and digital modes from
Saint-Sauveur (July 16-23) and Sainte-Anne-de-Beaupre (July 23-30).
QSL via homecall and LoTW.

YV - VENEZUELA, SA-035
The Grupo DX Caracas will conduct their annual IOTA expedition to
celebrate the Venezuelan Navy Day on July 13-18. This year a team of
15 operators will be active as YW5LR from Los Roques (SA-035) on all
bands and modes. QSL via DM4TI.

ZF - CAYMAN ISLANDS, NA-016
Bob,W5UQ (ZF2UQ), and Bill,W5SJ (ZF2EZ), will be active from the
Cayman Islands (NA-016) between July 11 and 18. They will operate
mainly CW/SSB on the HF bands and participate in the CQ WW VHF Contest
mainly on 6 metres. QSLs for both callsigns via W5JAY.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 16-17: Saar Contest
Jul 16-17: North American QSO Party
Jul 17: RSGB Low Power Contest

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-120, G, English Coastal Islands: The Wakefield & District Radio Society
will be active as GB1HI from Holy Island (also known as Lindisfarne)
from Jul 15-18. QSL via M0OXO (bureau/direct).
See also: http://www.wdrs.org.uk

EU-136, 9A, Kvarner group: 9A8ASN will be active from Cres Island from
Jul 13-30. QSL via IK5ASN (bureau/direct).

EU-172, OZ, Jylland East & Fyn group: OZ/DL4FO is going to hit the airwaves
from Tunoe (DIA JY-009) mainly in CW on the HF bands and 6m from
Jul 17-29. Tunoe is situated west of Samsoe and is a small island of
only 3,52 sqkm. QSL via bureau to his homecall.
See also: http://www.qslnet.de/dl4fo

NA-091, VE, British Columbia Province South group: Broughton Island has a
confirmation rate of only 22 %. Broughton is the workplace and QTH of
VE7RSV/p. When Rob has some time he is working in SSB with 100 watts
and G5RV almost every day. He wants to take part in IOTA Contest also.

QSL via homecall.

NA-142, W, Florida State North West (Escambia to Walton County) group: This
quite rare IOTA group will be activated by W4/DF2MM from Santa Rosa
(aka Okaloosa) between Jul 18 and Aug 25. He plans to join also the
IOTA Contest. QSL via DF2MM. His website is: http://www.df2mm.de

NA-232, KL7, St Matthew Island: It seems like everything is on "go" for a
first time activity from St. Matthew from Jul 19-22. If the weather is
fine and condx good N3QQ and NL8F want to make around 3000 QSOs signing
KL7RRC/p. They will work with high power in CW and SSB on 40m-10m.
Their "lift" can be found at: http://www.mikehorn.com
Other plans to activate NA-070 seem to be obsolete.
QSL via N7RO and for EU stations via UA9OBA (bureau/direct).

OC-187, VK, Queensland State (North Coast) North group: JE1SCF will activate
Lizard as KU2F/VK4 from Jul 18-22. QSL via JE1SCF (bureau/direct).

AN-016, VP8/A, Antarctica: VK2BFG is working as VK0BFG from Casey Station
and has been spotted in SSB on 40m already.

Lighthouse activities (WLOTA/ARLHS/ILLW)

** MMMonVHF and DUBUS 144 MHz Meteorscatter-Sprint Contest **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part in
our 144 MHz Meteorscatter Sprint Contest, which took place for the
first time in the 2008 Perseid shower. The 144 MHz Meteorscatter
Sprint Contest will take place each year on the day of the from IMO
(International Meteor Organization) announced maximum of the Perseid
shower. 2011 contest period: Date: 12./13. August 2011 Time period
for 48 hours: start 12.August 00:00hrs till end 13.August 2011
23:59hrs "UT" (End time of the last complete QSO) !! NEW !!
Reference data for 2011 by the IMO: expected Perseids Maximum 2011:
August 13th. 07:09UT with a expected ZHR of 100. Read all in detail
at the overview and rule page: http://www.mmmonvhf.de/ctest.php

** Discovery of the February Eta Draconids **

The Central Bureau for Astronomical Telegrams of the International
Astronomical Union today issued this TELEGRAM announcing the
discovery of the February Eta Draconids. Although CAMS was designed
to confirm previously discovered showers, a meteor outburst was
detected in CAMS February 4 data obtained at the Fremont Peak
(Rick Morales, Loren Dynneson, et al.) and Mountain View (Peter
Jenniskens) stations. This is the first new shower discovered by
CAMS. It is also a very unusual shower, of a type that only occurs
once or twice every sixty years and is caused by the dust trail of

a (still to be discovered) potentially hazardous long-period comet.
The new shower was named the February eta Draconids and is now
listed as shower 427 in the IAU Working List of Meteor Showers.
A paper on this discovery was submitted to the Journal of the
International Meteor Organization [[paper pre-print]].

** Working K5QE in the CQ WW VHF contest... **

Hello to everyone in the 2M EME community. This year, the CQ WW VHF
Contest will be held July 16th and 17th. The contest begins at 1800Z
on Saturday and ends at 2100Z on Sunday. We want to work as many EME
stations on 2M as possible to increase our grid count. All new grids
gratefully appreciated. Please help us with this event by working us
on JT65b or CW. Thank you very much.
There has been a significant rules change this year. Stations attempt
ing digital EME contacts are allowed to post Call, Frequency, and
Sequence ONLY to the various reflectors. This means that a station
calling CQ in the contest will be able to post something like
"144.142MHz....CQ CQ CQ de K5QE Second". That is what I usually post
anyway. Stations in the contest will not be able to post if they are
doing CW EME or making contacts via tropo scatter or other such means.
Full rules at http://www.cqww-vhf.com/CQVHFContestRules2011.pdf.

** EJ3, IRELAND (IOTA Op) on HF, 6m and 2m **

Members of the Galway Radio Experimenters Club (EI4GRC) and the
Shannon Basin Radio Club (EI2SBC) will be on air from Inishbofin

Island (EU-121) for the RSGB IOTA Contest (July 30-31st) as a
Multi-Op/Mixed-Mode/Low-Power entry using the callsign EJ3Z. This
is their second year of joining forces for this contest. Inishbofin
is a small island 9km off the west coast (53.37 North - 10.14 West).
On the days leading up to the contest, members will be active using
their own callsigns on HF and VHF; also watch out for EJ4GRC.
Inishbofin Grid Sq. is IO43VO. Operators mentioned are Pat/I9HX,
Niall/EI4CF, Anthony/EI6GGB, Mike/EI2EO, Tony/EI3HA, Fergus/EI6IB,
Ronan/EI8IH, Brian/EI8IU, Mark/EI6JK, Des/EI5GT, Tom/EI3ER,
Adrian/EI7DMB, Michael/EI4AL and Enda/EI2II. For more information
on the island, see: http://www.inishbofin.com
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1018

** PJ5, SINT EUSTATIUS, qrv HF and 50 MHz **

Gerd, DL7VOG, announced that he will be active as PJ5/DL7VOG from
Sint Eustatius Island (NA-145) starting the middle of November
through the beginning of December. His three week operation will
also include the CQWW DX CW Contest (November 26-27th). Activity
will be on 160-6 meters using mainly CW and RTTY, but he will have
a microphone with him just case someone really needs a phone QSO.
As always, Gerd will be using his IC-706MK2G (this time with an amp)
into an HF9VX for 80-6m and an inverted "L" (on a 15m fiberglass
pole) for 160m. QSL via his home callsign, Bureau is preferred.
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1018

** ZF, CAYMAN ISLANDS qrv on VHF **

Operators Bob/W5UQ and Bill/W5SJ will be active as ZF2UQ and ZF2EZ,
respectively, between July 11-17th. They will be based at the
"Cayman Amateur Radio Society" (ZF1A) club station. Operation will
be primarily CW with an emphasis on 6 meters. Bill will operate
Single-Op in the CQWW VHF Contest (July 16-17th). Bill states, "It
is planned to be fun and relaxing - dits, dahs and beach!" Send QSLs
for both callsigns to Jay, W5JAY.
SOURCE [DX-ENG] Ohio/Penn DX Bulletin #1018

** DL4FO, active as OZ/homecall in JO55 on HF and 50 MHz **

Chris,DL4FO, will be active as OZ/DL4FO from Tuno Island (EU-172)
on July 17-29. He will operate mainly CW on the HF bands and 6 metres
QSL via homecall, direct or bureau.
SOURCE: DXNL 1736 (July 13, 2011)

** T48K (FL10MW) qrv in CQ WW VHF Contest **

Radio Club Las Tunas will participate in the CQ WW VHF Contest
(16-17 July) as T48K, on 6 and 2 metres, from Grid Square FL10mw.
QSL via DK1WI. SOURCE: [TNX CO8ZZ] via [425ENG] 425 DX News #1053

** GM3ZHL/p qrv from various IOTA island groups **

Guy G3ZHL, Ken G3YKI and Trevor G8IBO hope to be active (80-6 metres
may be possible) as GM3ZHL/p from various IOTA island groups in north
west Scotland during a sailing trip from 9 to 22 July 2011. The route
and activations will depend totally on the weather. QSL via GM3ZHL
(bureau) or direct to G3ZHL's permanent address in England.
SOURCE: [425 DX News] via ICPO Bulletin (08 - 15 July 2011)

** DH8WE qill be qrv from JO88/JO98 on 6m focus and 20m & 40m **

2011-07-13 till 2011-07-21, JO98AX planed for 1 day (maybe 1st
Weekend after start) - pse read information on QRZ.com
SOURCE: tnx to DH8WE, direct to MMMonVHF

** K7BV July Square / Grid Trip on 50 MHz **

I will be leaving July 12 early AM for a rather long but fast moving
business trip=Grid Trip that will end about July 28. States covered
will include AZ, CA, ID, KS, NE, NM, NV, SD, TX. There are some
planned near full-day stops planned for girds I believe are still
pretty rare including: DM94, DN24, 37, 38, 58 others to try and catch
some Es. Grids I will cover include: EN 00,01,10,20 / EM 07,17,18,38
EM 29 / DM 13,14,15,23,25,26,33,37,38,39,43,44,45,49,54,55,65,66,74,75
DM 84,85,86,94,95,96,97 / DN 24,31,32,33,34,35,36,37,38,40,41,46,47,
DN 48,49,55,56,57,58,65,75,85,91,92,93,94,95 ... I am hoping to have
around 800W sometimes while mobile; more often 100W. Stops will
generally be done with 800W to 3el. I am working on a schedule right
now and will get it out ASAP. Barry, KS7DX will be my Pilot. I will
have cell phone and OnStar but no rolling Internet. When moving in
early AM hours, I will be on 50.255 WSJT FSK441 mode 1st sequence.
During day hours, most likely a combo of FSK441 and a CQ CW beacon
on 50155 until band opening indications appear. Please send comments
special requests, etc. via private email off the reflector.
More info to follow... SOURCE: Dennis K7BV via Reflector

** Square Tour from Bill, VE3CRU on 6m and 2m **

This weekend, VE3CRU, Bill be doing Saturday FN57 and FN67, Sunday
FN56 and FN66 . Prime 6 freq 50.155, 144 is 144.222 also doing
grids in VE2, VE9 and VY2 going, some US returning
SOURCE: VE3CRU Spots on ON4KST-Chat

** Helge, LA1QDA qrv from JP20 HF and 6m **

Helge, LA1QDA will be active from Sotra Island [Store Sotra]
(IOTA EU-055, WW Loc. JP20MH) on 11-31 July 2011. He plans to be
QRV on 80-6 metres, mainly SSB and CW. QSL via his home call,
direct or by the bureau. SOURCE: [rsgbiota.org] via ICPO Bulletin

---

** XE3/IZ2LSC qrv HF and 6 m **

Andrea, IZ2LSC will be active holiday style from Mexico between
26th of July and 8th of August 2011, using the callsign XE3/IZ2LSC.
Plans are to be QRV on on 30-6m CW, SSB, Digital modes. QSL via
EB7DX direct, or via IZ2LSC burau and LoTW.
SOURCE: [AT International] via ICPO Bulletin (08 - 15 July 2011)

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

73 de Guido "Guy" DL8EBW

==> 2011 SECOND MEETING OF THE ARRL BOARD OF DIRECTORS TO TAKE PLACE
THIS WEEKEND

The ARRL Board of Directors will hold its 2011 Second Meeting this
weekend in Windsor, Connecticut, with Directors, Vice Directors and
ARRL Board Officers in attendance. Per the Articles of Association the
ARRL Board of Directors meets twice a year, in January and July. Find a
copy of the meeting's agenda here
<http://www.arrl.org/files/media/News/2011_Second_Meeting_Draft_Agenda.pdf>.

==> +ON THE AIR: THE REPUBLIC OF SOUTH SUDAN NOW A DXCC ENTITY

At 10 AM (EDT) on Thursday, July 14, the UN General Assembly met to
vote on whether or not to admit the Republic of South Sudan as its
```

193rd member state. The Republic of South Sudan was admitted by a vote of acclimation and is now a member of the United Nations <http://www.un.org/apps/news/story.asp?NewsID=39034&Cr=South+Sudan&Cr1=>. Immediately following the General Assembly meeting, the flag of the Republic of South Sudan flew for the first time in front of the UN, ceremoniously marking its membership in the UN. The membership of the Republic of South Sudan in the United Nations invokes DXCC status under Section II, 1(a) of the DXCC rules <http://www.arrl.org/rules>. As such, the new country is declared a DXCC entity and QSOs for this new entity will be accepted immediately, with a start date of July 14, 2011.

According to DXCC Manager Bill Moore, NC1L, the Honor Roll numbers move from 340 to 341 for the Top of the Honor Roll, and for Honor Roll it becomes 332. "The deadline for the Honor Roll and annual listings is December 31, so you must submit the new entity to DXCC by then in order to retain your Honor Roll status," Moore explained. "For Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>), you may submit all your QSOs with the Republic of South Sudan stations anytime. There is no need to hold them out of your log or do anything differently from what you already have been doing. You do not need to assign country names or identifiers. After we issue certificates to the Republic of South Sudan license holders, LoTW will make matches and assign the correct entities automatically." Click here <http://www.arrl.org/news/us-recognizes-world-s-newest-country-the-republic-of-south-sudan>
for more on how the Republic of South Sudan became the newest DXCC entity.

==> + FCC NEWS: RECONROBOTICS PAYS $17,500 TO END FCC INVESTIGATION OF RULES VIOLATIONS

On Wednesday, July 13, the FCC announced that its Enforcement Bureau and ReconRobotics have entered into a Consent Decree. This resolves an FCC investigation in response to a complaint filed by the ARRL. In 2010, the ARRL alleged that ReconRobotics had violated Section 302a(b) of the Communications Act of 1934 as amended and Section 2.803 of the Commission's rules regarding the manufacturing, marketing, distributing and selling of radio frequency transmitters. In the complaint the ARRL alleged that ReconRobotics had unlawfully marketed the Recon Scout -- a remote-controlled, maneuverable surveillance robot operating in the 430-448 MHz band -- to public safety agencies and certain security personnel prior to the grant of a necessary waiver. The FCC granted a waiver to ReconRobotics in 2010 allowing public safety licensees to operate the device in a portion of the 70 cm band. To date, no license applications have been granted by the Commission for the device and the ARRL has petitioned to deny all applications filed. Read more here <http://www.arrl.org/news/reconrobotics-pays-17-500-to-end-fcc-investigation-of-rules-violations>.

==> + PUBLIC SERVICE: HURRICANE WATCH NET SEEKS NEW MEMBERS

The various organizations that assist the National Hurricane Center (NHC) in Miami are gearing up for what forecasters are predicting to be a very active storm season. One organization that assists the NHC is the Hurricane Watch Net (HWN). One of the functions of HWN is to provide on-the-ground, real-time weather data to the forecasters at the NHC. The HWN gets this weather data from Amateur Radio operators who volunteer their time to monitor data from their calibrated home weather stations and report that data to the HWN. To better assist the NHC, HWN Manager Kirk Harding, K6KAR, told the ARRL that the HWN is looking for new members. Read more here <http://www.arrl.org/news/hurricane-watch-net-seeks-new-members-1>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES EQUIPMENT GRANTS FOR SIX SCHOOLS

In June, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding equipment valued at nearly $5000 to six schools. More than 575 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. Applications for equipment and resource grants are accepted twice each year; application deadlines are May 1 and November 1.

A central goal of the ETP is to develop a foundation of wireless technology literacy among America's teachers and students. It employs Amateur Radio to explore radio science and electronics and provide hands-on activities that engage students' minds and imaginations, opening doorways into math, science and technology curriculum topics, as well as other core curriculum areas such as geography and language arts. Read more here <http://www.arrl.org/news/arrl-executive-committee-approves-grants-for-six-sc
hools>.

==> + OFCOM TESTS 70 CM BAND IN ADVANCE OF 2012 SUMMER OLYMPIC GAMES IN LONDON

In April, Ofcom -- the British equivalent to the FCC -- approached the Radio Society of Great Britain (RSGB) to help determine which sections of the 70 cm band could be used by the London Olympic Committee for a limited period before, during and after the 2012 Summer Olympic Games and the 2012 Summer Paralympic Games. Both events will be held in London.

"As a secondary user of the band, we as radio amateurs have no specific rights to any of those frequencies," the RSGB stated on its website. "Rather than just imposing changes, Ofcom has approached the Society in the spirit of cooperation to work together to solve the problem. The RSGB intends to work constructively on this matter to reach agreement with Ofcom on the segments that can be released on a temporary basis. Ofcom has given clear and unambiguous assurance that the segments used will be returned once the London 2012 Games are over." Read more here <http://www.arrl.org/news/ofcom-tests-70-cm-band-in-advance-of-2012-summer-ol

ympic-games-in-london>.

==> + NEW SECTION MANAGER APPOINTED IN WEST TEXAS

Bill Roberts, W5NPR, of Alpine, has been appointed as the Interim West Texas Section Manager as of July 8, 2011. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with ARRL West Gulf Division Director David Woolweaver, K5RAV. Roberts has served as the ARRL West Texas Section Traffic Manager since 2009. He is a past president of the Big Bend Amateur Radio Club and is also active as a back-up net control station for the Big Bend Emergency/West Texas ARES® Net and a net control station for the National Traffic System's Daytime Region Net 5.

John Dyer, AE5B, completed his latest term of office as the West Texas Section Manager on June 30. Dyer has served as the top Field Organization official in West Texas since July 2007; he previously served as Section Manager from October 2002-June 2005. Dyer decided not to run for the new term of office that began July 1, 2011. Roberts will serve as Interim West Texas Section Manager until a Section Manager is declared elected. Read more here <http://www.arrl.org/news/new-section-manager-appointed-in-west-texas>.

==> SOLAR UPDATE

Tad "I'm gonna soak up the Sun <http://www.youtube.com/watch?v=KIYiGA_rIls>" Cook, K7RA, reports: The average daily sunspot numbers this week were up 57 percent over the previous seven days, rising from 41.6 to 65.6, while the average daily solar flux rose just 3 points to 89.1. There seem to be plenty of sunspots of late, but none have been large, so the sunspot number and solar flux are not as high as in some previous months. A new sunspot appeared on July 7, then three more the next day on July 8, then a new one each day on July 9, 10 and 11 and two more on July 13. A coronal mass ejection on July 9 gave us some geomagnetic activity a couple of days later. Current forecast has an active day on July 14, with planetary A index at 17, then on July 15-24 at 8, 5, 5, 8, 10, 15, 12, 8, 8 and 5. Solar flux is predicted at 95 on July 14-15, 92 on July 16-17, 90 on July 18-20, then 92, 94, 90, 89 and 87 on July 21-25. Look for more information on the ARRL website on Friday, July 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sheryl Crow's Soak Up the Sun <http://en.wikipedia.org/wiki/Soak_Up_the_Sun>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Is it becoming more difficult to find parts for your homebrew
projects?
- Have your neighbors ever complained about your outdoor antennas?
- What is your favorite source for used Amateur Radio equipment?
- Are you active on 6 meter FM?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure
to bookmark it in your browser. Results from this QuickStats poll will
be published in the October 2011 issue of QST on the QuickStats page,
located in the rear advertising section of the magazine. Along with
monthly poll results, QST QuickStats offers colorful charts and graphs
that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- July 16 -- Feld Hell Sprint
- July 16-17 -- DMC RTTY Contest; CWops Mini-CWT Test; CQ Worldwide VHF
Contest; North American QSO Party (RTTY)
- July 17 -- CQC Great Colorado Gold Rush
- July 18 -- Run for the Bacon QRP Contest
- July 21 -- NAQCC Straight Key/Bug Sprint

Next week:

- July 22 -- NCCC Sprint Ladder
- July 24 -- WAB 144 MHz QRO Phone
- July 27 -- SKCC Sprint
- July 27-28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 15-17 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-inter
national-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention

WIANEWS WEEK COMMENCING July 17 2011.

A well-earned boost for amateur radio

They are still talking about the excellent coverage given in the Livewire
section of the Green Guide supplement in The Age newspaper.

HEAR MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA
FOR WEEK COMMENCING JULY 17 2011.

A well-earned boost for amateur radio

They are still talking about the excellent coverage given in the Livewire
section of the Green Guide supplement in The Age newspaper.

The well-researched article by Katie Cincotta appeared on Thursday the 7th
of July and involves accounts of nine radio amateurs, including 13-year old
Monique Golub VK3FWPZ.

The 8th grader enjoys contesting and has encouraged other young girls to
join the fun.

Justin Stewart VK3FLIP and Monique VK3FWPZ are shown at the Sherbrooke Community
School station VK3KID.

Maths teacher Edward Seeto VK3LIP demonstrates on a hand-held radio accessing a web-enabled local repeater to connect to a user in Dallas, Texas.

They learn the ropes from volunteers Randall McDonald VK3RM and Jim McNabb VK3AMN.

Another relative newcomer is Richard Holmes VK3TXD, keen to dispel the amateur radio stereotype of old blokes tinkering, and hopes a new generation will find clever ways to evolve the hobby. The lure of long-distance or DX contacts remains his main interest.

The article has a look at Doug McArthur VK3UM on emergency communications and moon-bounce experimentation through to Jack Bramham VK3WWW on his digital amateur television and ARDF pursuits.

Wireless Institute of Australia media spokesman Jim Linton VK3PC says the Foundation Licence is simple for people to acquire, although many progress to the higher grades as Standard and Advanced which give them more.

To read the full article visit:
theage.com.au/digital-life/ham-radio-far-from-over-or-out-20110706-1h135.html

(Jim Linton VK3PC)

august

Wally Green VK6WG turns 100 in August and is still going strong in the microwave experimenting area.

Wally recounts many amusing stories and one, told when being intervied by Bob Elms VK6BE went along these lines:-

"I recently heard you telling a story about your exploits
with ford spark coils and a male relative. Give us the
story again will you?

Wally responded......."

"Yes that sticks in my mind and I can see it in my head now.
He was interested in my elder sister and I was playing with
my Ford coil and I decided to see what would happen with this
bloke. There was a couch along the side wall. I connected the
coil to a battery and connected to two pieces of enamel covered
wire and put it under a piece of news paper.

The Ford coil would send a spark an inch long. It would go
through newspaper with no trouble at all. When he sat down
I turned the coil on. He just rose straight up into the air.
If his pants had been paper they would been set on fire.

But he still married my sister."

Augusts Amateur Radio Magazine will feature Wally VK6WG on the cover.

http://www.vk6uu.id.au/VK6WG.html
(sourced to vk7wia)

John Singleton's Macquarie Radio Network has concluded a heads of agreement to acquire eight commercial radio broadcasting stations from the Smart Radio Network in Queensland.
The agreement is subject to satisfaction of customary conditions including securing finance, board approval and the conclusion of a long form agreement.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA...Why be in it?

The Adelaide Hills Amateur Radio Society, an affiliate of the WIA in their last newsletter as that very question.

WIA...Why be in it?

They co on to say that "in 2010 the WIA celebrated 100 years of representing Amateur Radio in Australia. That is 100 years of improved conditions for the AR population in Australia. The WIA does not win all the battles, but at least they try.

Currently only 30% of Australian Amateurs are members.

The WIA is like a trade union, the WIA works hard to get benefits for their members, but all Amateurs benefit. Is that fair?

All amateurs are free to use VK5 repeaters yet some are funded by the WIA.

AHARS insurance: the club has liability insurance through the WIA. Any members who are members of the WIA are covered at no further cost to AHARS. The club submits members list in April and the WIA charges a fee for all non WIA members.

Clubs are not advised of who are not members, due to privacy restrictions, but Clubs are charged accordingly.

If you operate on the so called WARC bands, have a Foundation licence, operate HF without a CW test, then these conditions have all been won by the WIA.

WIA will be represented at the World Radio Conference (WRC) in 2012. The WIA is part of the official Australian Government contingent, the WIA pay for this privilege. If we do not attend, our bands and conditions are at risk.

This all costs money.

It will cost you less than $2 a week to be a WIA member.

Please visit the WIA website www.wia.org.au to see how many volunteers help.

Contests, awards, magazine, bookshop, historian and so on, for the benefit of all Amateurs. This is not a witch hunt, just putting the facts for your decision.

As AHARS say in their newsletter. Please consider joining.

WIA PRESIDENT VK3KI REPORTS

Recently an amateur forgot to renew his licence because he failed to advise the ACMA of his new address, and was upset when his two letter callsign was allocated to someone else.

The "Comment" in the June 2009 issue of Amateur Radio addressed this problem in some detail, and further information can be found on the WIA website www.wia.org.au under the tab "Australian amateur licensing and callsigns" under the button "Get your Amateur Radio Licence".

The Radiocommunications Act does not impose on ACMA an obligation to issue a renewal notice. ACMA does so, but failure to receive a renewal notice is no excuse for not renewing a licence.

Obviously, failing to notify the ACMA of a change of address will mean that even if the ACMA does send a renewal notice, it will go the wrong address. But the Act does provide that a licence can be renewed from 6 months before and 60 days after its expiry date. It is the licensee's responsibility to ensure that the licence is renewed in that time.

A callsign is only a condition of a licence, and if the licence is not renewed, after 60 days from the expiry date the callsign will be placed on the Public List, (the list of available callsigns on the WIA website) and after 7 days the WIA will issue a Callsign Recommendation to whoever wants that callsign.

PRESIDENT MICHAEL ALSO WROTE TO WIA FRONT PAGE NEWS

"From 8 July 2011 a change has been made to the procedures for a Callsign Recommendation for a two letter callsign in Queensland, New South Wales and Victoria.

Since 1 December 2010 the procedure in respect of two letter callsigns in those states has been that no callsign recommendation can be made until seven days after a callsign is placed on the Public List, (the list of available callsigns on the WIA website) to allow someone who has inadvertently allowed a licence to lapse to claim back the callsign.

Applications for these two letter callsign were still required to be lodged by mail, but after the seven days had elapsed, if there was more than one application for a callsign and the callsign has not been claimed back, then the applications were drawn at random in the presence of a WIA Director, Secretary or Treasurer. This ensured that those living in more remote areas, without Express Post, were not disadvantaged.

Now applications for a two letter callsign in Queensland, New South Wales and Victoria may be sent by mail, facsimile, scanned and sent by email, or delivered by hand to the WIA office.

After the expiration of seven days, the ballot procedure will determine the applicant who will receive the Callsign Recommendation.

In addition, fees paid by unsuccessful applicants will be retained until the callsign has been allocated by ACMA, and if the callsign is not allocated, then

the next applicant drawn would be offered the callsign and the fees will only be refunded to unsuccessful applicants after the ACMA has allocated the callsign.

The WIA cannot accept a standing application for a two letter callsign, as the application for a Callsign Recommendation must always relate to a particular callsign."

HAMS ACROSS AUSTRALIA.

Riverina Field Day Albury Wodonga Amateur Radio Club Inc

The Albury Wodonga Amateur Radio club hosts the Field day, held at the Lavington Scout Group Hall Lavington at 10:00am and it costs just $5.00.

Traders, second hand equipment, hot food, free tea and coffee.

All welcome on July 31.

Places for exhibitors and traders still available, for more information contact Tom vk2my

sanders_01@bigpond.com

(wia events)

East Gippsland Amateur Radio Club would like to remind members of the up and coming AGM, the AGM will be held in the rivers room at the Bairnsdale RSL Club, corner of Princes Highway and Forge Creek Road, on Sunday the 24th of July at 1:30 PM and meals start at 12 PM for those wishing to have a meal before the AGM, more information may be found at the clubs web site www.vk3egc.org

(Michael, clubs Publicity Officer, VK3HAU)

VK5

Darryl Ross, VK5HZ writing in the Winter 2011 issue of 'INFO' from the Elizabeth Amateur Radio Club in VK5 tells how they have added a new column to the issue -

'EARC Notices and Classifieds'.

Notices and 'adverts' are free for members and can be run for as many issues as are requested.

So if you have anything you want to get rid out of the 'junk room' er 'shack', send in a quick note and perhaps someone else will find a use for it!

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

VK7RCH interference

Michael 7FMRS and Hayden VK7HAY have managed to track down the interference on VK7RCH. It appears to be a "remote" operated boat crane operating on 433.575MHz, the repeaters input.

Just a reminder too that anyone may use the repeater, it's for the benefit of Southern Amateurs and to increase activity on 70cm.

(VK7WIA)

VKG Roundup http://www.police.nsw.gov.au/news

Snowy Mountains Amateur Radio Club.

Visitors to the Perisher ski areas over winter are invited to use the local 70cm repeater on 438.450 MHz. VK2RLJ located at a little under 2000 metres ASL on Mount Perisher, provides excellent coverage in and around the Perisher Valley range of ski resorts as well as into the Thredbo Ski Resort and surrounding towns.

The Snowy Club reminds visitors their 2mrepeaters are active on 147.025 MHz and 147.250 MHz, both positive offset and 91.5 Hz tone, providing coverage all the way from Cooma to the Snowy Mountains.

(vk2wi)

TRASH & TREASURE

The next Trash & Treasure event at VK2WI is on the last Sunday of this month, the 31st, with the usual line up. Trash & Treasure and exam assessments in the morning and the Home Brew gathering in the early afternoon.

International Lighthouse & Lightship Weekend heats up

Jim Linton tells us that the Illawarra Amateur Radio Society has told him that "Lighthouses of Australia", a non-profit organisation which aims to create a higher profile for lighthouses, will be in attendance to relight the old diesel powered Point Perpendicular Light for VK2AMW on the weekend!

Club Auction

Liverpool & District Amateur Radio Club Auction, Saturday August 20.

Miller Scout Hall, Shopshire Road, Miller. Next to Miller High School open 8:30am, auction commences at 10:30am

Any vendors who wish to participate, please contact the Liverpool Secretary Garry VK2BR further details.

VK2BR on 0427 063 553
email vk2tsr@bigpond.com

The report, The internet service market and Australians in the online environment, found that that more than 15 million people aged 14-years and over

used the internet during the December quarter of 2010, up from 14.2 million during the same quarter in 2009.

In addition, 71 per cent of internet users went online at least once a day in December 2010, compared to 67 per cent in December 2009 - an increase of 1.2 million users.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

ARNSW Foundation Course and assessments on Sunday the 4th of September at the VK2WI site.

We ask listeners to advise those they know who have an interest in getting into Amateur Radio that the course is to be held. Have them telephone 02 9651 1490 that number again 02 9651 1490, leaving their contact details.

The date again September 4.

(VK2WI)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Radio licence exemptions following Christchurch earthquake

Temporary transmitters being used in the Christchurch emergency response are exempted from radio licence requirements for the next three months.

The exemption applies to transmitters established within a radius of 30 kilometres of what is known as the 'The Square' in Christchurch. See NZMS 260 map series location M35 806 417.

For the purposes of technical coordination, details of the transmissions must be entered into the Register of Radio Frequencies as 'planned licences' and be certified by an approved radio engineer or an approved radio certifier.

The exemption is made under Regulation 10 of the Radiocommunications Regulations 2001, and is in effect until September 30, 2011.

(rsm)

ZLs TOURISM RADIO

aN Audio travel guide named 'Tourism Radio' operates in New Zealand.

Tourism Radio uses an integrated GPS system broadcasting content in real time.

The system points out well known landmarks as the vehicle approaches allowing visitors to take in all New Zealand has to offer.

The New Zealand company is planning to expand its travel guide here to Australia in 2012, followed by Hawaii and the US after that.

RMS station at Bangalore

The Amateur Radio Messaging Server (RMS) Gateway Station VU2IIH was inaugurated by Shri B.M.Baveja, VU2BMB, Group Coordinator, Department of Information Technology, Ministry of Communications and Information Technology, Government of India at INDIAN INSTITUTE OF HAMS, Bangalore on Wednesday, 6th July. The project is implemented by National Institute of Amateur Radio, Hyderabad.

==========

NEWS FROM ARNEWSLINE USA

NEW BILL INTRODUCED TO CRIMINALIZE ILLEGAL STREAMING

Streaming copyright material may soon be against the law. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

A trio of Senators has introduced a measure that would make illegally streaming TV shows or movies a felony. The bi-partisan bill, designated as S. 978 was introduced by Senators Amy Klobuchar, John Cornyn and Christopher Coons. It came the same day that Sen. Patrick Leahy of Vermont re-introduced a bipartisan measure to give the government more tools to shut down Web sites that traffic in stolen intellectual property, including TV shows and movies.

It is already a felony to download or upload that content, so the bill would just extend that to streaming. This was a recommendation made by White House Intellectual Property Enforcement Coordinator Victoria Espinel. Espinel pointed out that under existing law, it is unclear that streaming copyrighted work can be subject to a felony penalties because such penalties are predicated on the defendant either illegally reproducing or distributing the copyrighted work.

While, intuitively, streaming would seem to pretty clearly be distribution, there has been some legal question about that designation. This new law looks to clear up that point.

I'm Jim Davis, W2JKD.

The Obama administration has made protection, security and privacy of online content a priority given its push for universal broadband as a critical infrastructure component of the country's future.

FALCONSAT 3 CREATES OVER 200 NEW HAMS

Turning to ham radio space related news, word that the US Air Force Academy FalconSat-3 satellite, launched in 2007, has resulted in over 200 academy students becoming licensed radio amateurs.

FalconSat-3 was put into orbit on March 9, 2007 by the U.S. Air Force Academy in Colorado. It carries a 145 to 435 MHz digital store and forward transponder supporting data rates of 9k6, 38k4, or 76k8 running the pacsat file system so anyone with WiSP can copy telemetry.

Project OSCAR UK contacted Colorado Satellite to get the latest word on the satellite. They received an update below from Jim White who explained that the government band radios on Falcon-Sat-3 require a stable gravity gradient attitude to work properly. They have struggled with the attitude control

since launch and it is not yet stable. Instead, the satellite is operating using its amateur band radios and as a result a large contingent of cadets and faculty from the Air Force Academy have obtained Amateur licenses.

White says that FalconSat-3 is presently on during most day and evening passes over the Air Force Academy with a very strong downlink on UHF.

He adds that when FalconSat-5 was launched about 6 months ago there was some thought that FalconSat-3would move to fully amateur service. However FalconSat-3 has proven to be such a useful learning tool that the decision was made to operate it along with FalconSat-5. Unlike its predecessor, FalconSat 5 carries no Amateur equipment.

==========

WEIRD AND WONDERFUL

THAT 110 YEAR OLD BULB STILL HAS US IN ITS SPELL

A follow-up to a story that we first aired some ten years ago. It's about a light bulb. A very old light bulb that keeps a Northern California fire station out of the dark.

Amateur Radio Newsline's Bruce Tennant, K6PZW, with details:

A light bulb hanging in the Livermore Pleasanton California Fire Department has been burning steadily for exactly 110 years.

Lynn Owens, who's in charge of the "light bulb centennial committee", says that how it stays lit remains something of a mystery. He says that it's a 60-watt bulb but it only gives off only about four watts of light. Even so, but nobody knows why it keeps burning.

According to the lamp's website, the bulb is actually a somewhat different style bulb from what other manufacturers of the day produced. It was invented by Adolphe A. Chaillet and made by the Shelby Electric Company. It was donated by Dennis Bernal to the Livermore Volunteer Fire Department and this past June 18th was its 110th year of continuous illumination. This is a fact documented extensively by Guinness World Records.

One possible answer may be the way in which it was constructed.

In a 2010 interview with the Daily Mail, bulb protector Steve Bunn ascribed the light's success to good old fashioned engineering. In the Shelby bulb, a coiled filament burned brighter and lasted longer than the Edison bulb -- this as evidenced by the longevity of the Livermore Pleasanton centennial bulb which celebrated its 110th year of nonstop duty back on June 18th.

According to Owens, scientists from around the world have come to look at the bulb but why its lasted this long is still a mystery. You can visit it vicariously on the world-wide-web
www.centennialbulb.org

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Aug 13-14 WIA Remembrance Day Contest

Aug 20-21 WW I.L.L.W.

Oct 22 WIA Jack Files Contest

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

Here is an unofficial report on the NZART Memorial Contest held 2nd and 3rd July 2011.

Conditions were not good and made for some hard digging of signals at times.

Saturday there was an average of 32 SSB Stations per hour.

19 ZLs and 13 VKs

Sunday was very similar with an average of 36 SSB Stations per hour
23 ZLs and 13 VKs.

The pleasing thing was that most stayed around to give that 1 point.

PHILLIP zl2tze thanks those that worked this contest and remember to get your logs in by 31st July

Remember to include the summary sheet .

Please mark this on your calendar for 2012 First full weekend in July and pass this on to all ..

Thank you and hear you all in 2012 !!!

International Lighthouse & Lightship Weekend heats up

In yester-year the coastline had lighthouse protection, now well surpassed by modern satellite navigation.

The radio amateurs operating portable from those locations, on the third weekend of August helps keep the spirit of the lighthouse alive.

Several countries with a relative small coastline do surprisingly well, by activating as many of the accessible lighthouses as possible.

Of those countries that relied heavily on lighthouse protection on the past, Australia remains in the lead with 51 followed by the USA on 48, but usual leadership contender Germany has only 39 entries so far.

More than 300 entries are expected for lighthouses and lightships from now onwards with around 50 countries to be involved and with just 4 weeks to go to the International Lighthouse and Lightship Weekend a total of 290 entries

have been received. Many more expected in coming weeks.

This year so far 13 Lightships are entered mainly from Belgium, England, Germany and the USA. There's one each in the Netherlands, Sweden and Wales.

Lightships are a rarer breed of the long-gone era of magnified flashes a light used by ships as they navigated along the coast and around the world.

Since 1998 the 48-hour fun filled third weekend in August attracts more than 440 entrants, from around 50 countries.

Be part of the action, or just check the newly refurbished website at ILLW.NET where you will find more information about the International Lighthouse and Lightship Weekend, on August the 20th and 21st.

For full details and on-line registration for the weekend of August the 20th and 21st check the website ILLW.NET which has been recently been revised and well worth a visit.

(Jim Linton VK3PC)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The island of Nauru in the central Pacific is not often heard on the bands.
Pekka OH2YY will be active as C21YY until 20 July.
He will use SSB only and QSLs go via his home call.

Dave ZR6DG is in Mozambique until 28 July and will sign C92DG.
He plans to be active on the bands as time allows.
QSL info is via his home call.

The unusual callsign E76ARDF will be in use from now until 20 July from Bosnia-Herzegovina. This is in connection with the 6th Balkan Amateur Radio Direction Finding Championship. It is expected that 120 amateurs from 9 countries will take part in the event.

Brazil Special Event

Look for the amateur radio special event station PT 155 FD to be active between now and July 30th.

Activity is to commemorate the 155th anniversary of the first Official Fire Department in Brazil (Rio de Janeiro State).

LORD HOWE ISLAND, VK9L.
Hellenic Amateur Radio Association of Australia on Lord Howe Island (OC-004) as VK9HR between July 23 and August 2. CW, SSB and RTTY activity on 160 to 6 meters.
QSL via EB7DX.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

In the last DX Bulletin No. 1018 there was mention of ZL7 in the cluster report also the same reported in the DXCC Country / Entity report from Southgate Amateur radio News.

We are led to believe there is no current licensed operator with the calls listed :

N2KW 7023.0 ZL7O14 0652 03 Jul Chatham Islands

EA5YZ 14021.0 ZL7PW 5/9 I'm murcia 73.s 0615 13 May Chatham Islands

Anyone wanting to check any ZL call sign can do via the MED / RSM website http://www.rsm.govtnz/smart-web/smart/page/-smart/domain/licence/SearchCertificateAndIdentifierPE.wdk

Or contact NZART @ NZART.HQ@clear.net and ask the NZART ARX (Debbie) if the call has been issued .

(Phillip ZL2TZE)

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

The August edition of Amateur Radio magazine

On the cover is Wally Green VK6WG, turned 100 and still achieving. Also foreshadowed is an upcoming story on another centenarian, Pearce Healey VK2APQ.

In the WIA Comment there's the IARU latest by President Michael Owen VK3KI, explaining its vital role leading up to, and during, the World Radio Conference.

We learn about Willis Island visited by David Burton VK9WBM.

In Foundation Corner, Geoff Emery VK4ZPP revisits home brewing, a very good read for everyone.

At the other end of the demographic is a call to join the RAOTC.

There's news of the reformed Parkes Radio Club VK2BPK and the Hills Amateur Radio Group VK6AHR in action.

Spotlight on SWLing has Robin Harwood VK7RH lamenting that Radio Netherlands is to stop some broadcasts and Deutsche Welle has made cuts already.

There are the columns from ALARA, AMSAT, Contests, DX, VHF & UHF -- and writings from each state.

Amateur Radio magazine a membership service, is also available at selected news agents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager. The Rules and my introduction to the 2011 Remembrance Contest, are in the July edition of the Amateur Radio Magazine. Or you can download a copy of these rules when you can log onto the WIA website. At the bottom of the RD Contest page is a link to download a PDF copy of the Rules and my introduction, or you can email me at rdlogs@wia.org.au and I can send a copy of both (if required) in PDF format.

Basically, there has been NO changes since last year, however, as this is the WIA's Premier Annual Contest, I like to get the rules published each year.

Due to some request's and a discussion's at this year's AGM in Darwin the Start and finish times of the contest remain the same however it MAY change for next year's contest.

I would ask that any newly licensed Amateur Operator taking part in this year's contest take the time to read the rules.

As we did last year, I have include the new section for World WARII equipment. This equipment can be on HF or VHF. Please read the rules regarding criteria for this equipment.

Today is the 17th July and as this news goes to air, you have about 4 weeks to check your equipment, logs sheets, and Logging Software updates.

Over the next couple of weeks I will make available, at the bottom of the RD Contest page, printable log sheets, declarations, etc.
Until next week.

HAM RADIO IN SPACE: ANOTHER ARISSAT-1 DELAY

The orbiting of ARISSat One has been delayed for a few weeks. Bill
Pasternak, WA6ITF, is in the newsroom with the latest details:

--

According to ARISSat One Project Manager Gould Smith, WA4SXM , the
former Suit-Sat will not make an appearance in space until sometime in
August.

In a news release, Smith said he and ARISS Hardware Engineer Lou
McFadin, W5DID participated in a teleconference call this week with
NASA to review the Roscosmos spacewalk procedures for the release of
ARISSat One during E-V-A 29. For those who never heard the term before,
E-V-A is an acronym for Extra Vehicular Activity and is NASA-ese for
describing a spacewalk

Smith now says the discussion centered on preparation procedures
including the battery being charged and assembled into the satellite.
Also discussed were the procedures to remove the protective quilts from
the solar cells and turning on the safety switches prior to deployment.

During a later teleconference Sergey Samburov, RV3DR announced that the
ARISSat One battery will be charged in late July and a test of the
system will be conducted from the ISS from 1915 UTC July 30th to about
1200 or 1400 UTC July 31st. The standard ARISSat One 2 meter downlink
band plan should be transmitted as well as the FM signal also
downlinked on 437.55 MHz.

The ARRISSat One team believes that it is looking at an August 3rd date for actual deployment, but notes that this is all subject to change.

More information as it becomes available. For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More on ARISSat One in future Amateur Radio Newsline reports. (ANS)

**

RADIO EDUCATION: FCC ANNOUNCES LEARNING ON THE GO

The FCC has officially launched an innovative program for 20 schools and libraries in 14 states aimed at giving participating Kindergarten through 12th grade students off-premises connections to the Internet. This, to increase access to digital textbooks, cutting-edge interactive learning tools, and other innovative wireless technologies. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The new FCC wireless pilot project is called "Learning On-The-Go," and will provide up to $9 million for the 20 schools and libraries selected for the 2011-2012 funding year. It builds on the FCC's major modernization of the E-rate program last fall, and follows recommendations of the National Broadband Plan. Previously, the E-rate program supported on-campus connectivity only.

According to a 2010 E-rate survey, approximately 50 percent of the schools and libraries that responded indicated that they plan to implement or expand the use of digital textbooks and other wireless devices for digital learning. The 20 selected projects include initiatives to improve off-campus access to e-textbooks for students; connectivity for netbooks for students living in remote, isolated areas and access to flexible, online education programs for home-bound students unable to attend classes.

To initiate the funding process, the FCC has issued an order listing the 20 selected project applicants, outlining participant reporting requirements and more detailed information about the program.

Last September, the FCC initiated the pilot program in its Schools and Libraries Sixth Report and Order and, in November, it issued a public notice setting a December application deadline. The Commission received 94 applications and, in March, issued a public notice announcing the initial selected project participants.

Qualified pilot programs will be funded in the 2011through 2012 school year, assuming compliance with all other program requirements.

This pilot program is one of a series of initiatives in the FCC Education Agenda to modernize the E-rate program to help bring fast, affordable Internet access to schools and libraries across the country.

In addition to this program's goal to support off-campus wireless Internet connectivity for mobile learning devices for schools and libraries across the country, the Schools and Libraries Sixth Report and Order is also helping to bring super-fast fiber connections to schools and libraries all across the country via unused fiber optic lines already in place.

The FCC has also opened the door to what it calls "School Spots" where schools have the option to provide Internet access to the local community after students go home. This the regulatory agency says can bring the benefits of super-fast broadband to people who otherwise lack access to the Internet.

Under the "Learning On-The-Go" pilot program, mobile learning devices enable teachers and parents to tailor school curriculum and interactive learning to students' skill sets. Digital textbooks never go out of date and students will have greater opportunities to access the latest educational curriculum available.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The FCC's adds that its E-rate program will continue to support schools and libraries across America working toward the goal of helping ensure that the nations students receive the best education and the high-tech skills to compete in the 21st Century economy. A copy of the FCC Order is available on the FCC website at tinyurl.com/fcc-learning (FCC)

**

RESCUE RADIO: HURRICANE WATCH NET LOOKING FOR ADDITIONAL REPORTING STATIONS

The Hurricane Watch Net is currently looking for amateur radio operators who are located in hurricane prone areas to become part of a database of "Official Reporting Stations."

One of the functions of Hurricane Watch Net is to provide on the ground, real-time weather data to the forecasters at the National Hurricane Center in Miami, Florida. The Hurricane Watch Net gets this information from amateur radio reporting stations who volunteer their time to monitor data from their home weather stations and report that data to the net that operates on 14.325 MHz.

One important benefit of registering in the database is that the Hurricane Watch Net will notify you of upcoming activations should you be located in the affected area of a storm. If you are interested in joining the Hurricane Watch Net's team as one of its Official Reporting Stations, take your web browser to www dot hwn dot org. Then click on the words "Join Our Team" and complete and submit the short web form that you will see on your screen. Also keep in mind that this is one

ham radio activity where the information you provide as a net member could help save lives. (HWN)

**

RESTREUCTURING: EUROPEAN CB'ERS GET SSB OPERATION

A decision by the European Union has paved the way for the use of Single Sideband on 27 MHz CB across the British Isles and Europe. The revised regulation will permit European CB operators the use of SSB equipment running 12 watts Peak Envelope Power output in the frequency band 26.960 to 27.410 MHz. The European Union decision to permit SSB on 11 meters came into force on June 24th and carries a preferred implementation by national telecommunications administrations of October 1st. (Southgate)

**

RADIO RULES: LIGHTSQUARED MAY BE ATTEMPTING TO BYPASS FCC REGULATION

The GPS versus broadband saga continues. According to the July 7th issue of the aviation industry newsletter ainonline.com, LightSquared appears to be attempting do an end-run around the FCC to try to get its proposed high speed broadband service into operation.

Possibly recognizing that the July 1st final report on GPS testing showed that interference from its proposed broadband system was worse than predicted, the newsletter says that LightSquared lawyers are now bypassing the FCC and submitting technical papers directly to the United Nation's International Telecommunications Union in Geneva.

As we all know, the I-T-U is the world body that allocates frequency bands internationally within the radio spectrum to different user groups such as aviation, surface and weather. It also regulates and monitors their use. As such, ITU rules are regarded as much stricter than the typical recommendations made by any government telecommunications agency.

Meanwhile, both LightSquared and the GPS community are accelerating their public-relations campaigns. LightSquared is announcing initial customers and statements of support from Internet and voice-over-Internet providers for its 4G broadband system. This, while the GPS industry warns of ominous test results regarding interference from LightSquared's signals that could become a matter of life and death for first responders, such as ambulances, police and fire department vehicles.

In Congress, the House of Representatives included in a financial appropriations bill a prohibition on further FCC expense on LightSquared's proposal, even including staff salaries, until the company presents a complete GPS protection plan.

And in a late breaking development, a federal report documenting GPS interference by the proposed LightSquared satellite-terrestrial

broadband network has been released. In its findings, the National Telecommunications and Information says that it supports a recommendation that additional tests be performed and also recommends that the FCC continue to withhold authorization for LightSquared to commence commercial operations until all the available test data can be analyzed and all valid concerns have been resolved. More is on-line at tinyurl.com/arn-lightsquared-3. (ainonline.com, RW)

RESCUE RADIO: FCC REMINDS VPD'S OF OBLIGATION TO AIR EMCOMM INFORMATION TO THE DISABLED

The FCC says that in light of the recent flooding in the south, the tornadoes in various parts of the country, and the already active storm season, that it is issuing a Public Notice on information distribution. This, to remind video programming distributors of their obligation to make emergency information accessible to persons with hearing and vision disabilities in accordance with section 79.2 of the Commission's rules. Amateur Radio Newsline's Jim Davis, W2JKD, has the details:

--

Under section 79.2, emergency information encompasses what the regulatory agency calls critical details regarding the emergency and how to respond to it. It also must provide information for consumers about how to contact their video programming distributor or the Commission regarding compliance with the rule. Those affected include broadcasters, cable operators, satellite television services, and "any other distributor of video programming for residential reception that delivers such programming directly to the home.

The FCC adds that the need to comply with section 79.2 and make the critical details of urgent information accessible is not always limited to the immediate geographic areas affected by the emergency. This is because in some cases information such as the relocation of individuals outside that immediate geographic area also falls within the rule's mandate. Accordingly, compliance with section 79.2 could include providing information to non-impacted areas sheltering individuals displaced by a large-scale disaster. This might include incidents such as the recent tornado devastation to Joplin, Missouri or in 2005 when Hurricane Katrina struck the Gulf Coast.

Im Jim Davis, W2JKD.

--

The FCC says that all video programming distributors that air emergency information are required to make this information accessible who are visually or aurally handicapped. There are no exemptions to section 79.2. A local broadcast licensee is responsible for complying with section 79.2 regardless of the technology used to deliver its signal to consumers. (FCC)

**

RESCUE RADIO: TORNADO VIDEO NOW ON LINE

A anthology of broadcast television and radio coverage of recent tornadoes and their aftermath that was shown at the recent National Association of Broadcasters Education Foundation's Celebration to Service to America Awards is now available for anyone to view on-line. The six-plus minute clip shows the twisters along with a series of TV meteorologists warning people to take cover.

One clip from a live news chopper shows the tornado funnel from the level of the cloud ceiling. Another shot shows a twister hitting what appears to be a Mack truck and shredding it into sheets of metal that blow away like tissue paper.

The second half shows aftermath stories including relief efforts. The video is in cyberspace at tinyurl.com/arn-tornado-video (TVB)

RESCUE RADIO: HUNTINGTON BEACH CA. ROLLS OUT NEW EMCOMM UNIT

Huntington Beach, California has introduced its new emergency communications trailer to the public. According to Wayne Yoshida, KH6WZ, on Field Day weekend the new response unit made its first public appearance.

Yoshida says that the new unit was purchased by the City of Huntington Beach using homeland security grant funds. In addition to amateur radio, the trailer is also equipped with two-way radio gear for the city's police and fire departments making it a universal mobile command station tool. (KH6WZ)

ENFORCEMENT: NEW FINES INSTITUTED FOR ILLEGAL USE OF LASERS

Federal aviation officials say they will start imposing fines against people who point lasers at planes and helicopters, which can temporarily blind pilots. Agency officials released a new legal interpretation they said will allow them to fine people who point the lasers as much as $11,000 per incident.

According to the FAA, pilots have reported over 1,100 such incidents in the U.S. so far this year. These incidents have also increased rapidly around the world over the past six years. This as online sales of

newer and more powerful handheld lasers have soared.

The lasers are being marketed as an astronomical tool to point out stars at night but a government spokesman says that people are also pointing them at truck drivers, bus drivers and even individual motorists. The spokesman calls that this is a ridiculous kind of behavior and it needs to be stopped and stopped quickly.

So far this year, the Phoenix and Dallas-Fort Worth regions have each recorded more than 45 such dangerous laser events. Meantime, the Los Angeles, Philadelphia and Houston areas each have recorded more than illegal 30 laser pointings. (FAA and other published news reports)

**

ENFORCEMENT: BIG FINE FOR TOWER LIGHT FAILURE REDUCED

A fine against Big Fish Broadcasting for antenna lighting violations has progressed to a forfeiture order.

Big Fish owns a tower in Greenwood, S outh Carolina and used to own one in Chappells, South Carolina. It sold the latter one to Radio Training Network Inc. in April 2010.

The commission says the red obstruction lights were out for both towers and that the company didn't notify the FAA of the outages. In a recent decision, the agency said both towers required painting and a lit, flashing red beacon up top, along with steady burning red side obstruction lights.

Responding to a complaint about tower outages, the FCC's Atlanta office had contacted the FAA, which said no outage report had been filed for the towers. As a result, no Notice to Airmen or NOTAM had been issued for the unlit structures.

According to the Commission's summary of the case, in July 2009, the agency notified told Big Fish's owner the towers were his responsibility. He responded that he would check into it and notified the FAA about the outages that month. That October and again in November, the FCC confirmed the towers were still unlit after sunset and there was no power to the site. The agency said the local power company confirmed electricity to both towers was shut off in 2009.

In July 2010, the commission issued a $20,000 fine to Big Fish. In response, the broadcaster argued that it did not receive the notice until 30 days after its release and, by then, had already taken steps to fix the violations. Big Fish also said the company couldn't pay the full amount and asked for a reduction based on past good compliance with FCC rules.

The FCC expects violations to be corrected so it did not knock off any penalty because of that; however it did cut the fine to $7,000 based on documentation proving the company couldn't pay the full amount. Big Fish was given the customary 30 days to pay or to file an appeal. (RW)

**

ENFORCEMENT: $10,000 FINE AFFIRMED FOR UNLICENSED OPERATION

The FCC has affirmed a $10,000 Forfeiture Order issued to Antonio Robinson for willful and repeated violation of section 301 of the Communications Act. The alleged violations involved Robinson's alleged operation of an unlicensed radio station on 105.5 MHz from his commercial suite in Miami, Florida.

Back on May 5th, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Robinson. Since that time Robinson has not filed a response to the Notice. Based on the information before us, the FCC has affirmed the forfeiture order and has given Robinson the customary 30 days to pay or to file an appeal. (FCC)

NAMES IN THE NEWS: VK4XJJ WALKING ACROSS AUSTRALIA OPERATING HF

Jeff Johnson VK4XJJ is walking across Australia to raise Money for a charity known as the Newborn Emergency Transport Service. At last reports, he is now roughly half way across the country and he is looking for contacts from stations in the west on 14.090 MHz Upper Sideband at 06:30 UTC. Jeff will also be found on 7.045 Lower Sideband at 07:30 UTC, Jeff then moves back to 14.090 at approximately 07:40 UTC. More is on the web at www dot jeffswalk2 dot com. (WIA News)

RADIO GEER: ANYONE NEED AN RCA FM BROADCAST TRANSMITTER

Anybody got a good home for an RCA FM broadcast transmitter? According to Radio World on-line, the box in question is a model BTF-40E FM transmitter that currently resides on Cougar Mountain near Seattle, Washington.

The BTF-40E is described as actually being a pair of model BTF-40E's using a combiner to produce about 33,000 watts total power out. And before you ask, no, we do not know if it can be converted for use on the two meter band. Besides which, the power put out by the driver stage would likely exceed the maximum that's legal on the ham radio bands. But, on the other hand, it could make a nice living room conversation piece for any ham whose X-Y-L would let it in the front door.

Bryan Jones of equipment dealer RF Specialties Group says one of his clients is about to dispose of it to make room for a new unit. He welcomes questions about it by e-mail to bryan (at) rfswa (dot) com. (RW)

EMERGING TECHNOLOGY: UK COMPANY BEGINS MANUFACTURING WHITE SPACE RADIO GEAR

A UK startup company called Neul has begun manufacturing a white space radio. This, despite the fact that there isn't a single country where such a unitwould be legal to use. At least not yet. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

Neul which was launched last year in the United Kingdom city of Cambridge has been talking about protocols and standards for use in the so-called white space where television broadcast frequencies are not being used locally. Now the company which is staffed by some of the UK's top radio developers has real product to sell.

The Neul unit offers connection speeds of up to 16Mb per second for organizations with proper experimental licenses that want to see what white space communications can offer them. And at least in the U-K such licenses are not hard to obtain. Neul says that British

telecommunications regulator Ofcom processed its application within a couple of weeks.

Now it's reported that within a couple of years such a license shouldn't be necessary in the U-K as Ofcom is poised to allow unlicensed exploitation of the nations white spaces. Unlicensed use will be technology neutral, just as 2.4GHz is now, so any networking system will have to contend with garage door openers, baby monitors and the like.

Ofcom says that white space units will be required to check with an online database to see what frequencies are available. It believes that this should prevent the more-trivial applications from bothering more important ones. None the less both regulators and equipment suppliers expect to see a wide variety of applications filling the bandwidth once it opens up in the next few years.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

While predictions for embedded, and networked, devices vary by tens of billions, but most observers agree that they'll be something in the region of 50 billion such devices looking for a network connection in the next few decades. (MN)

WORLDBEAT: DUTCH PARLIAMENT APPROVES RADIO NETHERLANDS WORLDWIDE CUTS

Some sad news for Shortwave listeners. The possible end to an era in shortwave broadcasting is here. This after the Dutch parliament votes against two motions which might have blunted the effect of the budget cuts facing Radio Netherlands Worldwide.

One of the proposals called for a separate debate devoted to the future of Radio Netherlands Worldwide. The other criticized the decision-making as hasty and called for a postponement.

Effectively, this vote means that the cabinet's plans to move Radio Netherlands Worldwide operations from control under the Education, Media and Culture Ministry to the Foreign Ministry. Also, to cut the budget from 46.3 million euros to 14 million.

According to the newsletter of the Asia-Pacific Broadcasting Union, the Dutch government wants Radio Netherlands Worldwide to focus on bringing independent information to people in countries without press freedom and to scrap its other functions of providing information for Dutch people living abroad and presenting a realistic image of the Netherlands to other countries. The newsletter said it's unclear how much of the rest of Radio Netherlands Worldwide's existing content can be continued.

Meantime, Radio Netherlands Worldwide station management will now have to draw up an employment cutback plan, which is expected to be completed sometime in October. (Media Network, RNW News, APU)

WORLDBEAT: VK REPEATER BLOWN OFF HILLTOP BY SEVERE WINDS

Australia's recent stormy weather has claimed another victim. The VK7RNE, north-eastern repeater located on Tower Hill, unexpectedly went off the air recently.

The cause was immediately apparent to the ground crew on its arrival at the scene. The shed that housed the repeater was found lying on its side, along with all its contents, some way down the mountain. It had literally been knocked off its foundation by the wind.

The radio equipment has been recovered but currently there are no plans at present to reinstate the repeater. This sad event thus brings about the close of a chapter in the repeater history of VK7.

The VK7RNE has long provided a useful service to that part of the state and was a tribute to Paul Godden, VK7KPG, and his small group that first installed and then maintained the facility over the years. Some members of the group are now silent keys. In recent years the annual Australian license fee has been underwritten by the North West Tasmanian Amateur Television Group. (WIA News)

ON THE AIR" BATTLE OF BRITAIN STATION BECOMES PERMANENT SPECIAL EVENT

On the air, keep an ear open for U-K special event station GB4BOB to be active from September 1st to the 20th to commemorate the World War Two Battle of Britain. After running this station as a one-off for the battles 70th anniversary, the Pontefract and District Amateur Radio Society has now decided to keep it as an annual event to remember those who fought in it. QSL's go direct to G0BPK or via the RSGB bureau. More is on the Pontefract and District Amateur Radio Society website at www.pdars.com (Southgate)

**

ON THE AIR: CELEBRATING THE FLIGHT OF LIBERTY BELL 7

Back on this side of thre Atlantic, the 50th Anniversary of the Flight of the Liberty Bell 7 spacecraft by astronaut Virgil I. "Gus" Grissom will be celebrated by the Hoosier Hills Ham Club. This, by activating special event station W9GUS on Saturday, July 23.

The station will be located in Spring Mill State Park at the Grissom Memorial near Mitchell Indiana. Operation will be 10 am to 4 pm Central U-S Daylight Savings Time with stations on 40, 20 and possibly 6 meters.

For those of you a bit to young to remember, Gus Grissom was one of the original NASA Project Mercury astronauts and a United States Air Force pilot. He was the second American to fly in space and the first astronaut to fly in space twice. Grissom along with fellow astronauts Ed White and Roger Chaffee died during a pre-launch test for the Apollo 1 mission at Cape Canaveral on January 27, 1967 when a spontaneous fire broke out in their command module.

More information about this commemorative operation of the Hoosier Hills Ham Club special event station W9GUS is on-line at www.w9qyq.org (WA9JHH)

**

DX

In DX, a group of German operators will be on the air from Ascension Island as Zed-D-8-D from July 24th through August 9th. These are the same dates as previously announced, but their location on the island has changed due to damage to their original planned site. Listen out for Zed-D-8-D operating from a guesthouse in Georgetown which the group says is not the most ideal location. This could handicap their operatrions on 160 and 80 meters. Updates are on-line at www.zd8d.de.

RW6AML will be on Waya Island, Fiji until July 17th. He will be active as 3D2ML on both CW and SSB. QSLs go to his home callsign.

IK5ASN will be active as 9A8ASN from the island of Cres through the 30th of July. He will be on 40 and 20 meters using only SSB, CW, RTTY and PSK31. QSL via IK5SAN, direct or preferably via the bureau.

DL8KX and DD8ZJ will be active as 9H3KX from Gozo Island between October 8th and the 14th. Their operation will be on the High Frequency bands using CW and SSB. QSL via DL8KX either direct or via by the bureau.

KF8UN, will be in Peru between July 22nd and August 16th. He plans to be active stroke OA4 and says that he plans to work 20 meters, devoting August 8th specifically to amateur radio. At other time he will be operating casually at all other times hes on the air. He also plans to be on mobile as time permits. QSL via his home callsign.

Lastly, SM1TDE, will be active stroke O-H-Zero from the Aland Islands group between July 21st and the 24th. Look for him around 2 kHz from the band edges on CW on 80 through 10 meters. This operations will be holiday style meaning he will be on the air only as time permits QSL via the bureau, and Logbook of the World.

Above from various DX news sources.

THAT FINAL ITEM: LOVE AND MARRIAGE AT FIELD DAY

And finally this week, the story of a romance that ended at a Field Day Wedding. From down-under, heres VK2BUI:

--

When you think about ARRL Field Day, a few things come to mind: food, radios, food, antennas, food and friends. And food. But one couple took things a little bit further when they got married at their Field Day site.

Kevin Shissler, K1FQ, and Debra Hubbard, N1FQ, love Field Day so much that they decided it was the perfect place to share their love for each other and for amateur radio.

Wearing their 2011 ARRL Field Day shirts, they tied the knot at the Field Day, swapping the 20 meter band for a band of gold.

And as an aside, In April 2010, N1FQ donated 60 percent of her liver to a co-worker Jan Watson. Now Jan -- a happy Jan
-- had her chance to return the favor. She officiated the wedding.

Amateur radio amour. Do we get bonus points for this?

Reporting the weird and wonderful, I'm John, VK2BUI.

--

Our best wishes to the newlywed couple for a long and happy life filled with the very best of DX. (ARRL, WIA)

SOUTH SUDAN IS NOW A NEW DXCC ENTITY AND A MEMBER OF THE UNITED NATION!
Three Special Press Releases

The following is from Paul, N6PSE, labeled - Press Release #5 -- DXpedition to the Republic of South Sudan):

On July 9th, the Republic of South Sudan was born upon their successful declaration of independence from Sudan. The Country of Sudan has congratulated and recognized the Republic of South Sudan.

Today, on July 14th, 2011, the United Nations admitted the Republic of South Sudan as the newest member state. This is a significant achievement for this new country and a significant milestone for amateur radio. It is expected that the ARRL will now add South Sudan to the DXCC list of entities.

The DX Friends and the Intrepid-DX Group continue to move forward with their plans to activate this new entity with a multi-national DXpedition team. With our visas in hand, the teams will soon be making their way towards Africa and ultimately to Juba, the new capitol of this new nation.

We will have five active stations, operating 24 hrs a day.

We will be in regular contact with our US, EU and JA Pilot Stations and we will pay close attention to propagation reports from them. We ask that you please make contact with the pilot stations only during the DXpedition and to please refrain from contacting the team members directly via email. We will announce our call sign once we are in Juba and ready to become active.

Our official website is http://www.dxfriends.com/SouthernSudan2011/

Thank you,
The Intrepid-DX Group and The DX Friends.

PRESS RELEASE From An ARRL Bulletin:

SB DX @ ARL $ARLD028
ARLD028 The Republic of South Sudan Is Now a DXCC Entity

ZCZC AE28
QST de W1AW
DX Bulletin 28 ARLD028
From ARRL Headquarters
Newington CT July 14, 2011
To all radio amateurs

SB DX ARL ARLD028
ARLD028 The Republic of South Sudan Is Now a DXCC Entity

At 10:18 AM (EDT) on Thursday, July 14, the UN General Assembly met to vote on whether or not to admit the Republic of South Sudan as its 193rd member state. The Republic of South Sudan was unanimously admitted and is now a member of the United Nations; a two-thirds majority is needed to become a member of the UN.

Immediately following the General Assembly meeting, the flag of the Republic of South Sudan flew for the first time in front of the UN, ceremoniously marking its membership in the UN.

Now that the Republic of South Sudan is a member of the United Nations, the new country is now a DXCC entity by way of Section II, 1(a) of the DXCC rules. The DXCC Desk will begin immediately accepting QSOs for this new entity, with a start date of July 14, 2011.

According to DXCC Manager Bill Moore, NC1L, the Honor Roll numbers move from 340 to 341 for the Top of the Honor Roll, and for Honor Roll it becomes 332. "The deadline for the Honor Roll and annual listings is December 31, so you must submit the new entity to DXCC by then in order to retain your Honor Roll status," Moore explained.

"For Logbook of The World (LoTW), you may submit all your QSOs with the Republic of South Sudan stations anytime. There is no need to hold them out of your log or do anything differently from what you already have been doing. You do not need to assign country names or identifiers. After we issue certificates to the Republic of South Sudan license holders, LoTW will make matches and assign the correct entities automatically."

As of July 14, the International Telecommunication Union (ITU) has not announced a prefix block for the Republic of South Sudan.

Press Release from Rich Moseson, W2VU, Editor of CQ Communications,
Inc./ 25 Newbridge Rd. / Hicksville, NY USA 11801
Phone: 516-681-2922 / Fax: 516-681-2929 / Web: www.cq-amateur-radio.com

NEWS RELEASE
South Sudan Added to CQ DX Countries List (Hicksville, NY July 14, 2011)
- The Republic of South Sudan is the newest addition to the CQ DX Award Countries List, CQ DX Awards Manager Billy Williams, N4UF, announced today. It is #342. Verifications confirming contacts after July 14, 2011 (the date of its admission to the United Nations) are acceptable for credit. No award credit is available for southern Sudan contacts made during the 1980s and 90s.

The new addition will be reflected in CQ DX Honor Roll totals to be compiled near the end of September. The July listings will not include the new addition and will be based on 341 active countries. (See paragraphs 21 through 24 on the CQ DX web page at:
http://home.earthlink.net/~bfwillia/page3.html
Note in paragraph 24 that "the Award Manager will allow at least 30 days between the date of his announcement and any Honor Roll revisions that reflect the new maximum count.")

Verifications may be checked by a CQ Checkpoint or sent to the Award Manager. Include return postage or SASE with updates if you send cards or desire a reply. Updates are accepted only via postal mail.

The CQ DX Award Countries List contains 342 entities including Kosova. Endorsement stickers for 340 are not yet available. When stickers are available, an announcement will be posted on the CQ DX web page (see URL above). As of this time, the International Telecommunication Union has not yet issued a callsign prefix block for South Sudan.

For purposes of the CQ DX Field Award, most of South Sudan is in field KJ; small northern portions (above 10 degrees north latitude) are in field KK. More information on the CQ DX Field Award is available at
<http://www.cq-amateur-radio.com/cq_awards/cq_dx_awards/cq_dx_field_award/cq_dx_field_award.html>
and at <http://home.earthlink.net/~bfwillia/gridfield.html#CQ DX FIELD AWARD RULES>.

In addition, South Sudan will count as a country (entity) multiplier for the CQ DX Marathon, the CQ World Wide DX Contest and any other CQ contests that use country multipliers.

GB2RS NEWS

Sunday 17th July 2011

The news headlines:

* Results of RSGB Survey released

* Error found in Ofcom licensing system

* Dutch to get 500kHz and 70MHz bands

>From October to December last year the RSGB ran a major online survey of amateur radio enthusiasts. The intention was to capture the current state of the hobby and how it might develop over the next decade or so. The analysis of the survey has been completed and has turned up some interesting results. The detailed findings have now been published and can be downloaded from the RSGB website at www.rsgb.org/survey/analysis. A short article will appear in the August RadCom that puts the results in context.

An error has been discovered in the Ofcom licensing system that appeared to allow the reissue of callsigns. This is being investigated by Ofcom and will be corrected as soon as possible. Any incorrect callsigns issued will be revoked and replaced with a callsign of the correct series.

A recent change of the National Allocation Table in the Netherlands shows that Dutch amateurs will get a secondary allocation from 501-505kHz until 1 January 2014 and a secondary allocation from 70.0-70.5MHz. The allocations will not start until an update is made of certain frequency control legislation.

As preparations for the Olympics gather pace, Airwave has announced that its specialist TETRA Network, Apollo, is ready to provide voice communications in the London area. This uses UHF spectrum that is separate from the amateur 70cm allocation, however the scale of the games is such that additional spectrum may still be needed from the 70cm band on a temporary basis. Further to previous announcements, testing will occur in the Weymouth and Portland area between Wednesday 20 July and Saturday 13 August. These are expected to take the form of spot frequency transmissions in the range 431 to 432MHz and one near 436MHz, plus telemetry channels at 432.65, 432.85, 433.65 and 433.85MHz. All amateurs are requested to respect these tests and not interfere with them. Further information can be found on the RSGB website at www.rsgb.org/olympics.

The lecture programme for the RSGB Convention in October is nearly full. 60 of the 65 lecture slots have been filled and a new provisional lecture timetable has been uploaded to the Convention website, www.rsgb.org/rsgbconvention.

A new free sample edition of RadCom is now available to read online or download from the RSGB website. The sample RadCom is available in digital magazine format for reading online, which requires a Flash plug- in to your browser. For those who would like to save the magazine to their computer, or do not have Flash installed, a 24 megabyte PDF version is available. The sample is the March 2011 edition. Crystal Palace Radio & Electronics Club is starting a new Foundation course. It will take place on four Saturday mornings, commencing on 24 September and ending with the exam on 22 October. Contact Bob on 01737 552170 or email g3oou@aol.com for more information or to join the course.

Production company The Garden is inviting people to get involved in a new TV programme for Channel 4. They are looking for people with a wide variety of skills and voices to form a group to help someone at a crossroads in their life. They said that a radio amateur might be an interesting person to add to the mix. To find out more please call Tom Wilde on 0203 465 9079 or email takepart@thegardenproductions.tv. Filming will take place for a week in August.

The French radio club Provin, F6KOP is known for activations like TJ9PF, J5C, XT2C and many others. Its premises were recently burgled and all of its equipment was stolen. Unfortunately, the club's insurance did not cover the theft. A list of stolen equipment, including serial numbers, is on the club website at www.f6kop.com. Click on the flashing word HOT! to see the list.

And now for the details of rallies and events for the coming week

The McMichael Rally and Boot Sale takes place today, 17 July, at Reading Rugby Club, just off the A4 east of Reading. There is free car parking and admission is £2. Traders and special interest groups will be in attendance and a car boot sale area is available. The gates open at 9.30am. Details from Pete, G8FRC on 01189 695697.

Also today is QRP in Country at Upton Bridge Farm, Long Sutton, Langport TA10 9NJ. The Bath Buildathon team, led by Steve Hartley, G0FUW, will be supervising construction and George Dobbs, G3RJV will be attending and commenting on a Show & Tell display, so please bring along lots of homebrew things for all to see. Rob Mannion, G3XFD, Editor of PW, the RSGB and other QRP personalities will be there. Entry is free and details can be found at www.walfordelectronics.co.uk.

Bletchley Park is today celebrating the important contribution made by three Polish mathematicians for their work on breaking the Enigma codes. As part of the annual Polish Day celebrations, Bletchley Park will also be remembering other Polish contributions and involvement in World War II. The day will include Polish dancing, food and displays, themed talks and a Spitfire fly-past by the Battle of Britain Memorial

Flight.

Northumbria Amateur Radio Club is holding a Bring and Buy sale on Saturday 23 July, starting at 10am. Everyone is very welcome to come along. To sell items, please forward details to the club secretary Roy, G0AXJ, by email to roymccluskey@hotmail.co.uk, or telephone 0741 2659 150, as soon as possible. For full details please visit the NARC website, www.g4aax.org.uk, where you will find appropriate links associated with this event.

Now for the news of special events

Today, 17 July, Pontefract & District Amateur Radio Society is on its second and final day operating GB1AVR for Ackworth Vintage Rally. The site is at Watertower Field, Ackworth.

GB6MMR will be on the air today from the McMichael Mobile Rally near Reading. Operation is on 2m and 70cm. From 20 until 24 July GB4WP will be operating from the War and Peace Show at The Hop Farm, Paddock Wood, Kent. Activity will be from Top Band to 2m.

And now the HF DX news compiled from 425 DX News and other sources

>From 24 July to 2 August an international team of operators will be QRV from Lord Howe Island, IOTA OC- 004, on all bands from 6 to 160m. This includes the RSGB IOTA contest on 30 and 31 July. The callsign to listen for is VK9HR. All details can be found at www.vk9hr.com and you can see equipment preparations in progress by searching for VK9HR on youtube.com. All team members are linked to the Hellenic Amateur Radio Association of Australia.

Dave, ZR6DG will be active as C92DG from Tofo in Mozambique until 28 July. His plans are to do two DX sessions a day along with Helge, ZS6HB. QSL via ZR6DG.

Look for Stefan, DF8HS/P to be active from Fehmarn Island, which is IOTA reference EU-128, until 29 July. QSL via home call, bureau preferred.

Eric, SM1TDE will be active holiday style as OH0/SM1TDE from Eckero, Aland Islands, which is IOTA reference EU-002, from 21 to 24 July. QSL via the bureau and Logbook of The World.

Now the contest news

Today, Sunday 17 July sees the Low Power Contest taking place from 0900 to 1600UTC. Using the 3.7 and 7MHz bands, CW only, the exchange is signal report, serial number and power. Also today, from 1000 to 1600UTC is the 70MHz trophy. Using all modes the exchange is signal report, serial number and locator.

The UHF UK Activity Contest takes place on Tuesday 19 July from 1900 to 2130UTC. Operating on the 23cm band using all modes, signal report, serial number and locator form the exchange.

On Thursday 21 July from 1900 to 2030UTC it's the RSGB 80m Club Championships. Using data modes only on the 80m band, the exchange is signal report and serial number.

Next Sunday, 24 July, is the WAB QRO 2m phone contest, which runs from 1000 until 1400UTC. Using all modes on the 2m band, the exchange is signal report, serial number and WAB square.

And now the solar factual data for the period from the 4th to the 10th of July, compiled by Neil Clarke, G0CAS on the 11th of July.

The solar disc had sunspot groups visible every day with up to five groups on the 8th. Solar activity was very low except for the 7th when a single C class solar flare took place. Then during a six hour period on the 8th, as a group emerged, four C class solar flares took place. Solar flux levels varied little and averaged 86 units, but on the 10th increased to 91. The 90 day solar flux average on the 10th was 99 units. That's one unit down on last week. X-ray flux levels averaged B1.2 units and showed little variation day to day. Geomagnetic activity was just unsettled on most days for one reason or another, first a glancing blow from a coronal mass ejection on the 4th and the 5th and then a coronal hole disturbance on the 9th and the 10th. The 7th was the quietest day with an Ap index of 6 units. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 330 and 540 kilometres per second. Particle densities increased to 22 particles per cubic centimetre on the 8th and the 9th. The remaining days were low. Bz varied between minus 4 and plus 3 nanoTeslas on the quietest day and between minus 9 and plus 10 nanoTeslas during the disturbances.

And now the solar forecast. This week solar activity is expected to be at very low levels but could increase on some days. Solar activity should be around the 90 mark for most of the week. Geomagnetic activity should be quiet for at least the next couple of days before a recurring coronal hole disturbance arrives and when it does it will last till the weekend. The disturbance should not be too strong; the Ap index should be in the teens during the second half of the week. MUFs during daylight hours at equal latitudes should be around 20MHz for the south and 17MHz for the north. Darkness hour lows are expected to be about 13MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. Paths going directly over the equator will not be effected by the coronal hole disturbance and the best time to try this path will be between 1100 and 1600 hours. Sporadic-E is expected to take place most days on the lower VHF bands but the chance of an opening up to 144MHz is now becoming less likely as the peak of the season as now passed. A new solar activity near real time service has been launched on Twitter by G0CAS. It can be found by searching on Twitter for spots and flares, that's without the spaces.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 17 July Hinckley Amateur Radio Society is taking part in the low power field day. Details from John, M0JAV, on 07836 731544.

On Monday 18 July Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 18 July Lincoln Short-Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788356.

On Monday 18 July South Birmingham Radio Society is having an open meeting with the shack on the air. Contact Don, on 0121 458 1603.

On Monday 18 July South Normanton Alfreton & District Amateur Radio Club is holding a junk sale. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 18 July Welland Valley Amateur Radio Society is having a DF Hunt and barbecue at Rupert's Viewpoint. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 19 July Derby & District Amateur Radio Society is having a talk and demo on the High Performance Software Defined Radio by Steve Haseldine, G8EBM. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 19 July Loughborough & District Amateur Radio Club is holding a 2m DF hunt. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 20 July Bolsover Amateur Radio Society is on the air. Contact Alvey Street, G4KSY, on 01246 827135.

On Wednesday 20 July Lincoln Short-Wave Club is holding a formal meeting. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 20 July Midland Amateur Radio Society is looking at laptop computers and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 20 July Telford & District Amateur Radio Society is learning to build and fly kites at the LWVH field, or will be holding a quiz if the weather is inclement. Contact Mike, G3JKX, on 01952 299

677. On Thursday 21 July Cheltenham Amateur Radio Association is having a talk on the PIC-a-STAR project by G3LVP. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 21 July Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 21 July South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 22 July Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777363.

On Friday 22 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 23 July Lincoln Short-Wave Club is in the shack and putting GB2CWP East Kirkby on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Sunday 17 July Hornsea Amateur Radio Club is participating in the Low Power Contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 18 July Angel of the North Amateur Radio Club is having a talk on RAYNET by Geoff Darby. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 18 July Sheffield Amateur Radio Club is having a portable evening at Whitely Woods and the club fields plus a barbecue at club HQ. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 18 July Thornton Cleveleys Amateur Radio Society is holding a barbecue at John, G4FRK's. Details on the web at www.tcars.org.uk.

On Tuesday 19 July Chester & District Amateur Radio Society is holding a surplus sale. Details from Barbara Green on 07957 870770.

On Tuesday 19 July Halifax & District Amateur Radio Society is operating /P from Lower Wyke starting about 6.45 BST. Participants are invited to bring their own transmitters and aerials although there will be some club equipment available. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 20 July Hornsea Amateur Radio Club is running a fox hunt with Richard, G4YTV. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 20 July Wakefield & District Radio Society continues its Foundation and Advanced licence courses from 13:30. Details from David, G4CLI, on 07748 221855.

On Thursday 21 July Hornsea Amateur Radio Club is taking part in the 80m Data Club Contest. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Thursday 21 July Ripon & District Amateur Radio Society is

on the air and having a club night. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 21 July South Manchester Radio and Computer Club is having a talk on simple electronic test equipment Ged G8RSI. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 21 July Wakefield & District Radio Society having a debrief on the Holy Island DXpedition. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 22 July East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 23 July Denby Dale Radio Club commences its weekend special event station GB200HNC for the Huddersfield Narrow Canal bicentenary celebrations at Tunnel End, Marsden. Details from Richard, M0RBG, on 07976 220126.

On Saturday 23 July Wakefield & District Radio Society continues its Foundation and Advanced licence courses from 13:30. Details from David, G4CLI, on 07748 221855.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 19 July Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Thursday 21 July Aberdeen Amateur Radio Society is closed. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 17 July Chesham & District Amateur Radio Society is at the McMichael Car Boot Sale. More details from Terry, G0VFW, on 01442 831 491.

On Sunday 17 July Lowestoft & District PYE Amateur Radio Club is taking part in the RSGB Low Power Field Day. Details from Lee, 2E1LJL, on 01502 564242.

On Sunday 17 July Newbury & District Amateur Radio Society is participating in the Low Power Contest. For more information contact Rob, G3LMW, on 01635 862737. On Sunday 17 July Norfolk Amateur Radio Club Radio is by the seaside at West Runton for Low Power Field Day and an informal family day out in a beautiful part of Norfolk. Details from Chris Danby, G0DWV, on 01603 898678.

On Sunday 17 July Reading & District Amateur Radio Club is running the McMichael Radio Rally at Reading Rugby Club, Sonning. Details are on the web at www.radarc.org.

On Sunday 17 July South Essex Amateur Radio Society is operating field station G4RXE at Canvey Railway and Model Engineering Club. Contact

Norman, M0FZW, on 01268 692776.

On Monday 18 July Braintree & District Amateur Radio Society is operating on 6 or 10m. For more information contact John, M5AJB, on 01787 460 947.

On Monday 18 July Burnham Beeches Radio Club is having a talk on the RSGB by Regional Manager Alison, G8ROG. Contact Dave, G4XDU, on 01628 625 720.

On Monday 18 July Surrey Radio Contact Club is having a fix-it, advice, chin wag and move-it-on evening. Contact John, G3MCX, on 020 8688 3322.

On Tuesday 19 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 19 July Bromley & District Amateur Radio Society is having a practical operating evening. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 19 July Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 19 July Verulam Amateur Radio Club is having a club night and looking at data modes, radio to PC connection and CAT with Peter, G4HSO. Details from Tony, 2EOWAP, on 01727 853087.

On Wednesday 20 July Chesham & District Amateur Radio Society is having a presentation on operating procedures by Jeremy, G3XZG. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 20 July Havering & District Amateur Radio Club is having an informal evening and Morse Class with Peter, G3JSR. More information from John, M0UKD, on 07890 222111.

On Wednesday 20 July Norfolk Amateur Radio Club is having a talk on the DX Cluster GB7RDX and bulletin board service GB7LDI by Roger Cooke, G3LDI. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 20 July Worthing & District Amateur Radio Club is having a vintage equipment bring, show and tell evening. Contact Phil, G4UDU, on 01903 816684.

On Thursday 21 July Colchester Radio Amateurs Club is having an equipment night. More information from Kevan, 2E0WMG, on 07766 543784.

On Thursday 21 July Cray Valley Radio Society is holding its summer social from 8pm at The Bull, Shooters Hill. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 21 July Horndean & District Amateur Radio Club is having a talk on St Helena by Mrs Matthews. Contact Stuart, G0FYX, on 023 9247 2846. On Thursday 21 July Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 21 July Norfolk Amateur Radio Club is taking part in the RSGB Club Data Contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Friday 22 July Cambridge & District Amateur Radio Club is watching "PYE, how we began" and "The wonder Jet". Contact Ron, G3KBR, on 01223 501712.

On Friday 22 July Mid-Sussex Amateur Radio Society is having the Chairman's barbecue at G6YPYs QTH. Contact Peter, G4AKG, on 01444 239371.

On Friday 22 July Radio Society of Harrow is having a talk. More information from Linda, G7RJL, on 0208 386 8586.

On Saturday 23 July Hastings Electronics and Radio Club is at the Pevensey boot sale with SARS. Details from Gordon, on 01424 431 909.

On Saturday 23 July Newbury & District Amateur Radio Society is having a club barbecue. For more information contact Rob, G3LMW, on 01635 862737.

NEWS FOR THE SOUTH WEST On Sunday 17 July Bristol RSGB Group is attending QRP in the Country at G3PCJ's, Long Sutton, Langport. Details from Robin, G3TKF, on 01225 420442.

SARL NEWS - SUNDAY 17 JULY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SAARDT MAKES 5 RAE BURSARIES AVAILABLE

FURTHER ARISSAT-1 LAUNCH DELAY

PRESIDENT'S NET TO DISCUSS IARU MOTIONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SAARDT MAKES 5 RAE BURSARIES AVAILABLE

The South African Amateur Radio Development Trust is making bursaries available for students under 25 who are planning to write the October 2011 Class A Radio Amateur Examination. Through the generous sponsorship of the Tony Reumerman, ZS6AOG, family, the Trust is able to offer five bursaries. The bursary includes the examination fee, SARL student membership subscription for one year and tuition fee of R640. The total bursary amount is R1000.

The closing date for applications is 31 July 2011 For more details and an application form go to www.amateurradio.org.za/bursaries.htm.

FURTHER ARISSAT-1 LAUNCH DELAY

The orbiting of ARISSat One has been delayed for a few weeks. According to ARISSat One Project Manager Gould Smith, WA4SXM, the former Suit-Sat will not make an appearance in space until sometime in August.

In a news release, Smith said he and ARISS Hardware Engineer Lou McFadin, W5DID, participated in a teleconference call this week with NASA to review the Roscosmos spacewalk procedures for the release of

ARISSat One during E-V-A 29. For those who never heard the term before, E-V-A is an acronym for Extra Vehicular Activity and is NASA-ese for describing a spacewalk.

Smith now says the discussion centered on preparation procedures including the battery being charged and assembled into the satellite. Also discussed were the procedures to remove the protective quilts from the solar cells and turning on the safety switches prior to deployment.

During a later teleconference Sergey Samburov, RV3DR, announced that the ARISSat One battery will be charged in late July and a test of the system will be conducted from the ISS from 30 July at 19:15 to about 12:00 or 14:00 UTC July 31. The standard ARISSat One 2 metre downlink band plan should be transmitted as well as the FM signal also down linked on 437,55 MHz.

PRESIDENT'S NET TO DISCUSS IARU MOTIONS

A President's Net will be held on Sunday 24 July from 19:30 to brief the SARL delegates on the motions on the IARU Region 1 Conference Agenda. The motions can be downloaded from www.iaru2011.org.za. The motions cover a wide range of issues affecting amateur radio. The SARL would like your input. Join us next Sunday for the discussion.

NEW AFRICAN COUNTRY

On Thursday, 14 July the UN General Assembly admitted the Republic of South Sudan as its 193rd member state. Immediately following the General Assembly meeting, the flag of the Republic of South Sudan flew for the first time in front of the UN.

Now that the Republic of South Sudan is a member of the United Nations, the new country is now a DXCC entity. However the ITU has not confirmed the new country's callsign prefix.

BARK 40 METRE SUNDAY WINTER WARMER

The Boland Amateur Radio Club will be holding its 40 metre sprint contest on Sunday 24 July from 15:00 - 18:00 CAT. This is a fun activity to promote contacts on 40 metres between radio amateurs in Southern African countries. It is also an ideal opportunity for Mobile stations, Field stations and RaDAR stations to participate. For more information go to page 60 of the SARL "Blue book" available on the SARL web. The full URL is available on the web version of SARL News

(Do not read the url only for web version of SARL News)
http://www.sarl.org.za/public/contests/SARL_2011_Contest%20Manual_issue_9.pdf SARL MEMBERSHIP RENEWAL

With just two weeks into the new financial year, over 50% of members have renewed their membership. Invoices were mailed some time ago. If you have not yet responded with your payment please do so as soon as possible. Your support of the SARL as the national body is important for the future of amateur radio. Thank you for your support. When

making bank transfers or electronic payments, please add your name and callsign so that the office can identify your payment.

SARL WEB REMAINS A CHALLENGE

The SARL Web remains a challenge. While the new hosting company is sorting out some of the code and scripting issues, Imaginet will be moving the website to another server on Monday. For the past few weeks the web had to be reset several times a day. Expect disruption on Monday morning.

At this stage it looks if we will have a mirror site running in the next few days when all functionalities will be tested. The website is a priority for the SARL but before making the final move we want to make sure that every aspect works. Some of the uncalled for remarks on the forum will not change the process that we have to follow to ensure that we do not repeat the problems of the past.

CLUB NEWS

The Centurion Radio Amateur Club held a very successful Annual General Meeting on Saturday 9th July 2011 at the Scout Hall in Wierda Park. The following members were elected to the club's new committee:

Chairman: Pam Momberg, ZS6APT; Vice Chairman: James du Toit, ZS6JDT; Secretary: Billy Strumpher, ZS6WPS; Treasurer: Pam Momberg, ZS6APT; Ordinary Committee members: Repeater - Pieter du Toit, ZS6PZ; Technical Training - Rian Venter, ZS6RXY; Technical Forums - Pine Pienaar, ZS6GST; RAE Training/Events - John Longland, ZS6AA; Additional member - Ben Booysen, ZS6BTB.

Thanks to the outgoing committee and chairman for their good work during 2010-2011 and best wishes and strength to the new committee.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at very low to low levels. The parade of small sunspots continue with another new region forming to the southeast of 1 251 in the northern hemisphere. Solar activity does remain at very low levels however and there remains a chance for a C-Class flare. None of the current regions are magnetically complex.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be less than 35.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m. There is a chance of 15 m openings to South America.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 24 July - Boland Amateur Radio Club 40 metre sprint contest 15:00 - 18:00

CAT. 24 July - President's Net at 19:30 CAT. 27 July - 4th leg of SARL Club Competition. 30 July - RTA in Durban. 07 Aug. - SARL HF Phone Competition. 09 Aug. - SARL YL Sprint. 21 Aug. - 3rd leg of SARL Digital Competition. 28 Aug. - SARL HF CW Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

>From the Business Manager, Debby ZL2DL

Debby says.

Correction - I must apologise for placing the wrong date in the special issue of HQ Info-line last week for Jamie Pye. He passed away on 2nd July 2011, not June as reported.

SMART

Having recently been questioned by some amateurs regarding silent key and expired call signs, still viewable in SMART, Warren ZL2AJ my deputy ARX made some enquiries with RSM on what the problem is.their response is below:

"RSM is working on the problem of expired amateur callsigns appearing in the SMART database and plan to complete this work over the next few weeks."

Regards

Jeff Hicks

Speaking of SMART, I have been going through the usual annual financial statements and removing those who have not paid their 2011 subscriptions and I notice that one in two new amateurs, who take the offer of a free NZART membership for one year, do not renew the following year. This may be due to financial constraints, so please advise them that an easy monthly payment option of $8.00 can be set up to ensure they continue to remain members.

I urge all branches to encourage these new members to re-join, both for the sake of the Association and for all the hard work, you as branches put in, to get them to pass their examination.

Subscriptions for 2012 out soon

The annual invoice for your 2012 subscription will be included in your August Break In. The cost of subscriptions this year is $95 for transmitting members and $125 for family transmitting/non-transmitting.

If you pay your subscription by the end of November 2011, your membership number will go in a draw to win an Icom VHF Hand Held radio.

HQ Info-line material

As earlier notified, if you are a regular contributor to HQ Info-line, can you please now forward your articles to me at nzart.hq@clear.net.nz, preferably in word format as I am not able to covert pdf files.

Jamie has done a sterling job keeping this regular media update available to members, and as the new temporary (?) editor, I would hate to be the one who cannot pass on all important information because I do not receive it.

That's all from me.Debby ZL2DL

****

Message from the President - ZL2KH

There is still a casual vacancy on NZART Council for a councillor for the Midlands District. This vacancy will be filled at the on-air council meeting on 2nd August.
Would any NZART member who is willing to fill this vacancy please send me their details plus a brief CV outlining their qualities that would make them a good councillor before 20th July. Please send the details to: zl2kh@xtra.co.nz <javascript:press_email('zl2kh@xtra.co.nz')>

****

World Scout Jamboree - SJ22S

Amateur radio stations have been set up at each World Scout Jamboree since 1957. They provide live-links from the Jamboree to the home countries of the participants over short-wave radio as well as being interesting stations for other amateurs to contact.

>From 27 July till 7 August 2011, the 22nd World Scout Jamboree at Rinkaby in Sweden will be on the air with call sign SJ22S (Scout Jamboree No 22 Sweden). This is a special event call sign.

The station will offer an exciting radio-scouting programme including kit building and fox hunting to the Jamboree participants.

Jim, ZL2APE, who is the NZ National Organiser for the Scout Jamborees on the Air, will be one of the station operators

Google "SJ22S", and go first to the QRZ listing for details of frequencies etc.

Thanks,

Jim Parnell, ZL2APE

Interview with Vaughan ZL1TGC

An interview on National Radio with Vaughan (ZL1TGC) was mentioned on the Auckland VHF group tonight and given an excellent

review. I have a copy, but haven't listened to more than the opening section, but I thought it would be good to mention (link to) on

the NZART web site.

The link to the mp3 file is
http://podcast.radionz.co.nz/ngts/ngts-20110708-2007-community_radio_in_auckland-048.mp3

With info on the item at

FMTAG NOTES

CALL BOOK

Preparations are being made for the 2011-2012 Call Book.

Towards the end of July, FMTAG will be contacting each repeater-beacon-link-owning Branch, asking for up-to-date details on its

equipment and repeater trustees, to ensure that the 2011-2012 Call Book is the best ever.

Many thanks for your assistance.

PROPOSALS

That 146.600 MHz be added to the NZART Bandplan for P25 Simplex.

Branch 63 Upper Hutt has applied to add the D-STAR DV digital mode to, and change the location of, its Mount Climie 5425 repeater. The new location will be Topo50 map reference BP32 798.83 423.94. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 145.425 MHz and the receive frequency can remain on 144.825 MHz, and that there will be no interference to other stations.

Branch 66 Auckland VHF has applied for a D-STAR DV digital mode repeater at Klondyke, Topo50 map reference BC32 602.01 641.50. The repeater's transmit frequency will be 145.650 MHz and the receive frequency will be 145.050 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.

FINAL RECOMMENDATIONS

NZART Council, at its 5th of July 2011 meeting, approved the following application:

Branch 53 Te Puke has applied for an APRS Digipeater at Shaw Road, Topo50 map reference BE37 870.20 014.96. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

****

FROM THE VHF/UHF/SHF CONTEST MANAGER

Results of the Hibernation Contest, held on 11th and 12th of June, 2011.

Congratulations to the overall winner: Simon, ZL1SWW, and to Stephen, ZL1TPH, in second place. The full results will be available shortly at:

www.vhf.org.nz

THE NEXT CONTEST

The next contest is the Brass Monkey Contest, 50 MHz and up, on Saturday the 6th and Sunday the 7th of August 2011. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz with Contest Log in the subject line, or by post to:

Contest Manager

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, WO2N, NG3K & ADXO, N4AA & QRZ DX, N4JF, K6GEP, KH6BZF, K8YSE, W8GEX (60m News), WB8YJF, AT International, DL1SBF, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, E51JD, F6AJA & Les Nouvelles DX, F6FQK, HP1AC, I1JQJ/IK1ADH & 425 DX News, IZ3EBA, OE1WHC, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PT2OP, RSGB IOTA Web Site, TA1HZ, UT7CL, VA3RJ & ICPO, VE7DP, VHF-DX-Portal (MMMonVHF) and ZL2TZE for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-July, through Sunday, 17th-July there were 211 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5Z, KENYA. Sig, NV7E, is active as 5Z4EE from Nairobi, and has announced that he will be in the CQWW DX SSB Contest (October 29-30th) and the ARRL DX SSB Contest (March 3-4th, 2012) as a Single-Op/All-Band/High-Power entry. QSL via NV7E, by the W7 Bureau or direct using the address on QRZ.com (see details). He DOES NOT use LoTW.

9Y, TRINIDAD AND TOBAGO. Jim, N6TJ, will be active as 9Y4W from Scarborough, Tobago Island (SA-009, WLOTA 0412), during the CQWW DX CW Contest (November 26-27th) as a Single-Op entry. QSL via DL4MDO, direct or by the Bureau.

E5, SOUTH COOK ISLANDS (Airmail Deliveries To The Islands). Jim, E51JD, from Rarotonga Island sent the following to OPDX about the airmail he receives (edited): "To The Editor -- For some time I have been intrigued at how long it takes airmail to reach my mail box, particularly some of the mail posted in USA, and I decided to record details of QSL mail received between 11 and 27 June 2011. Mail from Italy, UK, Slovenia, Spain, Czech Republic, France, Greece, Germany & Ukraine took two to three weeks from date of mailing compared to that from USA which with two exceptions took at least a month and in most cases a number of months to reach me. Some examples include that posted in Greer, SC, on 11th Feb. & Gilbert, AZ, on 13th Oct. 2010 received on 11th June, that posted in Melbourne, FL, on 10th Oct. 2010 received on 20th June together with mail posted in Melrose, FL, on 29th March and Pacifica, CA, on 25th March. Mail received on 30th June included one posted in San Jose, CA, on 15th November 2010 and others posted in Bakersfield, CA, on 14th April, Melrose, FL, on 21 March, Austin, TX, on 5th February and Wichita Kansas on 31st March. The mail I picked up on 27 June included one mailed in Springfield, LA, on 29th March.
Apart from the occasional public holiday our post office is open Monday to Friday and my mail box is cleared daily - I have not listed the U.S. mail which took less than two months to reach me.
This is hardly DX news but I thought that I should try to get the information out to operators who may have been waiting some months to receive a response to QSL cards. Personally I am not worried as I do not chase the cards, but any card I receive which includes the addressed envelope and return postage is replied to.
In the hope of getting maximum coverage I have sent this message to two other DX Newsletters.
Thanks and 73s
Jim E51JD
JIM DITCHBURN
P O BOX 491
RAROTONGA
COOK ISLANDS"

FG, GUADELOUPE. Members of the Radio Club Guadeloupe (FG5KC) will be active as FG5KC/P from Isle of Saints (NA-114) during the RSGB IOTA Contest (July 30-31st). Operators mentioned are Isaac/FG0NC, Daniel/FG1JS, Philippe/FG1DD, Jules/FG1JD and Marie-Berthe/SWL F-97120. QSL via FG5KC, direct or by the Bureau or eQSL. Visit Radio Club Guadeloupe's Web page at: http://fg5kc.voila.net

IOTA NEWS.....
AS-080. Members of the Korea Contest Club (KCC) will be active as D93I from Anmyon Island during the RSGB IOTA Contest (July 30-31st). Operators mentioned are Seung/DS4NYE, Jeong/DS1OYR, Jeon/DS1EVQ, Han/DS2GOO, Cho/DS3MLG, Lee/DS4NMJ, Kim/HL1OYF

and Han/HL1VAU. QSL via DS4NYE direct or LoTW.

EU-030. Axel, OZ7VEA, will be active from Bornholm Island between July 24th and August 5th. His activity will also include the RSGB IOTA Contest (July 30-31st) as a Single-Op/SSB-Only/ 12-Hrs entry. QSL via the Bureau. For more details, see his Blog at: http://oz7vea2011.blogspot.com

EU-042. Peter, DC1HPS, will be active as homecall/p from Pellworm Island (DID N-23, WLOTA 1188) during the RSGB IOTA Contest (July 29-31st). Outside of the contest activity will be on the HF bands with a focus on the Digital modes. For more information, see: http://www.qrz.com/db/DC1HPS

EU-073. Members of the Associazione Radioamatori Marina Italiani Sezione di Taranto (A.R.M.I) and 599 DX Team will be active as IJ7DX from San Pietro Island between August 18-21st. Activity will be on the HF bands and 6 meters using CW, SSB and the Digital modes. QSL via IZ7LDC. For more details, visit their Web page at: http://www.armi.ta.it/ij7dx

EU-091. Members of the Centro Italiano Sperimentazione Attivit&#65533; Radioantist Sezione di TARANTO (C.I.S.A.R.) will be active as IQ7HK from Isola Grande during the RSGB IOTA Contest (July 30-31st) as a Multi-Op entry. QSL via IK7FPX direct only. Operators mentioned are Gilberto/IK7LMX, Giancarlo/IK7QMJ, Michele/IK7FPX, Angelo/IZ7CTE, IZ7CEG, Vincenzo/I7PXV, Casear/ IK7XNF, IK7SIA and IZ7MND.

EU-097. Ian, G4FSU, will be active as OH/G4FSU from Emsalo Island between now and August 10th. His activity will also include the RSGB IOTA Contest (July 30-31st). QSL via his home callsign.

EU-131. Members of the Extreme DX & Contest Group will be active as IL3A from La Certosa Island (IIA VE-018), Saturday, July 23rd, weather permitting. Activity will be on 20 and 40 meters. QSL via IK3HHX, by the Bureau or direct. For more details, see QRZ.com or <www.extremegroup.org>.

EU-136. Lang, S57UN, will be active as 9A/S57UN from Rab Island during the RSGB IOTA Contest (July 30-31st) as a Single-Op/All-Band/ Low-Power entry. QSL via his home callsign.

EU-146. Operators Francois/ON4LO, Eddy/ON4CCK, Walter/ON8CW, Beni/ ON3BL and Erik/ON4CCV will be active as PA/ON4LO/P from Schouwen Duiveland between July 22-24th. Activity will be on 80-10 meters using SSB and the Digital modes. QSL via ON4LO, by the Bureau or direct.

EU-179. Operators Alexey/UR5GDX, Ivan/UR8GX, Nick/UR3GO, Leo/UT7CL and Roman/UR3CJR will activate Kalanchakskiye Islands between July 26th and August 3rd. Callsign will be homecall/p. Activity

will be on 80-10 meters using CW and SSB. QSL via UR8GX. Visit
their Web page at: http://ur5gdx.at.ua/index/iota_expedition/0-12

NA-067. Jon, WB8YJF, will be active again as WB8YJF/4 from Ocracoke
Island (NC-001S, Hyde County, NC) between July 24-31st.
Activity will be on 80-10 meters using CW, RTTY and SSB.
He will also be active in the RSGB IOTA Contest (July 30-31st).
Please QSL direct via the address on QRZ.com for a fast reply.

NA-144. Operators Jeff/W6UX, Rick/AE6RS, Tom/WA6WPG and Tim/K6GEP
will be active as W6UX/p from Anacapa Island during the RSGB
IOTA Contest (July 29-31st) as a Multi-Op/Mixed-Mode entry.
Activity outside of the contest will be on 40-6 meters,
including 30/17/12 meters. QSL W6UX/p via K6GEP. For activity
outside of the contest, please QSL via their home callsigns.

NA-232. Just a reminder that the members of the Russian Robinson Club
are expected to activate St. Matthew Island sometime this week
(possibly between July 20-26th). Operators mentioned are
Yuri/N3QQ, Tim/NL8F and Yuri/UA9OBA. QSLs can be confirmed by
either Yuri/UA9OBA or Dick/N7RO. For more details and updates,
watch: http://www.na-234.com

OC-021. Adhi, YB3MM, will be active from Java Island during the RSGB
IOTA Contest (July 30-31st) as a Single-Op/All-Band/SSB-Only/
12-Hrs entry. QSL via IZ8CCW.

OC-239. Joni, YB9WZJ, will be active as homecall/p from Doom Island
during the RSGB IOTA Contest (July 30-31st). Activity will be
during his spare time and on 20 meters SSB only. QSL direct
only or LoTW.

SA-045. (Update) Excerpts from a press release state that operators
Orlando/PT2OP and Fred/PY2XB will be active from Parazinho
Biologic Reserve in Bailique Archipelago between August 17-24th.
Activity will be on 40-10 meters using CW, SSB and the Digital
modes. They will use the IOTA and DX frequencies. The callsigns
have been issued as PQ8OP (Orlando) and PQ8XB (Fred). Orlando
will mainly operate SSB and the Digital modes while Fred will
use mostly CW and also the Digital modes. They will also have
6m capabilities and will monitor the band for openings. The
equipment will be Icoms 706 and 7000 with a 400w THP amplifier.
Antennas will be an SteppIR vertical (40-6m) and a Zepp (40-
10m). Power will be off a Diesel generator. Eventually, during
generator off periods, batteries will be used. The Parazinho
Bilologic Reserve is an biologic sanctuary. Only an Environ-
mental Ministery/State Secretary outpost is available on the
site. The site is about 300km straight line far from French
Guyana border. Few meters from the outpost there is an automatic
Lighthouse run by Brazilian Navy. So this operation will not
only account for a rare IOTA but also for WLOTA awards (L-1123)
and ALRHS (number awaiting confirmation). QSO is valid for

the Brazilian Islands Diploma DIB AP-03; Brazilian Lighthouses
Diploma DFB AP-03 and South American Lighthouses Diplom DFA.
The team will arrive in Macapa, capital city of the state of
Amapa, on August 14th. Then on the 16th it will sail to the
Biologic Reserve. The boat ride takes 12 hours to Vila Progresso
- a small fishermen community, plus 30 minutes in a motor boat
to the reserve. Boat ride schedule will depend on tides that
can get amplitudes as high as 10 meters. The team will take
food, water and essential goods as well a spare generator and
fuel for the entire period. The team will return on the 25th
to Macapa, depending on the tide levels. It is to be confirmed,
that on August 26th, activity is planned from S�o Jos� de
Macapa Fortress, the biggest historic Brazilian fortress.
Valid for DFH Historical Brazilian Fortress with code DFH AP-01.
PQ8OP cards will be handled by PT2OP and PQ8XB cards by PT7WA.

J45, DODECANESE. Members of the SV9 DX Team with co-operation of SV5BYR
will be active as J45K from Kasos Island (EU-001) during the RSGB IOTA
Contest (July 30-31st). The first team with the equipment will be on the
island Tuesday, July 26th. Operations will start next day on 160-6 meters,
as well as 2 meters band during weekend. QSL via SV9DJO and LoTW.

JT, MONGOLIA. Frank, DD0CW, is now active as JT1FDB from Ulaanbaatar
until the first week of August. According to his QRZ.com Web page, he
will be active as JT1FDB/7 most of the time from Bugat near Erdenet
(Locator: ON19UB) about 400 km NW of Ulaanbaatar. He will be from
Ulaanbaatar only during the first week and last week. Frank has per-
mission to be active on all HF bands (160-6m) and VHF/UHF bands using
all modes, but he prefers CW. Activity over the past weekend was on
15 and 6 meters. He will use a FT-100D with a GP and Dipole antennas.
QSL via DD0CW.

KD0, UNITED STATES (Lighthouse Op!). Steve, KD0ETC, will be on a kayak
expedition to the Apostle Islands National Lakeshore, Wisconsin, in Lake
Superior, and possibly activate the following three lighthouses between
July 30th and August 5th: Sand Island (USA 722 and WI018L)
Raspberry Island (USA 688 and WI019)
Devils Island (USA 228 and WI015)
Operating time will between 1500-2100z. His base camp will be on York
Island (WI017). Devils Island is maybe iffy since he is kayaking. Activity
will mainly be on 20 meters SSB only. However, there may be some 40
meters in the evening using a larger loading coil on his vertical, but
he doubts that he will be at a lighthouse then. QSL direct only to KD0ETC
with SASE, please.

KH6BZF PROPAGATION FORECAST/REPORT (July 18-24th)....
Jul 18 HN-AN SOLAR REFERENCE KEYS
Jul 19 AN-HN-LN --------------------
Jul 20 LN BN - Below Normal
Jul 21 LN-HN AN - Above Normal/Geomagnetic Level is QUIET
Jul 22 HN LN - Low Normal

Jul 23 AN HN - High Normal/Geomagnetic Level is UNSETTLED

VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

QSL INFO AND NEWS.....
PIRATE ALERT. Phillip, ZL2TZE, informs OPDX that there are PIRATE stations active claiming to be on Chatham Island (ZL7014, ZL7PW). There is no current licensed operator with these callsigns listed.

PP0T QSL STATUS. David, EB7DX, reports that he has been very busy these days, and also has been out of town for 10 days. He has recently uploaded the PP0T QSOs to LoTW. The paper QSLs are still at the printer.

QSL STATUS FOR DZ1P. Frank, VE7DP, informs that QSLs for the DZ1P operation (OC-091; between March 11-13th; QSL via VE7DP or 4F1OZ) were printed and shipped on June 12th. However, delivery has been delayed due to a recent postal strike in Canada. PSE QRX, the package should arrive sometime this month and all direct requests will be mailed out promptly.

QSL RECEIVED VIA LoTW: 3C9B, 3C0C, C6A/N5KM, PP0T, PZ5RA, S9DX, ST2VB and T31A

QSLS RECEIVED VIA MAIL: 4L6AM, 5N7M, 9K2VO, 9L5MS, CR5CQK, CT3/DF8AA, FG5FR, HK7AAG, HS0AC, JT1DA, KP2/K3CT, OD5/DL6SN, PJ4E, PZ5RA, S57IIO, SV2ASP/A, VP8ORK, YN2ER, YN2ET, YN2MG, ZB2X and ZB3R.

QSLS RECEIVED VIA THE BUREAU: 3D2A, 5W0YA, C91YI, DL2DSL, EA1ARW, EA8/DL1ARD, GB6MD, IR2C, JD1BMM, MS0WRC, MU0FAL, PJ4/G4IUF, PQ0F, S9DX, SM5PHU, T06T, TM32CDXC, TO5SM, TS7C, V25VG3N, YJ0MM, YO3KPA and Z21DXI

ST0, SOUTH SUDAN (Update). The South Sudan is now the world's newest country and as expected, the 193rd member of the United Nations on July 14th. Also, the South Sudan become a new DXCC entity on July 14th. ARRL DXCC Manager Bill Moore, NC1L, announced that the Honor Roll numbers have now moved up from 340 to 341 for the Top of the Honor Roll, and for Honor Roll it becomes 332. As this was being written, the last news we heard about the DX Friends/Intrepid DX Group's DXpedition to the South Sudan is: "The Intrepid DX Group is meeting the DX Friends in Cairo on July 21st. On July 22nd, they all fly from Cairo to Juba, South Sudan. On July 23rd, they will meet with the Ministry of Communi-cations to amend licenses to the new ITU prefix. They expect to be active later on July 23rd, or July 24th (Web page now states July 25th), until shut down on August 10th, 2011." The International Telecommunication Union (ITU) has not announced a prefix block for the Republic of South

Sudan on their Web page yet. However, they have announced that the South Sudan does now have an area code - 211. For more details and updates watch: http://www.dxfriends.com/SouthernSudan2011

ADDED NOTE: Wolf Harranth, OE1WHC, from the Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communications/QSL Collection, has informed OPDX that on their Web site, they now provide an extensive overview of Sudan's amateur radio history. The URL Link is: http://www.dokufunk.org/sudan

TC, TURKEY (TC Special Event Stations). Tevfik, TA1HZ, informs OPDX readers that there will be new TC special event callsigns to be activated in the coming weeks:
TC2BK - First of all, Turkish members of the (TRAC Giresun branch) Giresun Radio Amateurs and Nature Sports Club (GITRAD), and the TCSWAT (Special Wireless Activity Team) will be active as TC2BK between July 20-27th. Bahri Kacan, TA2BK (SK), one of the founders of ham radio in Turkey and former president of TRAC, passed away 10 years ago. Both GITRAD and TCSWAT will be on the air to commemorate this valuable elmer of Turkish ham radio operators. QSL Manager is TA7EB (see details on QRZ.com)

TC100TAF - The year 2011 is the 100th anniversary of Turkish Air Force. In May, TCSWAT was on the air as TC100HKK. For those who missed having a QSO for the 100th anniversary, TCSWAT will once more be on the air using a special callsign, but this time as TC100TAF between July 23-31st. Activity will be on the HF bands, mainly SSB, but look out for BPSK31 and SSTV signals especially during the nights! QSL via TA1HZ.

TC1LHW and TC7LHW - In August, look for two lighthouses to be activate by the TRAC Giresun Branch members, GITRAD and TCSWAT during the International Lighthouse-Lightship Week (August 1-8th). The classic TC1LHW team manned by TCSWAT will be located once more in Karaburun Lighthouse while TC7LHW will be activated from Yoros Lighthouse by GITRAD, TCSWAT and the TRAC Giresun Branch members. Both lighthouses are on the Black Sea coastline. QSL via TA1HZ.

SPECIAL NOTICE FOR QSL CARDS: TCSWAT QSLs are 100% via the Bureau. The usual delivery time is the end of June at the Friedrichshafen Messe. If you are not in a hurry, please wait for it. The cards are printed usually twice a year (May and December), so it is usually of no use to send in a direct request right after the activity. If you use <www.eqsl.cc> the logs are uploaded to the database right after the activities.

TC7, TURKEY (Special Event). Members of the Trabzon Branch (TRAC) will activate their club station using the special callsign TC7EYOF between July 22-31st. This special activity is in celebration/promotion and during the "TRABZON 2011, 11th European Youth Olympic Festival" sports event. Look for activity to take place on the HF, 6m and 2m bands, using

CW, SSB and the Digital modes. QSL via YM7KA, direct or by the Bureau.
For more details, visit the TRAC Web page at: http://www.ym7ka.com

TP50, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE)
will be active as TP50CE during the RSGB IOTA Contest (July 30-31st).
Activity is to celebrate the 50th anniversary of the European Social
Charter. Operations are usually on all HF bands and modes, possibly the
satellites. QSL via F5LGF. An online log search will be available at:
http://ewwa.free.fr

UN/UP, KAZAKHSTAN (UNFF/Lakes/Mountains/Rivers Op!). Two teams of operators
from Kazakhstan will activate the following Flora & Fauna, Lakes, Rivers
and Mountains of Kazakhstan between July 18-31st:
Team UN6GWC/7 (from Almaty) - Operators Sergei/UN6GAO, Arthur/UN6QC
(+XYL), Oleg/UN7ECA and UN8GEK (+ XYL) will activate the
following:
UNL-003, UNL-131, UNL-128, UNL-045, UNL-129, UNL-002
UNFF-012, UNFF-018, UNFF-006, UNFF-029, UNFF-003
UNR-018, UNR-001
UNWF-002

Team UP7Z (from Astana) - Will activate the following:
KDA B15, B07, F13, F11, F06, F07, J05, J06, J07,
J09, J16
UNFF-002, UNFF-006, UNFF-027, UNFF-029,
UNR-001, UNR-018
UNL-064, UNL-065, UNL-126, UNL-129, UNL-130
UNWF-002
UNM-036

Activity is planned for all bands using CW, SSB and the Digital modes.
Suggested frequencies for SSB are: 3744, 7144, 14144, 14244, 18144,
21244 and 24944 kHz. QSL via the home callsign. For more info, please
visit: http://un-dx.ucoz.com/index/wff_kazakhstan/0-12

VK9C, COCOS (KEELING) ISLAND. Operators Lot/DJ7ZG and Babs/DL7AFS will
be active as VK9CX from Cocos (Keeling) Islands (OC-003) between October
19th and November 9th. QSL via DL7AFS.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 17th July 12011

IRTS 2 Metres Counties Contest

The IRTS 2m Counties Contest will take place Sunday 28th August 2011. The closing date for the submission of the log to the contest manager is 27th September 2011.

IRTS SSB Field Day

The IRTS SSB Field Day takes place Saturday 3rd September and Sunday 4th September 2011. The closing date for the submission of the log is October 4th 2011.

GI HF Conference

The West Tyrone Amateur Radio Club (WTARC) Omagh are holding a HF Conference on Saturday 20th August 2011. This Conference comes following the very successful DigiCon 09 Conference back in September 2009.

A range of speakers from around GI, EI and G will be in attendance to share their various perspectives on aspects of HF operation. There will also be in attendance Traders such as, Tyrone Amateur Electronics (TAE) and JBT (Jim Bob) along with exhibits from the RSGB and the IRTS.

The Event is supported by Practical Wireless, TAE, JBT, IRTS and RSGB. So come along for what will be a Fun Day Out for all the family. The town of Omagh has a range of top class shopping along with a wide range of other tourist attractions
http://www.omagh.gov.uk/culture_leisure_and_tourism/

We look forward to seeing you there. For details of the Venue etc go to
http://wtarc.co.uk/GIHFConference.aspx

London 2012's critical communications ready for service

Airwave, the leading provider of critical voice and data communications to public service organisations in the UK, has announced that the

private mobile radio (PMR) service infrastructure for the London 2012 Olympic and Paralympic Games is ready for service. The PMR network, named Apollo, will provide voice communications for over 18,000 staff and volunteers from the London Organising Committee of the Olympic and Paralympic Games (LOCOG) during the 2012 Games. Apollo has been purpose-built to provide mobile radio to all London 2012 competition venues from the Olympic Park itself to sites across the country from Glasgow and Manchester to Coventry and Weymouth. The stand-alone network is now ready for operation and will be used by Games staff and volunteers, from stewards and security personnel to anti-doping officials, from now until December 2012. (Source:southgatearc.org)

RSGB Amateur Radio survey released

The results of the RSGB Amateur Radio survey are now available. It shows the Amateur population is continuing to age with a typical RSGB member now being about 65. The survey also shows that just 1.97% are women and only 0.88% classify themselves as being from an ethnic group other than White or White British a figure closer to 13% might have been expected. (Source:Southgatearc.org)

IOTA News from the Deutscher Amateur Radio Club

EU-120, G, English Coastal Islands: The Wakefield & District Radio Society will be active as GB1HI from Holy Island (also known as Lindisfarne) from Jul 15-18. QSL via M0OXO (bureau/direct). See also: http://www.wdrs.org.uk

EU-136, 9A, Kvarner group: 9A8ASN will be active from Cres Island from Jul 13-30. QSL via IK5ASN (bureau/direct).

EU-172, OZ, Jylland East & Fyn group: OZ/DL4FO is going to hit the airwaves from Tunoe (DIA JY-009) mainly in CW on the HF bands and 6m from Jul 17-29. Tunoe is situated west of Samsoe and is a small island of only 3,52 sqkm. QSL via bureau to his homecall. See also: http://www.qslnet.de/dl4fo

NA-091, VE, British Columbia Province South group: Broughton Island has a confirmation rate of only 22 %. Broughton is the workplace and QTH of VE7RSV/p. When Rob has some time he is working in SSB with 100 watts and G5RV almost every day. He wants to take part in IOTA Contest also. QSL via homecall. NA-142, W, Florida State North West (Escambia to Walton County) group: This quite rare IOTA group will be activated by W4/DF2MM from Santa Rosa (aka Okaloosa) between Jul 18 and Aug 25. He plans to join also the IOTA Contest. QSL via DF2MM. His website is: http://www.df2mm.de

NA-232, KL7, St Matthew Island: It seems like everything is on "go" for a first time activity from St. Matthew from Jul 19-22. If the weather is fine and condx good N3QQ and NL8F want to make around 3000 QSOs signing KL7RRC/p. They will work with high power in CW and SSB on

40m-10m. Their "lift" can be found at: http://www.mikehorn.com Other plans to activate NA-070 seem to be obsolete. QSL via N7RO and for EU stations via UA9OBA (bureau/direct).

OC-187, VK, Queensland State (North Coast) North group: JE1SCF will activate Lizard as KU2F/VK4 from Jul 18-22. QSL via JE1SCF (bureau/direct).

AN-016, VP8/A, Antarctica: VK2BFG is working as VK0BFG from Casey Station and has been spotted in SSB on 40m already. (Compiled by Ric, DL2VFR.)

The North Cork Radio Group

The North Cork Radio Group is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477.www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 085-7039042 Email:ei7gtb/ at /gmail/dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

DX News

The Republic of Southern Sudan became an independent state on 9 July. At the time of writing DXers are waiting for the first amateur radio signals from this new DXCC entity. At least two teams are poised ready to deal with the huge pileups which can be expected on all bands in the coming days.

Another new one - this time for the IOTA chasers - will be KL7RRC operated by Yuri N3QQ and Tim NL8F from the Alaskan island of St Matthew, They hope to be QRV from 19-22 July and the new Islands on the Air reference is NA-232. Dates are subject to change depending on the local weather. QSLs go via N7RO.

Eric SM1TDE will be active from Eckero in the Aland Islands using the callsign OH0/SM1TDE from 21-24 July. He plans to be 2khz up from the band edges on 80-10m CW.

A large group of Italian operators will sign IM0P from San Pietro Island in the Mediterranean from 22 July till 2 August. This island counts as EU-165 for the Islands on the Air Award. During their stay there they hope to active several other smaller islands in the area.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Highlights of Solar and Geomagnetic Activity
11 - 17 July 2011

Solar activity began the week at low levels for 11-12 July. Region
1249 (S18, L=244, class/area Cso/020 on 11 July) produced a C2/1f
flare at 1103 UTC on 11 July which was associated with a type II
radio sweep and a small coronal mass ejection. Region 1247 (S18,
L=269, class/area Esi/080 on 11 July) produced C1/Sf at 1449 UTC on
12 July. Activity levels declined to very low levels for the
remainder of the week from 13-17 July.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on 11 July but increased to high levels on 12 July
and continued to reach high levels for the remaining days of the
reporting period.

Geomagnetic field activity began the week at unsettled levels with
some active periods (and some isolated storm periods at high
latitude). This initial activity appears to have been caused by a
combination of effects from a coronal mass ejection (observed on 09
July) and a high speed stream from a coronal hole. Conditions
gradually subsided for 12-14 July as the high speed stream persisted
but weakened; typical activity levels were quiet to unsettled with
isolated active periods and isolated storm periods at high latitude.
Quiet levels prevailed for the remainder of the period from 15-17
July.

Forecast of Solar and Geomagnetic Activity
20 July - 15 August 2011

Solar activity is expected to be very low to low for most of the
outlook interval. However, there is a chance that new, rapidly
emerging flux regions could increase activity to moderate levels at
any time during the outlook period.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at background or moderate levels for most of the outlook interval. However, increases to high levels are expected for 21-24 July, 28-30 July, 1-3 July, and 6-9 August in response to recurrent high speed streams.

Geomagnetic field activity is expected to be unsettled with a chance for active periods for 20-22 July due to a favorably positioned coronal hole. Quiet levels are expected to prevail for 23-26 July. An increase to unsettled levels is expected for 27 July to 2 August due to another recurrent coronal hole. Quiet levels are expected for 3 August followed by another increase to unsettled levels for 04-10 August due to recurrence. 11-13 August is expected to be quiet and an increase to unsettled is expected for 14-15 August, again due to recurrence.

665. Ohio/Penn DX Special Bulletin #1019.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1019.1
BID: $OPDX.1019.1
July 19, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and N6PSE for the following DX information.

SOUTH SUDAN UPDATE. Here is the latest information regarding the South Sudan DXpedition from Paul, N6PSE:
"Today, the Intrepid-DX Group is making their way to Cairo to meet with the DX Friends. Our advance team will arrive in Juba, South Sudan tomorrow (July 20th) with a list of tasks to perform in advance of the main team. As the ITU has not yet issued a new prefix for South Sudan, our license that was issued in March has the call-sign of ST0R (Sierra Tango Zero Romeo). That will be our call for the DXpedition unless the ITU issues a new prefix which will require that we amend our license.
More updates to follow.
Thank you,
Paul N6PSE
Co-Leader, STOR DXpedition to South Sudan"

DXNL 1737 - Jul 20, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Enrico Stumpf-Siering, DL2VFR
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

SOUTH SUDAN - NEW DXCC ENTITY
The Republic of South Sudan declared its independence on July 9, 2011.
South Sudan applied for the UN membership on Jul 14 and was included
as the 193rd member of the UN on the same day. Since then South Sudan
meets the criteria of the ARRL (Section II, 1(a) of the DXCC rules)
to be approved as an own DXCC entity.
The new DXCC entity is NOT identical with the former DXCC country
South Sudan (ST0).

The teams of the "Intrepid DX Group" and the "DX Friends" (see online
at http://www.dxfriends.com/SouthernSudan2011) meet in Cairo on Jul 22
and will travel together to the South Sudanese capital Juba.
They expect to get their DXpedition callsigns issued on July 23 with
the newly allocated ITU prefix. Expect their activities with up to five
stations until Aug 10.
Another team around OH2BH is also expected to show up on the bands
after the official approval as a new DXCC entity.

FP - ST PIERRE ET MIQUELON, NA-032
FP/K9OT and FP/KB9LIE will be QRV again from Miquelon (NA-032) between
Jul 22 and Aug 4. Activities will take place in CW and SSB on 80m-10m
with 100 watts and wires. QSL via K9OT, via bureau, direct or LoTW.
See also: http://hamradio.pnpfarms.com

JT - MONGOLIA
Frank,DD0CW, is momentarily active as JT1FDB from Ulan Bator and will
stay in Mongolia until the first week of August. Except from the first
and the last week he works as JT1FDB/7 from Bugat (near Erdenet) in all
modes (mainly CW) on 10m-160m. Frank is using a FT-100D, a groundplane
and dipoles. QSL via DD0CW, via bureau ok.

JX - JAN MAYEN, EU-022
The JX5O DXpedition went QRT two days earlier than planned on July 14
with 17.844 QSOs in their log. The skipper urged to leave earlier
because of bad weather and rough seas. Meanwhile the first online logs
are available at: http://www.clublog.org/charts/?c=5O

T8 - PALAU, OC-009
OM Masumi,JA3AVO/T88MB (CW), XYL Hiroko, JH3PBL/T88MP (SSB), and their
grandson OM Shota,W7AED/T88SR (SSB), will be QRV from Koror (OC-009)
signing T8XO on all bands from Jul 22-24.
QSLs for T8XO via JA3AVO (direct or via LoTW).

TK - CORSICA, EU-014
OM Laurent,F8BBL, intends to hit the airwaves as TK11OTA or TK1QRP
from Olmeto Plage on Sanguinaires Island (EU-014, DIFM TK-001) between
Jul 23 and Aug 6. He will use a FT-857D and a MP-1 vertical mainly in
CW, sometimes also in SSB and digital modes, on 80m-10m.
QSL via F8BBL, via bureau, direct or LoTW.

VK9L - LORD HOWE ISLAND, OC-004
The HARAOA group around VK2IR plans a DXpedition to Lord Howe (OC-004)
from Jul 23 until Aug 2. They will sign VK9HR with several stations at
the same time in CW, SSB and RTTY on 160m-6m. They have five radios,
power amplifiers, several verticals and yagis QSL via EB7DX.
Find more information at: http://www.lordhowe2011.com

XE - MEXICO
XE3/IZ2LSC will stay in central Mexico from Jul 26 until Aug 8. After
that he also plans to activate NA-045 as XF3/IZ2LSC. Listen for him in
SSB/CW/digital modes on 30m-6m. The log will be uploaded to the LoTW.
Direct QSLs schould be sent via EB7DX and bureau QSLs via IZ2LSC.

ZD8 - ASCENSION ISLAND, AF-003
A German group plans to activate Ascension Island (AF-003, WLOTA 1491)
between Jul 24 and Aug 9. They will work as ZD8D on 160m-6m, mainly in
CW and RTTY but also in SSB. The team of DL1CW, DJ4KW, DK1IP, DL7OR is
led by DJ9KH and plans to work with two stations simultaneously around
the clock using Quads, verticals and yagis.
For more information and updates click on: http://www.zd8d.de

8P - BARBADOS, NA-021
Carsten,DF1XC, will spend his holiday on Saint Philip/Barbados (NA-021)
from Jul 23 until Aug 14. He will work as 8P9XC "holiday style" mainly
in CW on all HF bands. QSL via bureau or direct to his homecall.
Online logs will be uploaded to: http://www.clublog.org/logsearch/8p9xc

TURKEY, SPECIAL EVENT STATIONS
Several special event stations will be activated in the upcoming days.
The members of the GITRAD, the TRAC Giresun and the "TCSWAT" will be
active as TC2BK from Jul 20-27 to commemorate Bahri Kacan, TA2BK (sk
).
He was one of the founders of ham radio in Turkey, former president of
TRAC, activated the very rare country Albania and had passed away

10 years ago.
QSLs for TC2BK should be sent via the TA bureau or direct to TA7EB.

The 100th anniversary of the Turkish Air Force is an occasion for the
TCSWAT to activate the special event callsign TC100TAF from Jul 23-31.
Activity will take place on the HF bands, mainly in SSB but also in
BPSK31 and SSTV especially during the nights. QSL via TA1HZ.

The special callsign TC7EYOF will be active from Trabzon during the
"11th European Youth Olympic Festival" from Jul 23-30.
QSL via bureau or direct to YM7KA.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
In view of the independence of South Sudan and the upcoming activities
Wolf Harranth,OE1WHC, of the ORF QSL-Collection and Dokufunk.org has
collected some information about amateur radio in Sudan. For more
details visit the extensive website at: http://www.dokufunk.org/sudan

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-030, OZ, Bornholm Island: OZ7VEA will stay on Bornholm from Jul 24 until
Aug 5 and plans to take part in the RSGB IOTA Contest as well.
QSL via DL7VEA. See also: http://oz7vea2011.blogspot.com

EU-031, I, Campania Region group: A group of Italian HAMs will be active
as IC8L from Licosa on Jul 24/25. QSL via IZ8EGM (bureau/direct).

EU-062, LA, Nordland/Nord-Trondelag County group: Waldi,LA/SP7IDX, and
Mek,LA/SP7VC, will be QRV during their fishing holidays on Vega Island
from Jul 23 until Aug 2. One station is reserved for 6m, the other one
will be active in SSB and RTTY on HF. They want to take part in the
IOTA Contest as well. QSLs via homecalls (bureau/direct).

EU-125, OZ, Jylland West group: OZ/DF2SD will activate Fanoe Island in
holiday style working only in SSB between Jul 23 and Aug 2, including
the IOTA Contest. QSL via DF2SD (bureau/direct).
For more information check his website: http://www.qrz.com/db/df2sd
---
OZ/DH3BEA will be QRV from Fanoe as well from Jul 24 until Aug 5.
QSL via DH3BEA (bureau/direct).

EU-146, PA, Zuid Holland/Zeeland Province group: ON4LO, ON4CCK, ON8CW, ON3BL
and ON4CCV will be active as PA/ON4LO/p from Schouwen Duiveland from
Jul 22-24. They will work in SSB and digital modes on 80-10m.
QSL via ON4LO (bureau/direct).

EU-179, UR, Black Sea Coast group: An Ukrainian IOTA expedition will show up
from the Kalanchakskiye Islands in CW and SSB between Jul 26 and Aug 3.
QSL via UR8GX.

NA-112, K, North Carolina State West (Brunswick to Carteret County) group:
NC4EN/2 will be QRV from Bogue Banks (aka Emerald) from Jul 25-31.
QSL direct via homecall or via LoTW. See also: http://www.nc4en.com

NA-144, K, California State South (Santa Barbara to LA County) group: N4LI
and WA4CB will make a bike trip on Santa Rosa Island on Jul 22 and plan
to activate this island as N4LI/6 on 20m for a few hours.

NA-198, VO1, Newfoundland's Coastal Islands: The DXpedition to Little Bell
Island (scheduled for the beginning of August) will probably start in
the week after Jul 25.

NA-232, KL7, St. Matthew Island: The already announced first activation by
KL7RRC/p is now scheduled for Jul 20-26 but it is not sure if it takes
place at all.

NA-242, KL7, North Slope County West group: Another first activation has
been announced for Jul 22-26. K6VVA and K9AJ want to become active as
K6VVA/KL7 from Point Lay Barrier Island mostly in CW on 40m-15m. This
activity is strongly depending on the weather conditions and shall last
for at least three days. QSL via N6AWD (bureau/direct).
Their website is: http://www.k6vva.com/iota/na242
It is possible that there may be also a short activity from NA-172
after that.

OC-059, V6, Kosrae Island: V63FAA will be QRV from Kosrae from Jul 26-29.
QSL via W6ANM (direct) or LoTW.
For more information check: http://home.comcast.net/~v63faa/site

IOTA Contest 2011: A list of all stations who announced to be active from
islands in the RSGB IOTA Contest during the last weekend of July will
be published in the DX Newsletter 1738 next week.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-07-21
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** Let's honor our Moon Bouncer Silent keys with a "Final Bounce"

With recent heavy SK losses in the EME community, I would propose
that a perpetual memorial to Silent Keys of EME be created. Founded
around the "final bounce" idea of sending the SK Op's image, with
Callsign to the moon and back, and posting the received image at a
suitable memorial website. Perhaps a Guest book, for comments,
rememberances from EME colleagues about the passed EME'er.
What say? I just released a preliminary page with a few callsigns
that came to my mind: http://www.moonbounce.info/sk.html
Please send corrections and additions to my private address:

** MMMonVHF and DUBUS 144 MHz Meteorscatter-Sprint Contest **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part in
our 144 MHz Meteorscatter Sprint Contest, which took place for the
first time in the 2008 Perseid shower. The 144 MHz Meteorscatter
Sprint Contest will take place each year on the day of the from IMO
(International Meteor Organization) announced maximum of the Perseid
shower. 2011 contest period: Date: 12./13. August 2011 Time period
for 48 hours: start 12.August 00:00hrs till end 13.August 2011
23:59hrs "UT" (End time of the last complete QSO) !! NEW !!
Reference data for 2011 by the IMO: expected Perseids Maximum 2011:
August 13th. 07:09UT with a expected ZHR of 100. Read all in detail
at the overview and rule page: http://www.mmmonvhf.de/ctest.php

** 5W0GJ on 6m EME - Please distribute widely! **

Now that the summer Es season is winding down, it is time to remind you again that it is time for some half million mile 6m DXing to begin again! In case any of you serious 6m operators with digital mode capability still need Samoa (5W), this is a reminder that I am going there in only FOUR WEEKS! All you need is some decent ground gain for your 6m yagi, an amplifier and JT65A mode. For North and South American stations, I will be elevating on MY end, so you can just keep your antenna aimed at the horizon during your moonset during the last days of August. With ground gain and optimum EME cndx, amazing things are possible - I worked N3CXV with his single 6M5X yagi on both my previous DXpeditions to 3D2 and E51.
For European stations, our best chance is during the week of August 22 during my moonrise. Although cndx are not as good then as on the last weekend of August, it is also your moonset, so we have a good chance of ground gain on both ends, which should make up for the difference in Degradation.
If you are one of the numerous 6m stations who have recently added elevation, please try to catch up with me during my moonrise out over the water. I expect that to be my best direction. I was surprised to find W7CE with his single 6M9KHW pointed up in the air was one of the first stations I worked during my first moonrise from 3D2 last fall! Full information is on my website below and also will be updated there and on the MMM on VHF DXpedition website:

http://www.bigskyspaces.com/w7gj/Samoa2011.htm - Please read the information on my website about my schedule and also familiarize yourself with the procedure I use for my 6m EME DXpeditions: http://www.bigskyspaces.com/w7gj/DXpedition%20Procedure.pdf I am excited about handing out a new DXCC to many deserving 6m operators who take the time to get on and look for me on JT65A mode. Please spread out and only work me once, to allow others an opportunity for a contact during these limited days! I hope to be able to update a list of stations worked from time to time as I can find a place with internet access. I hope you also will be able to add a 5W0GJ QSL card on your wall ;-) GL and VY 73, Lance
SOURCE: Lance Collister, W7GJ, direct to MMMonVHF

** TK9VOCE active on HF and VHF bands **

Hi friends - TK9VOCE, will be aired starting July 23rd afternoon, until July 24, by Corsican Hams, from the convent of Cervione (North East of Corsica). All modes and bands, HF, VHF (except 50 MHz which is forbidden here), and UHF. QSL via Jacques, TK1LG. Exceptionnaly a QSO will be held under the TK9VOCE callsign, on July 22nd evening startiong 1830 utc on 3709.5 kHz Be lucky, Tks Tony, TK5XN
SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** VK9L - LORD HOWE ISLAND, OC-004 **

The HARAOA group around VK2IR plans a DXpedition to Lord Howe (OC-004) from Jul 23 until Aug 2. They will sign VK9HR with several stations at the same time in CW, SSB and RTTY on 160m-6m. They have five radios, power amplifiers, several verticals and yagis QSL via EB7DX. Find more information at: http://www.lordhowe2011.com
SOURCE: [DXNL] DXNL 1737 (Jul 20, 2011)

** SA-045 ACTIVATION - PRESS RELEASE **

Orlando (PT2OP) and Fred (PY2XB) will carry on an operation from Parazinho Biologic Reserve in Bailique Archipel (SA-045) From August 17th thru August 24th 2011. The team will operate on SSB/CW and DIGITAL modes from 40m to 10m. They will use IOTA and DX frequencies. The callsigns have been issued as PQ8OP (Orlando) and PQ8XB (Fred). Orlando will carry on mostly Phone and Digital traffic. Fred will do mostly CW and also DIGITAL. They will also have 6m capabilities and will monitor the band for openings. The equipment will be Icoms 706 and 7000 with an 400W THP amplifier. Antennas will be an SteppIR vertical (40-6m) and a Zepp (40-10m). Power will be off a Diesel generator. Eventually, during generator off periods, batteries will be used. The Parazinho Bilologic Reserve is an biologic sanctuary. Only an Environmental Ministery/State Secretary outpost is available

in the site. The site is about 300km straight line far from French Guyana border. Few meters from the outpost there is an automatic Lighthouse run by Brazilian Navy. So this operation will not only account for a rare IOTA but also for WLOTA awards (L-1123) and ALRHS (number awaiting confirmation). QSO valid for Brazilian Islands Diplom DIB AP-03; Brazilian Lighthouses Diploma DFB AP-03 and South American Lighthouses Diplom DFA. The team will arrive in Macapa, capital city of the state of Amapa, on August 14th. Then on the 16th it will sail to the Biologic Reserve. The boat ride takes 12 hours to Vila Progresso - a small fishermen community, plus 30 minutes in a motor boat to the reserve. Boat ride schedule will depend on tides that can get amplitudes as high as 10meters. The team will take food water and essential goods as well a spare generator and fuel for the entire period. The team will return on the 25th to Macapa, depending on the tide levels. To be confirmed, on the August 26th its planned an activation from Sï¿½o Josï¿½ de Macapa Fortress, the biggest historic brazilian fortress. Valid for DFH Historical Brazilian Fortress with code DFH AP-01. PQ8OP cards will be handled by PT2OP and PQ8XB cards by PT7WA. Stay tuned - SOURCE: Orlando, PT2OP via Dave, VA3RJ

** N8OFS/P (Caboose) In the CX Phone Contest announcment... **

Now that everything is 'official', I can announce my entry in the CX (Classic Exchange) Phone Contest 2011 Broadcasting Live and Direct from the BIG Caboose at the beloved AC&J Railroad (Jefferson Ohio EN91or Ashtabula County)... The CX is a no-pressure contest celebrating the older commercial and homebrew equipment that was the pride and joy of ham shacks many decades ago. The object is to encourage restoration, operation and enjoyment of this older "Classic" equipment. (This is MY kind of Contest)... :)
>Date: The AM - SSB - FM CX will run from 1400 UTC September 18 to 0800 UTC September 19, 2011. (9 AM Eastern Time on Sunday to 3 AM Eastern Time Monday) Call: "CQ Classic Exchange" What: Exchange your name, RST, QTH (state US, province for Canada, country for DX), receiver and transmitter manufacturer/model (homebrew send final amp tube or transistor type) and other interesting conversation. Note: The same station may be worked with different equipment combinations on each band and in each mode. Freq's: I will start and CQ on 52.525FM, then move to 52.500AM (unless your boat anchor won't go that high, or is rockbound; then we'll work something out), then switch to 52.500USB; then back to 52.525FM to finish the QSO... If you have another rig that will do 6 Meters, then repeat the process all over again... Equiptment: A 17 year old Kenwood TS-60 to 29.4ft of LMR-400 to the "DOMINATOR" 5/8 wave Vertical at 29.5ft off the ground supported by the Caboose roofwalk and a 8' Shakespeare heavy duty mast... QSL Instructions: QSL Direct or eQSL with AG status... Log will be uploaded to LotW; but I still want a Card, eQSL with AG status, or both... For more information, please see: http://www.classicexchange.org PeAcE...

** IOTA Activity - J45 - DODECANESE **

Members of the SV9 DX Team with co-operation of SV5BYR will be
active as J45K from Kasos Island (EU-001) during the RSGB IOTA
Contest (July 30-31st). The first team with the equipment will
be on the island Tuesday, July 26th. Operations will start next
day on 160-6 meters, as well as 2 meters band during weekend. QSL
via SV9DJO and LoTW. SOURCE: Ohio/Penn DX Bulletin #1019

** JT, MONGOLIA - JT1FDB qrv from Ulaanbaatar **

Frank, DD0CW, is now active as JT1FDB from Ulaanbaatar until the
first week of August. According to his QRZ.com Web page, he will
be active as JT1FDB/7 most of the time from Bugat near Erdenet
(Locator: ON19UB) about 400 km NW of Ulaanbaatar. He will be from
Ulaanbaatar only during the first week and last week. Frank has
permission to be active on all HF bands (160-6m) and VHF/UHF bands
using all modes, but he prefers CW. Activity over the past weekend
was on 15 and 6 meters. He will use a FT-100D with a GP and Dipole
antennas. QSL via DD0CW. SOURCE: Ohio/Penn DX Bulletin #1019

** ZD8 - ASCENSION ISLAND, AF-003 **

A German group plans to activate Ascension Island (AF-003,
WLOTA 1491) between Jul 24 and Aug 9. They will work as ZD8D
on 160m-6m, mainly in CW and RTTY but also in SSB. The team of
DL1CW, DJ4KW, DK1IP, DL7OR is led by DJ9KH and plans to work with
two stations simultaneously around the clock using Quads,
verticals and yagis. For more information and updates click on:
http://www.zd8d.de SOURCE: [DXNL] DXNL 1737 (Jul 20, 2011)

** JD1BLY active from Chichijima Island (IOTA AS-031) **

I JD1BLY(JI5RPT) will be active from Chichijima Island (IOTA AS-031)
Ogasawara on 40m to 6m + Satellite CW/SSB/DIGI (NO 6m EME) from
Aug. 1 to 7 2011. QSL via my home callsign JI5RPT. My logsearch
will be on my web site; http://www.ji5rpt.com/jd1/ I also use
Twitter to inform my real time activities http://twitter.com/jd1bly
SOURCE: Makoto, JD1BLY via 73 Bill/NG3K DX-News

** IOTA Activity - EU-073 **

Members of the Associazione Radioamatori Marina Italiani Sezione
di Taranto (A.R.M.I) and 599 DX Team will be active as IJ7DX from
San Pietro Island between August 18-21st. Activity will be on the
HF bands and 6 meters using CW, SSB and the Digital modes. QSL
via IZ7LDC. For more details, visit their Web page at:
http://www.armi.ta.it/ij7dx SOURCE: Ohio/Penn DX Bulletin #1019

** TC7EYOF, TURKEY (Special Event) between July 22-31st **

Members of the Trabzon Branch (TRAC) will activate their club
station using the special callsign TC7EYOF between July 22-31st.
This special activity is in celebration/promotion and during the
"TRABZON 2011, 11th European Youth Olympic Festival" sports event.
Look for activity to take place on the HF, 6m and 2m bands, using
CW, SSB and the Digital modes. QSL via YM7KA, direct or by the
Bureau. For more details, visit the TRAC Web page at:
http://www.ym7ka.com SOURCE: Ohio/Penn DX Bulletin #1019

Operators John IK8LIU, Francesco IK8WEJ, Vincenzo IZ0FKE, Oreste
IZ8EDJ, Aurelio IZ8EGM, Rosario IZ8KNW, Dario IZ8LKL, Fabio IZ8OJG
and Giuseppe IZ8UZF will be active as IC8L on the 24th of July 2011
from Licosa Island (IOTA EU-031, IIA SA-001, MIA MI-051, WW Loc.
JN70KG) and lighthouse (WAIL CA-020, ARLHS ITA-089, TWLHD WLH I-019
WLOTA 3342). The island of Licosa is also part of the Cilento and
Vallo di Diano National Park (WFF IFF-008), and is located in the
Campania Region, Salerno Province (SA), Comune of Castellabate
Expect activity on all HF bands, propagation permitting.
QSL via IZ8EGM, direct or bureau. www.ic8l.net

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

WIANEWS WEEK COMMENCING July 24 2011.

WIA Monitoring Service request volunteers who can assist with
linguistic skills.

ANOTHER ARISSAT-1 DELAY

RD CONTEST REPORT

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JULY 24 2011.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

A few weeks ago we heard from WIA Director Peter Young in relation to the
WIA Monitoring Service with a request from Peter for volunteers who can
assist with linguistic skills, this to help with monitoring reports of
intruders on to our HF bands. Peter said that sometimes phone
communications are in foreign languages that once identified can assist
with the location and possible identification of the intruder. So if you
have skills particularly in Asian or Middle Eastern languages and dialects

Peter would like to hear from you. You can contact Peter by email vk3mv@wia.org.au

ACMA NEWS

The total number of Australian internet subscribers rose by 17 per cent in 2010 and the average amount of data downloaded increased by a further 29 per cent over the same period, according to research released by the ACMA.

'These increases reflect again the ongoing digital boom in online social and economic activity,' said Chris Chapman, ACMA Chairman.

'More and more Australians are going online to do their shopping, banking and social networking.'

The report, The internet service market and Australians in the online environment, found that that more than 15 million people aged 14-years and over used the internet during the December quarter of 2010, up from 14.2 million during the same quarter in 2009.

In addition, 71 per cent of internet users went online at least once a day in December 2010, compared to 67 per cent in December 2009 - an increase of 1.2 million users.

The 300th entry for the International Lighthouse & Lightship Weekend

The milestone entry 300 is for the R&#65533;vargrund Lighthouse, under the club station OH6NR, which plans to have a good experienced presence on the bands.

On an island in Western Finland and one of seven from that country, it's to be activated by DXers who on their recent outings to R&#65533;vargrund favoured HF through 6-metres including the digimodes.

With three weeks to go there have been an average of five entries a day. This is to escalate in the final weeks and it's not too late to get permission to set up and make an entry.

There's lots of easily assessable lighthouses that have not yet made it on the 2011 list. So far we have more than 40 countries in all and this too is expected to rise. Why not join in the fun that is had on the third weekend of August?

Visit the revised website at ILLW.NET to check out the full list of entries, read more details or register for the International Lighthouse and Lightship Weekend on August the 20th and 21st.

The WIA gives Australian radio amateurs and electronics enthusiasts access to an extensive range of locally and internationally sourced publications including those from the ARRL and the RSGB.

Our bookshop is designed to provide you with a simple and secure way to purchase the latest amateur radio books and publications online. We use a secure commercial e-commerce gateway for all credit card transactions and

delivery to your door is provided by Australia Post.

Purchasing the latest in amateur radio publications is both secure and easy.

We hold a wide range of the most popular publications suitable for those starting out in the hobby as well as books popular with the more experienced hobbyists.

If there is a particular publication that you are trying to locate that is not listed in our online catalogue, then we would be more than happy to help you. Please send an email with the details of the book you are looking for to bookshop@wia.org.au

Both WIA members and non members are able to purchase from the WIA online bookshop, however the bookshop provides significant discounts to members of the Wireless Institute of Australia.

>From time to time we do run specials on some publications, so keep an eye on your Amateur Radio magazine each month for details.

This is Mal VK3FDSL for the WIA Bookshop

Solar panels stolen during break in Coomera.

Queensland Police are investigating the theft of between 200 and 300 solar panels with the inverters from a business at Coomera.

Unknown offenders forced a door to the business and loaded the items on to a truck that had earlier been reported stolen from a business at Middleton Street Ashmore. The truck is a 2005 Isuzu FR500 Torqueliner with a white cabin and has a blue back cover. It has attached Queensland registration plates 534 IIZ.

Members of the public are warned to be cautious of people selling solar panels at a heavily discounted price and to be sure they check the business's or seller's credentials before purchasing.

Anyone with information which could assist police with their investigations should contact Crime Stoppers anonymously via 1800 333 000 or crimestoppers.com.au

SILENT KEYS

Horrie Young VK2AMZ - a Life Member of the WIA / ARNSW

Horrie in WW2 was the radio operator on MV Krait in Operation Jaywick on the Commando raid on Singapore. After WW2 he rejoined the PMG / radio branch and ended up as Superintendent of the NSW Radio Branch.

An extensive interview script about him can be found on the internet at The Australians at War [Archive 1815]. His farewell was held Thursday.

Horrie was heard on the 2002 and 2006 RD opening address. http://wiaq.com/rd_archives/

He lived on the Central Coast.

The source of his passing was heard on Tuesday afternoon on the ABC Statewide program.

(Tim VK2ZTM)

Also passing is David Thompson formerly VK2BDT.

His death occurred on Tuesday the 19th of July on his 92nd birthday.

David would be well known as VK2 president for some years and was a very active Amateur and was the Founder and patron of the Goulburn Amateur Radio Society now Goulburn and Southern Highland Radio Society.

David had been in failing health recently and had entered hospital for a minor operation but sadly didn't survive.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Recently the news media gave prominence to an international report on the possible effects of radiation from mobile phones. There have been many earlier reports, claims and counter claims about the safety of hand held phones and the possible links to brain tumours caused by the radio frequency interacting at the cellular level.

The lowest cell phone frequency in use, in Australia is below 900MHz and our lowest equivalent amateur band starts just above 1200MHz. Cell phones are generally running milliwatts but we amateurs normally think in watts.

The point is, in my mind, that until the science is defined, it is best to act with caution. As the radiation field diminishes according to the inverse square law, the further away from body parts the transmitting antenna is located the greater the apparent safety. We have grown used to people with hand held radios carrying them on their belts and using speaker mics. What price kidney damage?

It seems that a metal lined safety hat with the antenna mounted atop as we have seen at some big ham meetings really has more to recommend it than just attracting attention.

I'm Geoff Emery and that's what I think....how about you?

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

A Digital Training Day was held at the Rockhampton Heritage Village, in North Rockhampton on Saturday July 9th 2011, a total of 19 people attended from both local clubs, the Rockhampton & District Amateur Radio Club inc and the Central Queensland Amateur Radio Association inc.

The day was centred around using the Tigertronics SLUSB Interface with the FLdigi Software, written by Dave Freese W1HJK.

Jack VK4JRC went through the aspects of setting up the interface, doing the offset corrections using the Check SR program and then it was on to the setting up FLdigi and exploring some of its many features.

Since many attendees brought along their computers, radios, power supplies and dummy loads, the day progressed with people helping each other work out the vagaries of the software and hardware to get up and running.

The lunch break saw Mike VK4LMB, Andrea VK4FROG, Maree and a band of helpers, cook up a storm on the Village BBQ with steaks, sausages and burgers all round.

After lunch it was back to 'school' and the learning continued! By the end of the day, there were many signals radiating around the room, with contacts being made over varying distances of up to 20 feet!

The day finished at about 4pm with the attendees leaving with their carry bag information packs for further study.

Thanks go to Jack VK4JRC for organising the day and Maree for providing gastronomic delights that would put a bakery to shame!

Thanks also go out to all the people who assisted and attended on the day and to the Rockhampton Heritage Village for the generous use of their facilities. Plans are now underway for another training day in using SSTV with the Tigertronics Interface.

I'm Adam - VK4MTJ on behalf of the Central Queensland Amateur Radio Association Incorporated.

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

In keeping with the promotion of the Wide Bay Hamfest, the members of the Maryborough Electronics and Radio Group got to share a rag chew and a cuppa with visiting amateurs, last Saturday 16th July.

With visitors from the Wide Bay itself, Gin Gin to the north and Gympie, Sunshine Coast through to Brisbane and one lone VK7 we enjoyed a low key function on a wet and blustery day.

Items of pre-loved equipment as well as product brochures supplied by Icom Australia left the hall and out the back the VK4-ICE Communication display never

seemed to be free of visitors. MERG is really appreciative of David Tavener's support over the last 3 years and thanks David for the donation, not only of a Wouxun H/T as raffle prize but also an antenna for the permanent JOTA station at the Aldershot Scout Camp.

The weather had an effect on the number attending but a successful day was enjoyed and the efforts of the ladies from the local scout group was greatly appreciated with hot food and drinks being available.

For MERG, I'm Geoff, VK4ZPP and hope to see you next year at the Wide Bay Hamfest.

ROCKHAMPTON
IRLP NODE 6973
e-mail vk4jym@wia.org.au
Secretary Jim 04 2948 4734
http://www.radarclub.org.au

Greetings from the Rockhampton and District Amateur Radio Club, the RADAR Club. This is Les VK4VIL reporting.

Last weekend, the club worked with the Central Queensland Motor Sporting Club, undertaking communications for Round 2 of the Queensland Rally Championships held at the Capricorn Resort.

Twelve operators were on hand from the club.

As the area is heavily wooded and hilly, duties included setting up repeaters and radio headquarters for the event and completing general field relay of information as well as conducting emergency comms for accidents, injuries and recoveries. With the course classed as very slippery, bingles were common and at the end of the day, only 16 of the initial 28 cars entered remained operational. Good emergency training.

To allow early results to be collated in time for the dinner and presentations, operators were also kept busy between other tasks, reporting all competitor result times for the numerous stages over the three courses.

Leon VK4KLL at the resort's headquarters was kept busy on 4 radios which operated on one VHF frequency, one Wicen UHF frequency and two UHF CB Channels as well as coordinating with the Clerk of the Course and the score keeper. John, VK4AJS ran a second base at one of the courses to prevent confusion.

During the dinner, the motor sporting club acknowledged the RADAR clubs operation as professional, and essential for the conduct of the event with an undertaking for continued collaboration in 2012.

The radio club's next major event is a visit to Cape Capricorn Lighthouse for the annual International Lighthouse and Lightship Weekend next month.

I'm Les VK4VIL, on behalf of the Rockhampton and District Amateur Radio Club.

vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

The next meeting for the C.C.A.R.C. will be held at the penguin lions club rooms on the 30th of July with a help and demo session for those building "Squid Pole" antenna, and weather permitting Dion, VK7DB, will erect and test his unique version of the squid pole outside the meeting room.

There will also be some club surplus components and equipment for sale.

Other members are welcome to bring along unwanted amateur related bits and pieces to sell at the same time.

Meeting time will be 1.30pm and all welcome.

http://www.my-x15.net/ccarc/

(David, VK7DC, Secretary, CCARC)

WIA DIRECTORS WEEKLY REPORT

WIA Emergency Communications Training and Accreditation Update.

I thought I'd give you an update on the WIA's emergency communications training and accreditation system.

So far we have run training courses in many major Australian centres and we now have over 100 people trained in emergency communications. The emergency communications training and accreditation system is a two part process - training and accreditation, so the next step in the training program is accreditation.

So far 32 people have applied for accreditation as a WIA Volunteer Emergency Communications Operator. Those people need to show that they are available, fit and well, if required to help out in an emergency.

If you have completed the Emcomms training course, we encourage you to apply for accreditation by completing the application form in the emergency communications training section of the WIA website, or by contacting the WIA office.

We are now investigating the best way to move forward, that is, how to structure and coordinate the accredited operators, so they can be used effectively if required by emergency services or non-government organisations.

Like all things the WIA does, this work relies almost entirely on the goodwill, effort and time of volunteers. Without the volunteers the WIA would simply not be able to function as it does.

We need to find ways to better acknowledge the work of volunteers, but for now I would simply like to say thank you to all those people who have brought the WIA's Emcomms training system to its current position.

This Phil Wait, for the WIA.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Assessments

Potential amateurs and those wishing to upgrade are reminded that exams can be conducted across the north west coast of the Apple Isle at a mutually agreed time and place by the Cradle Coast Amateur Radio Club examiners.

For further details on gaining a licence or upgrading, contact the Cradle Coast Amateur Radio Club learning organiser, Keith Winkler, VK7KW.

Contact details are available on the club website, go to wia.org.au and find Cradle Coast under the VK7 clubs.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Radio ham killed and another seriously injured in tower accident.
As a group of South Dakota hams were dismantling a 110 foot tower, a gust of wind toppled the final section, trapping two local hams, Tim Anderson, K0OR, 54, and Tom Embree, NC0K, underneath.

Loss of 2 meter simplex frequencies imminent in Texas!

Texas two meter simplex users stand to lose a large portion of available frequencies to D-Star repeaters if proposed changes to the two meter band plan are passed by the Texas VHF-FM Society.

South Sudan DXpedition

Paul, N6PSE says the advance team should have arrived in Juba, South Sudan Wednesday, July 20th, with a list of tasks to perform in advance of the main team. As the ITU has not yet issued a new prefix for South Sudan. Their March call-sign of ST0R will be call for the DXpedition unless ITU issues a new prefix.

World Scout Jamboree - SJ22S

Amateur radio stations have been set up at each World Scout Jamboree since 1957. They provide live-links from the Jamboree to the home countries of the participants over short-wave radio as well as being interesting stations for other amateurs to contact.

>From 27 July till 7 August 2011, the 22nd World Scout Jamboree at Rinkaby in Sweden will be on the air with call sign SJ22S (Scout Jamboree No 22 Sweden). This is a special event call sign.

The station will offer an exciting radio-scouting programme including kit building and fox hunting to the Jamboree participants.

Jim, ZL2APE, who is the NZ National Organiser for the Scout Jamborees on the Air, will be one of the station operators

Google "SJ22S", and go first to the QRZ listing for details of frequencies etc.

==========

NEWS FROM ARNEWSLINE USA

HAM RADIO FREDRICHSHAFEN ATTRACTS 16,300

The 2011 Ham Radio convention in Friedrichshafen, Germany took place the weekend of June 24th to the 26th. This annual event has become known as Europe's answer to the Dayton Hamvention in the U-S-A and Japan's famed Ham Fair.

Taking place at a venue on picturesque Lake Constance, this year's Ham Radio attracted 184 exhibitors and 16,300 visitors. Attendees came from all over the world. In addition to the German amateur radio community, other countries represented included Italy, Malaysia, Japan, Qatar the United Kingdom and the United States.

During the event 124 young people were given a demonstration of amateur radio. Some even tried soldering and playing with the Morse code. A video captures the flavor of Europe's largest amateur radio event, narrated in German, is on-line at tinyurl.com/arn-europe-ham

HAM RADIO IN SPACE: ANOTHER ARISSAT-1 DELAY

The orbiting of ARISSat One has been delayed for a few weeks. Bill Pasternak, WA6ITF, is in the newsroom with the latest details:

According to ARISSat One Project Manager Gould Smith, WA4SXM , the former Suit-Sat will not make an appearance in space until sometime in August.

In a news release, Smith said he and ARISS Hardware Engineer Lou McFadin, W5DID participated in a teleconference call this week with NASA to review the Roscosmos spacewalk procedures for the release of ARISSat One during E-V-A 29. For those who never heard the term before, E-V-A is an acronym for Extra Vehicular Activity and is NASA-ese for describing a spacewalk

Smith now says the discussion cantered on preparation procedures including the battery being charged and assembled into the satellite. Also discussed were the procedures to remove the protective quilts from the solar cells and turning on the safety switches prior to deployment.

During a later teleconference Sergey Samburov, RV3DR announced that the ARISSat One battery will be charged in late July and a test of the system will be conducted from the ISS from 1915 UTC July 30th to about 1200 or 1400 UTC July 31st. The standard ARISSat One 2 meter downlink band plan should be transmitted as well as the FM signal also down linked on 437.55 MHz.

The ARRISSat One team believes that it is looking at an August 3rd date for actual deployment, but notes that this is all subject to change.

More information as it becomes available. For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

EUROPEAN CB'ERS GET SSB OPERATION

A decision by the European Union has paved the way for the use of Single Sideband on 27 MHz CB across the British Isles and Europe. The revised regulation will permit European CB operators the use of SSB equipment running 12 watts Peak Envelope Power output in the frequency band 26.960 to 27.410 MHz.

The European Union decision to permit SSB on 11 meters came into force on June 24th and carries a preferred implementation by national telecommunications administrations of October 1st.

ON THE AIR" BATTLE OF BRITAIN STATION BECOMES PERMANENT SPECIAL EVENT

On the air, keep an ear open for U-K special event station GB4BOB to be active from September 1st to the 20th to commemorate the World War Two Battle of Britain. After running this station as a one-off for the battles 70th anniversary, the Pontefract and District Amateur Radio Society has now decided to keep it as an annual event to remember those who fought in it. QSL's go direct to G0BPK or via the RSGB bureau. More is on the Pontefract and District Amateur Radio Society website at www.pdars.com

RSGB

600m and 4m for Netherlands

A recent change of the National Allocation Table in the Netherlands shows that Dutch amateurs will get a secondary allocation from 501-505kHz until 1st January 2014 and a secondary allocation from 70.0-70.5MHz.

The allocations will not start until an update is made of certain frequency control legislation.

TETRA ready for Olympics

As preparations for the Olympics gather pace, Airwave has announced that its specialist TETRA Network, Apollo, is ready to provide voice communications in the London area.

This uses UHF spectrum that is separate from the amateur 70cm allocation, however the scale of the games is such that additional spectrum may still be needed from the 70cm band on a temporary basis. An example of this is the forthcoming use of 70cm for telemetry to support sailing test events.

As announced last week, this will occur in the Weymouth and Portland area between Wednesday 20th July and Saturday 13th August. Further information can be found on the RSGB website

www.rsgb.org/olympics.

New RadCom free sample

A new free sample edition of RadCom is now available to read online or download from the RSGB website.

The sample RadCom is available in digital magazine format for reading online, which requires a Flash plug-in to your browser. For those who would like to save the magazine to their computer, or do not have Flash installed, a 24 megabyte PDF version is available.

The sample is the March 2011 edition.

==========

WEIRD AND WONDERFUL

What came before GeoCaching - Was it Letterboxing?

An interesting discussion around GeoCaching with Angela VK7FPAA at a DATV night lead to Angela telling REAST about LetterBoxing which was an early form of GeoCaching.

Letterboxing is an intriguing mix of treasure hunting, art, navigation, and exploring interesting, scenic, and sometimes remote places. It takes the ancient custom of placing a rock on a cairn upon reaching the summit of a mountain to an artform.

It started when a gentleman simply left his calling card in a bottle by a remote pool on the moors of Dartmoor, in England.

Here's the basic idea:

Someone hides a waterproof box somewhere (in a beautiful, interesting, or remote location) containing at least a logbook and a carved rubber stamp, and perhaps other goodies. The hider then usually writes directions to the box (called "clues" or "the map"), which can be straightforward, cryptic, or any degree in between. Often the clues involve map coordinates or compass bearings from landmarks.

Selecting a location and writing the clues is one aspect of the art.

Once the clues are written, hunters in possession of the clues attempt to find the box. In addition to the clue and any maps or tools needed to solve it, the hunter should carry at least a pencil, his personal rubber stamp, an inkpad, and his personal logbook. When the hunter successfully deciphers the clue and finds the box, he stamps the logbook in the box with his stamp, and stamps his personal logbook with the box's stamp. The box's logbook keeps a record of all its visitors, and the hunters keep a record of all the boxes they have found, in their personal logbooks.

For more information take a look at the link on the email editions of this broadcast.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager.

Today Sunday the 24th July and as this news goes to air, you have about 3 weeks to check with your local Club to see if they are going to participate and your Club's Equipment, Antennae's, logs sheets, and Logging Software are up to date.

I have just had a short time to assemble the RD Contest printable log sheets, declarations, etc. over the next couple of weeks I hope to be able to make

available these documents, they will be at the bottom of the RD Contest page, as a downloadable documents.

Remember In all cases, logs must be received by last mail on Friday 16th September, 2011 Late entries will not be eligible. Electronically sent logs will be returned with a courtesy note, also Snail Mail will be returned unopened.

NEW AFRICAN COUNTRY

Thursday, 14 July the UN General Assembly admitted the Republic of South Sudan as its 193rd member state. Immediately following the General Assembly meeting, the flag of the Republic of South Sudan flew for the first time in front of the UN.

Now that the Republic of South Sudan is a member of the United Nations, the new country is now a DXCC entity. The SARL however say the ITU has not confirmed the new country's callsign prefix.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

The Illawarra Amateur Radio Society currently has a construction competition running that is open to amateur radio operators within VK.

There are prizes to be allocated in two categories.

Entry is easy, just build a crystal set.

Judging will be based on some simple rules:-

The crystal set must work i.e. receive a transmitted signal.
The crystal set can receive either commercial, broadcast or amateur signals.
No external power other than the received signal can be used.
Additional points will be gained by utilizing recycled parts, or home made components.
Additional points will be gained for Innovative design, and unique concepts.
The finished article does not need to be aesthetically pleasing.
Testing will be carried out at Industry World Centre, Wollongong 8/11/2011 (Between 19:30 - 22:00 Hrs).
The judge's decision will be final.

The judging of the contest will be at the IARS November meeting.

The Crystal set will need to be bought to the meeting on this evening, alternatively they can be posted to the Secretary Illawarra amateur radio society, by the meeting date which is 8th November 2011. Correct postage and packaging cost must be included if you require the project to be returned after the competition. Note that this project is a receive only construction, so it is therefore open to all license classes in VK.

Why not put together a club entry?

Old hands, why not take a newer member of the hobby under your wing and show them how construction was done when you first discovered radio.

Results and awards will be presented at the December 2011 meeting.

The two entry categories are:-

Category 1:- Financial members of the IARS
First Prize :- 2 metre Handheld radio
Second Prize:- Quality Screwdriver Set
Third Prize:- Lightweight Headphone Set

Numerous consolation prizes such as mouse mats, baseball caps

Category 2:- All other VK Hams
First Prize:- 2 metre Handheld Radio
Second Prize:- Quality Screwdriver Set
Third Prize:- Lightweight Headphone Set

Details are available on the Illawarra amateur Radio Society's web site
http://www.iars.org.au or email the secretary vk2vvv@wia.org.au

Silver pen has the 'write stuff' for flexible electronics

ScienceDaily report on a pen that can be used to create flexible electronic
circuits.

University of Illinois engineers have developed a silver-inked rollerball pen
capable of writing electrical circuits and interconnects on paper, wood and
other surfaces. The pen is writing whole new chapters in low-cost, flexible
and disposable electronics.

ANOTHER HOLLYWOOD BLOCKBUSTER FEATURES AMATEUR RADIO

2011 is replete with big movies, ranging from action-adventure flicks to
comedies to coming-of-age dramas. And already, Amateur Radio has played a
part in not one, but two movies.

In Mr Popper's Penguins, ham radio is featured, albeit incorrectly, on the big
screen. And now Super 8 -- a film set just outside Dayton, Ohio in 1979 -- uses
Amateur Radio in a crucial scene.

Super 8 revolves around a group of six middle-schoolers who witnesses a
mysterious train crash in the fictional town of Lillian. Soon after the crash,
the Air Force arrives and strange things start happening in the small town.

The kids, a group of young film makers (hence the title of the movie) begin to
investigate the creepy phenomena.

George VK4AJL gets active with HF SSTV

George and a few other Mackay hams are currently utilising the VK4AES EasyPal Digital SSTV software on 3642 to 3643kHz with good contact results into Rockhampton, Nanango and Gold Coast.

Good results are also being obtained on 40 and 20 metres.

George invites any other hams experimenting with EasyPal to give it a go on 80metres and join in with the Mackay Group.

WW SPECIAL INTEREST GROUP --- NAVAL

New RNARS website - simple to use

The Royal Naval Amateur Radio Society has launched its new web site.

The outstanding feature of this replacement site is its simplicity and ease of use.

All radio amateurs and anyone with an interest in maritime radio, especially those who have served or are serving in the Royal Navy, Royal Marines and other navies throughout the world, are invited to visit the site.

www.rnars.org.uk

There is something there for everyone, including listeners, as the Society issues awards for various activities associated with contacting its members. RNARS operating frequencies are listed in the 'skeds, nets and frequencies' page which can be copied and pasted into a proprietary editor for printing as a guide to where to find Society members.

The site is under continuous improvement and visitors are invited to suggest additional features to enhance the site.

RADIO JUSTICE: YEMENI MAN PLEADS GUILTY IN HIGHJACKING THAT RESULTED IN THE DEATH OF THREE HAMS

A Yemeni man pleaded guilty to acts of piracy on Thursday, July 14th in connection to his role in the hijacking of a yacht off the coast of east Africa that resulted in the deaths of four Americans including three ham radio operators. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details.

--

As previously reported here on Newsline, Scott Adam, K9ESO, and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV, and Phyllis Macay were on board the yacht Quest off the coast of Oman when pirates boarded their vessel on Friday, February 18th. Officials were in the process of negotiating for their release when gunfire was heard around 1 a.m. Eastern Time on Tuesday, February 22. United States forces responded and then boarded the Quest. It was then that they discovered that all four hostages had been shot by the high seas bandits. Despite immediate steps to provide life-saving care, all four hostages ultimately succumb to their wounds.

Now, one of the alleged pirates identified as 23 year old Mounir Ali has accepted a plea bargain by U.S. District Judge Mark Davis, where he plead guilty to taking part in the armed hijacking. Ali claimed that

he and four other men from Yemen were crew members aboard another vessel that was pirated by Somalis earlier in February. But prosecutors say that Ali willingly elected to join the pirates in return for a share of the ransom money. However they also say that he did not personally shoot nor did he instruct anyone to shoot any of the four Americans.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Ali is the 11th person convicted in relation to the highjacking and murders of the four Americans on-board the Quest. Sentencing is scheduled for October 21st. (Published news reports)

**

RADIO SAFETY: RADIO AMATEUR KILLED IN TOWER COLLAPSE ACCIDENT

A Hot Springs, South Dakota ham radio operator was killed and another seriously injured Saturday, July 16th. This after a communications tower they were helping dismantle was blown over by a gust of wind.

According to Fall River County emergency manager Frank Maynard, Tim Anderson, K0OR, died of his injuries at Rapid City Regional Hospital shortly after arriving by Life Flight helicopter. The second man, Tom Embree, NC0K, also of Hot Springs, was also flown to Rapid City Regional Hospital where surgery was performed Sunday. He remains in serious condition.

The men were helping their amateur radio club remove a 110 foot high tower on the top of a near-by peak known as Gull Hill. The tower was no longer in use, and the owner had offered it to the radio club, which was going to move it to a new location.

News reports say that several other radio club members were on the ground at the time of the accident. They had taken down all but the final 30 foot section of the tower and were just beginning to release some guy wires when a gust of wind blew the tower over with the two men still on it and then collapsed on them.

Both Anderson and Embree are members of the Hot Springs Amateur Radio Club. Hot Springs is located about 60 miles south of Rapid City. At the time of his death, Anderson was the club's president. (KELO, other published news reports)

**

WORLDBEAT: SOUTH SUDAN BECOMES SOVEREIGN ENTITY - ADDED TO DXCC AND CQ DX AWARDS

The Republic of South Sudan is now the world's newest country and as expected, it became the 193rd member of the United Nations on July

14th. It also became a new DXCC entity on the same date and was also added to CQ DX Awards Countries List as entity number 342.

Meantime, the latest news regarding the planned South Sudan operation by the combined DX Friends and Intrepid DX Groups is that the two groups were to meet in Cairo on July 21st. On July 22nd, they planned to fly to Juba which is the capital of the South Sudan. As we go to air on the 23rd, they were to meet with the Ministry of Communications to amend licenses to whatever new I-T-U prefix is assigned to the South Sudan. If all goes as the DX'er hope they expect to take to the airwaves sometime between July 23rd or as late as the 25th. The operation will continue until August 10th.

For the latest details on this upcoming South Sudan operation keep an eye on www.dxfriends.com/SouthernSudan2011. We will have more DX news later on in this weeks Amateur Radio Newsline report. (DX Friends)

**

RADIO LAW: HAMS IN FLANDERS (BELGIUM) NOW COVERED BY RADIATION LIMIT LAWS

The administration of the Flanders (Belgium) area in Northern Europe has now included ham radio operators in its restrictive public safety radio frequency Specific Absorption Rate or SAR Ministerial Decree. A law enacted only this past January 26th. Frank Haas, KB4T, is here with the details on the position the this puts hams in the region into:

--

The law was originally directed at telecommunications system operators to protect the public from what some consider dangerous RF levels.

It now appears that radio amateurs in the Flanders region must also observe the same standards and obligations and pay the same annual fee as their commercial counterparts. In addition they will be subject to the same government oversight and can face the same fines or imprisonment for infractions and violations of the new Flanders Specific Absorption Rate standard.

Radio amateurs in Flanders will soon have to apply for a certificate of conformity for their station and presumably re-apply whenever the station configuration changes. This costs about 75 Euros or $105 U.S. dollars.

In an application, a ham must supply a complete station location plan; an installation plan of antennas and an installation plan of the entire station site. Also required will be an overall safety analysis plan; a station elevation plan and an overall cross-section layout diagram.

In simpler terms Flanders hams will have to file what amounts to a complete engineering and electromagnetic impact study anytime even a minor station change takes place.

Still unknown is what impact the law will have on mobile, portable and hand-held operations by Flanders area hams.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

More on this rather radical law, most in the Flemish language, is now on line at thesw various web locations: Antenna File in Google English -http://tinyurl.com/BelgiumAntennaFile; SAR-Vlaanderen Facebook page (in Flemish) http://nl-nl.facebook.com/pages/; SAR-Vlaanderen/165726696825269; Joke Schauvliege Minister of Environment, Nature and Culture at http://tinyurl.com/JokeSchauvliege and the Royal Union of Belgian Radio Amateurs (UBA) http://tinyurl.com/BelgiumUBA) (Southgate, UBA, others)

**

RADIO LAW: RECONROBOTICS ENTERS CONSENT DECREE WITH FCC TO END INVESTIGATION BROUGHT ON BY ARRL COMPLAINT

ReconRobotics has entered a Consent Decree agreement with the FCC where it will make whats termed as a voluntary contribution of $17,000 to the United States Treasury. This, to end an FCC investigation in response to a complaint filed by the ARRL.

Back in 2010 the ARRL had alleged that ReconRobotics had violated Section 302a(b) of the Communications Act and Section 2.803 of the Commission's rules regarding the manufacturing, marketing, distributing and selling of radio frequency transmitters in the United States. In the complaint the ARRL alleged that ReconRobotics had unlawfully marketed a remote-controlled, maneuverable surveillance robot called the Recon Scout which operates in the 430 to 448 MHz band to public safety agencies and certain security personnel prior to the grant of a necessary waiver.

The FCC granted a waiver to ReconRobotics in 2010 to allow public safety licensees to operate the device in a portion of the 70 centimeter band that's shared with ham radio operations. To date, no license applications have been granted by the Commission for the device and the ARRL has petitioned to deny all applications that have been or might be filed. (ARRL)

COMMEMORATIVE EVENTS: REMEMBERING THE FIRST DECADE SINCE 911

This coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks of September 11th of 2001. These attacks felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Islamic extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures. Over 3000 American citizens were killed as well as a number of foreign nationals who worked in the twin towers buildings.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we here at the Amateur Radio Newsline are trying to compile a list of radio clubs and individual hams who are planning any form of amateur radio memorial operation to honor those whose lives were lost that day. If you have plans to commemorate 911, please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest. (ARNewsline)

ON THE NET: FIRST LIVE REMOTE BROADCAST OF BOB HEIL'S HAM NATION ON JULY 26

If you are hearing this newscast before Tuesday, July 26th, be certain to tune into Bob Heil, K9EID, show Ham Nation for its first live out of studio remote broadcast. Bob along with co-host Gordon West, WB6NOA, plan to originate from the historic radio room on board the famed Queen Mary ocean liner. This is a major Southern California attraction moored in Long Beach Harbor.

Their special guest will be Nate Brightman, K6OSC. Brightman is the person generally credited with first bringing the radio room to life as an operational ham radio station with the call sign W6RO several decades ago.

Ham Nation airs live on Leo LaPorte's Twit internet television network every Tuesday at 9 P.M Eastern time. To tune in simply take your web browser to www dot twit dot tv and click in the tab marked "live." You can also see a replay of the show about 24 hours later by downloading the podcast at www dot twit dot tv. (ARNewsline)

**

RADIO SITE NEWS: CALIFORNIA INSTITUTES $150 FIRE PREVENTION FEE

If you own a repeater, a remote base station or even a home in the state of California, a new law signed by Governor Jerry Brown may affect you. Measure ABX1 29 imposes an annual fee of up to a $150 on

every habitable structure in the State Responsibility Area or SRA to fund fire prevention activities. The governor said that due to population and development growth in these SRA's, taxpayer borne costs for fire protection have risen in recent decades.

California hams may need a local map to determine whether their repeaters, remote transmitter sites or even their homes are located in an State Responsibility. One fire official notes that, "As written, revenue from the fee would go to CalFire and an equivalent amount of General Funds would be removed from CalFire's budget for no net gain. A copy of ABX1 29 is on line at tinyurl.com/150FireFee. (CGC Communicator)

**

HAM HAPPENINGS: ILLW THE WEEKEND OF AUGUST 20 - 21

With only a few weeks to go to the International Lighthouse and Lightship Weekend, a total of 290 entries have been received but many more expected before the event.

So far this year 13 Lightships are entered mainly from Belgium, England, Germany and the USA. There's also one each in the Netherlands, Sweden and Wales. For those not aware, lightships are a rarer breed of the long-gone era of magnified flashes a light used by ships as they navigated along the coast and around the world.

Since 1998 the 48 hour, third weekend in August event has attracted more than 440 entrants, from some 50 nations. This year the dates are August 20th and the 21st. More information is on the World Wide Web at illw.net. (VK3PC)

**

THE SOCIAL SCENE: ARRL MIDWEST CONVENTION IN CEDAR RAPIDS IA. AUG 5 - 7

And the ARRL Midwest Division Convention and Summerfest 2011 will take place August 5th through the 7th in Cedar Rapids, Iowa. Events on August 5th and 6th will be held at Clarion Hotel & Convention Center with events for Sunday the 7th to be held at the near-by Teamsters Hall. A convention brochure containing a speakers list, forum line-up, registration form and more is available ob-line at tinyurl.com/cedar-rapids-summerfest. (Press release)

**

THE SOCIAL SCENE: RAC AGM AND HAMFEST 2011 IN NEWFOUNDLAND

Radio Amateurs of Canada will hold the eighteenth Annual General Meeting on July 30th in St. John's Newfoundland. The venue is the Battery Hotel and Conference Center at Signal Hill which is also playing host to the concurrent Hamfest 2011 events hosted by the Society of Newfoundland Radio Amateurs. Please visit www.sonra.ca for more details. (RAC)

**

THE SOCIAL SCENE: YO0YOA & YO0TSL CELEBRATE YOUTH AND TESLA

Romania's Zamolxes Foundation Radio Club will be operating the special call sign YO0YOA through years end. This, to promote the first youth ham radio organization in Europe known as Youngsters on the Air.

Youngsters on the Air is operated under a grant from Youth in Action and is financed by the European Commission to interest youngsters in amateur radio. Operation of YO0YOA will be on all HF and VHF bands.

Also on the air will be station YO0TSL. This station is to commemorate 155th birthday of famed inventor and researcher Nikola Tesla. (YO9GJX)

**

NAMES IN THE NEWS: WB4APR AND THE APRS GOLDEN PACKET TEST

Some names in the news. First up is Bob Bruninga, WB4APR, who invites you to join in the terrestrial annual APRS Golden Packet attempt on Sunday July 24th. This, from Noon to 16:00 hours your local time.

During this test Bob needs hams with Kenwood D700 transceivers to drive or hike to the top of some of the highest mountains in the USA. Then set up as a portable APRS digipeater to see if hams can link a Golden Packet across thousands of miles.

At airtime it is known that there will be an attempt along the Appalachian Trail from Alabama to Maine and another along the Pacific Crest trail from San Diego. California to Seattle, Washington. More information can be found on line at tinyurl.com/APRS-East for eastern states operations and tinyurl.com/APRS-West for operations out West. (WB4APR via VHF Reflector)

NAMES IN THE NEWS: W5NPR APPOINTED WEST INTERIM TEXAS SM

Bill Roberts, W5NPR, of Alpine, has been appointed as the Interim West Texas Section Manager as of July 8, 2011. Roberts has served as the ARRL West Texas Section Traffic Manager since 2009. He is a past president of the Big Bend Amateur Radio Club and is also active as a back-up net control station for the Big Bend Emergency West Texas ARES Net and a net control station for the National Traffic System's Daytime Region Net 5

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with ARRL West Gulf Division Director David Woolweaver, K5RAV. Roberts will serve as Interim West Texas Section Manager until a Section Manager is declared elected. (ARRL)

EMERGING TECHNOLOGY: RESEARCHERS DEVELOP ENERGY RECYCLING SENSORS

Researchers at Georgia Tech are tapping RF transmissions from a television station located half a kilometer from their lab to power a wireless temperature sensor. Amateur Radio Newsline's Bruce Tennant, K6PZW, is in the science center with more:

--

A Georgia Tech Research News article said scavenging experiments using TV bands has already yielded power amounting to hundreds of microwatts. It also says that multi-band systems are expected to generate one milliwatt or more. That says researchers is enough to operate many small electronic devices, including a variety of sensors and microprocessors.

The report goes on to note that devices requiring 50 milliwatts or more should be able to be powered by adding super-capacitors across the output of the power system for storage and using cycled operation. The Georgia Tech team is also looking at alternative power for the sensors. The current line of thinking is most likely solar power for daytime operations with the scavenged RF power used at night.

The self-powered wireless sensors are created using ink-jet printers and a special ink containing nanoparticles of silver and/or other material. The researchers have been able to literally print out a combination of sensors, antennas and energy-scavenging capabilities on paper or flexible polymers. The resulting sensors can be used for chemical, biological, heat and stress testing for defense and industry.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

So far these energy scavenging devices are able to recycle energy using RF sources ranging from 100 MHz to 15 GHz or higher. More about this breakthrough is on-line at tinyurl.com/recycled-power. (Georgia Tech Research News)

WORLDBEAT: SAARDT TO UNDERWRITE THE COST OF 5 SOUTH AFRICAN STUDENT HAM RADIO EXAMS

The South African Amateur Radio Development Trust has announced that it is underwriting the cost for a number of students under the age of 25

to take that nations Class A Radio Amateur Exam this October. Through the generous sponsorship of the Tony Reumerman, ZS6AOG and his family, the Trust is able to offer five such financial assistance plans this year. Each includes payment of the examination fee, a one year South African Radio League student membership subscription and tuition fee of 640 South African Rand. The total package is worth about 1000 Rand which is the equivalent of $143 United States dollars at the current international monetary exchange rate. (SARL News)

RADIO IN SPACE: FIRST EVER ORBITING OF AN ASTEROID ACHIEVED BY RADIO

For the first time in history, a spacecraft from Earth is in orbit around an asteroid and it is radio that has made it happen.

On Monday, July 18th NASA confirmed that its Dawn spacecraft was captured into orbit around the massive asteroid Vesta after a multi-million-mile journey. The entry into orbit occurred while the spacecraft's antenna was pointed away from Earth, so mission controllers had to wait for Dawn to re-establish radio contact to confirm its success.

The capture was estimated to have occurred at 1 a.m on Friday, July 15th when Dawn was 9,900 miles from Vesta and 117 million miles from Earth. According to researchers at the Let Propulsion Laboratory in Pasadena, California, this put the intercept inside of the main asteroid belt between Mars and Jupiter.

NASA said that after the orbital capture, Dawn sent an initial close-up image taken of the asteroid for navigation purposes. The spacecraft is now being prepared to begin a study of a surface that may date to the earliest era of the solar system, of which Vesta is believed to be a part of. Before the Dawn mission, images of Vesta were obtained by ground- and space-based telescopes but did not show much surface detail. (NASA, Science OnLine)

HAM RADIO IN SPACE: CELEBRATING THE FINAL US SPACE SHUTTLE FLIGHT

N4S was the callsign of the special events station that was on the air to celebrate the final flight of the United States Space Shuttle program. Operating from a location not far from the Cape Canaveral launch facility, N4S was on the air from launch through landing of the space ship Atlantis on the STS-135 and final mission of the space shuttle program. Take a listen:

--

Audio of contact. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

That was recorded here at the Newsline studio on a dipole antenna on a day with pretty poor propagation. N4S used CW, SSB and PSK on 40, 20 and 15 meters along with D-Star using the KJ4OXT repeater.

Those who made contact with N4S are eligible to receive a special commemorative certificate in exchange for their QSL. Send QSL's along with an 8.5 x 11 inch self addressed stamped envelope to the North Brevard Amateur Radio Club, P O Box 1033, Mims, Florida, 32754 (AA4MI)

**

HAM RADIO IN SPACE: ISS AND ATLANTIS CAUGHT IN DAYLIGHT VIDEO

And speaking about the final shuttle mission, an amateur astronomer named Scott Ferguson has successfully captured video of the space shuttle Atlantis docked to the International Space Station in broad daylight.

Ferguson used a video camera attached to an 8 inch telescope to capture the event. His video was taken about an hour and a quarter after sunrise. Atlantis is the glowing white object at the top of the ISS. You can also clearly see the solar panels on the space station itself, and get a hint of other structures too.

You can watch this rather exciting and historic video and read more about how it was accomplished by taking your web browser to tinyurl.com/iss-in-daylight. (Discover On-Line via KB4KCH)

HAM RADIO IN SPACE: A LOOK BACK AT THE SHUTTLE AMATEUR RADIO EXPERIMENT

Amateur radio has been an active participant on Space Shuttle flights since STS-9 Now that the shuttle program is at an end, Newsline Producer Bill Pasternak, WA6ITF, takes a quick look back at how the shuttle took manned ham radio into space:

--

Audio of W5LFL first CQ approaching the US Pacific coast. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

That's what it sounded like on my Icom IC-2AT in the courtyard of the old Metromedia Square building in Hollywood, California that winter evening in 1983 as Astronaut and Mission Specialist Owen Garriott, W5LFL, streaked across the nighttime sky at close to 135 nautical miles above me in the space ship Columbia.

Dr. Garriott was fulfilling a dream that he'd had since before his first trip to orbit aboard Spacelab several years earlier. That was to take a ham radio station with him into space. Now, thanks to some assistance from the late NBC Newsman Roy Neal, K6DUE, the blessings of then NASA Administrator Jess Moore, and an amazing flying machine called the Space Shuttle, it had come to pass.

His first CQ from orbit brought thousands of responses, but the one that he heard best and who became the first United States ham to contact W5LFL was Lance Collister, then WA1JXN, now W7GJ, of Frenchtown Montana. The QSO between the two hams lasted only a few seconds during which ham radio history was made:

--

First QSO betweek W5LFL/space mobile and WA1JXN in Montana. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

To get on the air from Columbia Dr. Garriott used a commercial handie talkie that had been modified and programmed for operation on several ham radio frequencies. To get signals out of and back into the orbiting spaceship W5LFL used a specially-designed cavity antenna engineered to fit a specific shuttle window and was held in place with Velcro binders. The antenna, designed by members of the Johnson Space Center Amateur Radio Club was roughly 24 inches in diameter and looked somewhat like a large aluminum cake pan with a piece of coaxial cable running from it to connect it to the hand-held transceiver.

Knowing the number of QSO's would be fast and furious a small cassette recorder was attached to the system to log anyone he heard and anyone he talked to.

--

Random QSO space to ground audio. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--
In addition to the random QSO's , Garriott also had some interesting pre-arranged contacts. Among others W5LFL was able to speak with the amateur radio club in his hometown of Enid, Oklahoma and with the Johnson Space Center Amateur Radio Club in Houston Texas whose members had helped develop his flight ham station hardware. He also held QSO's with the late Senator Barry M. Goldwater Goldwater and with Jordan's late King Hussein, JY1.
--

Contact between W5LFL and JY1: Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.
--
Dr. Garriott's ham radio adventure on STS-9 ushered in a host of outstanding outreach activities that in following years that put ham radio onto almost every shuttle mission. It also lead to the creation of the Shuttle Amateur Radio Experiment or SAREX program. This was the ground breaking alliance between the ARRL, AMSAT and NASA that over the years enabled astronauts on-orbit to make contact with thousands of school kids as well as to their own families back on Earth. And not only using FM voice. Soon both slow scan Amateur television and packet messaging were a part of SAREX as well. Eventually SAREX went from the Shuttle Amateur Radio Experiment to be renamed the Space Amateur Radio Experiment and then to ARISS - Amateur Radio on the International Space Station. Today, Earth to space station contacts are almost routine. More modern equipment and external antennas in the International Space Station make signals both ways a lot stronger than they were back in 1983 when Dr. Owen Garriott, W5LFL, called that first CQ from the space ship Columbia and ushered in the era of manned ham radio in space. Looking back over the years of ham radio operations from the United States Space Shuttle, I'm Bill Pasternak, WA6ITF, in the Newsroom in the City of Angels.

--

In all there were five videos made chronicling ham radio on board the United States space shuttles. They live on as a lasting reminder of manned amateur radios first steps into space. (ARNewsline(tm))

**

DX

In DX, NQ6K will be active as stroke VY0 from Devon Island in the Canadian high Arctic through August 5th. The crew will be primarily using 20, 15v and 10 meters running PSK31 and RTTY and possibly SSB. Other bands will also be used depending on propagation. Please see devon2011 (dot) nq6k (dot) org for current frequency updates, and contact information.

DD0CW will active from Mongolia as JT1FDB until the first week of August. According to his QRZ.com Web page, he has permission to be active on 160 throgh 6 meters as well as the VHF and UHF bands using all modes, but he prefers CW. QSL via DD0CW.

Some DX slims appear to be on the air. This according to ZL2TZE, informs OPDX that there are pirate stations active claiming to be on Chatham Island using the calls ZL7014 and ZL7PW. ZL2TZE says that there is no current licensed operator with these callsigns listed.

DJ7ZG and DL7AFS will be active as VK9CX from the Cocos Keeling Islands between October 19th and November 9th. No modes or times of operation are yet known. QSL this one via DL7AFS.

Lastly, members of the SV9 DX Team with co-operation of SV5BYR will be active as J45K from Kasos Island during the RSGB Islands on the Air Contest the weekend of July 30th to the 31st. The first team with the equipment will be on the island Tuesday, July 26th. Operations will be on 160 through 2 meters during weekend. QSL via SV9DJO or electronically using Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE HITCHHIKERS GUIDE TO DXING RADIO PARODY RE-RELEASED

And finally this week, it's been thirty years since former Radio Netherlands Media Network host Jonathan Marks, G8WGN, wrote a parody on international radio broadcasting. One based on his favorite radio series at the time, the Hitch-Hikers Guide to the Galaxy. He called it the Hitchhikers Guide To DX'ing and it was an overwhelming hit when it first aired back in 1980. Heres a quick sample, courtesy of G8WGN:

--

Sample audio from Hitch Hikers Guide to DXing. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

As Marks writes in his on-line blog, there seemed to be so much to make fun of at the time because of the boring propaganda at the height of the Cold War. According to Marks, several segments of this classic series are now available for download from the Media Network Vintage Vault at jonathanmarks.libsyn.com. The rest says G8WGN, will follow shortly.

Jonathan also invites everyone to browse through other material stored at the Media Network Vintage Vault and he encourages you to share your stories as well. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm David Black, KB4KCH, at the South-East bureau in Birmingham, Alabama, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 24th July 2011

The news headlines:

* Restrictive legislation for Belgian amateurs

* SSB coming to European CB

* AMSAT Colloquium to be webcast live

The administration in Flanders has included radio amateurs in the restrictive Specific Absorption Rate, or SAR, Ministerial Decree of 26 January, aimed at telecom operators. It appears that radio amateurs in Flanders will now have the same standards and obligations, fees and even the same fines or imprisonment for breaches as the telecom operators. Radio amateurs have to apply for a certificate of conformity for their station and, presumably, re-apply whenever the station configuration changes. This costs about 75 Euros and the amateur has to supply detailed information on the site and the antenna concerned. More information online at http://tinyurl.com/BelgiumUBA.

A decision by the European Union has paved the way for the use of single sideband on 27MHz CB across Europe. The revised regulation will permit European CB operators the use of SSB equipment running 12 watts PEP output in the frequency band 26.960 to 27.410MHz. The European Union decision to permit SSB on 11 metres came into force on 24 June and carries a preferred implementation by national telecommunications administrations of 1 October.

The AMSAT-UK International Space Colloquium takes place in Guildford next weekend, July 30-31. BATC and AMSAT volunteers will be streaming video of the event live, enabling it to be seen around the world. Clearly a webcast cannot match actually being there, with the opportunity to chat to satellite builders and inspect space hardware, but if you can't get to Guilford then the webcast provides the next best thing. The webcast will be at www.batc.tv.

AMSAT satellite ARISSAT-1, currently aboard the International Space Station, has had a chequered history. As previously reported, it was not deployed in February as originally planned. A further date in July also came and went. The RSGB understands that it will now be tested within the ISS on 30 to 31 July, the weekend of the AMSAT-UK Colloquium. It is planned to monitor the tests from the Colloquium using the facilities of GB4FUN. The satellite will probably transmit

its standard 2m bandplan, centred on 145.938MHz. All being well it will be hand-launched from the ISS on Wednesday 3 August.

Also on a space theme, AMSAT-UK's FunCube satellite is undergoing thermal testing at RAL Space at Harwell, near Didcot, as part of its launch qualification programme. Reporting to GB2RS live from the laboratory via a video link on Wednesday, Graham Shirville, G3VZV said that the schedule includes a power- off survival test from -35&#65533;C to +75&#65533;C.

Mexborough & District Amateur Radio Society has been lucky enough to secure passage on the Yorkshire Belle on 30 July for a full day of maritime mobile operating. Sailing from the coastal resort of Bridlington, they intend to operate both HF and 2m stations from on board the Yorkshire Belle with a support station nearby on land. Anyone wishing to contact Full licence holders working maritime mobile should listen out from 9am onwards on 30 July. Anyone wishing to take part in the event should contact Sharon Saiger on 07795 225447.

The National Hamfest will take place at the George Stephenson Pavilion, Newark & Notts Showground, Lincoln Road, Winthorpe, Newark NG24 2NY on 30 September and 1 October. Around 3000 visitors came through the doors last year and this year's show is due to be bigger than ever. The main hall is already well on the way to being full with all the major brands represented, as well as the biggest dealers in the UK and several overseas traders. Tickets can be purchased online with several discounts available for those booking early, www.nationalhamfest.org.uk.

The Radio Club of Provins would like to thank the amateur radio community for all the help and support during the recent theft of 20,000 Euros worth of DXpedition equipment. A radio amateur is helping police with their enquiries following the theft. It was thanks to the network of radio amateurs that this sad event was resolved quickly. The equipment was recovered and will soon be on its way to PJ4C with the F6KOP team and some will be travelling with the MDXC team to 9N.

The Republic of South Sudan is the newest addition to the CQ DX Award Countries List, number 342. Verifications confirming contacts after 14 July 2011, which was the date of its admission to the United Nations, are acceptable for credit. No award credit is available for southern Sudan contacts made during the 1980s and 90s. In addition, South Sudan will count as a country, or entity, multiplier for the CQ DX Marathon, the CQ World Wide DX Contest and any other CQ contests that use country multipliers.

Today, 24 July, at 0900UTC, a balloon called Aisekom will be launched from Bilbao in northern Spain with APRS equipment attached. This will transmit an APRS beacon on 144.800MHz FM at 1200 bps. It should be possible to hear it in the UK because it will rise up to 30,000 metres and then come down on a parachute. The callsign will be EG2EE-11. There is more information at www.aisekom.com but it is only available in

Spanish.

And now for the details of rallies and events for the coming week

Next weekend, 30 and 31 July, the AMSAT-UK Space Colloquium takes place in the Holiday Inn, Guildford, GU2 7XZ. There is a lecture programme available, including a Beginners' Workshop run by Dave, G4DPZ and Carlos, G0AKI, the RSGB Amateur Radio Department manager. GB4FUN will also be onsite. Details at www.uk.amsat.org.

Horncastle Summer Rally will take place on Sunday 31 July in the Horncastle Youth Centre, Willow Road, Horncastle, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is £1.50. Information can be obtained from Tony, G3ZPU on 01507 527835.

MW0MAH is setting up a demonstration station at charity fund raising event at RAF Valley on 30 July. The RAOB annual charity event starts at 2pm and visitors have the opportunity to pass greetings messages at the demonstration station as well as join in the other activities. Now for the news of special events

Hull & District Amateur Radio Society will have a station active at The Hull Sea Shanty this weekend at Hull Marina. Their communications trailer will be demonstrating HF, VHF and D-Star communications.

British Inland Waterways on the Air is set to be launched at The Waterways Festival, Shobnall Fields, Burton on Trent on 29 to 31 July. A special event station, GB2TWF, is being set up by local radio clubs and this is just one of over forty stations being set up for the weekend, which include GB0NWM at the National Waterways museum at Ellesmere Port, the Waterways museum at Goole, GB2FIP at the Foxton Inclined Plane museum and GB4HSC at the Hinckley Sea Cadets. Other stations will be set up from the Caledonian canal down to the River Way. A full list can be found on the participants tab at website www.biwota.org.

Hull & District Amateur Radio Society and the RAFARS are setting up a special event station at a veterans weekend on 30 and 31 July held at East Park, Holderness Road, Hull. GB2VET will be on the air using HF, VHF & UHF and D-Star. The club will also display vintage WW2 radio equipment.

Pontefract & District Amateur Radio Society is operating a GB0YD for Yorkshire Day on 1 August. Operated from the Club's shack with the Yorkshire flag flying from the mast, they intend to talk at all amateurs £ whichever side of the Pennines they are.

And now the HF DX news, compiled from 425 DX News and other sources

A group of German operators will be on the air from Ascension Island as ZD8D from 24 July to 9 August. They will be operating from a guesthouse in Georgetown. Updates are online at www.zd8d.de.

IK5ASN will be active as 9A8ASN from the island of Cres until 30 July. He will be on 40 and 20 metres using SSB, CW, RTTY and PSK31. QSL via IK5SAN, direct or preferably via the bureau.

KF8UN will be in Peru until 16 August. He plans to be active stroke OA4 and says that he plans to work 20m, particularly on 8 August. At other time he will be operating holiday style. QSL via his home callsign.

EF8M operating from the Canary Islands during the RSGB Islands on the Air Contest on 30 and 31 July as a Multi-Operator, All-Band, High-Power entry. Operators mentioned are RD3A, EA8CAC and UA5C. QSL via UA3DX.

Now the contest news

Today, 24 July, is the WAB QRO 2m phone contest, which runs from 1000 until 1400UTC. Using all modes on the 2m band, the exchange is signal report, serial number and WAB square.

26 July sees both the 50MHz UK Activity Contest and the SHF Activity Contest take place from 1900 to 2130UTC. The former uses all modes on the 50MHz band and the exchange is signal report, serial number and locator. The latter is on all bands from 2.3GHz upwards and using all modes the exchange is also signal report, serial number and locator. This leaves the biggest HF event to the end. Over the years IOTA Contest has become the RSGB's flagship contest. These days it attracts over 2000 entries worldwide. Casual participants are likely to pick up some new countries and serious entrants will make thousands of QSOs in the 24 hours, although there are also 12-hour sections for single-op stations. The IOTA Reference is part of the exchange; the one for mainland Britain is EU005. All the IOTA references can be found on the internet at www.logiciel.co.uk/iota/shtlist/europe.html. Operations start at 1200 on the 30th, although some of the island DXpeditions will be using their own callsigns during testing in the days leading up to the contest. Using the bands 3.5 to 28MHz on CW or SSB, the exchange is signal report, serial number and IOTA reference.

And now the solar factual data for the period from the 11th to the 17th of July, compiled by Neil Clarke, G0CAS on the 18th of July.

First this week the smoothed monthly sunspot numbers for October, November and December 2010, they are 23.2, 26.5 and 28.8 respectively. The rise continues towards a maximum, which is due probably in 2013.

Numerous sunspot groups were visible every day, in fact, seven groups were visible on the 13th and the 15th. However, most were small and quiet. One C class solar flare took place on the 11th and the 12th when solar activity was low. The remaining days' activity was very low. Solar flux levels increased from 90 units on the 11th to 104 by the 17th. The average was 95 units. The 90 day solar flux average on the 17th was 97 units, that's two units down on last week. X-ray flux levels increased slightly to B2.1 by the 17th. The average was B1.7 units. Geomagnetic activity was unsettled on the 11th with an Ap index of 13 units. This was due to a coronal hole. The remainder of the period activity was just at quiet levels with an Ap of 6 or 8 units on

most of the other days, except for the 17 which was 5 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar winds at 750 kilometres per second on the 11th and the 12th but then gradually decline to 345 kilometres per second by the 17th. Particle densities were low every day. On the 11th Bz varied between minus and plus 8 nanoTeslas and between minus 3 and plus 4 nanoTeslas on the 16th.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at very low levels on most days. Even though sunspot groups will be visible, all are expected to be small and inactive. Solar flux levels should be in the high 80's for most of the week. Geomagnetic activity is expected to be at quiet levels till after midweek, when a small recurring coronal hole disturbance arrives. The effects from the hole should be minimal, with the daily Ap index into the teens. MUFs during daylight hours at equal latitudes should be around 20MHz for the south and 17MHz for the north. Darkness hour lows should be about 13MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 18MHz. The optimum working frequency with a 90 per cent success rate will be about 13MHz. The best time to try this path will be between 1000 and 1500 hours. Sporadic-E should take place on most days on the lower VHF bands and up to 144MHz occasionally during any intense openings.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 25 July Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 25 July South Birmingham Radio Society is planning for Field Day and rally visits. Contact Don, on 0121 458 1603.

On Monday 25 July South Normanton Alfreton & District Amateur Radio Club is at Crich. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 25 July Stratford Upon Avon District Radio Society is holding its construction competition. Contact G0CHO, on 01608 664488.

On Monday 25 July Sutton Coldfield Amateur Radio Society is holding a general meeting with discussions on equipment, 2m HF and Morse. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 26 July Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 26 July Loughborough & District Amateur Radio Club is holding a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 26 July Mid-Warwickshire Amateur Radio Society is looking at technical topics. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 26 July Worcester Radio Amateurs Association is holding a construction night and shack clearout. For more information email Rich Moles, 2E0MOL, via secretary@m0zoo.co.uk.

On Wednesday 27 July Bolsover Amateur Radio Society is having a project night. Contact Alvey Street, G4KSY, on 01246 827135.

On Wednesday 27 July Lincoln Short-Wave Club is on the air and sorting things out for the IOTA Contest. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 27 July Midland Amateur Radio Society is holding an outdoor party with barbecue, food and drink. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 27 July South Kesteven Amateur Radio Society is planning a trip to the Dambusters Rally. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 27 July Telford & District Amateur Radio Society is preparing for its Guernsey trip and practicing with oscilloscopes. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 28 July Salop Amateur Radio Society is holding a fox hunt. Details on the club website at www.salop-ars.org.uk.

On Thursday 28 July South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 29 July Coventry Amateur Radio Society is holding a radio workshop evening on PSK31 and RTTY. Contact John, G8SEQ, on 07958 777363.

On Friday 29 July Lincoln Short-Wave Club commences its weekend event. participating in the IOTA contest. For more information contact Pam Rose, G4STO, on 01427 788356.

On Friday 29 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND In 1949, Walter Farrar G3ESP founded the Wakefield and District Radio Society. He passed away in 2010. On hearing of his passing, Wakefield society successfully acquired the transfer of his callsign, following extensive research by the

Secretary, Dr David Lockwood, G4CLI and the Chairman, Ken Quinn, 2E0SSQ. This transfer of an SK callsign has been used by many other clubs, such as the use of G2CP's callsign by the Scarborough Contest Group. Walter's callsign came about because of his love of the artificial language Esperanto. The Society hopes to keep his memory alive by regular use of his callsign on the air and wish to thank Rob Mannion G3XFD, Nigel Ferguson, G0BPK of the Pontefract and District ARS, Walter's son and executor, Paul Farrar OBE and the staff of the licensing centre of Ofcom for their assistance in achieving the transfer.

On Monday 25 July Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 25 July Bolton Wireless Club is holding an activity night. For details, send an email to boltonwireless@gmail.com.

SARL NEWS - SUNDAY 24 JULY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that it must be announced that the keys of two radio amateurs became silent recently. They are:

Reg Sweet, ZS5CO, about a month ago.

Freddie Calitz, ZS6JC, on 20 July after a period of ill-health. He was a long standing member of the Pretoria Amateur Radio Club.

Our sincere condolences go out to the relatives and friends of the deceased.

(PAUSE)

In the news today:

ALL ROADS LEAD TO DURBAN NEXT SATURDAY

BOB HEIL TO BROADCAST HAM NATION ON JULY 26 FROM THE QE2 RADIO ROOM

PRESIDENT'S NET TO DISCUSS IARU MOTIONS THIS EVENING

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

ALL ROADS LEAD TO DURBAN NEXT SATURDAY

Do not miss the SARL's Radio Technology in Action on Saturday 30 July. It will be held at the University of KwaZulu-Natal at the School of Electrical, Electronic and Computer Engineering. Registration is from 08:15. The full programme is available on www.sarl.org.za, select RTA in the left hand column. The cost is R60 including refreshments and a light lunch as well as participation in the draw for attendance prizes.

Students and learners under 25 attend free.

Bring a friend along and introduce him or her to the world of Amateur Radio.

BOB HEIL TO BROADCAST HAM NATION ON JULY 26 FROM THE QE2 RADIO ROOM

On Tuesday 26 July be certain to tune into Bob Heil, K9EID, show Ham Nation for its first live out of studio remote broadcast. Bob along with co-host Gordon West, WB6NOA, plan to originate from the historic radio room on board the famed Queen Mary ocean liner. This is a major Southern California attraction moored in Long Beach Harbour.

Their special guest will be Nate Brightman, K6OSC. Brightman is the person generally credited with first bringing the radio room to life as an operational amateur radio station with the call sign W6RO several decades ago. Ham Nation airs live on Leo LaPorte's Twit internet television network every Tuesday at 21:00 Eastern time. To tune in simply take your web browser to www dot twit dot tv and click in the tab marked "live." You can also see a replay of the show about 24 hours later by downloading the podcast at www dot twit dot tv.

PRESIDENT'S NET TO DISCUSS IARU MOTIONS THIS EVENING

The President and SARL delegates to the triennial IARU Region 1 conference invite your input to how the SARL should respond to the various motions to be discussed at the conference to be at Sun City from 12 to 19 August.

The President's net will be on the air this evening, Sunday 24 July from 19:30 on various repeaters and on Echolink. Martin du Preez, ZS6ZY, will also relay the net on 3 718 kHz.

Clubs wishing to join the network should send the telephone number to be linked to artoday@sarl.org.za before mid day today. Only Telkom landlines can be connected.

NEW MEMBERS

We this week welcome the following new members to the SARL:

ZS6JDR, Jerry De Ru ZSL1026, Rigardt Van der Spuy ZS5GLR, Gawie Le Roux and ZS6SCR, Francois de Wet.

We thank you for supporting the SARL and Amateur Radio.

The paid up membership reached 931 this week. As month-end approaches we encourage you to pay your subscription as soon as possible. Please ensure that if you pay by bank transfer or electronic transfer that you include your and call sign so that we credit your account without delay.

COMPETITION NEWS

DO NOT MISS THE BARK 40 METRE SUNDAY WINTER WARMER THIS ADTERNOON

The Boland Amateur Radio Club will be holding its 40 metre sprint contest today, Sunday 24 July from 15:00 - 18:00 CAT. This is a fun activity to promote contacts on 40 metres between radio amateurs in Southern African countries. It is also an ideal opportunity for Mobile stations, Field stations and RaDAR stations to participate. For more information go to page 60 of the SARL "Blue book" available on the SARL web.

SARL YOUTH SPRINT

The results for this competition are as follows:

1st with score of 119, Mitchell Mynhardt, ZS6YH, 13 years old 2nd with score of 99, Rechard Preston, ZU4RP, 11 years old 3rd with score of 98, Melissa Snyders, 10 years old

Theunis Potgieter wins an ARRL Antenna book for the amateur older than 25 who brought the most non amateurs for the contest on the air.

Lucky Draw Results:

ARRL Basic Antenna Book: Mitchell Mynhardt, ZS6YH Tiffany de Jager, ZU1PPG Hugo Coetzee, ZS3H

Lightning Predictor Kit Melissa Snyders

Remote Microphone Kits Devon de Jager Katelyn Bauermeister CJ van Jaarsveld

Free SARL Student Membership for a year Renier de Jager, ZU1K Elsa de Beer, ZU3EB Rechard Preston, ZU4RP Cilliers Schultz, ZU3CN Jannes Fleming, ZU3JF

CLUB NEWS

At the AGM of the Zululand Amateur Radio Club, held on the 10th July 2010 in Richards Bay, the following members were elected to serve on the committee of the club for the forthcoming year:

Chairman: John Kramer, ZS5J Vice Chairman: Andrew Jansen, ZS5AND Treasurer: Willie Axford, ZS5WI Secretary: Dawn Snyders, ZS5ME

Members: Jo Snyders ZS5PO, (News Editor)

Anne Griffith,s ZS5FAB

Thys v Rensburg, ZS5ZS

Warren Snyders, ZS5WOZ

Brian Utterson ,ZS5AE

We wish them well during their term of office, and thank the outgoing members for their hard work during their term of office.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at very low to low levels. Currently there remain three spotted regions on the face of the visible solar disk. Sunspots 1 251, 1 254 and 1 259 remain fairly quiet. There is a chance for C-Class flares.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be less than 40.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m. There is a chance of 15 m openings to South America.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 24 July - This afternoon, Boland Amateur Radio Club 40 metre sprint contest 15:00 - 18:00 CAT. 24 July - Tonight, President's Net at 19:30 CAT. 26 July - Transmissions from the QE2 starts. 27 July - 4th leg of SARL Club Competition. 30 July - RTA in Durban. 07 Aug. - SARL HF Phone Competition. 09 Aug. - SARL YL Sprint. 21 Aug. - 3rd leg of SARL Digital Competition. 28 Aug. - SARL HF CW Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 24th July 2011

EI DXCC List

An updated list of EIs on the DXCC list is now on the IRTS web site. The latest list, which shows quite a lot of movement in recent months, suggests that EI stations have been busy working and confirming DX. Many of the long-standing DXCC holders have claimed a significant number of new credits and we also have some new entrants to the DXCC list - the new ones being Tom EI9CJ, Charlie EI8JB and Tom EI4DQ.

Tom EI4DQ is the first and only EI with DXCC on 2 metres; to achieve this he worked and confirmed 110 DXCC entities on 2 metres, which is no mean feat! Worldwide, just over 60 radio amateurs have been awarded DXCC on 2 metres; with 110 entities confirmed, Tom is ranked 14th in this group.

Have a look at www.irts.ie/dxcc to see the full EI DXCC list.

IRTS 2 Metres Counties Contest

The IRTS 2m Counties Contest will take place Sunday 28th August 2011. The closing date for the submission of the log to the contest manager is 27th September 2011.

HF Newsreaders.

We wish to welcome Francis Lenane EI5GOB and George Donaldson EI7GKB as HF newsreaders. Francis is based in Waterford and George is based in Athlone thus ensuring a nice geographical spread. If there are any other operators who would like to read the news please contact Ger McNamara on 087 2532512 orei4gxb / at /gmail / dot/com.

South Dublin Radio Club

SDR members held a Field Day on Howth Head last weekend. One of the purposes of this exercise was to give the newer members of the club an opportunity to participate in setting up and operating portable HF and VHF stations. Most of the focus for the day was on the HF bands;

although no real DX was worked - despite valiant efforts by Tony EI7JN to work Yankee-Bravo (Indonesia) - the station had many contacts around Europe. The most enjoyable DX of the day was a contact on Phone and CW with Tony EI5EM, who was in Ye Olde Hurdy Gurdy Museum of Vintage Radio just down the road!

The North Cork Radio Group

The North Cork Radio Group is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477.www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 086-3357100 Email:ei7gtb/ at /gmail/dot/com as soon as possible. Please note the new contact number for table bookings.

Further details can be found via the group's website www.ei1nc.com

---

Limerick 2M Repeater QRV again.

The Limerick 2M repeater on 145.725 is now QRV again after being off the air due to vandalism at the repeater site. Limerick Radio Club are grateful for the many generous donations received from around the country, which have gone towards installation of a new security door. A new run of Hardline has also been installed from the hut to the mast.

The Joyce Country Challenge 2011,

Also known as the Finney walk, took place on Saturday 16th July. As usual the Galway Radio Experimenters Club, provided radio coverage for the event. This necessitated the strategic positioning of operators at several points along the walks of which there were three. Despite very bad weather the event passed off with no incident of note.

Inishbofin Island

The Galway Radio Experimenters Club annual dxpedition will take place from Sat 23rd -Sat 30th July. We will, as usual, be using the callsign EJ4GRC. All modes and bands will be in use. So if you hear us give us a call. Several club members will be staying the entire week with several

more dropping out for the unique 'Boffin experience.

The Dalkey Island Contest Group

The callsign EI1DD will be activated by members of the Dalkey Island Contest Group during the IOTA Contest on 30/31 July. This year the group will operate from the Cullen, Co Tipperary QTH of Gerry EI8CC. Team members are EI2CA, EI7CC, EI7CD, EI8BP, EI8CC, EI8CE and are joined this year by EI8KD better known as Norby LX1NO. The island reference number is EU-115 and calls from EI's will be very welcome.

Outside contest times Norby EI8KD/LX1NO is hoping to take advantage of his time in Ireland to operate from as many local Summits on the Air as is feasible. He was here before in 2008 when he used the call EI/LX1NO/P.

DX News

Hopefully by the time you hear this, the new DXCC entity of Southern Sudan will be on the air. Two international groups have teamed up to bring this new one to the waiting multitudes. The groups are the Intrepid-DX Group and the DX Friends. Members started arriving in Juba, the capital of Southern Sudan, on Wednesday 20 July to finalise the licensing arrangements. The callsign issued is ST0R (Sierra Tango Zero Radio) and it is hoped that the operation will start around 23 July. The International Telecommunications Union have not yet issued a callsign block to the new country and when this happens it is expected that the necessary amendment will be made to the licence documentation. In any event the DXpedition will last until 10 August so you have plenty of time to get this new one in the log.

Carsten DF1XC is in Barbados on holiday until 15 August. Look for him signing 8P9XC on the HF bands. QSLs go via the home call.

Prefix hunters will be interested in the special event station TC7EYOF which is on the air until 30 July. This is in connection with the 11th European Youth Olympic Festival being held in Trabzon, Turkey. QSL manager is YM7KA.

Frank DD0CW is active as JT1FDB from Ulaanbaatar in Mongolia. He will be there until early August and operates mainly in CW.

Japan to Remove Morse Requirement

The Japanese Ministry of Internal Affairs has decided to delete Morse telegraphy testing for its Amateur Radio Class 1 and 2 licenses with effect from October 2011. (Source: Practical Wireless August 2011)

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th-July, through Sunday, 24th-July there were 211 countries active. Countries available: 3A, 3B8, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J7, JA, JD/o, JT, JX, JY, K, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, S5, SM, SP, ST, ST0, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK9L, VP2V, VP5, VP8, VP9, VR, VU, XE, XT, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

17M INTERFERENCE RESOLVED. Chuck, W3ON, informs OPDX and its readers: "I just received an E-mail from the Laura at the FCC regarding the CW transmissions heard on 18085 kHz over the last several weeks, that the issue has been resolved. The FCC received a request from the ARRL, and others such as me, to investigate the transmissions. It found that the

transmissions were from a transmitter operating in the state of California. The FCC visited the radio site, and the transmissions ceased. Laura stated that the transmissions were inadvertent. No further details were furnished. When I checked this morning, July 22nd, the strange CW signals are gone. On a personal note, I am glad to hear that the FCC does react to requests sent by email. In my case, I received an E-mail within a few hours from Laura, at the FCC, that they had been contacted about the matter and were investigating the incident. This was my first attempt at writing to the FCC about anything. :) "

5X, UGANDA. Only a few more days to work Stewart, GM4AFF, as 5X1SF from Kampala. He will be going QRT on July 29th. Activity has been mainly on 20 meters at various times using CW and SSB. QSL via GM4FDM.

7P8, LESOTHO. Arnold, WB6OJB, will once again be active as 7P8JK from here between September 15-22nd. Activity last time was on the HF bands, 40-10 meters using mostly SSB with some CW. QSL direct to his home callsign.

9H, MALTA (Update). Jasper, PB2JJ, will be active as 9H3JN from Malta between September 2-14th. Activity will be on 80-10 meters, mostly CW and some SSB also. QSL via his home callsign.

EA6, BALEARIC ISLANDS. Jordi, EA3PT, will be active as EA6/EA3PT from Menorca Island (EU-004) between August 8-21st. Activity will be holiday style (at least 1 hour of the day) on 40/20/17/15/12/10 meters SSB only. He really likes 17 meters. QSL via LoTW or to his home callsign.

EI, IRELAND. Members of the Dalkey Island Contest Group will be active as EI1DD from the Main island of Ireland (EU-115) during the RSGB IOTA Contest. Operators mentioned are Paul/EI2CA, Peter/EI7CC, Sean/EI7CD, S&#xFFFD;amus/EI8BP, Ger/EI8CC, Aidan/EI8CE and Norbert/EI8KD/LX1NO. QSL only via the EI Bureau.

GB5/GW8, WALES (IOTA Op!). Members of the Barry Amateur Radio Society (B.A.R.S.) will be on Flat Holm Island (EU-124) for the RSGB IOTA Contest (July 30-31st). The B.A.R.S. group will on the island Thursday, July 28th, for 5 days. Prior to the contest, the callsign will be GB5FI. During the IOTA Contest they will use GW8K. QSL via GW0ANA. HISTORICAL NOTE: Glyn, GW0ANA, Chairman of B.A.R.S., informs OPDX that it was this island that Marconi came to in May 1897. He successfully transmitted a CW signal between Flat Holm in Wales to Brean Down in Somerset, England. Thus making this transmission the world's first DX and first IOTA DXpedition (as Marconi came from Italy to Wales).

GI, NORTHERN IRELAND. Operators Declan/EI9HQ, Ger/EI4GXB, Rory/EI4DJB, Peter/GI4VIV, GI0WHO and Victor/GI4ONL will be active as GI8P from Rathlin Island (EU-122) during the RSGB IOTA Contest (July 30-31st).

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013) during the RSGB IOTA Contest (July 30-31st). QSL via LoTW, or direct to GJ3DVC.

GM, SCOTLAND (IOTA & SCOTIA Ops!). Andre, GM3VLB, will once again try to activate some of the SCOTIA islands (SCOTtish Island Award) he missed last year during a 3 week DXpedition in September to the two IOTA groups -- Orkney (IOTA EU-009, SCOTIA OI14) and Shetland (IOAT EU-012, SCOTIA SI11) Islands. Here is his proposed "plan of action" in relation to Shetland. Andre only has 6 of the 26 designated SCOTIA islands still to activate. XYL Veronica and Andre will be in Shetland from early morning July 28th to late evening August 5th. It is his plan to attempt to activate all 6 islands. His proposed, "ideal" plan of action is as follows, but we must add that all will depend on the WX and availability of boatmen. As in previous attempts, there will almost certainly be changes to the plan. It is naturally impossible to suggest proposed start/finish times. Andre suggests that the best solution is to monitor 14257.5 kHz +/- QRM. He states, "There will be NO overnight/camping operation...I consider that at 73+, and after 15 years and 271 islands, I have "done my bit" in that respect...Where are the keen, young, activators ??!!" Planned schedule for Shetland is as follows:
July 28th - Papa Little (SI14); his 3 or 4th attempt!! Willing boatman, but no chance if winds come from a southerly direction.
July 29th - Balta (SI25); Friendly, willing boatman [took Alex and Andre to Linga (SI23) last year]... has to fit us into his working day..hopeful.
July 30th - Hascosay (SI21); Again, a willing boatman...skipper of an inter-island ferry... he'll do what he can to help..hopeful.
July 31st - Bigga (SI19); This is the big unknown...have seen no boats in the area, have no contacts, but will try everything. Andre may end up doing this one before SI21, if he sees an opportunity.
August 1st - West Linga (SI16); This needs to be tackled from Whalsay (SI15)...No problems (other than WX) anticipated...friendly fishermen on Whalsay...only WX dependent..Fairly certain he will spend Sunday and Monday nights on Whalsay in the old campervan, so Andre may well activate SI15 also, although this is not a prime target, as he has previously activated this one with Alex G(M)0DHZ.
August 2nd - Linga (SI17); No problem with this one. Willing fisherman; only WX-dependent, as ever...If not this day, then another. Certain!
These six are the main and final targets in SHETLAND (EU-012). Andre has allowed 3 extra days before sailing onwards to ORKNEY (EU-009), early evening on Friday, August 5th. WX-permitting, he hopes to take a short flight over to OUT SKERRIES on Thursday, August 4th (out at 0800z, back in at 1530z) - not a SCOTIA island, but (Andre hasn't told his XYL Veronica), he will take a rig and the "Islander" antenna, and beg for power...).
ORKNEY (EU-009): Andre's current plan is to be on Orkney from very late evening August 5th, until early morning August 18th. He has 9 SCOTIA "OI" islands on his "wanted" list - the last 9 to complete all 200 SCOTIA islands (assuming he is successful in Shetland). All, Andre can say is that he will attempt as many as possible. At the time of writing, Andre does not even have a proposed "plan of action" yet. He will be working on this

over the next few days. As Andre says, "I will try to activate as many as possible in the time available... Andre needs, and will target, Swona (OI01), Switha (OI03), Copinsay (OI12), Muckle Green Holm (OI20), Linga Holm (OI21), Eynhallow (OI24), Holm of Scockness (OI26), Faray (OI28) and Calf of Eday (OI29).

HK0/M, MALPELO ISLAND (Update OPDX.1010 & OPDX.1016). According to the HK0NA Web page <http://hk0na.com> three new members have been added to the DXpedition, and the team is now complete. The "Colombian Flora and Fauna" has approved the increase to 15 operators. The three new members are John/VE7CT, Manu/LU9ESD and Jerry/WB9Z, and they will join the team of Jorge/HK1R (Team Leader), Jahm/HK1T, Pedro/HK1X, Franz/DJ8ZB, Bolmar/HK1MW, Jaime/HK1N, Alexis/YV5SSB/6, Olli/OH0XX, Pedro/HK3JJH, Gregg/W6IZT, Dr.San/K5YY and Bob/K4UEE. Also approved this week is the start date of the DXpedition to begin on January 22nd, 2012, unless nothing extraordinary happens, as well as a list of equipment and all activities that will be realized on the island by the DXpedition team. During the second week of August (2011), there will be a final meeting between the "Colombian Flora and Fauna", Fundacion Malpelo, SEA WOLF vessel and the "Dxcolombia Amateur Radio Club" (DXARC) to workout the final details. They hope that they will have the written permit at the end of August or beginning of September. Also mentioned on the Webpage is that ELECRAFT Radios is a new sponsor for their DXpedition. For more details and updates, visit the HK0NA Web page at: http://hk0na.wordpress.com

IOTA NEWS (Remember the RSGB IOTA Contest is July 30-31st).....
IOTA CONTEST -- Complete details and can be found at:
http://www.rsgbcc.org/hf/rules/2011/riota.shtml

EU-011. Paul, I1RBJ, will be active as M/I1RBJ from Ynys Skaw Island during the whole month of August. Activity will be on all bands and SSB only. He may try to operate from the other Scilly Islets while there. QSL via F/I1RBJ: Gian Carlo Bavassano, 24 RUE SAINTE BRIGITTE, 83440 MONTAUROUX, FRANCE.

EU-017. Alex, IK8YFU, will be active as ID9/IK8YFU from Stromboli Island (WLOTA 1996, IIA ME-016, Grid JM78KN) between now and July 30th. Activity will be on 40-10 meters and 6 meters. QSL via IK8YFU. Log will be uploaded to LoTW. For more details, see: http://iva.arasitalia.it

EU-031. (Cancelled) Activity by the Italian team to activate IC8L from Licosa Island (IIA SA 001, ARLHS ITA 089, WAIL CA 020, WLOTA LH 3342) on July 24th, had to cancel due to adverse sea conditions. They hope to try again on August 8th. For updates and details, see: http://www.ic8l.com

EU-038/
EU-127. Alex, IZ4AMS, will be active from the following two islands in August:
Helgoland Island (EU-127) - DL/IZ4AMS between August 11-14th
Texel Island (EU-038) - Possibly PA/IZ4AMS between August

14-17th
Activity will be only on 20 meters SSB using just 100 watts
and a vertical antenna.

EU-055. Christian, LA8OM, will be active from Finn&#65533;y Island between
July 28-31st. Activity will include the RSGB IOTA Contest
(July 30-31st) as a Single-Op/CW-Mode/24-Hrs entry. QSL via
the Bureau.

EU-064. Operators Geoffrey/F4FVI and Chris/HB9ELV will be active as
TM0NOI from Noirmoutier Island between August 12-14th. Activity
will be on 40/20/10 meters using CW and SSB. QSL via F4FVI for
a Bureau QSL, and via HB9ELV for a direct QSL.

EU-068. Operators Bastien/F4EYQ, Jean-Francois/F4EYR and possibly
others will be active as F5KKD Sein Island (French Brittany)
during the RSGB IOTA Contest (July 30-31st).

EU-073. A group of Italian operators will be active as IJ7A from San
Pietro Island (Grid JN80NK)between July 29-31st. Operators
mentioned are Vin/IK7IMO, Roby/IK7VJX and Roberto/IK7XIV. The
team will be active on all HF bands except 160m using CW and
SSB. The activity will also include the RSGB IOTA Contest
(July 30-31st) as a Multi-Op entry. QSL via IK7IMO, by the
Bureau or direct. For more datails and updates, watch:
http://ij7a.altervista.org/blog[/h]

EU-095. Antoine, F5RAB, will be active as F5RAB/P from Ratonneau
Island (DIFM ME003) during the RSGB IOTA Contest (July 30-31st).
He will use 100w into a dipole. QSL via F5RAB.

EU-149. Juri, ES5GP, will be active possibly as ES4GP or ES4WK from
Island of Vaindloo (ARLHS EST 057) between July 27th and
August 3rd. Activity will be on 80-10 meters, as well as 6
and 2 meters, using SSB and the Digital modes. He will also
be on during the RSGB IOTA Contest (July 30-31st) as a Single-
Op/DXpedition/High-Power entry. QSL via the ES Bureau.

EU-166. Operators Giuseppe/IT9ATQ, Afio/IT9EJW, Giovanni/IT9GAC,
Andrea/IT9RKR, Sebastiano/IT9RYJ, Eugenio/IT9VKY, Dario/
IT9ZZO, Eugenio/IW9BCW, Davide/IW9GUR, Marcello/IW9HLI and
Andrea/IW9HQP will be active as IT9EJW/P from Lachea Island
(IIA CT-002) during the RSGB IOTA Contest (July 30-31st).
QSL via IT9EJW, direct or by the Bureau. For more detailed
information (about their 2010 op), go to:
http://www.it9ejw.it/lachea

EU-174. Laci/HA6NL will lead a Hungarian group to take part in the
RSGB IOTA Contest (July 30-31st) from Thassos Island, Greece,
this year. They will be in the village of Astris on the south
point of the island between July 27th and August 1st. Operators
and callsigns mentioned are Laci/HA6NL (J48NL), Sanyi/HA7JJS
(J48JJ), Laci/HA7PL (J48P) and Andor, SV8/HA5AOP. QSL via their

home callsigns, by the HA Bureau or direct.

EU-174. Laci, HA0NAR, will be active as SV8/HA0NAR on Thassos Island between July 25th and August 1st. His QTH is on Skala Rachoni which is situated on the north-west "corner" of the island. Activity will include the RSGB IOTA Contest (July 30-31st) using the callsign SX8R. QSL via HA0NAR.

EU-181. Operators Stan/LZ1GC, Dechko/LZ1QV, Boyko/LZ1QN, Boris/LZ2JR, Nasko/LZ3YY and Todor/LZ5TS will be active as LZ0I from Sveti Ivan Island between July 29-31st. Activity will include the RSGB IOTA Contest (July 30-31st). QSL via LZ0I (by the QRZ.com address) or by the Bureau to LZ1BJ.

EU-185. Victor, R6AF, will be active as R6AF/P from Sudzhuk Island during the RSGB IOTA Contest (July 30-31st) as a Single-Op/ All-Band/DXpedition/High-Power entry. QSL via his home callsign.

NA-126. Operators Helen/VA1YL, Rich/VA1CHP, Bill/VE1MR, Lynn/VE1ENT, Lowell/VY2OX, Bill/VE3NNQ, Al/VO1NO and Fred/VE1FA will be active as VX1D from Bon Portage (Outer) Island (CISA NS-128) between July 26th and August 1st. This is a special event callsign issued to commemorate the 150th anniversary of the first lighting of the Cape Sable Island lighthouse in 1861. Activity will be on 80-6 meters using CW, SSB and possibly RTTY. During the RSGB IOTA Contest (July 30-31st), look for the team to use the callsign VC1D. QSL both callsigns via VE1DHD.

NA-136. Adam, W1ASB, will be active as W1ASB/P RaM (Shea) Island during the RSGB IOTA Contest (July 30-31st). Activity will be on 80-10 meters. QSL via W1ASB, For more info, see QRZ.com.

NA-152. (Op Cancelled!) Chuck, KL7OH, planned to activate Sarichef Island between August 1-15th, "due to lack of funds & pro-pagation". Chuck states, "a valiant effort will be made for 2012".

SA-046. Members of Casa do Radioamador de Pernambuco (CRAPE) will once again be active as PY7CRA/p from Itamaraca Island (DIB-018) during the RSGB IOTA Contest (July 30-31st). Activity will be on all HF bands using CW and SSB. QSL via PY7CRA, direct or by the Bureau. Visit their Web page at: http://www.crape-py7cra.com.br

SA-095. (Update) Operators Cezar/VE3LYC and Dino/CE3PG have embarked on a project to activate Pupuya Islands as CE4A at less three days during the second half of November (dates mentioned - between Novembver 20-23rd. Please note that these days can slip in case of bad weather conditions). The operation will take place under the auspices of the Radio Club de Chile. Given the difficulties associated with operating from Pupuya Islands, various contingencies will be considered, including radio

equipment, power, transportation, landing, and camping.
Activity will be on 40/30/20/17 meters using CW and SSB.
The team will attempt to operate around the clock, looking
for propagation windows to every region of the world. They
are looking intensely for interested groups and enthusiastic
individuals willing to support this project. QSL via VE3LYC,
PLEASE see the Web page for details. The DXpedition's Web is
at: http://ce4a.yolasite.com

JD1, MINAMI TORISHIMA. Take, JG8NQJ, is now active as JG8NQJ/JD1 from
Marcus Island in the Minami Torishima (OC-073) group until mid-October
2011, but will return again in December. Present activity has been only
30 and 17 meters. However, when Take returns to the island at the end
of the year, he will be active on all bands. QSL via his home callsign,
by the Bureau or direct to JA8CJY: Susumu 'Sin' Sanada, 5-17, 5-4,
Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is available at:
http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

JD1, OGASAWARA. Makoto, JI5RPT, will once again be active as JD1BLY from
Chichijima Island (AS-031), Ogasawara, between August 1-7th. Activity
will be on 40-6 meters, including the satellites, using CW, SSB and the
Digital modes (NO 6m EME). QSL via his home callsign JI5RPT. His log
search will be available on his Web site at: http://www.ji5rpt.com/jd1
He will also use Twitter to inform his real-time activities at:
http://twitter.com/jd1bly

KH6, HAWAII. Jim, N6TJ, will be active as KH6LC from Keaau (Hawaii
County, Grid Square: BK29), during the CQWW DX SSB Contest (October
29-30th) as a single-Op/All-Band entry. QSL via LoTW or direct to
QSL Manager WA6WPG.

KH6, HAWAII. Dave, WJ2O, will be active as KH6/WJ2O between November
23-30th. Activity will be in the CQWW DX CW Contest (November 26-27th).
Outside the contest, look for Dave on the 30/17/12 meter bands. QSL
via WJ2O.

KH6BZF PROPAGATION FORECAST/REPORT (July 25-31st)....
Jul 25 AN SOLAR REFERENCE KEYS
Jul 26 AN --------------------
Jul 27 AN BN - Below Normal
Jul 28 HN AN - Above Normal/Geomagnetic Level is QUIET
Jul 29 HN LN - Low Normal
Jul 30 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 31 HN-AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LIGHTHOUSE ANNOUNCEMENTS.....
GS2UG - Geoff, G0PFH, will activate three lighthouses this week as GS2UG in Scotland. His updated itinerary for this coming week is as follows:
July 26th - Southerness Lighthouse (SCO-223)
July 27th - Killantringan (or Black Head) Lighthouse (SCO-111)
July 28th - Port Patrick Lighthouse (SCO-177)
Geoff will be on the air between 1100-1600z all three days. Suggested frequency will be 14255 khz or above, depending on the QRM. QSL via G0PFH, by the Bureau or direct (see QRZ.com). Watch QRZ.com under GS2UG for more information and updates.

KD4QIT/LH - Jeff, KD4QIT, will be active from the New Point Comfort Lighthouse (USA 543) in Matthews County, VA, for 6 hours between 1300-1900z on August 4th. Activity will be on 40/20/15 meters using SSB and PSK31. All QSOs will be uploaded to LoTW and eQSL. Paper QSL are available direct.

PG6HK - During the International Lighthouse and Lightship Weekend (August 20-21st) the special callsign PG6HK will be on the air and will be active from the old lighthouse in Harderwijk [aka De Vischpoort](NL0038, NET-162), Netherlands. The team will be active on several modes on HF and VHF. Operators mentioned are Cil/PA1RBZ, Gert/PA2LO, Michel/PD0JMB, Ben/PD0PDB and Jack/PD2J. QSL via PA2LO. For more details, see: http://www.PG6HK.com

W7KXB - Bill, W7KXB, will activate Patos Island Lighthouse Station (ARLHS USA-584, ILLW USA-123) in Washington for the first time ever August 6-7th. QSL via his home callsign.

MU, GUERNSEY (Update). Members of the Dutch Contest and Expedition team (PA6Z) will be active as MU/PA9M from Guernsey (EU-114) between October 23-30th. Activity will be on 160-6 meters using CW and SSB. Operators mentioned are Marcel/PA9M, Frank/PA4N, Jelmer/PA5R, Dervin/PD9DX, Arbo/PH0AS, Arend/PA2AWU and Dick PA4VHF. QSL via PA9M, direct or by the Bureau. For more details and updates, go to: http://www.pa6z.nl/guernsey2011

NP3, PUERTO RICO (NA-099). Sergio, NP3QE, will be active during the RSGB IOTA Contest (July 30-31st) as a Single-Op/Single-Band (20m)/SSB-Mode/Low-Power/12-Hrs entry. QSL via his home callsign.

OY, FAROE ISLANDS (EU-018). Carsten, OY1CT, will be active during the RSGB IOTA Contest (July 30-31st). QSL via direct (see QRZ.com for details).

PJ7, ST. MAARTEN. Isao, JH1ROJ, will be active possibly as PJ7ROJ from Sint Maarten (NA-105) between August 18-25th. Activity will be on all HF bands using CW and SSB. He will use a FT-450 with a 500w amp into a HF6V and 2 element beam for the higher bands. QSL via his home callsign. Log will be uploaded to LoTW after the operation.

QRP DXCC STANDING LIST. Lee Hiers, AA4GA, states, "Since the ARRL only issues QRP DXCC certificates, but does not maintain official standings boxes for QRP, and because I couldn't find such a standings box elsewhere,

I've decided to maintain a list on my Web site at: http://www.aa4ga.com
Interested QRP DXers are invited to click on the 'QRP DXCC' link on my
site and submit their information to me for inclusion. Hopefully over
time, it will serve as valuable inspiration for other QRP ops."

9V1YC QSL STATUS/UPDATE. QSL Manager Randy, W5UE, reports, "I received
log updates from James for QSOs between 17 April and 22 July today. I
am processing the backlog received since mid-April this weekend. Should
be in the mail Monday. Sorry for the delay."

NEED A QSL MANAGER? John, N5ER, is willing to serve as a QSL Manager
for a DXPEDITION or a couple of DX Stations in need. If interested,
feel free to ask him him by dropping an E-mail to:
n5er@arrl.net --or-- jclark@brownjanitorsupply.com

OLD QSLS AVAILABLE. Jean-Michel, F6AJA, reports, "Maybe someone still
wants a card for FT5ZB, FT0ZB and/or FT2XE from 1988. The LNDX has
printed a small batch of cards and you can send a request (direct
or by the Bureau) to F3CJ: Joel Cathelain, 4 hameau des Tilleuls,
Les Antennes, F-62118 Pelves, France.

QSL RECEIVED VIA LoTW: 5X1VB, 5Z4/UA4WHX/A, 8P9NX, CR6K, HK1X, PJ4LS,
PT7CB, PV8ADI, PY2WC and ZS8MI

QSLS RECEIVED VIA MAIL: 4A4A, 5Z4FM, 9L5MS, HZ1FI, LZ2WO, S21YZ,
T6AF and TO2FH

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

ST0, SOUTH SUDAN (Update). Amateur radio is now active in the South Sudan,
the world's newest country, as well as the 193rd member of the United
Nations and new DXCC entity. First signals were heard on July 22nd.
Co-leader Paul, N6PSE, reported on July 23rd, that the teams arrived in
Juba on July 22nd. He states (edited), "We have now been QRV for 23 hours
on CW and SSB. We are putting more antennas and stations on the air today.
Our hotel's internet is broken so it is difficult to communicate to the
outside world at this time other than via radio. More information to
follow. All stations should be QRV tomorrow (July 24th) until August
10th. They hope to have five stations on the air operating simultaneously
in the coming days. They announced on the 24th that the a new TX frequency

for 20 meters is 14145 kHz, RX from 14200 kHz and up. For more details and updates watch: http://www.dxfriends.com/SouthernSudan2011
As this was being prepared, their logs showed (at 1112z, July 24th): 9695 QSOs with 4796 unique callsigns. QSL via EA5RM direct. Their OQRS will be activated after the DXpedition. Online log is available on the Web page.

SV5, DODECANESE. Stathis, SV5DKL, will be active from Rhodes Island (EU-001) during the RSGB IOTA Contest (July 30-31st) as a Single-Op/ CW-Mode/24-Hrs entry. QSL via LoTW or direct (QRZ.com).

T6, AFGHANISTAN. Francesco, IZ8NWA, an Italian soldier stationed in southern Afghanistan until November 2011, is expected to be active as T6FR. Activity will be on 20/17/15/10 meters using SSB and PSK31. QSL via IZ8OJG only. Visit his Web page at: http://iz8nwa.jimdo.com

VK9L, LORD HOWE ISLAND. Members of the Hellenic Amateur Radio Association of Australia are now active from Lord Howe Island (OC-004) as VK9HR until August 2nd. Activity by the international team of operators will operate CW, SSB and RTTY, and on 160-6 meters. QSL via EB7DX. The operation's Web site is: http://www.vk9hr.com

W9DXCC CONVENTION. The Midwest's best known DX convention, W9DXCC, will be held this year on Friday and Saturday, September 16-17th, at the Holiday Inn in Elk Grove Village, IL. The hotel is conveniently located just west of O'Hare International Airport and just off Interstate 90 and offers a free airport shuttle and a low room rate of $89 plus tax. This year's programs includes VP8ORK South Orkney, CY0 Sable Island, a report on K9CT's new 11-tower contest station, propagation by K9LA, and the banquet speaker is ARRL President Kay Craigie, N3KN. The audio/visual setup is top notch, making it easy to see and hear the programs. The convention opens at 7:30 PM Friday evening with registration/packet pick-up and a welcome reception, followed by a hospitality suite hosted by the Northern Illinois DX Association. The Saturday activities run from registration at 8:00 AM through the banquet at 6:30 PM and another hospitality suite hosted by the Greater Milwaukee DX Association. Complete details are available on the Web site at: http://www.w9dxcc.com
PLEASE NOTE: They will not be mailing flyers and registration forms this year. Please save a copy of this announcement and register on the Web site. You can pay by check or, new this year, by PayPal for your convenience. Ticket discounts are available for registrations received by September 10th.

ZB2, GIBRALTAR. Astronaut Edmondo, VA3ITA/IW0GVP, will be active as ZB2/VA3ITA from Gibraltar between August 8-11th. Activity will be on 6 and 2 meters only, using CW, SSB, the Digital modes and the satellites. Edmondo is willing to make skeds. Please check his QRZ.com page for his E-mail address and updated information. QSL via VA3ITA, direct or by the Bureau.

+ ARRL Board of Directors Holds 2011 Second Meeting

The ARRL Board of Directors met July 15-16. Highlights of the meeting
include:
* After hearing a comprehensive progress report, the Board
authorized the staff to continue planning to publish an electronic
edition of _QST_ as a benefit to ARRL members at no additional
charge.
* Committees were created to review the ARRL Band Plans for the
amateur bands between 902-3500 MHz, to plan the program of
activities for the ARRL's Centennial in 2014 and to seek input
from youth and others to improve outreach to young Americans.
* The Board welcomed the opportunity for ARRL involvement in the
Seventh World Radiosport Team Championship, to be held in New
England during the ARRL's Centennial Year.
* The Board accepted a recommendation to change the name of the RTTY
```

DXCC Award to Digital DXCC.

A more detailed report of the meeting will be distributed when the minutes are released. If you would like to receive a copy of the minutes via e-mail, please go to "Edit your Profile" on the ARRL website, click on "Edit Email Subscriptions" and check the box labeled "ARRL Board meeting agendas and minutes." The minutes will also be available for download from the website in the coming days.
+ _Amateur Radio in Space_: NASA's Space Shuttle Program Comes to an End

The space shuttle _Atlantis _lands for the final time at NASA's Kennedy Space Center in Florida. Click here for a larger image. [Photo courtesy of NASA]

As _Atlantis_ once again touched the Earth in Florida on Thursday, July 21, an era came to an end. This era saw dreams realized when men and women could go into space on a craft -- the space shuttle -- that could be used again and again. NASA's space shuttle fleet has set dreams aflight since its first launch on April 12, 1981, starting with _Columbia_ and continuing with _Challenger_, _Discovery_, _Atlantis_ and _Endeavour_. These crafts have carried people into orbit repeatedly, launched, recovered and repaired satellites, conducted cutting-edge research and transported materials to help build the largest structure in space, the International Space Station.

Barely 30 months after _Columbia_ first lifted to the skies, radio amateurs around the world were excited about another first: a ham in space. It was 1983 -- the third year of the space shuttle program -- and Mission Specialist Owen Garriott, W5LFL, was on board _Columbia_ for mission STS-9. NASA had given Garriott permission to attempt radio contact with Amateur Radio operators on Earth during his free time. Read more here.

+ _Public Service_: ARRL Soliciting Stations to Become Emergency Liaison Stations

During the 2008 hurricane season, ARRL Headquarters instituted a Command-Control-Coordination (C3) operation to support operations taking place in the affected ARRL Sections. One requirement was the need for Headquarters to establish radio links into the affected areas. In the summer -- the height of hurricane season -- 75 meters is noisy and doesn't propagate well during the day and hindered W1AW's reach into these areas. As such, the nets on 40, 75 and 80 meters -- while providing excellent coverage of several hundred miles in the impacted areas -- did not allow W1AW to monitor these frequencies, nor did it permit monitoring of developing conditions that would allow Headquarters staff to maintain a higher level of situational awareness and disaster intelligence necessary for support operations.

ARRL West Gulf Division Director David Woolweaver, K5RAV, offered his EchoLink system to ARRL during the 2008 hurricane season. Woolweaver

-- who had good propagation into the impacted areas during the tropical events in the Gulf of Mexico area -- established a connection between his home HF equipment and EchoLink. By connecting in to this, W1AW was able to use a direct EchoLink connection to Woolweaver's home station, enabling W1AW to come up on these HF frequencies. With EchoLink, the ARRL was to maintain contact between the affected areas and with the National Hurricane Center and VoIP Hurricane Net operations.

The need to build out the capability to link HF stations to EchoLink was clear and Woolweaver began to enlist other stations in Texas to develop it. But according to ARRL Emergency Preparedness Manager Mike Corey, W5MPC, it has been an ad hoc effort with known stations with no official standing for emergency communications with the ARRL. Additionally, while a regional capability was developed in a part of Texas, the ARRL needed to have this capability throughout the rest of the country.

The concept of the _Emergency Radio Internet Linking System_ (ERILS) was crafted to meet this need, with ERILS stations operating under the ARRL Emergency Preparedness Program. Stations would be designated Official ERILS Stations after meeting specific criteria that would enable them to blend the capabilities of radio and the Internet, permitting emergency communications and a W1AW presence to occur. Stations would be geographically diverse, providing redundant pathways into multiple areas of the United States. While EchoLink was used successfully in 2008, other current and future software platforms could be used with traditional RF capabilities to meet the mission needs.

"Individual stations are the key component of ERILS," Corey explained. "These stations require a particular designation for planning and response purposes, and as recognition of the station owner's resources and commitment. These stations are designated as an _Emergency Liaison Station_. An ELS is not an Official Emergency Station (OES) that is part of the ARES® program, but is a separate resource available to the Emergency Preparedness Manager, or designees, and the ARRL Leadership." To find out more, including information on your station can be part of the ELS program, click here.
+ One Ham Killed, Another Seriously Injured in Tower Accident

Hot Springs is located in the southwest corner of the state, about an hour's drive south from Rapid City.

As a group of South Dakota hams were dismantling a 110 foot tower outside of Hot Springs on Saturday, July 16, a gust of wind toppled the final section, trapping two local hams underneath. Tim Anderson, K0OR, 54, and Tom Embree, NC0K, were transported to Rapid City Regional Hospital via helicopter, where Anderson died of his injuries. Embree underwent surgery on Sunday and Wednesday; he remains in serious condition. Both are members of the Hot Springs Amateur Radio

Club; Anderson was the club's president. Hot Springs is located about 57 miles south of Rapid City. Read more here.
Ad
+ Newly Licensed Hams Help with Search for Missing California Man

Derrick Rush Rush vanished when he fell off his inner tube in the Kern River about 50 miles northeast of Bakersfield.

After Derrick Rush -- a 28 year old state corrections officer from Arroyo Grande, California - disappeared on July 9, several state agencies and volunteers began searching for him. According to reports, Rush vanished when he fell off his inner tube in the Kern River about 50 miles northeast of Bakersfield. Clayton Cullen, KJ6PYC, and his son CJ Cullen, KJ6PYD, of Paso Robles, joined the search efforts on July 13. Three days later, CJ spotted Rush's lifeless body floating by in the river and used his handheld transceiver to report it. His father was able to secure the body farther down the river. Read more here.
Solar Update

The Sun, as seen on Thursday, July 21, 2011 from NASA's SOHO Extreme Ultraviolet Imaging Telescope. This image was taken at 304 Angstrom; the bright material is at 60,000 to 80,000 Kelvin.

Tad "I want to be the one to walk in the Sun" Cook, K7RA, reports: The average daily sunspot numbers for the week rose nearly 27 points to 92.4, while average daily solar flux increased more than 9 points to 98.2. The latest prediction has solar flux values at 100 for July 21-23, 98 on July 24-28, 90 on July 29-August 2, 95 on August 3-7, 98 on August 8, and then back to 100 on August 9-16. The planetary A index for July 21-23 is predicted at 15, 12 and 8, then 5 on July 24-28, 8 on July 29-31, then 10, 8, 5 and 8 on August 1-4, 12 on August 5-7, and back to 8 on August 8-10. Look for more information -- including more about astrophysicist Douglas Biesecker's analysis and critique of predictions for a grand solar minima -- on the ARRL website on Friday, July 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page. This week's "Tad Cookism" is brought to you by Cyndi Lauper's _Girls Just Want to Have Fun_.

+ _Social Media_: ARRL Launches Online Forums

To assist League members in communicating with one another and with ARRL staff on topics of common interest, the ARRL has established three forums -- Contesting, Awards and Technology -- on the ARRL website. Visit _www.arrl.org/forums_ to chat with fellow hams about these topics. Additional forums are planned once we have gained some experience with these three. ARRL members, guest users and others can view the threads, but in order to participate in the conversations or ask questions, you must be logged in as an ARRL member. All users should read the forum rules before participating.
+ _Social Media_: Connect with ARRL and Amateur Radio via Social Media

ARRL participates on many of the popular social networking sites to share news, photos, events and videos. Check out these sites for communities of ARRL members who share your interests in Amateur Radio. We'll share everything with you -- and you can share with us, too!__

Find Us on Facebook

* _www.facebook.com/ARRL.org_ -- With almost 20,000 fans, the ARRL's Facebook page is the largest Amateur Radio site in social media.
* _www.facebook.com/LogbookOfTheWorld_ -- A nifty way to follow the latest LoTW news. LoTW is an exciting way for radio amateurs to confirm two-way contacts they have made and use the confirmations as credit toward various ARRL awards.

___Follow Us on Twitter_

* _arrl_ -- Find all of the latest information in the Amateur Radio community with this Amateur Radio newsfeed.
* _ARRL_EMCOMM_ -- Interested in Emergency Communications? Then be sure to follow all the latest EmComm and ARES® happenings.
* _ARRL_PR_ -- Geared toward the ARRL Public Information Coordinators and Pubic Information Officers in the League's Field Organization, this Twitter feed focuses on public relations and media issues involving Amateur Radio.
* _ARRL_DXCC_ -- The Twitter home of the ARRL's DXCC awards program.
* _ARRL_Youth_ -- For the young and young-at-heart, this Twitter feed delves into how youth can have fun with Amateur Radio.

___Watch Us on YouTube_

* _www.youtube.com/ARRLHQ_ -- Catch the latest videos from the ARRL - including monthly Product Reviews and event highlights -- on the League's YouTube channel.

Listen to Us on iTunes
* _www.arrl.org/arrlletter/audio/aan.rss_ -- Listen and download the latest ARRL news, uploaded as a podcast to iTunes. Click here for instructions on how to subscribe to this weekly feature.

This Week on the Radio

Go behind the scenes and meet a member of the ARRL HQ staff! This week we feature ARRL Field Organization Supervisor Steve Ewald, WV1X. Click here and scroll down the page to the "Meet the Staff" video box to meet Steve.

This week:
* July 22 -- NCCC Sprint Ladder
* July 24 -- WAB 144 MHz QRO Phone
* July 27 -- SKCC Sprint
* July 27-28 -- CWops Mini-CWT Test

Next week:
* July 29 -- NCCC Sprint Ladder

* July 30-31 -- RSGB IOTA Contest; US Counties QSO Party
* July 31 -- ARS Flight of the Bumblebees
* August 2 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page, the ARRL Contest Update and the WA7BNM Contest Calendar for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page.
Upcoming ARRL Section, State and Division Conventions and Events
* July 29-30 -- ARRL Oklahoma State Convention, Oklahoma City, Oklahoma
* August 5-6 -- ARRL Texas State Convention, Austin, Texas
* August 5-7 -- ARRL Rocky Mountain Division Convention, Taos, New Mexico; ARRL Midwest Division Convention, Cedar Rapids, Iowa
* August 20 -- ARRL West Virginia State Convention, Weston, West Virginia
* August 20-21 -- ARRL Alabama State Convention, Huntsville, Alabama
* August 21 -- ARRL Kansas State Convention, Salina, Kansas
* August 28 -- ARRL Western Pennsylvania Section Convention, New Kensington, Pennsylvania
* September 9-11 -- ARRL Southwestern Division Convention, Torrance, California
* September 11 -- ARRL Great Lakes Division Convention, Findlay, Ohio
* September 17 -- ARRL Roanoke Division Convention, Virginia Beach, Virginia
* September 24 -- ARRL Washington State Convention, Spokane Valley, Washington

# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
18 - 24 July 2011

Solar activity was at very low to low levels during the period. The
summary period began at low levels, when Region 1254 (S24, L=136,
class/area Cso/110 on 20 July) produced the largest event of the
period, a C1/Sf flare at 1028 UTC. On 19 July, solar activity
decreased to very low levels and remained at these levels for the
rest of the summary period. Even though numerous regions were
numbered and tracked during the summary period, all regions either
remained stable and quiet, producing low level B-class events, or
diminished to spotless plage.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels from 18-19 July. High levels were observed
for the remainder of the period, 20-24 July, in response to a
coronal hole high speed stream (CH HSS).

Geomagnetic activity ranged during the period between quiet to minor
storm levels, with a few isolated major storms occuring at high
latitudes due to coronal hole high-speed stream effects. Early on 18
July, quiet to unsettled levels were observed due to a solar sector
boundary crossing (SSBC), as the Earth moved from a positive to a
negative polarity region of the IMF. On 19 July, measurements from
the ACE spacecraft indicated the onset of another CH HSS while
geomagnetic levels also increased to mostly active coniditions at
mid latitudes. On 20 July, quiet to active levels were again
observed with an isolated major storm period occuring at high
latitudes between 0900-1200Z. Conditions on 21 and 22 July were also
observed at quiet to unsettled levels on both days. On 22 July,
conditions included a major storm period observed at high latitudes.
A return to quiet to unsettled levels was observed on 23-24 July, as
effects of the CH HSS finally deminished.
```

Forecast of Solar and Geomagnetic Activity
27 July - 22 August 2011

Solar activity is expected to be at very low to low levels during the forecast period. However, there is a chance that new, rapidly emerging flux regions could increase activity to moderate levels at any time during the outlook period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to start the period at moderate to normal levels on 27 - 30 July, before increasing to high flux levels on 31 July - 02 August, as the result of elevated solar winds from a CH HSS. Moderate to normal levels are expected from 03-06 August after solar winds subside. A return to moderate to high levels is expected 07-13 August and once again from 16- 22 August as the result of two solar wind speed increases from two more coronal holes.

Geomagnetic activity is expected to be at quiet levels on 25 July. Quiet to unsettled levels are expected from 26 - 27 July as another CH HSS becomes geoeffective. A return to mostly quiet conditions is expected on 28 July. Quiet to unsettled levels are forecast on 29-31 July as a northern polar CH HSS extension moves into a geoeffective position. Afterwards, quiet levels are expected to prevail between 01 and 04 August. Conditions are expected to increase again, ranging from quiet to active levels 04-11 August as another recurrent CH HSS is expected. Mostly quiet conditions should return 12-14 August before the next CH HSS is expected 15-19 August, when unsettled to active conditions return. A brief retreat to mostly quiet levels is expected on 20 August before the period finally ending with mostly unsettled to active conditions as yet another recurrent CH HSS becoming geoeffective 21-22 August.

682. [DXNL] DXNL 1738 (Jul 27, 2011)

(e-mail: dl7voa@darc.de)

CE0Y, EASTER ISLAND, SA-001
Frank,CE0Y/I2DMI, will be active only in RTTY between Jul 30 and Aug 8
on following preferred frequencies: 3.592, 7.042, 14.082, 18.102,
21.092, 24.922 and 28.092 MHz. His equipment includes a TS-480HX,
a TS-480SAT, a power amplifier, a trap vertical (I1UJX) and a dipole
for 3.5 MHz. QSL via homecall.
There is also an online survey about needed bands on his website:
http://www.mdxc.org/ce0yi2dmi/index.htm

F, FRANCE
The special event station TM2CV is working from the 19th World Meeting
of the 2CV friends in Salbris from Jul 26-31. QSL via F6KJX.

The clubstation TP2CE of the European Council (http://ewwa.free.fr)
will be active with the special call TP50CE once again from Jul 29-31.
QSL via F5LGF.

G, ENGLAND, EU-005
The Cestrian Scout Group from Chester is going to hit the airwaves on
10/12/15/17/20/40/80m signing GB2COS from Jul 29-31. This activity
takes place during the 22nd World Scout Jamboree in Sweden.
QSL via G7BQY.

JD1, OGASAWARA ISLAND, AS-031
Makoto,JI5RPT, will be QRV again as JD1BLY from Chichijima Island/
Ogasawara (AS-031) from Aug 1-7. He is working in CW, SSB and digital
modes on 40m-6m and via satellites (no 6m EME). QSL via homecall.
A logsearch will be available on his website: http://www.ji5rpt.com/jd1
He has also an own twitter site at: http://twitter.com/jd1bly

KH8, AMERICAN SAMOA, OC-045
Ron,WA8LOW, and others will operate with high power stations in CW,
SSB, RTTY and PSK on 160m&#65533;6m from Tutuila (OC-045) between Jul 30 and

Aug 14. QSL direct via WA8LOW.

LZ, BULGARIA, EU-181
Stan,LZ1GC, Dechko,LZ1QV, Boyko,LZ1QN, Boris,LZ2JR, Nasko,LZ3YY, and
Todor,LZ5TS, will be QRV as LZ0I from Sveti Ivan Island (EU-181) from
Jul 29-31, including the IOTA Contest. QSL via LZ1BJ.

OH, FINLAND, EU-140
Jari,OH1JO, will show up as OH1K from Kaunissaari Island (EU-140)
mainly on 20m from Jul 28 until Sep 4. QSL via homecall.

SM, SWEDEN
The special event station SJ22S (http://sj22s.simplyscouting.se) will
be active from the 22nd World Scout Jamboree near Rinkaby in Sweden
between Jul 27 and Aug 7. 40 HAMs from all over the world will activate
this call 24 hours 7 days a week.

SV5, DODECANESE, EU-001
SV5BYR, SW5KKR and a group from Crete will take part in the upcoming
IOTA Contest as J45K from Kasos Island (EU-001, KM35kj). They will
work on HF, 6m/4m/2m and also 1,2 GHz starting on Jul 27.
QSL via SV9DJO and LotW.

UN, KAZAKHSTAN
Mike,UN8GC, and his friends will be QRV as UQ44Q from the Kolsay Lakes
national park from Jul 29-31. More information at: http://uq44q.com
QSLs will be sent automatically via GlobalQSL, so no QSLs necessary!

UR, UKRAINE
R3CJR, UR3GO, UR5GDX, UR8GX and UT7CL are working in CW/SSB on 80m-10m
from the Kalanchakskiye Islands (EU-179) between Jul 26 and Aug 3.
QSL via UR8GX.

Bogdan,UT7UU, is activating the special event station EO2011U during
the F1 Powerboat Grand Prix in Vyshgorod in SSB, CW, RTTY and PSK 31/63
on HF from Jul 25 until Aug 5. QSL via UT7UU.

V6, MICRONESIA
If you still need Kosrae (OC-059) listen for V63FAA from Jul 25-29.
His next stop will be Pohnpei (OC-010) from Jul 30 until Aug 5.
He is working "holiday style" in SSB and CW mainly on 40m and 20m.
QSL via LOTW or direct to W6ANM.
More information available at http://home.comcast.net/~v63faa-2011/site

VE, CANADA, NA-198
VO1/VE9MY, VO1/VE9GLF and VO1/VO1DK are expected to hit the airwaves
from Little Bell Island (NA-198) this week. Operation takes place on
20m between 1400 and 2000 UTC. QSLs via homecalls.

W, USA, NA-067
Jon,WB8YJF/4, is working in CW, RTTY and SSB on 80m-10m from
Ocracoke Island (NA-067) from Jul 24&#65533;31, including the IOTA Contest.
QSL via homecall.

ZB2, GIBRALTAR
Astronaut Edmondo,VA3ITA/IW0GVP, will be QRV as ZB2/VA3ITA from the rock Gibraltar from Aug 8-11. Activity will take place in CW, SSB, digital modes and via satellites only on 6m and 2m. Edmondo is also willing to make skeds. More information and his e-mail address can be found on QRZ.com. QSL via VA3ITA.

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 30-31: RSGB IOTA Contest

WFF Activities

DLFF-057: DL0WFF will activate the special DOK WFFDL from Jul 30 until Aug 13. QSL via DARC bureau. See also: http://www.wff-dl.de

EAFF-040, EAFF-041: EA5ENT (CW) and EA5TW (SSB) will be active on the HF bands from the Ordesa y Monte Perdido Natural Park and the Ordesa-Vinamala Biosphere Reserve from Aug 1-7. QSL via EB5HRX.

LZFF-077: LZ05WFF is working from "Baltata" in CW and SSB on all HF bands until Aug 8. QSL via LZ1BJ (bureau/direct).

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-001, SV5, Dodecanese: SV5/DJ4MH is working in SSB on 10m/15m/20m from Kos between Jul 26 and Aug 8. He will take part in the IOTA Contest for a few hours as well. QSL via DJ4MH (bureau/direct).

EU-042, DL, Schleswig-Holstein State North West group: OM Volker,DL1WH, will be active from Amrum (GIA/DID N-18) from Jul 28 until Aug 5. QSL via DL1WH (bureau/direct).

EU-068, F, Sein Island: F4EYQ, F4EYR and other OMs of the clubstation F5KKD will activate l'Ile de Sein during the IOTA Contest on Jul 30/31.

EU-110, 9A: Alessandro,IZ4AMS, will be QRV from Sveti Nikola Island from Jul 29 till Aug 1, including the upcoming IOTA Contest. QSL via IZ4AMS.

EU-125, OZ: Rene,OZ/DH3BEA, is working from Fano Island from Jul 24 until Aug 5. QSL via homecall.

EU-149, ES: Juri,ES5GP, will be QRV from Vaindloo Island from 27 till Aug 3. He is working in SSB and digital modes on HF, 6m and 2m and will sign either ES4GP or ES4WK in the IOTA Contest. QSL via bureau.

EU-150, CT, Minho/Douro Litoral/Beira Litoral Province group: A group of HAMs from CT, DL and HB9 will sign CR6W (QSL via CS1GDX) in the IOTA

Contest. They willl stay on Insua after the contest and are going to
activate the lighthouse (ARLHS POR-028) as CS2W. Most likely they will
work only during daylight in CW and SSB on 40m-6m from Aug 1-7.
QSL via HB9CRV (bureau/direct). See also: http://www.to-mk.com/neu

EU-170, 9A, Dalmatia North group: DK3CH is working in SSB in his holidays
from Dugi Otok (CI-018) between Jul 28 and Aug 10. QSL via DK3CH.
See also: http://www.qrz.com/db/dk3ch

EU-172, OZ: Mike,DG5LAC, and Petra,DB1LPS, will be QRV in SSB on 80m-10m
signing OZ/DG5LAC from Bjorno Island from Jul 29 until Aug 1. They
will join the IOTA Contest as well. QSL via DG5LAC.

EU-172, OZ: Listen for OZ7BQ/p to become active from Drejo Island between
Jul 29 and Aug 5, including the IOTA Contest. QSL via homecall or LoTW.

EU-174, SV: Laci,HA0NAR, will sign SX8R from Thassos Island (EU-174)
working in CW, SSB and RTTY on 160m-6m from Jul 25 until Aug 1,
including the IOTA Contest. QSL via homecall.

EU-174, SV: Laci,HA6NL (J48NL), Sanyi,HA7JJS (J48JJ), Laci,HA7PL (J48P), and
Andor,HA5AOP (SV8/HA5AOP), will be QRV from Thassos Island as well
in the IOTA Contest and between Jul 27 and Aug 1. QSLs via homecalls.

NA-125, VE: VA3KAI, VE3VY, VE3BSB and maybe also other OMs intend to show up
as VE2/VE3LCA from Grosse Boule from Jul 29 till Aug 1. QSL via VA3KAI.

NA-126, VE: Rich,VA1CHP, Helen,VA1YL, Lynn,VE1ENT, Fred,VE1FA, Bill,VE1MR,
Bill,VE3NNQ, Al,VO1NO, and Lowell,VY2OX, are working on 80m-6m signing
VX1D from Bon Portage Island between Jul 26 and Aug 1.
They will use the callsign VC1D in the IOTA Contest. QSL via VE1DHD.

NA-152, KL7, Nome County North group: CANCELLED! KL7OH has cancelled his
activity from Sarichef due to the "lack of funds and propagation".

SA-046, PY: The OPs PU7RLM, PY7AHA, PY7GK, PY7OO, PY7VI and PY7XC will sign
PY7CRA/P from Itamaraca Island from Jul 29-31. QSL via PY7CRA.

683. Hollywood looking for a Telefax machine

Newsgroup: rec.radio.amateur.misc
Date: 2011-07-27 02:54:13 UTC
From: Jim Haynes <jhaynes@alumni.uark.edu>
Message-ID: <VeOdnQrelvFI4LLTnZ2dnUVZ_gudnZ2d@earthlink.com>
Source record: 4323
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I remember there were once some hams using old Western Union Desk-Fax machines.

Here's a message received by one of my friends.

Hello,
My name is Montgomery Pollack, I own a motion picture prop house in Los Angeles, CA. I am on the hunt for a 1970’s working Telefax machine for a film we are working on right now. Do you have such an item or do you know where I can locate such an item.
Any information would be helpful.
Thank you so much for your time.
Monty

Ham Radio Quiz:

1. What is Lloyd Davies' Ham Radio License classification?

2. What is Roger Wiseman's Ham Radio License classification?

3. How many times did Lloyd Davies have to retest?

4. How many times did Roger Wiseman have to retest?

5. How many letters from Riley Hollingsworth did Lloyd Davies receive?

6. How many letters from Riley Hollingsworth did Roger Wiseman receive?

7. How many times did Lloyd Davies post fake kiddie porn ads over Roger Wiseman's name and address?

8. How many times did Roger Wiseman post fake kiddie porn ads over Llloyd Davies' name and address?

9. How many times have the Heils visited Lloyd Davies?

10. How many times have the Heils visited Roger Wiseman?

11. How many Usenet groups have been set up in Lloyd's name?

12. How many Usenet groups have been set up in Roger Wiseman's name?

Watch now as Roger does that which he is so known for. He will plagiarize this questionnaire and post edit same due to his lack of originality and intellect.

you would expect to hear it being read back and NEVER send just links & url's.

DURING WIANEWS WEEK COMMENCING July 31 2011.
We'll hear from WIA Director VK6POP along with further RD news
from our Remembrance Day Contest Manager VK4OD, so grab your pen and paper,
connect your earth wire to your trusty L1A2 bayonet, break a bit of C4 and
"brew up" as we present THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM
THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JULY 31 2011.

First ever 24 GHz Digital Modes Record

On June 23, Alan Devlin VK3XPD and Colin Hutchesson VK5DK operated portable in
VK4, setting a new Digital Modes record for the 24 GHz band. The distance was
152.2 km.

New 3.4 GHz Digital Modes Record

On June 25, Mark Swannack VK2AMS and Neil Sandford VK2EI worked Alan Devlin
VK3XPD and Colin Hutchesson VK5DK, who were operating portable at the time in
northern VK2. This contact set a new national Digital Modes record for
3.4 GHz band. The distance was 161.6 km.

The full list of current VHF-UHF records is on the Records Update page of
the WIA web site, wia.org.au

This page also includes an updated list of all Australian VHF-UHF records since
1947.

(John VK3KM)

The Walcha Radio Group.

The Walcha Radio Group would like to thank all who donated to Jeff's Walk. They sent out some 250 letters to the people of the North West area of this state and got back almost $500.

Jeff is now well across VK5 towards the VK6 Border and donations to NETS are still most welcome.

Brian Kelly VK2WBK President of the Walcha Radio Group is justifiably proud of all his members, it's a small club with only 8 members who run three repeater sites with 5 repeaters plus 23cm on air soon!

(vk2wi news)

MAYDAY FAKE

SA Police have been inundated of late with radio calls for help which appear to be hoaxes, wasting time and resources for emergency services.

The Yorke Peninsula Country Times say calls have related to a range of fake emergencies and Yorke-Mid North Local Service Area operations manager, Senior Sergeant Gerry Nicholson, has warned officers will be investigating.

These include calls on either CB radio or marine radio creating the belief the caller is in dire straits and requires immediate assistance.

The response to the hoax calls has resulted in the use of large numbers of volunteer personnel, helicopters, marine vessels and other emergency services like police, SES, CFS and ambulance.

For the full report read the print edition of YPCT or Google Yorke Peninsula Country Times.

FADE TO BLACK

Digital fault plagues Brisbane's TVs

A digital transmission fault was the cause of woes for television stations and viewers across Australia's east coast Sunday last.

Channels Seven and Nine were unable to broadcast in Brisbane for nearly one hour after their digital feed from Sydney was cut at about 1pm however lovers of re-runs of I Love Lucy were not left in the dark, 9's "GO" channel stayed up.

Most stations could only transmit an error message to viewers from Brisbane to Hervey Bay and Sydney.

The feed continued to cut in and out during the afternoon, also affecting ABC, Channel 10 and 612 ABC Brisbane radio.

It is said that the original fault was with Telstra in Sydney but Nine said their backup satellite link out of Melbourne also failed at the same exact time.

And it's said that all over the country people slowly emerged onto the streets, blinking in the dawn of a new age! HiHi.

wIA DIRECTOR BOB BRISTOW VK6POP REPORTS:-

Congratulations to Phil VK6KPH. In July 2011, Phil, was recommended for a merit scholarship by Murdoch University in support of his research studies at the Western Australian School of Mines.

Phil has been a postgraduate student since 2007 and his research is now commanding global attention having been presented at peer-reviewed international meetings.

Phil is conducting research into high altitude millisecond electrical discharges that seem to originate in the mesosphere over regions of impending earthquake activity.

Discoveries in science often begin with a happenstance, and that's what set Phil on this research path.

Some time ago Phil was listening in his car to commercial radio in the amateur 2 metre band. Phil noted that 24 hours later a strong (M=5.9) earthquake hit Newcastle in New South Wales, Australia.

The recollection of the first event came when in October 2001 a similar anomaly was registered by him in Esperance, Western Australia, (even on the FM music band at 104.75FM) and 14 hours later the Earth trembled under Esperance (the epicentre was 200 km west at Ravensthorpe).

Having had 35 years experience as a radio amateur, TV electronics engineer, ex RAAF avionics technician and part time post trade industrial electronics teacher he started to record the suspicious signals using transceivers tuned to different frequencies, using many of the skill utilized by Amateur Radio enthusiasts.

Congratulations Phil on you ongoing research, and I wouldn't be surprised to see an article in a future edition of AR magazine about your work.

See the text edition of the news for a web link with more information.

Phil's work is in chapter 7 of this free pdf
www.fanarco.net/books/geology/Pulinets_Boyarchuk_Ionospheric_Precursors_of_Earthquakes.pdf

HOME OF THE GOOD GUYS

Pierce Healy VK2APQ coming up to his Centenary.

Pierce VK2APQ will be celebrating his 100th Birthday in mid August.

His family will be celebrating this milestone with a function Sunday the 14th of August. There will be more details in later bulletins.

(vk2wi news)

Lighthouses are the talk of the town

With more than 40 new entries in the past week, the 14th International Lighthouse and Lightship Weekend in August is shaping up well indeed.

Among those which have gained media publicity are the Cape Leeuwin and Cape Naturaliste lighthouses. The West Australian newspaper reports that they are to be illuminated in recognition of seafarers over the years.

Similar things are happening elsewhere as greater attention is paid to these important heritage structures that once protected the coastline around the world.

Looking around Australia's coast we have record 59 entries. There's also good numbers from Canada, Chile, Italy, Holland, New Zealand, Portugal and the USA.

A further 20 each are expected from England, Holland and Germany. Among the others who are down on last year's totals so far are Argentina, Scotland and South Africa.

To keep track of the International Lighthouse and Lightship Weekend, August the 20th and the 21st visit the website at illw.net which also has the online entry form.

More on ILLW with Felix later in this Bulletin.

To read the newspaper report:
http://au.news.yahoo.com/thewest/a/-/breaking/9861939/world-ready-to-honour-safety-beacons/

To read the latest on the ILLW visit:

The Amateur Radio Victoria Centenary

The centrepiece of the 100th celebration is an operating award. It runs throughout the period August the 1st through to November the 30th.

The rules and full details are now available under the Award section of the Amateur Radio Victoria website amateurradio.com.au

During the four-month celebratory period contact with members gains 2 points. A bonus ten points is available by working VK3WI during the Remembrance Day and International Lighthouse and Lightship weekends in August, and the Oceania DX Phone Contest in October.

Bonus points are also available for contacts with the Nominated VK100ARV special callsign to be rostered in November.

The Amateur Radio Victoria Centenary also involves the world's first DATV QSO Party emanating from VK3RTV and across the world, and November the 19th and 20th a number of Victorian National Parks will be on air.

Wherever you are, don't miss a chance to join in the celebration.
More in coming weeks.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Long established on the amateur radio calendar is the Jamboree of the Air, now run in conjunction with the Jamboree on the Internet. This activity brings youth together via the capability of technology to share experience locally and globally.

Whether it is one amateur or a club contribution, there are the necessary preparations to undertake. Site, activities to be supported and equipment readiness all have to be addressed. This is the age of the touch screen and instant messaging and as interesting as CW and SSTV can be to the officianado we need to be both practical and up to date.

To this end, a discussion with the Scout Leaders who will be attending and a look at the various badge requirements may give some insight into appropriate presentations of the amateur radio activity.

Remember that glint in the eye when enthusiasm bursts through. We can all have it but it is good to share our enthusiasm with others. Members of the scouting movement are especially welcome during JOTA.

If you hear a voice in your mind saying "do your best" then remember the correct response is still to "do our best".

I'm Geoff Emery and that's what I think....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

Bunya Mts & District AmCom

Good morning/evening to all, I'm Neil VK4NF with greetings from the north western darling downs and south burnett.

The Bunya Mts & District AmCom Inc will be holding it's annual meeting on Saturday the 13th August at the Myall youth & community network centre, cnr of Drayton & Nicholson streets in Dalby.

Visitors will be most welcome, so take this opportunity to come early and check out the great shopping in Dalby, then join us at around the 1100 hrs for a chit chat, then we will have a BBQ lunch at around the 1230hrs, followed by the annual meeting at 1400hrs, and this will be followed with a general meeting.

It would be great to have your company. Thanks folks & happy days to all.

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
http://ipswichdistrictradioclub.webnode.com/
email - vk4wip@wia.org.au

This is Allan VK4FABR with news from the Ipswich and District Radio Club.

First up this week, the club's AGM last Monday elected a new president, Derek VK4MIA, following the announcement by outgoing president Mike VK4QS that in the near future his family will be relocating to Maryborough.

Former secretary Darrin VK4FVRX is back in the saddle, and John VK4IE is stuck firmly in the treasurer's chair. During the meeting several members expressed their sincere thanks to past president Mike for guiding the club through a period of rejuvenation and membership growth.

Last Sunday club station manager Rob VK4HW completed commissioning a new 70cm repeater - VK4RSM Spring Mountain - linked to the club's main 2m repeater VK4RAI at The Knobby. The project was started more than a year ago with the support of Ipswich City Council and Cr Paul Tully VK4FPGT. The wet summer put the project on-hold for several months, but the new repeater on 439.300 sprung to life around noon on July 24. Special thanks must also go to several club members who lent a hand with the installation on two separate days the previous

week.

I'm Allan VK4FABR.

North Queensland Amateur Radio Convention Fri 16 to Sun 18 Sept 2011

The 20th Bi-ennial North Queensland Amateur Radio Convention will be happening in Charters Towers from Friday afternoon 16th to Sunday afternoon 18th September.

The primary venue for Convention happenings will be the RSL Club in Prior Street Richmond Hill, Charters Towers.

Displays, Talks, Tours, Awards, Raffles, Prizes and some serious socialising will all be a part of the weekends proceedings.

Deadline for Registrations is at the TARC Management Meeting Tuesday 6th September.

(vk4zz)

VK6

F-troop

Onno Benschop, vk6flab tells us that they meet on repeater, VK6RAP, 147.000 MHz.

F-Troop isn't the old TV series of the American Wild West but a Net for the F-call licensees, also some times called "Foundies". As an aside the Summerland club in VK2 were arguably Australia's first F troop net.

WA's F-Troop sprang into life on Sunday 12 June 2011 courtesy of HARG member Onno VK6FLAB and by all accounts it has been a successful start, giving "F" calls an opportunity to get on the radio and be heard.

Onno runs this net at 8am every Saturday.

(harg website)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Ham College 2011 Foundation Course Remaining Dates

Saturday & Sunday 17-18 September
Saturday & Sunday 19-20 November

Their regular venue is the Lynwood Scout Hall which is situated within the Whaleback Golf Course, Parkwood.

For people outside the Perth metropolitan area arrangements can usually be made for assessments to be conducted elsewhere, subject to the availability of a suitable venue and assessor commitments.

Port Stephens Amateur Radio Club has new Amateurs on the Air.

Back in June, the Port Stephens Amateur Radio Club conducted a Foundation weekend class and is proud to announce that they had Four successful candidates.

listen in the Port Stephens / Newcastle area for
Bruce VK2FKNN
Jarrod VK2FZRO
Stuart VK2FOOO and
Tony VK2FACK.

Please make these chappies welcome, to the wonderful and exciting world of Amateur Radio.

Proposed Jesmond Electronic Club.

Community Radio station 2NUR have been announcing this new club will be holding its Foundation meeting at the Jesmond Park Uniting church hall on the 4th August commencing at 2 pm.

Cost for the afternoon is $20.

Anyone interested, particularly in the Cessnock Jesmond area, please get along.

Kaitlyn Cole, KS3P named Amateur Radio Newsline 'Young Ham of the Year'

At age 11, Kaitlyn Cole, KS3P, of Harvest, Alabama, becomes the youngest person* ever to receive the Amateur Radio Newsline(tm) 'Young Ham of the Year Award.'

But her lack of chronologic age is more than made up for by her selfless dedication to her community and the youth of Alabama through her chosen hobby/service of amateur radio.

On April 27, 2011, the Huntsville, Alabama area, including the small community of Harvest, was hit by a series of destructive tornadoes. The severe weather took a heavy toll in lives lost and property damaged. Electrical service was out for over a week. Kaitlyn and her father immediately volunteered to help with amateur radio relief activities. Kaitlyn began by logging contacts and running errands, but in short order took on the role of Net Control Station, working for many days from 7:30 a.m. to 4:00 p.m. With cellular and wireline telephone coverage being spotty to non-existent, Kaitlyn's duties as Net Control involved dispatching amateur radio operators with chainsaws (and other rubble clearance machinery) and debris pickup teams.

For her efforts, Kaitlyn received many compliments from veteran operators on the professionalism that she displayed during this crisis situation.

A straight-A student entering sixth grade this fall, the 11-year old also enjoys home-brewing and construction, and has posted on YouTube a video of herself building a QRP transceiver

(see http://www.youtube.com/watch?v=_SK55sbxOj4 and related videos).

The 2011 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented on Saturday, August 20 th at the Huntsville Hamfest in Huntsville, Alabama.

As the 2011 "Young Ham of the Year," Kaitlyn will receive -- courtesy of Vertex-Standard -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat her to an expense-paid week at Spacecamp Huntsville, and will present Kaitlyn with a variety of CQ products. Amateur Radio Newsline(tm) will provide Kaitlyn with a commemorative plaque at the award ceremony.

(* Note: The previous youngest recipient of the award was Mary Alestra, KB2IGG, in 1990 at age 12.)

==========

NEWS FROM ARNEWSLINE USA

YEMENI MAN PLEADS GUILTY IN HIGHJACKING THAT RESULTED IN THE DEATH OF 3 HAMS

A Yemeni man pleaded guilty to acts of piracy on Thursday, July 14th in connection to his role in the hijacking of a yacht off the coast of east Africa that resulted in the deaths of four Americans including three ham radio operators. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details.

As previously reported here on Newsline, Scott Adam, K9ESO, and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV, and Phyllis Macay were on board the yacht Quest off the coast of Oman when pirates boarded their vessel on Friday, February 18th. Officials were in the process of negotiating for their release when gunfire was heard around 1 a.m. Eastern Time on Tuesday, February 22. United States forces responded and then boarded the Quest. It was then that they discovered that all four hostages had been shot by the high seas bandits. Despite immediate steps to provide life-saving care, all four hostages ultimately succumb to their wounds.

Now, one of the alleged pirates identified as 23 year old Mounir Ali has accepted a plea bargain by U.S. District Judge Mark Davis, where he plead guilty to taking part in the armed hijacking. Ali claimed that he and four other men from Yemen were crew members aboard another vessel that was pirated by Somalis earlier in February. But prosecutors say that Ali willingly elected to join the pirates in return for a share of the ransom money. However they also say that he did not personally shoot nor did he instruct anyone to shoot any of the four Americans.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

Ali is the 11th person convicted in relation to the high jacking and murders of the four Americans on-board the Quest. Sentencing is scheduled for October 21st.

RADIO AMATEUR KILLED IN TOWER COLLAPSE ACCIDENT

A Hot Springs, South Dakota ham radio operator was killed and another seriously injured Saturday, July 16th. This after a communications tower they were helping dismantle was blown over by a gust of wind.

According to Fall River County emergency manager Frank Maynard, Tim Anderson, K0OR, died of his injuries at Rapid City Regional Hospital shortly after

arriving by Life Flight helicopter. The second man, Tom Embree, NC0K, also of Hot Springs, was also flown to Rapid City Regional Hospital where surgery was performed Sunday. He remains in serious condition.

The men were helping their amateur radio club remove a 110 foot high tower on the top of a near-by peak known as Gull Hill. The tower was no longer in use, and the owner had offered it to the radio club, which was going to move it to a new location.

News reports say that several other radio club members were on the ground at the time of the accident. They had taken down all but the final 30 foot section of the tower and were just beginning to release some guy wires when a gust of wind blew the tower over with the two men still on it and then collapsed on them.

Both Anderson and Embree are members of the Hot Springs Amateur Radio Club. Hot Springs is located about 60 miles south of Rapid City. At the time of his death, Anderson was the club's president.

==========

RSGB

Restrictive legislation for Belgium

The administration in Flanders has included radio amateurs in the restrictive Specific Absorption Rate, or SAR, Ministerial Decree of 26th January, aimed at telecom operators.

It appears that radio amateurs in Flanders will now have the same standards and obligations, fees and even the same fines or imprisonment for breaches as the telecom operators. Radio amateurs have to apply for a certificate of conformity for their station and, presumably, re-apply whenever the station configuration changes. This costs about 75 Euros and the amateur has to supply detailed information on the site and the antenna concerned.

More information online at http://tinyurl.com/BelgiumUBA.

French club's stolen radio kit recovered

The Radio Club of Provins would like to thank the amateur radio community for all the help and support during the recent theft of 20,000 Euros worth of DXpedition equipment.

A radio amateur is helping police with their enquiries following the theft. It was thanks to the network of radio amateurs that this sad event was resolved quickly. The equipment was recovered and will soon be on its way to PJ4C with the F6KOP team and some will be travelling with the MDXC team to 9N.

South Sudan added to CQ DX Award Countries List

The Republic of South Sudan is the newest addition to the CQ DX Award Countries List, number 342.

Verifications confirming contacts after 14th July 2011, which was the date of its admission to the United Nations, are acceptable for credit. No award credit is available for southern Sudan contacts made during the 1980s and 90s. In addition, South Sudan will count as a country, or entity, multiplier for the CQ DX Marathon, the CQ World Wide DX Contest and any other CQ contests that use country multipliers.

WEIRD AND WONDERFUL

NEBRASKA

Prairie dogs get the blame for an internet and phone outage in western Nebraska.

Charter Communications say prairie dogs apparently chewed through some buried fibre optic cable, in Scottsbluff that there were hundreds of prairie dog mounds in the area, and it took time to find the cut and get it repaired.

Service was rerouted and repairs were completed about seven hours later.

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

31st July

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager.

Today being the 31st July and, you have about 3 weeks to the commencement of this year's RD Contest.

In the past I have asked that when you send your log in either by Electronic or postal means please ensure that you have you correct postal address.

Anybody requiring any of the forms posted to them please contact me ASAP.

In the coming week I will finalize the Opening speech and send out a special email via the usual weekly news server you know, the

wiabroadcasters@yahoogroups.com

For those people that are hand writing their logs, " PLEASE" write your logs in a legible manner, as in the past some logs have been VERY HARD to decipher.

Until next week.

WINTER VHF-UHF FIELD DAY RESULTS

The Winter Field Day saw a good level of activity, although participation was down in some of the colder parts of the country!

An interesting feature is that three of the sections have been won by VK5 stations, and this time the rover section was dominated by VK2 stations.

The winners of the six sections were

Iain Crawford VK5ZD
David Minchin VK5KK
the Elizabeth Amateur Radio Club VK5LZ
the Blasco family station VK3ALB
Ross Keogh VK3MY and in the rover section there was a tie between

Dan Joyce VK2GG and Jack Swart VK2TRF.

Congratulations to all for braving the elements.

Full details of the Field Day are available on wia.org.au

The next VHF-UHF Field Day will be the Spring event, which will be held over the last weekend in November

(John VK3KM)

International Lighthouse Weekend Aug 20-21 2011

Hills Amateur Radio Group will be activating the North Mole Light House in Fremantle again this year for the 2011 ILLW.

Martin VK6ZMS says they will set up from 10am WST.

Please call in or CALL past and say hello.

wITH FURTHER ON THIS YEARS illw HERE IS vk3dq

Lino VK3EI and Myself John VK3DQ will be taking a team of eighteen amateurs to Cape Liptrap for the lighthouse weekend, The team will include amateurs from VK and ZL Operation will be from Bear Gully Coastal Cottages which is the closest venue to the lighthouse itself where activity is permitted, we will also have a static display at the lighthouse itself and weather permitting will man that display for a period during daylight hours. (Parks Victoria will not permit operation from their car park at the Lighthouse)

Our operation is registered as a three day event on the events calendar at The Amateur Radio Lighthouse Society and we will be active on Friday 19th through Monday 22nd August Using the callsign VK3BAD.

The station will consist of three operators on HF and one operator and VHF/ UHF voice , CW and digital modes will be used, and the station will operate for the entire period we are at the location.

So please make this event in your calendars, because as they say "Our operators are waiting to take your call" "

SUMBANDILASAT SO-67 Recovery Successful

SO-67 has returned to operation after recovery from a cosmic ray upset.

Operation over Australia, New Zealand, Japan has been planned until the 31st July.

There is no activation tone required so LEO satellite operation is now even easier.

The AMSAT-VK mailing list has been reporting many successful contacts made on passes over VK and NZ.

For more information about the activation schedule take a look at the website address on the email edition of this broadcast.

(AMSAT News Service)

Vietnam Amateur Radio CubeSat video

Vietnamese students have produced a great video about Vietnam's new Amateur Radio CubeSat F-1.

The F-1 is an educational CubeSat to be launched into 320km circular, polar orbit in the first quarter 2012.

It will carry 2 independent transceivers using amateur radio 145 and 437MHz bands. The transmission speed will be 1200bps and higher using FM AFSK & GMSK modulation, AX.25, KISS protocol.

It will carry a low resolution C328 camera with 640x480 resolution.

The IARU satellite frequency coordination panel have agreed a downlink frequency of 437.485MHz.

Brazil's first Amateur Radio satellite

Brazil is preparing to launch the NANOSATC-BR. The design of the NANOSATC-BR is being developed by the National Institute for Space Research (INPE) and students of Federal University of Santa Maria (UFSM) of state Rio Grande do Sul in Brazil.

"The BR-NANOSATC will have two scientific instruments, a magnetometer and also a particle detector of precipitation for monitoring real-time geospatial, and the precipitation of particles in the magnetosphere disturbances on the Brazilian territory to determine its effects on regions such as the South Atlantic Magnetic Anomaly (SAMA, the English acronym) and the Brazilian sector of the equatorial electrojet.

This anomaly [SAMA] is a "failure" of the Earth's magnetic field in that region, which is about Brazil. As a consequence of this anomaly, there is a greater risk of the presence of particles high-energy region, which can affect communications, signals from global positioning satellites (like GPS), or even cause failure of electronic equipment such as onboard computers.

The INPE has been studying this anomaly for decades, including several researchers international reputation, which even took part in defining the mission and its payload. "

Launch is in November 2012.

Telemetry will be at 145.865 MHz 9k6 BPSK.

Control station will be PY3EB.

Radios to the sound of Migaloo (the white whale) this weekend

As the news goes to air some radio amateurs in the Townsville region
have donned radio backpacks and put to sea to provide communications support
for the Magnetic Island to Townsville Swim.

They attended yesterdays Main Swim Briefing at the Choral Society Hall in
Sturt street and met with some of the swimmers and skippers that they would
be helping out.

Operators involved have included VK4s ZZ, FR, HSV, AAH and PVH at sea
and VK4s FTVL, UCM, FBLU and ZM manning Swim Base or shadowing various
officials keeping information flowing.

They faced a brisk and early start getting to their observation points and to
their mighty vessels to be in position in time for the start of competition at
9am. Competitors then faced the 8km swim back to the mainland under the
watchful eye of the radio amateurs operating the safety net with relatively
calm conditions ensuring some cracking quick times for the event. The swim is
expected to be completed by 12-30pm hopefully with the 58 solo swimmers and
15 swim teams making it safely back to The Strand.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

** AURORA / BIG SUNSPOTS **

After more than a week of quiet, solar activity is picking up with
the emergence of two large sunspot groups on the sun's northeastern
limb. The active regions are crackling with C- and M-class solar
flares. So far none of the eruptions has been squarely Earth
directed, but that could change in the days ahead as solar rotation
turns the sunspots to face our planet. For more do Visit
http://spaceweather.com for images and more information.

** Costas, SV1OE SK **

I am in the unfortunate position to report that SV1OE has passed
away at the age of 65 following his battle with the terrible disease.
We had the pleasure to be close prior to my moonbounce journey and
neighbors for 9 years. He was the first to pioneer from SV on EME,
in 1982 on 2m and in 1992 on 23cm. A homebrewer in the true sense
of the word 6m-3cm, loved to experiment on new projects. Assisting
amateurs, passionate with ham radio and courageous in life. In
memory, samples of his constructions: www.qrz.com/callsign/SV1OE
He will be surely missed, RIP Costas.

LATEST NEWS from Jeremy, W7EME, dated 2011-07-26: Aloha to all:
Please watch "Make More Miles on VHF" (MMMonVHF) for my updates.
I will be lunar from the old Kapa'a house this weekend (might not
be QRV Sunday only) and later next week BL02. I will be three days
(Monday through Weds.) where I was raised attending a wedding,
N. Kohala/Upolu Point, very Rare BL20 with my portable. I can
assure this has never been on the moon or to the mainland via
tropo. North Kohala was also the birth place of Kamehameha and I
will be offering a lovely QSL based on this fact. BL02 Kaua'i:
2x 17 element/8877/MiniCeptor wideband DSP Rx/WA2ODO ULNA
BL20 Big Island: 13 meter long Yagi/1kW SSPA/MiniCeptor wideband
DSP Rx/WA2ODO ULNA - The pile up on my end is always robust. No
need to spread out, just go for it. To help keep folks screwing
up, I will be simply using W7EME and the locator. Always second,
Tx always near 144.144. I may be using the the logger from BL02,

but not from BL20. My DT is always off, as I us it as a filter
to weed through the piled up screen. The DT is not that critical
as the software can easily manage it on your end. If you're not
decoding, you may be looking for the wrong grid. Adjust your
call files correctly...again at MMMonVHF will always have my
latest info. SOURCE: tnx to Jeremy, W7EME, direct to MMMonVHF

** LA/SP7VC and LA/SP7IDX qrv from Vega Island JP65BQ **

Mek SP7VC and Waldi SP7IDX will be active as LA/SP7VC and LA/SP7IDX
from Vega Island EU-062 between 23.07-02.08.2011 Loc JP65BQ, Also
JP55 posible Activity will be holiday style (we also fisching). We
plans to use 2 stations .One for HF band second for the 50Mhz.
Operation will be 80-6m using ssb,rtty also in IOTA Contest. Our
equipment consist of: IC-746,ts-2000X ,HEX beam,R-7 vertical,
6el.yagi for 6m, PA 500W for HF and 6m.
SOURCE: tnx to Mek SP7VC and Waldi SP7IDX direct to MMMMonVHF

** ZB2, GIBRALTAR qrv HF, 2m and 6m **

Astronaut Edmondo,VA3ITA/IW0GVP, will be QRV as ZB2/VA3ITA from the
rock Gibraltar from Aug 8-11. Activity will take place in CW, SSB,
digital modes and via satellites only on 6m and 2m. Edmondo is also
willing to make skeds. More information and his e-mail address can
be found on QRZ.com. QSL via VA3ITA. SOURCE: DXNL 1738 (Jul 27, 11)

** ES4GP or ES4WK qrv from Vaindloo Islet **

Juri, ES5GP, will be active as ES4GP or ES4WK from Vaindloo Islet
(IOTA EU-149, WW Loc. KO39ET) and lighthouse (ARLHS EST-057, WLOTA

1142) between 27 July and 3 August 2011. Juri will also be active
in the RSGB IOTA Contest (30-31 July). QRV as follows: HF - 1kW,
spider beam 20-10m; windom 80-10m (SSB;DIGI). 6 metres - 500w
4 el. yagi (SSB). 2 metres - 100w 4 el. yagi (FM;SSB).
QSL via the ES bureau.

** Alaska, KL7, Activity **

Yuri, N3QQ, and possibly others will be active as KL7RRC from Adak
Island (IOTA NA-039, USi AK008S, WLOTA 1258, WW Loc. AO11QS) starting
28th July and ending 3 August 2011, RSGB IOTA Contest (30-31 July)
included. If transportation is available Yuri will activate Kiska
Island (IOTA NA-070, USi AK197S, Grid Loc. RO81) Aleutians West,
from 6-12th of August. QRV on 40-6 meters using CW and SSB, from both
locations. QSL via N7RO for North America and via UA9OBA for Europe.
SOURCE: NG3K DX-News & [DX-ENG] ICPO Bulletin (22 - 29 July 2011)

** IOTA Activity - IJ7A / IJ7DX from EU-073 - JN80NK **

A group of Italian operators will be active as IJ7A from San Pietro
Island (Grid JN80NK)between July 29-31st. Operators mentioned are
Vin/IK7IMO, Roby/IK7VJX and Roberto/IK7XIV. The team will be active
on all HF bands except 160m using CW and SSB. The activity will also
include the RSGB IOTA Contest (July 30-31st) as a Multi-Op entry.
QSL via IK7IMO, by the Bureau or direct. For more datails and
updates, watch: http://ij7a.altervista.org/blog
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1020

** IOTA Activity - J45 / KM35 - DODECANESE **

SV5BYR, SW5KKR and a group from Crete will take part in the up
coming IOTA Contest as J45K from Kasos Island (EU-001, KM35kj).
They will work on HF, 6m/4m/2m and also 1,2 GHz starting on Jul 27.
QSL via SV9DJO and LotW. SOURCE: DXNL 1738 (Jul 27, 2011)

** IOTA Activity NA-126 as VX1D **

Operators Helen/VA1YL, Rich/VA1CHP, Bill/VE1MR, Lynn/VE1ENT,
Lowell/VY2OX, Bill/VE3NNQ, Al/VO1NO and Fred/VE1FA will be active
as VX1D from Bon Portage (Outer) Island (CISA NS-128) between July
26th and August 1st. This is a special event callsign issued to
commemorate the 150th anniversary of the first lighting of the Cape
Sable Island lighthouse in 1861. Activity will be on 80-6 meters
using CW, SSB and possibly RTTY. During the RSGB IOTA Contest
(July 30-31st), look for the team to use the callsign VC1D. QSL

both callsigns via VE1DHD. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin

691. Parts for Jack up Mast AB-952

Newsgroup: rec.radio.amateur.misc
Date: 2011-07-28 18:09:51 UTC
From: Tom Horne <hornetd@gmail.com>
Message-ID: <05bf80b7-8113-4c65-9983-b9c05726de7d@x10g2000vbl.googlegroups.com>
Source record: 4331

I have two AB-952 Military antenna masts. I was fortunate in finding a complete extension kit for one mast at Ontario Surplus. For some time I have been trying to complete the extension kit for the second mast. I had found three additional mast sections, an additional guy ring, an extension kit carrier, and some guy cables that were long enough. But I had to use carabiners and mullion links to attach the extra guys because they were from a different mast system. That still left me looking for quite a few parts.

I called Ben at Ontario Surplus again hoping he might have some augur anchors. He put me in touch with a part time surplus dealer in Maryland which is were I live and he is quite close to me. That dealer, Tim Clark, had a complete extension kit at a very modest price. He also has brand new accessories kits with brand new cables that would replace the worn cables on one of my masts. So I finally have two complete mast sets. These masts are very useful for field day, boy scout jamboree on the air, public service events, and the list goes on. The tubes are four inches across and the assembly is stout enough to support VHF beams and smaller HF beams. Since the entire assembly is aluminum they are light enough to carry some distance from a vehicle if the situation demands it.

That left only one challenge. The four inch tubes are too large for the mast clamps that come with most beam antennas. The original adapter that comes with the masts is offset in order to center the weight of the corner reflector antennas, for which they were originally designed, over the center line of the mast. When I tried to use them to attach beam antennas they carried the weight off center and caused binding of the mast during raising and lowering. A friend, who is an amateur machinist, made me two adapters that addressed the problem. The only drawback was that we had to cut the end off of a mast tube to get a lock on base for each of the adapters. Damaged tubes are available in the surplus market but being five foot long they are somewhat awkward to ship which raises their cost significantly.

While I was at Tim Clark's place picking up the new accessories kit and the extension kit I recognized some alternate antenna adapters that were designed to carry a dish reflector antenna. That antenna was added as an additional part to the radio system the masts were built for. I had only previously seen these in manuals. The dish adapters come straight up out of the mast coupling and reduce the size of the mast to two and a quarter inches (2&1/4"). That is well within the range of the clamps that most of the beam antennas come fitted with. Best features of these adapters is they are small, light weight,

easily shipped, do not require a machinist to produce, and relatively inexpensive. Tim still has several of those adapters, even after I immediately bought two, so if you are dealing with that adapter issue he can simplify the problem considerably. He also has quite a collection of other GI surplus some of which he is willing to part with at prices I think are quite low.

My only connection with Ben at Ontario Surplus and with Tim Clark is that they have been very generous with time and effort to help me complete these two masts at a price I could afford. If you could use their help Ontario surplus has a web sight that you can find with Google or another search engine. If you want to contact Tim Clark you will have to use email via [glengar comat verizon period net]. For those of you not familiar with the term "comat" it is a contraction of the words "commercial at" which is the name of the symbol that is used before the domain name and after the user name in email addresses. I'm just so glad to have finally completed this mast project that I wanted to share the information with others who might need it.

--
Tom Horne, W3TDH

==> + PUBLIC SERVICE: NEW MEXICO HAMS PROVIDE COMMUNICATIONS SUPPORT
DURING WILDFIRES
```

One month after it began, the Las Conchas Fire -- New Mexico's largest fire on record -- has burned more than 157,000 acres and is 90 percent contained. One day after it started, the fire threatened the Los Alamos National Laboratory, forcing the evacuation of the entire town of Los Alamos. During the evacuation, the Santa Fe ARES® Group placed itself on alert. The fire, which began on June 26, is believed to have been human set. Read more here <http://www.arrl.org/news/new-mexico-hams-provide-communications-support-during-wildfires>.

==> + ARRL BOARD OF DIRECTORS GATHERS IN CONNECTICUT FOR 2011 SECOND MEETING

The ARRL Board of Directors held its Second Meeting of 2011 July 15-16 in Windsor, Connecticut, under the chairmanship of President Kay Craigie, N3KN. At the two-day meeting, the Board considered a number of reports and acted on several recommendations -- including proceeding with plans for a digital version of QST and planning for the League's Centennial Celebration in 2014 -- and Directors' motions. The ARRL Board of Directors meets twice each year -- in January and July -- usually in the Hartford area. Click here <http://www.arrl.org/news/arrl-board-of-directors-gathers-in-connecticut-for-2011-second-meeting> for a detailed look at the 2011 Second Meeting of the ARRL Board of Directors.

==> FCC NEWS: ARRL ASKS FCC TO KEEP 2300 MHZ PROCEEDING OPEN

In June, the FCC released a Public Notice that sought comments on whether or not it should terminate approximately 800 docketed proceedings in the Wireless Telecommunications Bureau, the International Bureau, the Office of Engineering and Technology and the Enforcement Bureau. Some of the proceedings set for possible termination affect the Amateur Radio Service. On July 20, the ARRL filed comments with the FCC on this matter, explaining that it has no objection to the termination of the proceedings in the Public Notice, save for one item. "With respect to the Office of Engineering and Technology dockets slated for termination," the ARRL stated in its comments, "there is one Amateur Radio-related proceeding that, in the ARRL's view, should not be terminated, but retained in open status." Read more here <http://www.arrl.org/news/arrl-asks-fcc-to-keep-2300-mhz-proceeding-open>.

==> + AMATEUR RADIO IN SPACE: ASTRONAUTS ON BOARD ISS GET ARISSAT-1 READY FOR LAUNCH

The ARISSat-1 satellite -- also known as KEDR -- has spent several months aboard the International Space Station waiting for deployment by crew. According to the AMSAT News Service, that day is arriving soon. "As of July 22, we are looking at an August 3, 2011 date for EVA 29 and the ARISSat-1/KEDR deployment, subject to change due to ISS schedules," said ARISSat-1/KEDR Project Manager Gould Smith, WA4SXM. "The preliminary Russian EVA-29 timeline shows the ARISSat/KEDR deployment is the first task of the EVA, so it will occur fairly soon after the EVA begins." The ARISSat-1/KEDR battery was charged for 24 hours on July 24. A test of the satellite inside the ISS is scheduled to run from 1900 UTC on Saturday, July 30 and will be turned off at 1430 UTC on July 31. Read more here <http://www.arrl.org/news/arissat-1-test-and-launch>.

==> + ON THE AIR: THE BANDS HEAT UP FOR THE 2011 ARRL AUGUST UHF CONTEST

VHF/UHF weak-signal operators across North America are making final tests on their stations in preparation for the 2011 ARRL August UHF Contest <http://www.arrl.org/august-uhf>, scheduled for the weekend of August 6-7. Most VHF+ SSB/CW operation takes place on the two lowest-frequency bands of the VHF spectrum: 6 and 2 meters. But a lot of activity takes place above 144 MHz in the UHF portion of the radio spectrum and beyond. This contest will focus on 220 MHz and above and there will be lots of activity -- and hopefully lots of propagation, too! Read more here <http://www.arrl.org/news/the-bands-heat-up-for-the-2011-arrl-august-uhf-contest>.

==> + ON THE AIR: 2011 ARRL JUNE VHF QSO PARTY SETS RECORD FOR LOGS RECEIVED

The 2011 running of the ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party> saw a record number of logs submitted. This year, 1243 logs were submitted for this contest, breaking the record set in 2010 of 1202 logs. "Six meters has been in excellent shape for the June VHF QSO Party for four of the past five years," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's clear that when the 'Magic Band' is in great shape at the start of the contest, we see more participation with more logs submitted. As a 6 meter fan, I hope this trend continues in the years to come."

With the exception of 2007, the ARRL June VHF QSO Party has seen upwards of 1000 logs submitted each year since 2006; in 2007, 860 logs were received, down from 1052 the year before. Kutzko said one of the contributing factors to the popularity of the contest is that more HF transceivers now include the 6 meter band: "When hams buy new HF rigs that include 6 meters, we see them having a go on the band -- sometimes for the first time, other times it's like revisiting an old friend from their past. These hams are having a blast on the band and it sure is contagious. When you add that to the improved propagation, it's no wonder we're seeing an upswing in the popularity of 6 meters."

==> + ARRL OFFICIAL OBSERVERS TEAM WITH FCC TO SOLVE ROGUE KEYER PROBLEM ON 17 METERS

On July 15, Walt Bilous, K3DQB -- an Official Observer in ARRL's Eastern Pennsylvania Section -- notified ARRL Headquarters of a keyer continuously sending a series of dits on 18.0855 MHz. According to ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, Bilous kept hearing the dits throughout the night.

Skolaut asked Bilous to alert other OOs to monitor the frequency, but the signal was proving hard to locate via direction finding due to changing propagation and fading conditions on the band. "We alerted OOs across the country to monitor and collect additional information for us including bearings and signal strength reports," Skolaut said. "We had a great response from quite a number of Official Observers." But the signal was still proving elusive, so Skolaut contacted the FCC for assistance. Read more here

<http://www.arrl.org/news/arrl-official-observers-team-with-fcc-to-solve-rogu
e-keyer-problem-on-17-meters>.

==> SOLAR UPDATE

Tad "Say my name, Sun shines through the rain
<http://www.youtube.com/watch?v=klMPhl7NJDg>" Cook, K7RA, reports:
Sunspot activity dipped over this past week, but now is on its way back
up. On July 20, five sunspot groups were visible, but on July 21, only
groups 1251, 1254 and 1259 remained. On July 24, new sunspot group 1260
appeared, but the next day group 1251 disappeared. On July 26, groups
1254 and 1259 went away, and new sunspot group 1261 arrived. The next
day, another new group, 1262, appeared. The average daily sunspot
numbers for the week July 21-27 declined nearly 47 points -- a little
more than 50 percent -- to 45.6. The average daily solar flux declined
more than 6 points to 91.8. The latest forecast shows the predicted
solar flux at 100 on July 28-29, rising to 105 on July 30-31, 110 on
August 1-3, and then dropping back to 95 on August 4-7. It also shows
the planetary A index at 5 on July 28-30, 12 on July 31-August 1, and
7, 5, 8 on August 2-4, followed by 12 again on August 5-7. Geophysical
Institute Prague predicts quiet conditions on July 29, quiet to
unsettled July 30, unsettled July 31 and August 1, then quiet to
unsettled August 2 and quiet again on August 3-4. Look for more
information on the ARRL website on Friday, July 29. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by The Bangles' Eternal Flame
<http://en.wikipedia.org/wiki/Eternal_Flame_%28song%29>.

==> + SOCIAL MEDIA: ARRL LAUNCHES ONLINE FORUMS

To assist League members in communicating with one another and with
ARRL staff on topics of common interest, the ARRL has established three
forums -- Contesting, Awards and Technology -- on the ARRL website.
Visit www.arrl.org/forums <http://www.arrl.org/forums> to chat with
fellow hams about these topics. Additional forums are planned once we
have gained some experience with these three. ARRL members, guest users
and others can view the threads, but in order to participate in the
conversations or ask questions, you must be logged in as an ARRL
member. All users should read the forum rules
<http://www.arrl.org/forum/home/rules> before participating.

==> THIS WEEK ON THE RADIO

This week:

- July 29 -- NCCC Sprint Ladder
- July 30-31 -- RSGB IOTA Contest; US Counties QSO Party
- July 31 -- ARS Flight of the Bumblebees
- August 2 -- ARS Spartan Sprint

Next week:

- August 5 -- NCCC Sprint Ladder
- August 6 -- TARA Grid Dip Shindig; European HF Championship
- August 6-7 -- ARRL UHF Contest; North American QSO Party (CW); 10-10
International Summer Contest (SSB)
- August 7 -- RSGB RoPoCo CW; SARL HF Phone Contest
- August 10 -- NAQCC Straight Key/Bug Sprint
- August 10-11 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 29-30 -- ARRL Oklahoma State Convention
<http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma
- August 5-6 -- ARRL Texas State Convention

RAC Bulletin 2011-020E - OFFICE ADMINISTRATOR / BOOKKEEPER
2011-07-29

OFFICE ADMINISTRATOR / BOOKKEEPER (1 yr contract - possible extension)

Radio Amateurs of Canada is a not-for-profit membership association with headquarters in Ottawa, Ontario, Canada. It is a national organization, representing the interests of amateur radio all across Canada. Speaking on behalf of Canadian radio amateurs, RAC provides liaison with government agencies and carries the amateur voice about regulatory and spectrum issues to the discussion table with government and industry leaders, nationally and internationally. RAC is the Canadian voting member society of the International Amateur Radio Union, (IARU). RAC also provides many services, publications and supplies to its members to enhance their enjoyment of amateur radio.

Duties and Responsibilities:

General office duties including, but limited to:

- Handling incoming and outgoing mail
- Responding to telephone and email inquires from members, advertisers and vendors
- Processing membership renewals into a database
- Process monthly renewal reminders
- Maintain various sponsor programs
- Ensuring book store inventory levels are maintained to ensure sales
- Ordering office supplies
- Full bookkeeping cycle including, but not limited to:
- Accounts Receivable - processing and mailing invoices to customers in accounting software for merchandise orders, advertising revenue,
- Accounts Payable - processing vendor invoices and make payments through e-commerce and/or cheque as required
- Monthly deferred revenue, accrued liabilities and prepaid entries
- Reconcile banks, credit cards and e-commerce accounts
- Analyze and record revenue in accounting software
- Input payroll and remit monthly source deductions, quarterly WSIB
- GST/HST quarterly remittance
- Weekly bank deposits
- Maintain tidy and accurate files

Qualifications and Requirements:

- Completion of College - focus in Accounting or equivalent work experience (Minimum 5 years)
- Minimum 3 years experience with Quickbooks, including using the "class" for coding and listing
- Complete understanding of deferred revenue accounting and accrued liabilities
- Must be organized and detail oriented
- Ability to work with minimal supervision
- Must be able to take weekly deposits to the bank
- French would be considered an asset
- Please send CV with covering letter and salary expectations to racgm@rac.ca. We thank all applicants; however only those selected for interviews will be contacted.

Radio Amateurs of/du Canada | 217-720 Belfast Road | Ottawa, ON | K1G 0Z5 | T: 613 244 4367 | www.rac.ca

Amateur Radio Newsline(tm) Report 1772 - July 29 2011

Amateur Radio Newsline report number 1772 with a release date of
Friday, July 29 2011 to follow in 5-4-3-2-1.

The following is a QST. ST0R in the South Sudan comes on the air and
illuminates the world of amateur Radio; ARISSat One is made ready for
deployment from the International Space Station, Portugal to give its
hams the full 6 meter band next April, and 11 year old Kaitlin Cole,
KS3P, is named the Amateur Radio Newsline 2011 Young Ham of the Year.
Find out more on Amateur Radio Newsline(tm) report number 1772 coming
your way right now.

(Billboard Cart Here)

**

ON THE AIR: ST0R TAKES TO THE AIR FROM THE SOUTH SUDAN

Huge pileups are reported for the ST0R DXpedition to the world's newest
independent country of the Republic of the South Sudan. Online DX News
site dxcoffee.com says the group expects to be on the air on all bands
between 160 and 6 meters, operating mostly in CW, with occasional
shifts to SSB and RTTY. Heres a sample of their SSB operation as
recorded in Aosta, Italy at 19.18 UTC on 25th on 14.145 MHz and
uploaded to YouTube by Radio Chris Italy:

--

20 meter audio. Hear it by downloading the MP3 audio file at
www.arnewsline.org.

--

ST0R is also active on the WARC bands. Ryan Jairam, N2RJ, of Wantage,
New Jersey, caught them on 17 meter SSB the evening of Tuesday, July,
26th:

--

17 meter audio. Hear it by downloading the MP3 audio file at
www.arnewsline.org.

--

The newly-established Republic of South Sudan is also the latest
addition to ham radio DX awards lists. It was added to both the ARRL's
DXCC list and the CQ Countries list as of July 14, its admission date

to the United Nations.

The ST0R DX operation is slated to continue through August 10th. We will have more DX related news later on in this weeks amateur Radio Newsline report. (CQ Newsroom, N2RJ, RadioChrisItaly, others)

**

HAM RADIO IN SPACE: ARISSAT-1 MADE READY FOR DEPLOYMENT FROM ISS

If all goes as planned, Arissat One should be on-orbit by Wednesday, August 3rd. Jeremy Boot, G4NJH, of the RSGB News is here with this update:

--

AMSAT satellite ARISSAT-1, currently aboard the International Space Station, has had a checkered history.

As previously reported, it was not deployed in February as originally planned. A further date in July also came and went.

The RSGB understands that it will now be tested within the ISS on 30th and 31st of July, the weekend of the AMSAT-UK Colloquium. It is planned to monitor the tests from the Colloquium using the facilities of GB4FUN.

The satellite will probably transmit its standard 2 meter band-plan, centered on 145.938MHz. All being well it will be hand-launched from the ISS on Wednesday the 3rd of August.

I'm Jeremy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

We will have more on ARissat One in next weeks Amateur Radio Newsline report. (AMSAT-UK)

**

RESTRUCTURING: PORTUGAL TO GIVE HAMS 50 to 52 MHz NEXT APRIL 4

The National Communications Authority of Portugal has accepted a proposal filed to it by CT1DHM and CT1FBF to amend the upper range limit on the 6 meters band effective April 4th 2012. That coincides with the date of the complete switch-off of the analogue TV broadcasting transmissions and changeover to digital terrestrial television. The new limits of the band allocation for Portugal will be from 50 to 52 MHz once analog television disappears from that spectrum. (CT1ETL)

**

RESTRUCTURING: SLOVAKIA HAMS GET NEW 5 MHZ CHANNEL

OK1RP reports that Radio Amateurs in Slovakia have access to a single channel in the 5 MHz or 60 meter band. Stations in Slovakia can use the channel ranging from 5.2585 to 5.2615 MHz with a maximum power of 100 Watts Effective Radiated Power. A special permit is required to operate in this new band sliver. Licenses are valid for 1 year from the date of issue which is the same as found in the Czech Republic. Further 60m information can be found on-line at 60mband slash blogspot dot com. (OK1RP, Southgate)

**

RESTRUCTURING: NETHERLANDS HAMS GET 70 MHZ BAND AND TEMPORARY 500 KHZ BAND

Hams in the Netherlands now have access to bands at 500 kHz and 70 MHz. This after the Dutch Minister of Economic Affairs, Agriculture & Innovation issued a Decree on July 6 changing the National Frequency Plan.

The revised bandplan shows an amateur service bands at 501 to 505 kHz that will remain available until January 1st, 2014. It also shows a new allocation from 70.0 to 70.5 MHz that has no time limit. More on this restructuring in the Netherlands is on-line at tinyurl.com/NetherlandsGazette20110706 (VERON)

**

ENFORCEMENT: DOMESTIC U.S. 17 METER INTERFERENCE RESOLVED

According to W3ON via the Ohio Penn DX newsletter the Morse transmissions heard on 18 point 085 MHz over the last several weeks are gone. This thanks to the quick action by the FCC's Enforcement Bureau taken in response to several complaints including one from the ARRL and another from him.

According to an e-mail that W3ON received from the FCC's Laura Smith, the errant C-W signal was traced to a transmitter operating in the state of California. The FCC visited the radio site, and the transmissions ceased. Smith's note to W3ON stated that the transmissions were found to be inadvertent butr no further details were furnished.

W3ON says that he is glad to find that the FCC does react to requests sent by e-mail. He says that in his case that he received an E-mail within a few hours from Smith that her agency was investigating the incident. (OPDX)

KAITLYN COLE, KS3P, AGE 11, NAMED 2011 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR

Amateur Radio Newsline's Young Ham of the Year Judging Committee has announced that Kaitlyn Cole, KS3P, of Harvest, Alabama, has been chosen as this years award recipient. Bill Pasternak, WA6ITF, is here with the details:

--

WA6ITF: "You are the 2011 Young Ham of the Year.

KS3P: "Oh my god.thats so awesome."

--

That's a very surprised Kaitlyn Cole, KS3P, of Harvest, Alabama, who at age 11 learns that she is the youngest person ever to receive the Amateur Radio Newsline(tm) "Young Ham of the Year Award." But her lack of chronologic age is more than made up for by her selfless dedication to her community and the youth of Alabama through her chosen hobby/service of amateur radio.

This past On April 27, the Huntsville, Alabama area, including the small community of Harvest, was hit by a series of destructive tornadoes. The severe weather took a heavy toll in lives lost and property damaged. Kaitlyn and her father immediately volunteered to help with amateur radio relief activities. Kaitlyn began by logging contacts and running errands, but in short order took on the role of Net Control Station, working for many days from 7:30 a.m. to 4:00 p.m. With cellular and wireline telephone coverage being spotty to non-existent, Kaitlyn's duties as Net Control involved dispatching amateur radio operators with rubble clearance machinery and debris pickup teams. For her efforts, Kaitlyn received many compliments from veteran operators on the professionalism that she displayed during this crisis situation.

Kaitlyn is also Assistant Section Manager for Youth Activities in the ARRL Alabama section. In this role, she visits many hamfests where she speaks to other young hams. Kaitlyn has also volunteered her services the past three years at the ARRL Expo Youth Lounge at the Dayton Hamventionc and ran a special event operation to honor the local Volunteer Fire Department in her hometown.

The daughter of Stanley, NX3P, and Amy Cole, Kaitlyn joined the amateur radio fraternity at the tender age of 8. She passed her Technician exam in September 2009, her General in October 2009, and her Extra Class this past January 3rd. Since being first licensed, Kaitlyn has participated in many amateur radio activities, with a special emphasis on the public service and the youth activity aspects of the hobby.

The 2011 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented to Kaitlyn will be honored on Saturday, August 20th at the Huntsville Hamfest in Huntsville, Alabama. Kaitlyn will receive --courtesy of Vertex-Standard -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat her to an expense-paid week at Spacecamp Huntsville, and will present Kaitlyn with a variety of CQ products. Amateur Radio Newsline(tm) will provide Kaitlyn with a commemorative plaque at the award ceremony. The cost of the plaque is once again underwritten by Dave Bell, W6AQ, President of DBA Entertainment Inc., Hollywood, California. Heil Sound Ltd. will also be presenting Kaitlyn with a ham radio related gift.

With the honor of making this announcement about a very fine young radio amateur who is a true asset to the hobby and her community, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

This year's award ceremony will be hosted by Don Wilbanks, AE5DW, of Amateur Radio Newsline(tm), Rich Moseson, W2VU, and Chip Margelli, K7JA, of CQ Communications, along with representatives of corporate underwriters Vertex-Standard and Heil Sound. (ARNewsline(tm))

ENFORCEMENT: FBI ARRESTS MEMBERS ALLEGED DDOS GROUP

The FBI says that it has arrested a total of fourteen individuals thought to belong to the hacking group Anonymous. This, for their alleged participation in a series of distributed denial-of-service or DDOS attacks against PayPal last year.

According to the indictment unsealed by a Federal court in San Jose, California, the 14 individuals who were arrested were all members of Anonymous who conspired to attack PayPal last December in retaliation for its perceived opposition to WikiLeaks. The defendants, all of whom are in their 20's or early 30's, were arrested on no-bail arrest warrants in a series of raids on July 19th in Alabama, California, Colorado, the District of Columbia, Massachusetts and five other states. Two other individuals were also arrested on what the FBI said were related cyber-crime charges. (Published News Reports)

RADIO LAW: MORE INFORMATION ON LIGHTSQUARED VS. GPS REVEALED

A federal report documenting GPS interference by the proposed LightSquared satellite and terrestrial broadband network has been released and because of it the National Telecommunications and Information Administration has recommended that the project remain on hold until the problem is solved.

In its findings, the NTIA said that it supports a recommendation that additional tests be performed. It also recommends that the FCC

continue to withhold authorization for LightSquared to commence commercial operations until all the available test data can be analyzed and all valid concerns have been resolved.

As previously reported, the interference issue started to vex LightSquared soon after it started testing its system. In response, LightSquared filed a modified operational plan with the FCC on June 30th that also took issue GPS receiver quality. The company noted that GPS receivers do not adequately reject adjacent-band interference and should be made to do so per FCC rules.

In response, an EXCOM test concluded that GPS receivers could be modified to reject interference, but that it would be impractical to do so. This is because it would require significant modification or complete redesign and replacement of GPS equipment currently in use. The report concluded that the timeline to develop new GPS receivers for some applications, from initial concept development through production, can take between 10 to 15 years. (B&C)

HAM RADIO ON THE WEB: ARRL STARTS NEW ON-LINE FORUMS

The ARRL has established three forums on its website that it says is to assist League members in communicating with one another and with ARRL staff on topics of common interest. The topics of these discussions are contesting, awards and technology. To take part, simply take your web browser to www dot arrl dot org slash forums. The ARRL says that it's planning to create additional forums on other topics once it has gained some experience with these first three. (ARRL)

NAMES IN THE NEWS: N8RUJ RECOGNIZED FOR HIS EMCOMM DEDICATION

Some names in the news. First up is Ed Young, N8RUJ, who has been recognized by the Shelby Michigan Township Board of Trustees for his decade and a half of volunteer services as part of the Radio Amateur Civil Emergency Service. For the past 15 years Young has been the point of contact between the amateur radio community and Shelby Township emergency management personnel. He job was to ensure that the township had backup emergency communication via an amateur radio program. (The Source, eHam)

**

NAMES IN THE NEWS: WALLY GREEN VK6WG TO CELEBRATE HIS 100th BIRTHDAY

And congratulations to Wally Green, VK6WG, of Albany, Australia who turns 100 this August. According to the WIA News, Wally is still going strong in the microwave experimenting area. The WIA News adds that the August issue of Australia's Amateur Radio Magazine will feature VK6WG on its cover. (WIA)

RADIO REMEMBRANCES: HELP COMMEMORATE 911

A reminder that this coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks on September 11th of 2001. Attacks that felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Moslem extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures and killing over 3000 American citizens.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we are trying to compile a list of radio clubs and individuals who are planning any form of ham radio memorial operation to honor those whose lives were lost that day. If you have plans to commemorate 911, please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many

as we can on our website at www dot arnewsline dot org.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest. (ARNewsline(tm))

EMERGING TECHNOLOGY: FORD TO ELIMINATE CD PLAYERS FROM ITS VEHICLES

Call this a sign of the times. According to news reports, the Ford Motor Company is eliminating CD players in its new United States vehicle models and opting to instead install USB sockets for iPods and other digital music players. Ford notes that all of its new cars will have a computer hub, which will allow drivers to access their music libraries from the Internet. (Published news reports)

HAM RADIO IN SPACE: BRAZIL ANNOUNCES NANOSATC-BR HAMSAT

In ham radio space related news, word that Brazil is preparing to launch its first amateur radio satellite to be known as the NANOSATC-BR.

The NANOSATC-BR is being developed by the National Institute for Space Research and students of Federal University of Santa Maria. It will have a cross-band transponder with an uplink on UHF and a downlink on VHF. Its telemetry beacon will transmit at 145.865 MHz using 9k6 BPSK.

In addition to the ham radio payload, BR-NANOSATC will also carry two scientific instruments. One is a magnetometer while the other is a particle detector of precipitation. It will be used to monitor real-time precipitation of particles in the magnetosphere above Brazil.

The BR-NANOSATC project is receiving support from the Amateur Radio Association Santamariense. The call sign for the satellites ground control station will be PY3EB. More is on-line at tinyurl.com/brazil-hamsat. (Southgate, PS8RF)

WORLDBEAT: DONATIONS BRING REPEATER VANDALIZED IN IRELAND BACK ON THE AIR

Ireland's Limerick 2 meter repeater on 145.725 is back on the air once again. This after being off due to vandalism at the repeater site.

The repair involved installing a new run of hardline coax from the repeater to the antenna. Also, a new security door was installed on the repeater site building.

The repairs were made possible through donations received from hams all across Ireland for which ythe Limerick club says that it is sincerely grateful. (IRTS)

WORLDBEAT: HCJB GLOBAL SAYS 5000 SOLAR POWERED RADIO SENT TO AFRICA

HCJB Global has announced the near-completion of its major effort to bring its broadcasts to thousands of listeners throughout Africa. The campaign began last fall when HCJB partnered with Moody Radio to publicize the need for the funds to purchase, program and distribute 5,000 SonSet Radio solar-powered radios to missions in Ghana.

As it turned out, the program brought in enough money to acquire an additional 2,000 radios to be delivered to missions in Sierra Leone and Burkina Faso. Additionally, 2,500 radios were recently shipped directly from the manufacturer to ministries in the Asia Pacific region. This included 1,000 to Indonesia, 1,000 to Thailand and 500 to Nepal.

The SonSet Radios are rugged, moisture-resistant handheld models featuring solar power-charged batteries and individual buttons for five fixed-tuned settings. The radios are programmed, tested and repackaged at the HCJB Global Technology Center before distribution. (Southgate)

**

DX

In DX, VA3ITA will be on the air August 8th to the 11th portable ZB2 in a VHF only operation from Gibraltar. Operations will be on 6 and 2 meters using a mix of digital, SSB and CW from the east side of the Rock, facing the Mediterranean Sea. Please check his qrz.com page for the latest news and email him directly to schedule a contact. QSL direct via home call either direct or via the bureau.

PA6NH, the contest team of North Holland, will be active during the RSGB IOTA contest held on to be held July 30th and 31st. Their operation weill take place from Texel Island using 100 watts into simple antennas. More on this operation is on-line www.pa6nh.com.

WB6OJB will be on the air as 7P8JK from Lesotho between September 15th to the 22nd. While mno other information was given, during his last Lesotho operation he was on the High Frequency bands from 40 to 10 meters using mostly SSB with some CW. QSL direct to his home callsign.

Members of the Jersey Contest Group will be active as GJ2A from Jersey Island during the Radio Society of Grreat Britain's Islands on the Air Contest. If you work them, QSL via Logbook of the World or direct to GJ3DVC.

PB2JJ will be active as 9H3JN from Malta between September 2nd and the 14th. Operations will be on 80 through 10 meters mostly CW but with the bpossibility of some SSB. QSL this operation alson via his home callsign.

EA3PT will be active stroke EA6 on Menorca Island between August 8th and the 21st. This operation will be holiday style meaning that he

will be on the air as he feels the need or as time permits. Bands announced are 40 through 10 using SSB only. QSL via Logbook of the World or by paper QSL to his home callsign.

Lastly, KF8UN will be in Peru until August 16th. He will be active stroke OA4 and says that he plans to work 20 meters with particular emphasis all day on August 8th. At other time he too will be operating holiday style. QSL via his home callsign.

Above from various DX news sources

THAT FINAL ITEM: SPY VS. SPY - 20th CENTURY STYLE

And finally this week how many of you remember the old "Spy Vs. Spy" comic in Mad Magazine. Well here's something that reads like its right out of that genre. Its a story about the Internet foreign intrigue that will leave you smiling and maybe wanting something sweet to eat. Amateur Radio Newsline's Bruce Tennant, has the story of the spies that got hacked by food:

--

According to published news reports, British spies successfully hacked into an al-Qaida website to replace instructions on how to build a bomb with - ready for this? Recipes for making cupcakes.

Nope, we are not kidding. The cyber offensive reportedly took place last year when the English language magazine aimed at Muslims in the West called Inspire was launched by supporters of al-Qaida in the Arabian Peninsula.

British intelligence officers based at the Government Communications Headquarters which is the state eavesdropping service, attacked the 67-page magazine, leaving most of it garbled. Instead of being able to read how to "Make a Bomb in the Kitchen of Your Mom," readers were greeted with computer code which actually contained recipes from The Best Cupcakes in America, published by U.S. talk show hostess Ellen DeGeneres.

The Washington Post reported that the British action followed a dispute between the CIA and the newly formed U.S. Cyber Command. The cyber unit had wanted to block the al Qaeda magazine but the CIA, which had countered such an attack, would expose sources and intelligence methods, won the debate and declined to allow an attack on Inspire. So the U-K did it for them and reports say that it took almost two weeks for magazine to post a corrected version after it had been sabotaged.

For the Amateur Radio Newsline, I'm Bruce Tennant, trying not to laugh to hard as I read this from Los Angeles.

--

An unnamed British security source said the Washington Post report was accurate but could not confirm details of the reported cupcake operation. (Various published news reports)

GB2RS NEWS

Sunday 31st July 2011

The news headlines:

* Slovakian amateurs gain 5MHz band

* Will 800MHz 4G signals interfere with TV?

* Islands On The Air contest active now

Slovakian amateurs have been given access to the 5MHz frequency allocation for experimental purposes. OM stations can use the band from 5.2585 to 5.2615MHz with a maximum power of 100W ERP. Licences are valid for 1 year.

Ofcom has extended the period for consultation on proposals for technical licence conditions for the award of 800MHz and 2.6GHz spectrum. The new closing date for responses to this consultation is 11 August 2011. Whilst not strictly related to amateur radio, there is an EMC concern. The new 800MHz 4G signals will fall within the bandwidth of masthead preamps and TV tuners, adding to an already complex mixture for TVI complaints.

This weekend sees amateurs around the world involved in the Islands on the Air contest. Until 1200UTC today you can expect to hear some unusual island stations on the air. Many will be using their own callsigns outside the contest hours. Operation is in the 3.5, 7, 14, 21 and 28MHz bands. All radio amateurs in the British Isles are automatically operating from an island and so will be keenly sought by others overseas who are taking part in the contest.

Following a request from a club, the graphs from the RSGB Survey are now available as a PowerPoint presentation. This means it is now possible to show the results to a group, with the presenter using the original PDF file as their presentation notes. The files can be downloaded at www.rsgb.org/survey.

Starting today, 31st July, a GB2RS news reading for the South of England is being re-introduced on 3640kHz at 9am local time. A team of five news readers will take turns with this schedule each Sunday. They will read the National news plus regional news for the South East, East Anglia and the South West. At around 9.30 the reader will seek reception reports during an after-news net, which may QSY to a nearby working frequency. On-air reception reports will be very welcome.

AMSAT-UK has made available a free PDF of the Spring 2011 edition of their newsletter, OSCAR News. It contains reports on four UK CubeSat projects currently being developed. There is also news of new South African CubeSats and details of the telemetry on ARISsat-1, currently scheduled to be deployed from the International Space Station on Wednesday 3 August. A printed copy of OSCAR News is posted to members each quarter. Read the Oscar News PDF at www.uk.amsat.org, just follow the new and renewing members tab. With only a few weeks to go to the International Lighthouse and Lightship Weekend on 20 and 21 August, a total of 290 entries have been received, but many more are expected before the event. So far this year 13 Lightships are entered, mainly from Belgium, England, Germany and the USA. There's also one each in the Netherlands, Sweden and Wales. Since 1998, the event has attracted more than 440 entrants, from some 50 nations. More information is at www.illw.net.

And now for the details of rallies and events for the coming week

This weekend, 30 and 31 July, the AMSAT-UK Space Colloquium takes place in the Holiday Inn, Guildford, postcode GU2 7XZ. There is a wide ranging lecture programme, which will also be streamed at www.batc.tv. RSGB Amateur Radio Manager Carlos, G0AKI will be on site with GB4FUN. Details at www.uk.amsat.org.

Horncastle Summer Rally will take place today, Sunday 31 July, in the Horncastle Youth Centre, Willow Road, Horncastle, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is £1.50. Information can be obtained from Tony, G3ZPU on 01507 527835.

King's Lynn ARC Rally & Car Boot will take place on 7 August at Gaywood Community Centre, PE30 4DZ. Doors open at 10am and admission is £1.50. There will be trade stands and a car boot area. Details from Ray, G3RSV, on 01553671307.

The Lorn Radio Amateur Rally will be held on 7 August at Crianlarich Village Hall, Crianlarich, near Oban, postcode FK20 8QN. Doors open at 10am and there will be trade stands and a Bring & Buy. Details from GM0ERV by e-mail to stewart.mciver@btinternet.com.

Now for the news of special events

Hull & District Amateur Radio Society and RAFARS are setting up a special event station at a veterans weekend today, 31 July, held at East Park, Holderness Road, Hull. GB2VET will be on the air, using HF, VHF & UHF and D-Star. There will also be a display of vintage WW2 radio equipment.

Pontefract & District Amateur Radio Society is operating a GB0YD for Yorkshire Day on 1 August. Operated from the Club's shack with the Yorkshire flag flying from the mast, they intend to talk at all amateurs £ whichever side of the Pennines they are located.

GB2SAH is the special event callsign operated by members of the Felixstowe & District ARS in conjunction with the Suffolk Aviation

Heritage Group. On 31 July the station will be operating from the Suffolk Aviation Heritage Group's display centre at Kesgrave, Suffolk, as part of the Military Heritage Weekend. The station will use both military and amateur radio equipment as well as making good use of the impressive communications towers on the site.

On 1 August, MI0RYL will be activating Scrabo Tower, Newtownards on the HF bands, propagation allowing. The site is at Locator io74dn and is being activated as part of the Castles and Stately Homes on the Air Programme.

On 3 August, MW6GWR will be activating Graig Fach Goch, an Iron Age hill fort, as part of the Castles and Stately Homes on the Air Programme. The hill fort is at an elevation of roughly 675ft. On 7 August a few amateurs in the Morecambe Bay area are putting a special event station on for the Heysham Classic Car Rally. They are trying to show the fun of amateur radio to a new audience. So if you're in the Morecambe area, please feel free to drop in or contact them on air. They will be operating 2m and HF between 10am and 4pm.

And now the HF DX news compiled from 425 DX News and other sources

Ian, G4FSU will be active again as OH/G4FSU from Emsalo Island, which is IOTA reference EU-097, until 10 August. He will be making an entry in the RSGB IOTA Contest. QSL via his home callsign either direct or via the bureau.

NQ6K will be active as stroke VY0 from Devon Island in the Canadian High Arctic until 5 August. The crew will be primarily using 20, 15 and 10 metres running PSK31 and RTTY and possibly SSB. Other bands will also be used depending on propagation. Please see www.devon2011.nq6k.org for current frequency updates and contact information.

EA3QS, IZ4AKS, IW3SQY, IZ8GCE and IT9YVO will operate as TY1KS from Benin from 5 to 14 August, on all bands, with three Elecraft K3s and two Elecraft KPA500 solid state amplifiers. They will focus on the lower bands and digital modes due to the high demand for those from Benin. They will also be on SSB on the higher bands, especially during trans-equatorial propagation openings. QSL via IZ8IYX.

Axel, DL7VEA will be active as OZ7VEA from Bornholm Island, which is IOTA reference EU-030, until 5 August, including a 12-hour entry in the IOTA Contest. QSL via DL7VEA, bureau preferred.

Now the contest news

Over the years, Islands On The Air has become the RSGB's flagship contest. These days it attracts over 2000 entries worldwide. Casual participants are likely to pick up some new countries and serious entrants will make thousands of QSOs in the 24 hours, although there are also 12-hour sections for single-op stations. The IOTA Reference is part of the exchange; the one for mainland Britain is EU-005. All the

IOTA references can be found on the internet at www.logiciel.co.uk/iota/shtlist/europe.html. Operations start at 1200 on the 30th, although some of the island DXpeditions will be using their own callsigns during testing in the days leading up to the contest. Using the bands 3.5 to 28MHz on CW or SSB, the exchange is signal report, serial number and IOTA reference.

2 August sees the 144MHz UK Activity Contest taking place from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The first weekend of the month is definitely one for low power enthusiasts. The action on Saturday 6th begins with the fourth 2m Backpacker Contest from 1100 to 1500UTC. Overlapping with the final hour is the144MHz Low Power Contest from 1400 to 2200UTC. In each of them you exchange the usual information, but also the first two letters of your postcode. Single letter postcodes are padded out to two letters, see the RSGB Yearbook or www.rsgbcc.org for a full list. Also on 6 August, the 12-hour European HF Championship takes place. QSOs within Europe are the only ones that count for points. Exchange a signal report and a two-digit number corresponding to the year in which you were first licensed. There are CW only, SSB only and mixed mode sections for high and low power stations.

The 432MHz Low Power Contest takes place on 7 August from 0800 to 1200UTC. Using all modes the exchange is signal report, serial number, locator and the first two letters of the postcode.

Also on 7 August is the 2nd RoPoCo event. It's a 90-minute Sunday morning event from 0700 to 0830UTC. You really need to be on your toes to do well, because the rolling exchange of postcodes (PC) is a real challenge. This is the CW leg, the SSB leg having taken place in April.

And now the solar factual data for the period from the 18th to the 24th of July, compiled by Neil Clarke, G0CAS on the 25th of July.

The period started with eight sunspot groups visible, most were small and stable. However, one of these groups produced the only C class solar flare, which lifted activity to low levels on the 18th. The remainder of the period saw activity at very low levels. Solar flux levels declined from 102 units on the 18th to 86 by the 24th. The average was 95 units. The 90 day solar flux average on the 24th was also 95 units, that's two units down on last week. X-ray flux levels declined from B2.4 units on the 18th to B1.4 by the 24th and the average was B1.9 units. Due to a recurring coronal hole geomagnetic activity was at unsettled levels from the 19th to the 22nd. The most disturbed day was the 20th with an Ap index of 19 units. The only quiet day was the 24th with an Ap index of 4 units. The average was 11 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 360 kilometres per second on the 18th to 750 by the 21st. Speeds then declined to 400 kilometres per second by the 24th. Particle densities were low except for a brief increase to 13 particles per

cubic centimetre on the 18th. Bz varied between minus 8 and plus 10 nanoTeslas during the disturbance and between minus 4 and plus 6 nanoTeslas on the quietest day.

And now the solar forecast. This week the quiet side of the Sun is expected to be rotating out of view. Even today an active region could be rotating into view over the Sun's south east limb. Solar activity is expected to be very low to low for most of the week. Solar flux levels should be on the increase and be in the high 90's or even slightly above the 100 mark, a lot will depend on the active region mentioned above. Slightly easier to forecast is the geomagnetic activity, which is expected to be unsettled today and maybe tomorrow, and again by next weekend. Both disturbances are the result of recurring coronal holes. However, the midweek period should be at quiet levels. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. Darkness hour lows are expected to be about 12MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 17MHz. The optimum working frequency with a 90 per cent success rate should be about 13MHz. The best time to try this path will be between 1900 and 2300 hours. The path will probably open earlier but levels will consequently be lower. Sporadic-E is expected to take place on some days.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

August 1, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, NG3K & ADXO, W3BTX, N4AA & QRZ DX, KH6BZF, WB6RSE, K8BL, K8GI, K8YSE, W8GEX (60m News), KB0ZIA, AT International, CT1EEB, DL1SBF, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, HA0HW, HP1AC, I1JQJ/IK1ADH & 425 DX News, IZ2DPX, IZ3EBA, JT1CD, OZ6OM & 50 MHz DX News, PA1AW, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM2LKW and VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 23rd-July, through Friday, 29-July there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5U, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J7, JA, JD/o, JT, JY, K, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, ST0, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VK9L, VP8, VP9, VQ9, VR, VU, XE, XT, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

CE0Y, EASTER ISLANDS. Frank, I2DMI, will be active as CE0Y/I2DMI from
Easter Island (SA-001) between July 30th and August 8th. Activity will
be on 80-10 meters, including 17/12 meters, using mostly RTTY. Suggested
frequencies are: 3582, 7038, 14082, 21082, 24922 and 28082 kHz. QSL
via his home callsign, direct or by the Bureau. Log will be uploaded
to LoTW and eQSL. For more info and online log, visit:
http://www.mdxc.org/ce0yi2dmi

CT9, MADEIRA ISLANDS. John, IZ2DPX, will be active as CT9/IZ2DPX from
the CR3L Santana station <http://www.cq3l.de/viewpage.php?page_id=? 1>
on the Island of Madeira (AF-014) between August 7-21st. Activity will
be on the HF bands and possibly 6 meters. QSL via his home callsign by
the Bureau or direct to IK2DUW. Log available at:
http://ik2duw.altervista.org/iz2dpxmadeira.html

IOTA NEWS (Remember the RSGB IOTA Contest is July 30-31st).....
IOTA CONTEST -- Complete details and can be found at:
http://www.rsgbcc.org/hf/rules/2011/riota.shtml

AS-014. Members of the Royal Omani Amateur Radio Society will be
active as A43MI from Masirah Island during the RSGB IOTA
Contest (July 30-31st). QSL Manager for this activitiy is
A47RS.

AS-066. Vlado, UA0LCZ is now active as UA0LCZ/P from Popova Island
and plans to be in the RSGB IOTA Contest (July 30-31st).
Activity will be on 80-10 meters using CW and SSB. QSL via
his home callsign.

AS-102. Koh, JH3GCN, is now active as BW9/JH3GCN from Kinmen Island
and plans to be in the RSGB IOTA Contest (July 30-31st).
QSL via his home callsign.

AS-147. Yoshi, JJ8DEN, will be activating the following islands
around the Hokkaido coastline as JJ8DEN/8:
July 28-29th - Rishiri Island
July 30-31st - Rebun Island
August 1-2nd - Rishiri Island
August 4-5th - Teuri Island
August 6-7th - Yagishiri Island
Activity will be on 40-6 meters (if possible, 160/80m) using
CW, RTTY, PSK31 and JT65A. Sorry, no satellite. This schedule
might be cancelled without notice due to sea conditions.
QSL via his home callsign, by the Bureau or direct.

EU-040. Operators Jorge/CT1BOL, Joaquim/CT1DZR, Marco/CT1EAV, Jose/
CT1EEB, Antonio/CT1ENV, Tony/CT1FFU, Antonio/CT1FJL, Joel/
CT1HXB and Mino/CT1IZW will be active as CR5B from Berlenga
Island between July 29-31st; during the RSGB IOTA Contest.
Outside the contest, operators will use their own callsigns/P
on all bands including the new 60m band. Authorized 60m band
frequencies (CW/SSB) in Portugal are: 5288.5, 5371.5 and
5403.5 kHz. QSL portable callsigns to their home callsigns.

QSL CR5B via CT1BOL.

EU-162. Nick, RA1QQ, will once again be active as RA1QQ/1 from Malyy Island and the Kandalakshskiy Lighthouse (RRA RR02-07, WLOTA LH-0768, ARLHS ERU-162, RLHA RLE-104, RDA MU-05) between July 28th and August 10th. Activity will include an entry in the RSGB IOTA Contest (July 30-31st). There is a possibility that Nick may visit other islands and lighthouses. QSL via his home callsign, direct or by the Bureau.

EU-186. Operators from the Turkish IOTA Contest Team will be active as TC0G from Gokceada Island during the RSGB IOTA Contest (July 30-31st). QSL via TA3TTT.

NA-045. Keith, K5ENS, is now active as XF1/K5ENS from Isla Mujeres until November 14th. Activity will be holiday style, but he will try to be on the air as much as possible. Watch for him on or near 14260 kHz most evenings. He has also been on 20 meters BPSK31. Keith also mentions that he is in operating distance to activate ARLHS MEX-139. He is using an Elecraft K3 w/100w with a N6BT Bravo-7K portable antenna custom built by Tom Schiller for Keith's special needs on this island. QSL via his home callsign direct or by LoTW, and eQSL. See QRZ.com for more details.

OC-227. YL Lyn, VK4SWE, a resident of Sweers Island, plans to be active during the RSGB IOTA Contest (July 30-31st). QSL via direct or eQSL.

J2, DJIBOUTI. Jacob, KB0ZIA, is now active as J28FJ from Djibouti City until the spring of 2012. He informs OPDX that he is "kinda new to the whole DX thing" and "this going to be a learning experience for him as this is the first time ever he has operated outside of the U.S." He is currently set up to work 40-10 meters, but he may do some changes later. Jacob will be working mostly SSB but may work some Digital later if he receives some other equipment. He is now using a Yeasu FT-857D and a ATAS-120. He plans to make a special QSL card for his stay in Africa. QSL via his home callsign.

JT, MONGOLIA. Seihachi, JA7LU, will be active as JT1LU from Ulaanbaatar between August 1-7th. QSL via JA7LU, by the JA Bureau or direct to: 2-5-9, Kaga, Kashiwa-shi 277-0051 Japan.

KH6BZF PROPAGATION FORECAST/REPORT (August 1-7th)....
Aug 01 AN SOLAR REFERENCE KEYS
Aug 02 AN --------------------
Aug 03 AN BN - Below Normal
Aug 04 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 05 AN LN - Low Normal
Aug 06 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 07 HN-AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Following their successful 2011 DXpedition to Jersey, members of the "Low Land DXpedition Team" (LLDXT) are now planning a trip to Luxembourg. Operators Ronald/PA3EWP, Jo/PA9JO, Dennis/PA7FM and Alex/PA1AW will be signing LX/homecall between August 30th and September 6th. Activity will be on all modes and all bands between 160-2 meters using several yagis and monoband antennas. The team is willing to accept activity requests reflecting the demand for LX worldwide. More details are available on their Web sites at: http://lx2011.lldxt.nl
--or-- http://www.cqfriends.com/user.asp?username=lx2011
This DXpedition is supported by CQFRIENDS.COM, the new InterNet community for radio-amateurs. QSL all callsigns via PA1AW.

LZ, BULGARIA. Operators Laci/HA0HW, Tomi/HA4DX and Ivan/LZ1PJ will travel throughout Bulgaria from the Serbian border to the Black Sea area and will spend their holiday south of Burgas between August 6-21st. On their route they will stop in different Bulgarian National Parks and will try to operate for few hours from each place. Laci and Tomi will sign LZ/homecall. During their second week, they will make a side trip to one of the EU-181 IOTA islands (Sveta Anastasia Island or Sveta Ivan Island). All operations will take place mostly on 40/30/20/17 meters using CW and SSB. QSL via the operators national QSL Bureaus or to theirs QRZ.com addresses.

N3, UNITED STATES (911 Special Event). Look for special event station N3U/Flt93 (N3U/United Flight 93) to be activated once again between September 8-15th, to remind "Amateur Radio Operators World-Wide" of the tragic events that happened near "Shanksville (Pa), New York City nd Washington DC on September 11, 2001." This year's activity will take place during 10th anniversary and the Memorial Dedication for the victims of United Flight 93. QSL N3U/Flt 93 via W3PN, by the Bureau or direct (Please include SASE and enough return postage. If additional postage is needed...your QSL will be returned via the BUREAU). For more details, QRZ.com.

TI, COSTA RICA (Early Announcement). Operators Kyle/WA4PGM, Roy/WK4Y, Rich/AJ3G, Julius/N2WN and possibly others will be active as TI5N during the ARRL DX SSB Contest (March 3-4th, 2012) as a Multi-? entry. QSL via W3HNK.

VP6, PITCAIRN ISLAND. Operators Jacques/F6BEE, Nigel/G3TXF, Gilles/VE2TZT, Michel/FM5CD and Vincent/F4BKV have announced a major DXpedition to the famous, mythical Pitcairn Island (OC-044, CQ Zone 32) in the heart of the Pacific Ocean. Efforts will be made to give this extremely rare entity to deserving DXers on as many bands as possible, but especially on the low bands. The team's plan is to be active as VP6T between January 20-29th, 2012. Activity will be on 160-10 meters including the 30/17/12 meter bands, using CW, SSB and RTTY. The VP6T log will be uploaded to LoTW during the operation if possible, if not immediately after the operation. They try to update their VP6T log on "ClubLog" several times a day during the operation. This will help you track your progress across the bands. QSL Manager is Nigel, G3TXF. In addition to the usual routes (Direct QSLing, QSLing via the Bureau and E-mail requests for Bureau cards to "QSL at G3TXF dot com"), they will also be using the new "Online QSL Request Service (OQRS) provided by ClubLog." For more details and the suggested frequencies, visit the VP6T Web site at: http://www.vp6t.org

ST0, SOUTH SUDAN (Update). The world's newest country and DXCC entity continues to be active on the air until August 10th, as ST0R. Updates from their Web page indicate that they now have five stations running and the 6 meters beacon (on 50.105 MHz). As this was being typed, activity has been on all bands (except 160m) on CW. SSB operations have been on 40/20/17/15/12/10/6 meters, while RTTY operations have been on 30/17/15 meters. Totals as of 1318z, July 29th, are 47011/QSOs with 14235/Unique callsigns. The breakdown is: 24364/CW, 16417/SSB and 6230/RTTY. Currently, there are 10 operators there: Paul/N6PSE, Dmitri/RA9USU, Valery/RG8K, Jun/JH4RHF, Andreas/DH8WR, Fabrizio/IN3ZNR, Manuel/EA7AJR, Jose/EA7KW and Antonio/EA5RM. Hrane/YT1AD return home on June 27th, and was replaced

by David/AH6HY. Others U.S. team members will arrive there around August 2nd. They report that the pile-ups are very heavy and they have to work by numbers to handle the pile-ups. They state, "Main target still is to give the new country to as many people as possible and we'll start to work others bands during upcoming days." For more details and updates watch: http://www.dxfriends.com/SouthernSudan2011
QSL via EA5RM direct. Their OQRS will be activated after the DXpedition. Online log is available on the Web page at:
http://www.dxfriends.com/SouthernSudan2011/log.php
ADDED NOTE: To see which actual operator you worked, hover your cursor over the green check mark and their picture and callsign comes up. Cool!

The following stations are expected to be active in the
RSGB IOTA Contest (July 30-31st, 2011)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2011 RSGB IOTA Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and N6PSE for the following DX information.

SOUTH SUDAN UPDATE. Here is the latest information regarding the South Sudan DXpedition from Paul, N6PSE:
Dispatch Juba:
The ST0R team continues to work through the pile ups, now passing the 60,000 QSO mark. We are continuing to run five stations and and we are trying to get QSOs into the hands of all who need them. As is the custom and practice of the Intrepid-DX Group, we have invited local youth to visit our operation. Today, we arranged a visit of 25 boys from the Juba Secondary Boy's Academy. We gave the boys a tour of the ST0R shack and explained to them the various aspects of amateur radio. We allowed them to listen as we made QSOs across the world. We have recorded this visit on the ST0R photos page: http://www.dxfriends.com/SouthernSudan2011/photos.php
We are just at the half-way mark of the DXpedition and we will continue to be active until August 10th, 2011.
Thank you,
The ST0R Team

Radio News Bulletin
Sunday 31st July 2011

IRTS 2 Metres Counties Contest

The IRTS 2m Counties Contest will take place Sunday 28th August 2011. The closing date for the submission of the log to the contest manager is 27th September 2011.

HF Newsreaders.

We wish to welcome Francis Lenane EI5GOB and George Donaldson EI7GKB as HF newsreaders. Francis is based in Waterford and George is based in Athlone thus ensuring a nice geographical spread. If there are any other operators who would like to read the news please contact Ger McNamara on 087 2532512 orei4gxb / at /gmail / dot/com.

South Sudan DXpedition

Anyone listening to the HF bands over the past week will have noticed the huge pile-ups generated by the DXpedition to South Sudan - the newest and therefore most wanted DXCC entity. In the first 6 days of operation, the multi-national team of radio amateurs clocked up 40,000 QSOs. The team, using the call sign Sierra-Tango-Zero-Romeo, plan to stay on the air until 10th August.

Operation will be on all the HF bands, along with 6 metres; the focus to date has been on the higher frequency bands. CW accounts for 50% of QSOs, phone and RTTY sharing the other 50%. At the time of writing, their log shows 88 QSOs with EI stations and 29 with GI stations. John EI7BA tops the EI list, with 13 QSOs.

Given the geographic location of South Sudan, European stations - and particularly southern European stations - have dominated the QSO lists. While the majority of radio amateurs trying to work them have been well behaved, there has been some deliberate QRM and "frequency police" actions, which have somewhat spoiled the fun at times.

Introduction to Amateur Radio

The Mayo Radio Experimenters Network are holding a series of practical hands on open days throughout the summer months. The events will start at 13.00 approx (weather permitting) and will take place on the following dates:

Sunday August 14th

Sunday September 11th

Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The location for all events will be the car park at the Halfway House on the Castlebar to Westport Road. If you would like further details please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/eircom/dot/net) , email David Hatfield EI3ECB on ei3ecb/at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

Limerick 2M Repeater QRV again.

The Limerick 2M repeater on 145.725 is now QRV again after being off the air due to vandalism at the repeater site. Limerick Radio Club are grateful for the many generous donations received from around the country, which have gone towards installation of a new security door. A new run of Hardline has also been installed from the hut to the mast.

South Dublin Radio Club

On Saturday 16th of July South Dublin Radio headed northside and set up a portable station on Howth Head. Two HF antennas, one VHF and two Amateur Television antennas were erected with power supplied by a portable generator. The club's tent was errected and the clubs rigs were put to good use.

A fibreglass extra large type fishing pole was used as the main mast with the base of this mast held firm with specialised 'ladder feeder'. Morse, voice and television were the modes in use, with High Frequency, 2 Metres, 23 Centimetres and 13 Centimeters the bands in use.

Some members of the South Dublin Radio club also took the opportunity to visit the nearby "Ye Olde Hurdy Gurdy Museum of Vintage Radio" After a great welcome members were given a guided tour of the museum by Pat the curator.

Comparison was performed between a carolina windom and a V multiband aerial. The weather conditions on the day were perfect with a risk of sunburn. The event was well attended with visitors from North Dublin Radio Club. It is hoped to continue the practice with the callsign EI2SDR/P on air again.

South Dublin Radio club is on its annual break and weekly meetings will return on Tuesday 16th of August.

Ampr.org Database

Brian Kantor, the administrator of the worldwide ampr.org database is currently doing a cleanup. If you are using an allocation in 44.155/16 subnet. Please contact Brian, or John EI7IG.

Astronomers Find Largest, Most Distant Reservoir ofWater

Two teams of astronomers have discovered the largest and farthest reservoir of water ever detected in the universe. The water, equivalent to 140 trillion times all the water in the world's ocean, surrounds a huge, feeding black hole, called a quasar, more than 12 billion light-years away. (Source:www.nasa.gov)

NASA's WISE Mission Finds First Trojan Asteroid Sharing Earth's Orbit

Astronomers studying observations taken by NASA's Wide-field Infrared Survey Explorer (WISE) mission have discovered the first known "Trojan" asteroid orbiting the sun along with Earth. Scientists had predicted Earth should have Trojans, but they have been difficult to find because they are relatively small and appear near the sun from Earth's point of view. (Source: www.nasa.gov)

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

703. ZL Ham August Band Scope

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

705. SARL NEWS - SUNDAY 31 JULY 2011

Newsgroup: rec.radio.amateur.misc

SARL NEWS - SUNDAY 31 JULY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with regret that it must be announced that the key of Robert Boulanger, ZS6ARC, became silent on Wednesday 27 July2011 after a long period with Alzheimer. Condolences to his wife Claire, three sons and daughter, other relatives and friends.

(PAUSE)

In the news today:

ARRL NAMES LARRY PRICE, W4RA, PRESIDENT EMERITUS

SARL TO CONSIDER AN ON-THE-AIR YOUTH FORUM

IARU REGION 1 CONFERENCE

RADIO TECHNOLGY IN ACTION SYMPOSIUMS 2012

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

ARRL NAMES LARRY PRICE, W4RA, PRESIDENT EMERITUS

Dr Larry Price who served as ARRL President from 1984-1992 and served previously as a Vice Director, Director and Vice President of the ARRL Board of Directors was named as the ARRL President Emeritus at the recently held meeting of the ARRL Board.

Larry also served for 10 years as Secretary of the International Amateur Radio Union (IARU) and another 10 years as that organization's President. Dr Price continues to serve the IARU as an expert consultant and has been recognized as President Emeritus by the IARU's

Administrative Council. In celebration of Dr Price's service to the Amateur Radio Service and in recognition of his 60th anniversary as a radio amateur, the Board named him President Emeritus of the ARRL.

The SARL has congratulated Larry and thanked him for his many years of service to amateur radio.

SARL TO CONSIDER AN ON-THE-AIR YOUTH FORUM

During its meeting to discuss the various new initiatives highlighted in the annual report, the SARL Council considered the formation of an on-the-air youth forum. The objective is to create a space where young radio amateurs can share ideas and talk to each other. The forum will be run on an intecnet basis with connections to various repeaters and HF.

One proposal is to run it once a month at an early evening time slot. Council would like the first forum to get on the air in early December. Comments and suggestions are invited from young radio amateurs on which day of the week and at what time the forum should be run. The objective is to get the youth to manage the monthly event and to form a steering committee.

If you are under 25 and are interested in running and participating in the forum send an email to HYPERLINK "mailto:artoday@sarl.org.za" artoday@sarl.org.za with your contact details and how you would like the idea to be implemented. Please mark the subject line SARL Youth Forum.

SARL WEB PROGRESS REPORT

The interim move to another server at the current ISP has stabilized access to the SARL web. The move to another ISP is making progress. Several of the issues with the various data bases interacting with some of the services on the web have been resolved and full testing is expected later next week. The SARL council is planning several new features and content which will be implemented over a period of time once the move to the new ISP has been completed.

IARU REGION 1 CONFERENCE

In two weeks time delegates to the IARU conference will be arriving in South Africa to deliberate on the many agenda items. You can find the motions and agenda as well as other interesting information on HYPERLINK "http://www.iaru2011.org.za" www.iaru2011.org.za. During the weeklong conference a special event station, ZS6IARU, will be on the air. Listen out for many exotic callsigns as delegates from over 50 countries take to the air using ZS6/ their own callsign.

The Region 1 conference will be followed by the IARU Administrative Council meeting. This is the first time since the formation of the IARU in 1925 that the conference and the AC meeting are held on the African continent.

RADIO TECHNOLGY IN ACTION SYMPOSIUMS 2012

The SARL Council has started planning the 2012 Radio Technology in Action symposiums and is inviting your proposals on subjects you would like to see covered. The theme will be RTA2012 back to Amateur Radio Basics, a mix of new technologies, practical amateur radio and operating. Send in your ideas and suggested speakers you would like to be approached. The address to write to is HYPERLINK "mailto:rta@sarl.org.za" rta@sarl.org.za. By the end of August all the ideas and proposal will be considered and for your input your name will go into a lucky draw for the ARRL Antenna Book valued at R480.

MEMBERSHIP RENEWALS KEEP A STEADY FLOW

As today is month end please send in your membership renewals, invoices were mailed some time back. The cutoff date is today but as in the past the SARL gives another month grace with the final cutoff date on 31 August. If you are not sure how much to pay or lost the invoice, call Mariska on Monday at 011 675 2393 or send her an email to HYPERLINK "mailto:admin@sarl.org.za" admin@sarl.org.za.

To date a thousand members have renewed their membership. Thanks to them for their continued support. If you have not yet rejoined the ranks of supporters, please do so as soon as possible.

NEW AFRICAN COUNTRY

Huge pileups are reported for the ST0R DXpedition to the world's newest independent country of the Republic of the South Sudan. Online DX News site dxcoffee.com says the group expects to be on the air on all bands between 160 and 6 metres, operating mostly in CW, with occasional shifts to SSB and RTTY. ST0R is also active on the WARC bands.

The newly-established Republic of South Sudan is also the latest addition to amateur radio DX awards lists. It was added to both the ARRL's DXCC list and the CQ Countrie's list as of July 14, its admission date to the United Nations.

NEW BANDS FOR THE DUTCH AND SLOVAKIA AMATEURS

OK1RP reports that Radio Amateurs in Slovakia have access to a single channel in the 5 MHz or 60 meter band. Stations in Slovakia can use the channel ranging from 5,258 5 to 5,261 5 MHz with a maximum power of 100 Watt Effective Radiated Power. A special permit is required to operate in this new band sliver. Licenses are valid for 1 year from the date of issue which is the same as in the Czech Republic.

Amateurs in the Netherlands now have access to bands at 500 kHz and 70 MHz. This after the Dutch Minister of Economic Affairs, Agriculture & Innovation issued a Decree on July 6 changing the National Frequency Plan.

The revised band plan shows an amateur service bands at 501 to 505 kHz that will remain available until January 1st, 2014. It also shows a

new allocation from 70,0 to 70,5 MHz that has no time limit.

CONTEST NEWS

SARL Winter QRP Contest 16 July 2011

The logs reveal that 72 stations took part during the event. 16 Logs were submitted including 3 check logs.

Most participating stations used SSB and a few used both CW and SSB, a few diehards used CW only.

The statistics don't reflect the true state of affairs since most stations that took part using CW unfortunately did not submit a log. It was very encouraging to see the renewed interest in using CW in this event and we sure hope that it will serve to encourage more to use this mode in future events.

The points advantage of operating with CW is substantial and this can clearly seen by the results in this contest as the winning station scored 660 points with 11 contacts.

1st - Pierre van Deventer, ZS6A 1230 points

2nd - Christo van Rensburg, ZS3R 640 points

3rd - Brendon Muller, ZS4DEF 504 points

The winner of the Lucky Draw prize is Dave Cloete, ZR6AOC.

The winner of a 1 year subscription to the SARL is Christo van Rensburg, ZS3R.

Congratulations to the winners.

PROBLEMS ENCOUNTERED DURING CONTESTS

It has come to the attention of the SARL Contest Manager, Geoff Levey, ZS6GRL, that there have been problems encountered between "Contesters" and "Rag chewers" during contests.

This is an appeal to the "Rag chewers" to please use the contest free segments of the band plan during contests. In this way conflict will not occur between the various parties. The frequencies used for contest purposes have been approved by the IARU are practiced world wide.

The same appeal goes out to the "contesters" to stay clear of the contest free segments of the band plan.

The contest free frequencies for phone (SSB) are as follows. Only the common frequencies that are used in contests are listed.

80 m - 3 650 to 3 700 kHz

40 m - 7 100 to 7 130 kHz

SARL HF PHONE CONTEST

The SARL HF Phone contest will be on the air from 13:00 to 16:30 UTC on Sunday 7 August 2011. The aim of the HF Phone Contest is for participants to contact as many radio amateurs in Southern Africa (see General Rules paragraph 1.b.) as possible in the 20, 40 and 80 m bands.

You can participate as a Single Operator Single Band, Single Operator All Band, Multi Operator Single Band or Multi Operator All Band. Club stations are encouraged to compete. A RS report and a consecutive serial number starting at 001 is the exchange.

Scoring. Each SSB contact counts 1 point. 2 points are earned per call area worked on each band and 2 points are earned for each station worked on all three bands.

The closing date for your log submission is 14 August and the logs must be sent to the West Rand ARC, PO Box 5344, Weltevredenpark, 1725 or by e-mail to HYPERLINK "mailto:contest@sarl.org.za" contest@sarl.org.za. Please do not use the address in the Contest Manual.

There are a number of trophies and special prizes to be won, but you must participate in the contest and submit your log sheet. Get all the rules on page 62 of the 2011 SARL Contest Manual.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low levels. However, there is a chance that new, rapidly emerging flux regions could increase activity to moderate levels at any time. The visible solar disk consists primarily of three big sunspot groups numbered 1 260, 1 261 and 1 263. Currently there is a chance for M-Class flares around both Sunspots 1 260 and 1261 and a very small risk of an X-Class flare. Each of these sunspot groups is the size of several planet earths. Sunspot 1 260 is in good position for any possible earth directed Coronal Mass Ejections (CMEs).

For the people doing their own frequency predictions the expected effective sunspot number for the week will be less than 50.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m. There is a chance of 15 m openings to South America.

Please visit HYPERLINK "http://www.spaceweather.co.za" www.spaceweather.co.za for further information.

DIARY OF EVENTS

07 Aug. - SARL HF Phone Competition.

09 Aug. - SARL YL Sprint.

21 Aug. - 3rd leg of SARL Digital Competition.

28 Aug. - SARL HF CW Competition.

Aug. - Send ideas about 2012 Radio Technology in Action symposiums to HYPERLINK "mailto:rta@sarl.org.za" rta@sarl.org.za.

Aug. - Send ideas about proposed youth forum to HYPERLINK "mailto:artoday@sarl.org.za" artoday@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
25 - 31 July 2011

Solar activity ranged from very low to high levels during the
period. The period began with very low activity during 25 July, with
B-class flares predominantly from Region 1260 (N19, L=358,
class/area Ehi/330 on 30 July). Activity increased to low levels on
26 July with two C-class flares from Region 1260. Activity increased
to moderate levels on 27 July due to an M1/1n flare at 27/1607 UTC,
as well as frequent to occasional low-level C-class flares, from
Region 1260. Activity decreased to low levels during 28 - 29 July
with 13 C-class flares on each of those days. The largest during
this period was a C6/1f at 29/1640 UTC from Region 1261 (N16, L=330,
class/area Eki/350 on 31 July). Activity increased to high levels on
30 July due to an impulsive M9 flare from Region 1261 at 20/0209
UTC. A 180 sfu Tenflare was associated with this flare. Low levels
returned on 31 July with several C-class events, the largest of
which was a C3/Sn at 31/0254 UTC from Region 1261.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to high levels during 25 - 26 July. Flux increased to
moderate to high levels during 27 - 29 July. Flux decreased to
normal to moderate levels on 30 - 31 July.

Geomagnetic field activity ranged from quiet to minor storm levels
during the period. Activity began the period at quiet to unsettled
levels, with isolated active to minor storm levels at high latitudes
on 25 July, due to a coronal hole high-speed stream (CH HSS).
Activity decreased to mostly quiet to unsettled levels on 26 July.
Activity decreased to mostly quiet levels during 27 - 29 July.
Activity increased to quiet to active levels with an isolated minor
storm period at high latitudes during 30 July. Mostly unsettled
conditions were observed on 31 July.
```

Forecast of Solar and Geomagnetic Activity
03 August - 29 August 2011

Solar activity is expected to be at low to moderate levels during 03 - 08 August, with a chance for M-class flares greater than M5 from Region 1261. Activity is expected to decrease to very low to low levels during the rest of the period as Region 1261 departs. A chance for M-class activity increases on 20 August when Region 1261 rotates back around the east limb.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high levels on 03 - 04 August. Normal to moderate levels are expected during 05 - 07 August. Moderate to high levels are expected during 08 - 13 August due to effects from a recurrent CH HSS. Normal to moderate levels are expected on 14 - 15 August followed by moderate to high levels from 16 - 25 August due to a second CH HSS. Normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to be predominantly quiet during 03 - 04 August. A CME observed at approximately 02/0706 UTC on LASCO C3 imagery is expected to arrive late on 04 August and increase activity to unsettled to active levels with a chance for minor storm conditions through the first few periods of 06 August. Major storm periods are possible at high latitudes during this time. Quiet to unsettled conditions are expected for the rest of 06 August through 11 August due to effects from a recurrent CH HSS. Activity is expected to decrease to mostly quiet levels from 12 - 13 August as the CH HSS effects subside. Activity is expected to increase to quiet to unsettled levels from 14 - 22 August, with a chance for active levels on 15 - 17 August due to another recurrent CH HSS. Conditions are expected to decrease to quiet levels until the arrival of a third CH HSS anticipated to become geoeffective on 26 August. Quiet to unsettled conditions with a chance for isolated active periods are expected to prevail for the remainder of the forecast period.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

August 3, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Surf the Ultra-Highs - ARRL UHF Contest
- A Summer's Day of Fun - NAQP CW
- Ham Overboard - at 200 Miles Up!
- W3ZZ - CSVHF President's Award Recipient
- WRTC-2014 Video by 9V1YC
- Wisconsin QSO Party - Online
- High-resistance Shorts
- Harvesting Wild RF Energy
- RTTY RKKY RNDP

NEW HF OPERATORS - THINGS TO DO

If working the Islands On the Air (IOTA) contest activated your
foghorn, check out International Lighthouse-Lightship Week. The Worked
All Europe (WAE) CW weekend also features a unusual and challenging
"QTC" aspect of competition. Those of you new to ham radio in the past
three years can enjoy the ARRL's first-ever RTTY version of the Rookie
Roundup <http://www.arrl.org/rookie-roundup>, too!

BULLETINS

Your editor spent some time over the past couple of weeks rambling
around the Eastern Seaboard to get a sample of that cool
ocean-moderated summer weather...NOT! Triple-digit temps
notwithstanding, the time spent in the vicinity of ARRL HQ and then on
the North Carolina beach was most enjoyable. Thus, this issue is a mere
shadow of its usual voluminous self but rest assured that the August
16th version will be back to normal.

BUSTED QSOS

Well, the Bumblebees didn't take flight until this past Sunday - I hope
you caught a few in the Flight of the Bumblebees contest. I can't spell
very well, either - it's Friedrichshafen and Phoenix. And the Rohn 9H50
push-up mast has a total extended height of 34 feet, not 50 feet.
```

(Thanks, Jake K9WN)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Aug 6-7

- ARRL UHF Contest
- North American QSO Party--CW
- SNS and NS Weekly Sprints--CW (Aug 5)
- Lighthouse-Lightship Week
- TARA Grid Dip Shindig--Digital
- 10-10 Summer Phone QSO Party
- European HF Championship
- South Africa DX Contest--Phone
- NAQCC Monthly QRP Sprint--CW (Aug 10)
- CWops Monthly Mini-CWT Test--(Aug 10)

Aug 13-14

- Worked All Europe--CW
- Dominican Republic Contest--Phone
- Maryland-DC QSO Party
- Straight Key Weekend Sprint

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

You can watch the deployment of ARISSat-1
<http://www.nasa.gov/multimedia/nasatv/index.html> on NASA's website
beginning at 1400 UTC on Wednesday, August 3, as two Russian cosmonauts
undertake a six-hour spacewalk that will include the satellite's
deployment. Expedition 28 Russian Flight Engineers Sergei Volkov,
RU3DIS, and Alexander Samokutyaev will launch the satellite from the
ISS near the beginning of the spacewalk. You can learn more in this
ARRL website story
<http://www.arrl.org/news/arissat-1-deployment-set-for-august-3-watch-live-via-computer-or
-tv>
and EDN magazine e-newsletter article
<http://www.edn.com/article/518993-Amateur_satellite_ready_to_go_in_to_action.php>.

The southern hemisphere's first-ever Contest University - Brasil
<http://www.ctubrasil.com/fotos-2011> was a big success! Held in Porto
Alegre (PY3) the well-organized 1-1/2 day program of 18 classes
attracted around 200 attendees including a number of unlicensed
students from the host technical school whose club call sign in PY3MHZ.
Faculty included K5ZD, K1DG, W3LPL, W9KNI, LU8ADX/AY8A, CX6VM/CW5W, and
XE1KK. Local presenters included PU5AAD, PY3PR, PY3KD, PY5HSD, PY1NB,
PP5JD, and PY5CC/PP5XX. You can see some of the happenings as YouTube
<http://www.youtube.com/> videos (search for "CTU Brasil"), including
top long-distance attendee PV8DXs video summary
<http://www.youtube.com/watch?v=O9HiVn9j0BY>. CTU has now been held in
Dayton, Friedrichshafen, England, Italy, and Brasil...rapidly becoming

a global program. Thanks to the Araucaria DX Group, Icom, and local companies for supporting CTU! (Thanks, WRTC-2014 co-chairs, Doug K1DG and Randy K5ZD)

I'm sorry to report the sudden passing of Scott Lehman, N9AG - a member of the J6DX contest team and their QSL manager as well as for PJ2T and other J6 and PJ2 calls.

Web Site of the Week - Tim K3LR reports that Gene Zimmerman, W3ZZ received the Central States VHF Society <http://www.csvhfs.org/> (CSVHF) Presidents Award during its 45th annual conference this weekend in Irving, TX. The CSVHF Presidents award recognizes Gene's unselfish contribution of his time and knowledge to the Amateur Radio hobby. These awards arevery rare - there are only two other recipients of this award in the last 45 years. Congratulations, Gene!

==> SIGHTS AND SOUNDS

The featured item in this category is a new WRTC-2014 video <http://www.youtube.com/watch?v=yNyMAMjRNuA> by professional videographer James 9V1YC. If you are asked, "What is WRTC and why should I support it?" you could offer this video as a good start! The high quality of video production and running time of just under 5 minutes makes it ideal for use at radio club meetings, for introducing amateur radio to young people, or promoting ham radio at public events.

WORD TO THE WISE

Salt water - can it help your HF signal? After extensive research in a previously undisclosed beach-front location, I can conclusively report that the answer is yes!

==> RESULTS AND RECORDS

Tom K9BTQ reports that results for the 2011 Wisconsin QSO Party <http://www.warac.org/wqp/wqp.htm> are online including a PDF version <http://www.warac.org/wqp/2011/11results.pdf> of the writeup.

OPERATING TIP

Use a coaster when putting a cold 807 on your log sheets - and use a pencil since graphite does not run when wet.

==> TECHNICAL TOPICS AND INFORMATION

For some fun summer techie reading, check out the Design News magazine "Sherlock Ohms <http://www.designnews.com/archives.asp?section_id=1368>" column. The recent "High-Resistance Shorts" is a good example. I attribute shorts resistance to my failure to watch what I eat on vacation but maybe it is electrical after all...

Technical Web Site of the Week - What do you think would happen if you brought one of these

<http://www.eweekeurope.co.uk/news/scavenging-free-green-power-from-radio-waves-35622>
into the near field of a big multi-multi station? (Thanks, Kirk K4RO)

==> CONVERSATION

RTTY RKKY RNDP

We have an excellent opportunity coming up to capitalize on the computer savvy of new and potential hams! The upcoming ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> (August 21st, 1800-2400 UTC) will be conducted using RTTY for the first time. While watching the St Charles Amateur Radio Club's excellent Field Day GOTA station coach, Jeff AC0SC, lead new hams through the paces of making PSK31 QSOs I realized that digital operation is probably the most comfortable and thus the most attractive for someone just getting involved with ham radio.

Why not phone? After all, everybody can talk, right? Well, sure, but making a phone QSO is a brand-new and awfully unfamiliar process for non-hams. Aside from mike fright, general nervousness and self-consciousness, there is all that QRN and QRM to contend with, the weird (to rookies) contact protocol and exchange, the hard-to-understand (again, to rookies) filtered and low-fidelity voice, and so forth. All of these make it hard for a rookie to jump right in with confidence.

On the other hand, digital operating lowers the psychological barriers to entry quite a bit (so to speak). No more scratchy voices - on RTTY, all you have to do is just line up the signal peaks or get the ellipses balanced on the display and the software does the rest. No one will ever hear your nervous voice and the keyboard doesn't care if your fingers are a little uncertain. The interface is completely familiar to most people - keyboard and mouse and computer software. The contact protocol is easy to learn without all the other simultaneous distractions - select the colored call sign, press the macro key, wait for the response, accept the information and press another macro key. Presto - you just made a contest QSO! As the photo shows, even my mom made a digital contact under Jeff's patient tutelage. In the past 40 years, I could no more get her to make a voice contact than jump off the high dive - fuggidaboudit! Yet there she was putting a WB0HSI contact in the log!

So here's your assignment - get together with the Field Day GOTA coach and reach out to one or two of the most interested rookies. Invite them over to your station for a Sunday afternoon of operating - for an hour or the whole contest. If you don't have a GOTA log to work from, contact the local general-purpose radio club and find those new hams. Get them on the air! The Rookie Roundup is a low-pressure way to show how simple contacts can be made using skills they may already have in an environment with which they are already familiar.

What's that - your station isn't set up for RTTY? This is great opportunity for YOU, then, isn't it? There is plenty of time to put together or buy a simple audio interface. Many late-model radios even have direct data interfaces to simplify the connection even further. Just do an on-line search for your radio model and RTTY or digital modes - you may be surprised at how simple it can be. I am a poster boy for this - I've dabbled in RTTY and PSK31, but having made the invitation, I am now going to have my station set up for low-power RTTY and PSK31 operation by the 21st. (I may even get my mom back over here...)

What's that - your contest software isn't set up for RTTY? Another great opportunity! The latest word is that the N1MM software package will have a version that supports RTTY for the Rookie Roundup in time for the contest. Other contest packages support RTTY and you can operate the contest using a "General QSO" configuration in most cases. Another option is to create a free account on In The Log <http://inthelog.com/> and enter your contact information separately from whatever digital mode software you use. As an added bonus, stations using In The Log can see the scoring totals of all other Rookie Roundup participants using In The Log, too!

The biggest name in RTTY contesting, Don AA5AU <rttycontesting.com> is thoroughly supportive of the RTTY Rookie Roundup as is CQ WW DX Contest manager, Ed W0YK. They know how much fun digital mode contesting is and how easy it is to get going...once you get started.

So what's holding you back? Recruit a rookie or two, get your station configured, clear off the operating desk and have some summertime fun. Who knows, you might find yourself jumping into an RTTY contest or two yourself? There are more "Dig" checks in the Contest Corral's <http://www.arrl.org/contest-calendar> mode column every month!

73, Ward N0AX

==> CONTESTS

3 August through 16 August

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American QSO Party--CW, from Aug 6, 1800Z to Aug 7, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and state. Logs due: 14 days. Rules <http://ncjweb.com/>

SNS and NS Weekly Sprints--CW, from Aug 5, 0200Z to Aug 5, 0300Z. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

Lighthouse-Lightship Week--Phone,CW,Digital, from Aug 6, 0000Z to Aug 7, 2359Z. Bands (MHz): 1.8-28. Frequencies: See website. Exchange: Serial or ARLHS mbr/light nr and name, S/P/C. Logs due: Aug 31. Rules <http://illw.org/>

TARA Grid Dip Shindig--Digital, from Aug 6, 0000Z to Aug 6, 2359Z. Bands (MHz): 160-28, 50. Exchange: Name and 4-char grid square. Logs due: Sep 3. Rules <http://www.n2ty.org/seasons/tara_grid_rules.html>

10-10 Summer Phone QSO Party--Phone, from Aug 6, 0001Z to Aug 7, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Aug 22. Rules <http://www.ten-ten.org/>

European HF Championship--Phone,CW, from Aug 6, 1200Z to Aug 6, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T), last two digits of 1st year licensed. Logs due: Aug 31. Rules <http://lea.hamradio.si/%7Escc/euhf/euhfc.htm>

South Africa DX Contest--Phone, from Aug 7, 1300Z to Aug 7, 1630Z. Bands (MHz): 3.5-14. Exchange: RS and serial. Logs due: 14 Aug. Rules <http://www.sarl.org.za/>

NAQCC Monthly QRP Sprint--CW, from Aug 10, 0030Z to Aug 10, 0230Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Aug 10, 1300Z to Aug 11, 0400Z - multiple operating periods. Bands (MHz): 3.5-14. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Worked All Europe--CW, from Aug 13, 0000Z to Aug 14, 2359Z. Bands (MHz): 3.5-28. Exchange: RST and serial (see Web for QTC rules). Logs due: 15 days. Rules <http://www.waedc.de/>

Dominican Republic Contest--Phone, from Aug 13, 0000Z to Aug 14, 0000Z. Bands (MHz): 3.5-7. Exchange: RS and serial. Logs due: 4 Sep. Rules <http://www.hi8ud.es.tl/>

Maryland-DC QSO Party--Phone,CW,Digital, from Aug 13, 1600Z to Aug 14, 0400Z to Aug 15, 0000Z - multiple operating periods. Bands (MHz): 1.8-28, 50-440, Frequencies: see website. Exchange: Maryland County/City or S/P/C. Logs due: Sep 14. Rules <http://mdcqsoparty.w3vpr.org/>

Straight Key Weekend Sprint--CW, from Aug 14, 0000Z to Aug 14, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

VHF+ CONTESTS

ARRL UHF Contest--Phone,CW,Digital, from Aug 6, 1800Z to Aug 7, 1800Z. Bands (MHz): 222+. Exchange: 4-char grid square. Logs due: Sep 6. Rules <http://arrl.org/contests>

RAC Bulletin 2011-021E - RAC ARES Section Restructuring Committee.
2011-08-03

During 2010, RAC established the Field Organization Review Project under the leadership of Doug Mercer VO1DM, Vice President of Field Services and with a committee of Section Managers and other volunteers reviewed the current Field Organization model and made certain observations which were reviewed by the Directors and Executive during the October 2010 vision/mission session in Ottawa.

In May 2011 a new regional model was approved by the Board which expanded the role of the regions from ARES only to a complete model with a wide and complete range of responsibilities. Further to this implementation came the realization that further changes may be necessary in our larger regions such as Ontario.

To improve representation to our members and to ensure that the task of our Section Managers is realistic in terms of member access and service, the RAC Section Restructuring Commission has been formed with the task of how best we can serve our membership. The Commission will determine the most effective number of Section Managers and other positions and any further regional such divisions which may be required. The final report is expected by November 2011, with implementation in 2012.

Members of the Commission are Bill Unger VE3XT, Director Ontario Northeast (Chair), Jeffery Stewart VA3WXM, Director Ontario South, Pat Barrett VE3RNH, Vic Henderson VE3FOX and a member yet to be named.

Questions or comments should be directed to Doug Mercer VO1DM, Vice President Field Services.

Geoff Bawden VE4BAW, President
Radio Amateurs of Canada

DXNL 1739 - Aug 3, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CE0Y, EASTER ISLAND, SA-001
Frank will upload the logs for the CE0Y/I2DMI DXpedition announced in
DXNL 1738 to the LoTW and eQSL after his return.

CT9, MADEIRA, AF-014
John,CT9/IZ2DPX, will be active from Madeira (AF-014) on all HF bands
and maybe also on 6m from Aug 7-21.
QSLs via bureau to his homecall, direct QSLs via IK2DUW.
http://ik2duw.altervista.org
http://www.cq3l.de/viewpage.php?page_id=1

EA, SPAIN
Depending on the weather the ERU Team Valencia is going to activate the
summit EA5/CS-014 for the SOTA award from a peak with 1.099m height in
the Parc Natural de la Serra d'Espada on Friday, August 5. Their call
will be EA5URV/p mainly on 40m, 2m (SSB/FM) and if possible also 20m.

EA6, BALEARIC ISLANDS, EU-004
Jordi,EA6/EA3PT, will show up from Menorca (EU-004) from Aug 8-21.
He will work in holiday style (at least 1 hour per day) only in SSB
on 40m/20m/17m/15m/12m/10m. His preferred band is 17m.
QSL via LoTW or via his homecall.

J2, DJIBOUTI
Jacob,KB0ZIA, is working as J28FJ from Djibouti-City until spring 2012.
He is new to the DX business and works in SSB on 40m-10m until Septem-
ber. He may use also digital modes later.

JD1/MT, MINAMI TORISHIMA, OC-073
Take is working as JG8NQJ/JD1 from Minami Torishima (OC-073) mainly on
17m and 30m until the mid of October. He will return to the island in
December and plans to work on all bands then.
A special QSL card for this activity is available via his homecall.

JT, MONGOLIA
Seihachi,JA7LU, is signing JT1LU from Ulaanbaatar from Aug 1-7.
QSLs direct via homecall, JA stations only may send via bureau as well.
He will be accompanied by JT1AWN (JH1AWN), JT1AGO (JA7AGO) and
JT1ZP (JA7ZP) and they are working in CW/SSB/RTTY/PSK31 on 80m-6m
(maybe 160m). QSLs via homecalls.

OE, AUSTRIA
The HAM scouts of the CTS (CLUB TELESCOUT) already hit the airwaves
mainly on the usual scout QRGs using the scout club callsign OE1XJA/5
(or OE5J in contests) from Bad Ischl-Haiden (JN67sr) between Jul 27
and Aug 6. They have two occasions to celebrate: The 22nd World Scout
Jamboree in Sweden and the 60th anniversary of the World Scout Jamboree
in Bad Ischl-Haiden. Their QTH is the original campsite of 1951.
See also: http://www.telescout.org

ST0, SOUTH SUDAN
The ST0R DXpedition has already logged more than 65.000 QSOs. They also
demonstrated and explained amateur radio to local adolescents.

TA, TURKEY
Listen for TC1LHW (Karaburun lighthouse) and TC7LHW (Yoros lighthouse)
from the Black Sea coastline from Aug 1-8. QSL via TA1HZ.

TI, COSTA RICA
If you are interested to become an operator of TI5N during the next
ARRL DX Contest in SSB on Mar 3/4, 2012, please contact OM Kyle via
e-mail to: wa4pgm@embarqmail.com

V3, BELIZE
Colin,KU5B, will show up as V31UB in SSB, CW and digital modes on 80-6m
from Aug 5-10. QSL direct via homecall and LoTW.

RUSSIA, SPECIAL EVENT STATION
The radio amateurs of the Komi Republic are going to celebrate the
90th anniversary of the Komi Republic by activating the special event
station UE90K during the month of August from following cities:
DATE QTH Responsible HAM
Aug 1 Syktyvkar R9XC
Aug 2/3 Vorkuta R9XE
Aug 4/5 Inta RA9XY
Aug 6/7 Ustj-Kulom UB9XT (expedition)
Aug 8/9 Petschora R9XA
Aug 10/11 Sosnogorsk R9XV
Aug 12 Ussinsk RA9XSK
Aug 13/14 expedition to a rayon of the Komi Republic
Aug 15 Ussinsk RA9XSK
Aug 16/17 Uchta UA9XAB
Aug 18/19 Emwa RA9XA
Aug 20/21 expedition to a rayon of the Komi Republic
Aug 22/23 Objatschewo R8XX
Aug 24/25 Ussogorsk RW9XC
Aug 26 Mikunj R8XJ

Aug 27/28 expedition to a rayon of the Komi Republic
Aug 29 Mikunj R8XJ
Aug 30/31 Eshwa RT8X
QSL cards for all activities should be sent via UA9XL.

http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 6: European HF Championship
Aug 6/7: North American QSO Party

WFF Activities

DLFF-039: DL/ON4ACA is active until the end of August. QSL via ON4ACA.
DLFF-045: DG6PY/p is working from the natural park Bergstrasse-Odenwald
until Aug 16.
LZFF: Laci,LZ/HA0HW, Tomi,LZ/HA4DX, and Ivan,LZ1PJ, are travelling from the
Serbian border to the Black Sea from Aug 6-21. They will activate
several national parks for a few hours and plan to make a side trip
to IOTA EU-181 during the second week as well. Listen for the mainly
in CW and SSB on 40m/30m/20m/17m. QSLs via homecalls (bureau/direct).

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-147, JA8, Hokkaido's Coastal Islands: JJ8DEN/8 is doing some island
hopping along the coast of Hokkaido until Aug 7. He is working in
CW/RTTY/PSK31/JT65A on 40m-6m from Rishiri, Rebun, Teuri and Yagishiri.
QSL via homecall (bureau/direct).

EU-009, GM/O, Orkney & EU-012; GM/SH, Shetland and Fair Isle: Andre,GM3VLB,
is on tour again. He activates several islands in both groups in SSB
on 14.257,5 kHz until Aug 18. Andre confirms QSOs only direct.
See also: http://www.qrz.com/callsign/GM3VLB

EU-016, 9A, Dalmatia South group: 9A/IK6XVO and 9A/IK6JNH are working from
Drvenik Veli until Aug 5. QSLs via homecalls (bureau/direct).

EU-031, I*8, Campania Region group: An Italian group plans to activate
Licosa as IC8L on Aug 7. QSL via IZ8EGM.

EU-146, PA, Zuid Holland / Zeeland Province group: PE1OPM and PE1OXV will
show up as PE1OPM/p from Schouwen Duiveland on Aug 9-12.
QSLs via homecalls (bureau/direct).

EU-162, UA, White Sea Coast group: Nick,RA1QQ/1, is going to become active
from Kandalakshskiy lighthouse on Malyy between Jul 28 and Aug 10.
More trips to other lighthouses or islands are possible as well.

QSL via homecall.

EU-172, OZ, Jylland East and Fyn group: Ric,DL2VFR, will sign OZ0FR/p from
Aero mainly in CW from Aug 6-19. He may visit also the lighthouses
Skjoldnes and Soby Havn for a few hours. QSL via DL2VFR.
See also: http://www.iota-expedition.com

NA-045, XE3, Quintana Roo State North Group: XF3/IZ2LSC is going to visit
Isla de Mujeres from Aug 9-15. He will upload his log to the LoTW also.
Direct QSLs via EB7DX. Bureau QSLs via homecall.
His website is: http://www.timpy.it/xf3

XF1/K5ENS is already staying on Mujeres until Nov 14 and is not using
the right prefix (instead of XF3). His QTH is near to the lighthouse
ARLHS MEX-139. QSL via LoTW, eQSL or direct via K5ENS.

NA-111, W2, New Jersey State group: N2OB will be QRV mainly in SSB on 20/40m
from "Old Barney" (Barnegat Lighthouse ARLHS USA-039) on Beach Island
on Aug 6. QSL via N2OB (bureau/direct).

NA-142, K4, Florida State North West (Escambia to Walton County) group:
N8CHS/4 announced to become active from Santa Rosa from Aug 7-12.
QSLs only direct via homecall.

IOTA Contest: A list of many participating OPs on islands can be found at:
http://www.iota-expedition.com/IOTA2011/iota2011.html

50 MHz

HAMs in Portugal and Slovenia get more space for amateur radio on the 6m
band. Starting from Apr 4, 2012, amateur radio operation on 6m is allowed
on 50-52 MHz in Portugal (at the moment on 50,0-50,5 MHz). The Portuguese
PTT explains that with the shutdown of analog television. Slovenian HAMs
can work on 5260 kHz with 100 watts - for one year. This information is
spread by the British Southgate Amateur Radio Club and the Swiss news portal
Hamnews.

MMMonVHF Newsletter 2011-08-04

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-08-04
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** METEORSCATTER in August 2011 **

August marks the return of one of the most popular meteor showers:
the Perseids. Only the ï¿½normalï¿½ peak, with ZHR around 100 hr-1, is
expected to occur this year. According to IMO, the maximum in 2011
is expected to occur on August 13, between 01h and 13h30m UT, with
peak around 06h UT having ZHR = 100 hr-1. No encounters with other
trails are expected this year. Have a look to meteor predictions for
August 2011 (together with some tips about Perseids) at our
MMMonVHF MS Propagationpage: www.MMMonVHF.de/ms.php

** next bad news: Vico, I4ZAU, is SK **

I unfortunately have to inform you that Vico, I4ZAU is now SK. He
left us last night after a long lasting struggle with a prostate
cancer. For those who do not know him I can tell you that Vico it
has been one of the major Italian Microwave pioneers especially on
the 10GHz band. He has been a reference point for many of us here,
me included. He was the main founder, heart and soul of IQ4DF, the
C.R.B.R. club in Bagnara di Romagna, Italy. And he is still is.
Moreover he was a person with an enormous heart and I, for everybody
here, like to tell you that we truly have lost a brother. Now you
can freely surf your loved 10Ghz wave Vico...

OK1TEH will be QRV during Perseids shower on 432 MHz from JO70FD
Hi all. OK1TEH will be QRV during Perseids shower on 432 MHz with 800W SSPA + LNA at antenna + 23el DK7ZB 5,7m long. My RX should be some 2dB better then in 2010 season. I'm looking for new stations for 70cm MS test in FSK441, especially from UA/OH to break my own distance record of 1932km. If you have some 100W + 20el yagi or better, please don't be shy to ask me for sked at my email: ok1teh"at"seznam.cz All info about 70cm MS you can find at my web: http://ok1teh.nagano.cz/ms_70cmlog.htm#tricks
During shower I'll be also QRV MS on 70+144 MHz.
SOURCE: tnx Matej, OK1TEH, direct to MMMonVHF

** LX, LUXEMBOURG, Low Land DXpedition Team qrv in JN29 **

Following their successful 2011 DXpedition to Jersey, members of the "Low Land DXpedition Team" (LLDXT) are now planning a trip to Luxembourg. Operators Ronald/PA3EWP, Jo/PA9JO, Dennis/PA7FM and Alex/PA1AW will be signing LX/homecall between August 30th and September 6th. Activity will be on all modes and all bands between 160-2 meters using several yagis and monoband antennas. The team is willing to accept activity requests reflecting the demand for LX worldwide. More details are available on their Web sites at:
http://lx2011.lldxt.nl --or--
http://www.cqfriends.com/user.asp?username=lx2011
This DXpedition is supported by CQFRIENDS.COM, the new InterNet community for radio-amateurs. QSL all callsigns via PA1AW.
SOURCE: [GOLIST] Ohio/Penn DX Bulletin #1021

** Andy M0CTR qrv holidaystyle (Aug, 13rd-26th) from Jersey **

Lots of cw activity especially evenings . 100w on 6m and long 2.5m 3el yagi @ 12m high but good takeoff and ears , lots of CW operation and FB operator. on the HF low bands will use loop antenna @ 12m and vertical etc with 3x572b amplifier [400w] 100% qsl via homecall address. last year he worked 100s qsos on 6m and also many more on HF but this year with larger 6m antenna and more power on HF low bands. maybe operate other HF bands but depends on time available as there is family to fit in as well although his wife is very lenient and patient and sympathetic towards ham radio for many years now.
SOURCE: tnx to Andy, M0CTR, direct to MMMonVHF

** EA, SPAIN - SOTA Activity **

Depending on the weather the ERU Team Valencia is going to activate the summit EA5/CS-014 for the SOTA award from a peak with 1.099m height in the Parc Natural de la Serra d'Espada on Friday, August 5. Their call will be EA5URV/p mainly on 40m, 2m (SSB/FM) and if possible also 20m. SOURCE: [DXNL] DXNL 1739 (Aug 3, 2011)

** PG6HK qrv International Lighthouse and Lightship Weekend **

PG6HK - During the International Lighthouse and Lightship Weekend (August 20-21st) the special callsign PG6HK will be on the air and will be active from the old lighthouse in Harderwijk [aka De Visch poort](NL0038, NET-162), Netherlands. The team will be active on several modes on HF and VHF. Operators mentioned are Cil/PA1RBZ, Gert/PA2LO, Michel/PD0JMB, Ben/ PD0PDB and Jack/PD2J. QSL via PA2LO. For more details, see: http://www.PG6HK.com
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1020

** Cocos Keeling Is., VK9C. **

Babs, DL7AFS and Lot, DJ7ZG will be active as VK9CX from the from Cocos (Keeling) Islands between 19 October and 9 November 2011. Plans are to be QRV on 80-6 metres, mainly in RTTY, PSK and SSB. QSL via DL7AFS. Updates and online log search will be available at: www.qsl.net/dl7afs/ SOURCE: Sixitalia Weekly

** ST0R Update **

SOUTH SUDAN UPDATE. Here is the latest information regarding the South Sudan DXpedition from Paul, N6PSE: Dispatch Juba: The ST0R team continues to work through the pile ups, now passing the 60,000 QSO mark. We are continuing to run five stations and and we are trying to get QSOs into the hands of all who need them. As is the custom and practice of the Intrepid-DX Group, we have invited local youth to visit our operation. Today, we arranged a visit of 25 boys from the Juba Secondary Boy's Academy. We gave the boys a tour of the ST0R shack and explained to them the various aspects of amateur radio. We allowed them to listen as we made QSOs across the world. We have recorded this visit on the ST0R photos page http://www.dxfriends.com/SouthernSudan2011/photos.php
We are just at the half-way mark of the DXpedition and we will continue to be active until August 10th, 2011. Thank you

712. [ADMIN] Seeking Test Submissions to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2011-08-04 10:13:55 UTC
From: "rec.radio.amateur.moderated Admin" <rram@panix.com>
Message-ID: <j1bp0q$9vc$1@reader1.panix.com>
Source record: 4402
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc

It has been brought to our attention that one or more major News Service Providers (NSP's) may have their servers misconfigured, and may not be directing posts to rec.radio.amateur.moderated to its moderation team. At least one of these NSP's is a re-seller of private-label news service to many ISP's, so this may have led to a widespread "outage" of posting access to rec.radio.amateur.moderated.

Over the next week (though next Wednesday, August 10th), we are soliciting test articles which we will approve for our newsgroup on a temporary basis. Normally, we do not approve test messages, but are interested in testing propagation, audience, and submitter connectivity at this time, hopefully to try to identify the source(s) of the outage, so that we can contact the affected NSP's to request an appropriate fix. This thread will be closed, and further followups automatically rejected, starting Thursday, August 11th.

Please send such test messages according to the following guidelines:

- Post your test message as a followup to this article, and with the same Subject (optionally with a "Re: " at the start). You may optionally quote the text of this article, or not.

- Include your geographic location (city/state/country), your ISP and NSP (which possibly are the same), and at least your first name and amateur radio callsign (if you have a callsign).

- Articles that otherwise violate our submission guidelines:

http://www.panix.com/~rram/usenet/rram/guidelines.html

will be rejected.

If your article meets the above guidelines, but does not appear on rec.radio.amateur.moderated within 48 hours, please try resubmitting it as an E-mail message to rec-radio-amateur-moderated@panix.com. If it still does not appear, please contact your customer service representatives at your ISP and/or NSP to report a possible local misconfiguration or error.

Thank you for your cooperation, and support of our moderated newsgroup.

--
rec.radio.amateur.moderated Admin

WIANEWS WEEK COMMENCING AUGUST 07 2011.

If you can read the text of this website thank a Teacher.
If you can read it in English thank a Soldier, Sailor or Airman.

NOW TO THE NEWS IN DETAIL FROM THE WIRELESS INSTITUTE OF AUSTRALIA
FOR WEEK COMMENCING AUGUST 7 2011.

A southeast Queensland-based security worker who was called insulting names
on CB radio has won a $5000 payout from her former boss.

The woman from Eagleby, south of Brisbane, hailed from the former Yugoslavia
and complained to the former Anti-Discrimination Commission over offensive
comments allegedly made by a security business owner.

The 65-year-old woman's complaint shone a light on the abusive culture of some
UHF/CB radio transmissions, with one witness admitting he had even encouraged
his four-year-old daughter to use racially loaded terms.

The tribunal was told the security firm had previously employed the complainant
and her son, but fell out with the son in 2008 prior to the alleged abuse.

"The culture of the CB radio conversations between the parties, witnesses and
other users is carried out in an abusive tone with racially vilifying and
sexually harassing words and connotations," the tribunal said.

ACMA NEWS

Radio Quiet Zone in VK6, VK4ERM reports:-

The following information from the ACMA will be of future interest to Radio Amateurs travelling in the Meekatharra region of Western Australia.

The Australian Communications and Media Authority has enhanced the radio quiet protections for the Mid West Radio Quiet Zone or RQZ in remote Western Australia (near Boolardy Station), around 200 km east of Meekatharra.

The RQZ was established in 2005 to provide an environment that protects highly sensitive equipment used for radio astronomy from unwanted radiocommunications signals. These arrangements protect the radio telescopes currently in place at the Murchison Radioastronomy Observatory, as well as those proposed in the Australian-New Zealand bid to host the Square Kilometre Array or SKA.

'A clear regulatory framework to support radio quiet arrangements will further assist Australia to create the world's best radioastronomy facility,' said ACMA Chairman, Chris Chapman. 'This will provide a platform that should be ideal for future radioastronomy projects, including the ?1.5 billion SKA project.'

Mr Chapman said the new protection measures provide greater clarity and certainty to the arrangements that protect radioastronomy services in the RQZ.

'The new measures continue to provide for radio quiet while supporting the use of spectrum by other users and placing the lowest feasible burden on industry in the region,' said Mr Chapman. Mr Chapman said the new protection measures will not significantly change the nature of spectrum access and radio quiet arrangements in the Mid West RQZ.

'This will enhance protection for the RQZ by upgrading the existing statements of ACMA administrative practice to more formal regulation,' Mr Chapman said. The introduction of the enhanced protections for the RQZ follows a very extensive consultation process in which the ACMA sought the views of interested stakeholders. The ACMA has also released a Response to Submissions paper that outlines the rationale behind the final package of measures. The paper can be accessed via the internet as can Stakeholder submissions.

This is Ewan VK4ERM wishing you safe travels.

HOME OF THE GOOD GUYS

VK2APQ

Next Sunday the 14th of August Pierce VK2APQ turns 100 and his family has arranged a function for him. It will be held at the Bankstown Trotting Recreational Club.

A buffet lunch is available for purchase.

The time is between 11.30 am and 3 pm.

The address of the Trotting club is 178 Eldridge Road, Bankstown - not far from the Bankstown airport.

If you would like to attend please contact Pat Skeers Today the 7th at the latest on 0404 486 406

(Tim VK2ZTM)

FROM GOOD TO BAD!

HAMS ACROSS AUSTRALIA.

VK3
web service:- http://www.amateurradio.com.au/news/
Police Roundup http://www.vicpolicenews.com.au/

Have you ever wanted to be BAD?

Well a large group of VK and ZL amateurs are going to be BAD for thee days in fact they are going to be VERY BAD , VK3BAD that is.

VK3BAD will we active from Cape Liptrap from Friday 19th August through Monday 22nd August, from Bear Gully cottages just down the road from the Cape Liptrap Lighthouse.

Our team of eighteen amateurs will be active on most HF bands so please listen out for us, when we are not cooking steaks , drinking red wine and generally having a BAD time we will be on the air and eager to take your call.

This is John VK3DQ who's going to be a BAD boy "

Keep an ear out for VK3WI during the Remembrance Day and the International Lighthouse and Lightship weekends, and earn bonus points towards the Amateur Radio Victoria Century Award.

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

A Foundation Training weekend was held by the Central Queensland Amateur Radio Association Incorporated on Friday evening the 22nd of July and concluded Saturday the 23rd of July.

Prospective Foundation License holders were taken through the theory and practical curriculum for their tests. Tests were conducted on the Saturday afternoon. The training was very comprehensive and many thanks go out to Lyle VK4LM for holding this training session.

The 2011 Qld Firefighter Championship and Safe Communities Expo is being held the 11th, 12th & 13th August, at the Rochampton Heritage Village. The Central Qld Amateur Radio Association Inc will be manning their 3 day equipment display with the theme "Providing Radio Communications Support To Public Service Organisations, In Times Of Need". The Expo is open to the public on Saturday the 13th of August.

All are welcome to attend.

I'm Adam, VK4MTJ on behalf of Cental Queensland Amateur Radio Association Inc.

This is gordon VK4VP with news from the Sunshine Coast

Sunfest

Its getting close to Sunfest time again, this year its being held on September 10th at the usual spot as the past few years at the Woombye School of Arts building in the main street of Woombye starting from 09:00.

The usual tables of equipment will be there along with great food and friendship. Tables are $20 each and that gets you two entry tickets and general entry is a low $5 with additional family members $2 each.

There will be signage and a call in on the local repeater frequency of 146.850 and 146.825.

For more information or to book a table contatct the Sunfest Coordinator Richard VK4RY on 07 5492 9898, 0417 366 773 or email vk4ry@wia.org.au

VK8

Here is a little news from the Darwin Amateur Radio Club brought to you by Spud vk8zwm. The monthly meeting was held last Wednesday at the clubrooms in Sports House Waratah crescent Fannie bay, the following morning another of the very successful weekly cuppa, cake and chat mornings was held, these have proved to be very successful since their inception. Thursdays and 10 am is the time. If you are in the Darwin area on a Thursday why not drop in and take part. Part of the morning was spent sorting out the large pile of offerings for the successful auction held Saturday night after a barbecue tea. What more could you ask for on a beautiful balmy Saturday evening in Darwin in the dry. Our new foundation licencees have spent the first of two evenings building their own 2 meter slim jims. A simple antenna to build and setup. The Darwin club has brought more than 30 new amateurs into the hobby through the foundation licence in the last 12 months mostly through a liason with the scouting movement. Some other repeater news from the Darwin area. The new northern suburbs repeater is up and running in moil on 146.950. Coverage reports have been excellent This repeater does not require sub tone to access it. The Palmerston VHF repeater on 146.900 and the Darwin city repeater and IRLP access on 147.000 now require a 123hz subtone to access them due to high levels of interference in the area. On behalf of the membership of the Darwin club i would like to thank all those who made their way to Darwin for the National conference weekend. It was a great pleasure having you here. Some sad news to report is the passing of Dan VK8AN recently after a long illness. This has been Spud vk8zwm on behalf of the darwin amateur radio club

I'm Geoff Emery, VK4ZPP, and I've been reflecting.

Over 90 years ago came the end of the "war to end all wars", the First World War as we know it now. For electronics this was some sort of proving ground for the new technology of wireless. It also saw the use of the flying machine, the armoured tank and bloody, exhausting and stagnant trench warfare.

The presence of the Australian and New Zealand troops in the Dardanelles campaign gave us the national day of remembrance, ANZAC Day. In the northern hemisphere the wearied combatants came to remember the signing of the Peace Treaty as Armistice Day with silence at the 11th hour of the11th day of the 11th month. This tradition continues today.

This year we have military personell active in various places around the globe and some of these people are fellow amateurs. The tradition amongst the Australian radio fraternity is to remember those amateurs who have died whilst on active duty with a broadcast ceremony followed by a contest. The second weekend of August is the date of this contest and I encourage you all to participate in Remembrance Day.

DISCUSSION POINT

What use is an f-call?

Last week I was talking to an amateur in Esperance from Fremantle on 21MHz and he was bemoaning the notion that he needed to upgrade his license because with 10 Watts you couldn't do much.

Little did he know that the week before I was sitting in exactly the same spot with my puny little f-license as he thought of it and I was talking to Portland, Oregon.

I was listening on 7.146 and a CQ came out from a call-sign I didn't recognise and I answered and sure enough an answer came back and then I found he was talking long-path to South Africa and here I was with my puny little 10 Watts talking to him. He was pumping out 400 Watts and he was amazed that I was doing this off batteries with no amplifiers no anything and hand-made antennas.

You know he couldn't quite believe that you didn't have to spend thousands of dollars to make that kind of distance.

So your f-call can do more than you think. You just have to figure out how to make it do that. That's the challenge, not more power. Use it better!

I'm vk6flab

WIA PRESIDENT VK3KI SPEAKS:-

Extension of time for Club Grant Scheme applications

Applications for Club Grants for 2011 closed on 25 July.

In the WIA's release of 27 July, we reported that only a disappointing three applications had been received.

Since then one club has asked that a late entry be accepted, and offered very legitimate reasons for the lateness of the lodgement of the application.

The WIA Board has decided to accept that application.

It is also conscious of the fact that other clubs may be in a similar position and so it has decided to also accept any other late application that is lodged at the WIA office by not later than 4 pm Victorian time, next Tuesday, 9th August 2011.

Reasons for the lateness of the lodgement are not required.

Go to the WIA website for full details of the Scheme.

Clubs are reminded that this year Grants will be given for projects falling in to either of two categories:

1) Projects and activities to be conducted before 1 June 2012 to attract new amateurs, but focussed on people under 25; and

2) Amateur radio projects that are useful and innovative and that utilise both information technologies and radio communications.

If you club is planning to take advantage of this extension, it would be helpful if you could let the WIA Manager Mal Brooks know as soon as possible.

Email Mal or telephone Mal between 10 and 4 any day.

However, clubs are advised that any applications lodged after 4 pm next Tuesday 9th August will not be considered.

WIA DIRECTOR VK3JNI

Colour, Movement and the 10 Second Grab

Have you ever sat down and analysed the Television or Media that is intended for today's teenagers? If you have the time, you will notice that something changes every 10 to 15 seconds. TV and Media producers really have to work to keep their young audience. If they get bored, within 30 to 60 seconds, they will vote with the remote control, iPhone or anything else that is at hand. While reflecting on the recent efforts of our clubs who participated in the National Field Day or Jamboree's On The Air in recent years, I take my hat off to those operators who manage to keep young people's attentions for more than a few minutes. It is never an easy task. With both amateur radio operators and the scout movement worldwide preparing for the 54th Jamboree On The Air, over the weekend of the 15 and 16 October, it is timely to ask ourselves how we will keep the interest of our young teenage visitors.

I sometimes wonder if we are all too welded onto our HF radio microphones? Most amateurs find it interesting to tune the HF bands looking for an interesting contact. While we do this, our visitors, who live in an online social media world, may well tune out. Take more than 10 seconds to make something happen, and their interest is already going somewhere else Would we be better to use IRLP or Echolink to provide the initial clear, easy to understand communication with the distant party or scout group? Sure keep the Spotter tuning HF radio with the headphones on and make a spare pair of cans

available for the very interested participant. Once a clear contact is established, some of the keener visitors will be happy to listen in. Some will then be happy to become involved with the microphone too.

Recently I watched as the internet displayed activity on WSPR known as Whisper, showing the activity on the HF bands. I thought, this is an ideal way to show how the bands open and close to different places at different times. It is very visual, takes little effort to run and can provide a good guide to where we may make that voice contact.

Other digital modes including SSTV hold an interest for young people. I find it interesting to watch them try to guess what picture is that is slowly appearing on the screen.

If we reflect on our demonstration stations and decide that they may be a little slow or dull, we may consider how to lighten them up? The methods that we deploy to attract and to keep our visitors interested in our activities, for more than a short moment, may certainly be enhanced by a little more colour and movement than what the S meter can provide.
This has been Philip VK3JNI for the WIA Broadcast.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

National DAB+ on-air in Germany

Germany, Europe's biggest radio market, is now broadcasting digital radio plus in all major cities and autobahns. 27 transmitters around the country are on air delivering new radio content to 40 million people.

German listeners now have 14 new digital services to choose from and radio broadcasters now have the opportunity to diversify their programme offering, something which is no longer possible in Germany on FM.

In addition to these ground-breaking audio services, further value-added data services will be provided in the national and regional broadcasts. These data services include advanced text information (DL Plus), slideshow, Electronic Program Guide and TPEG service.

90elf is Germany's football radio station. The programme broadcasts all matches of the 1st and 2nd grade, the complete German Football Federation Cup, and selected matches of the Euro and Champions Leagues live. Reaching more than one million listeners per match day via Internet distribution, 90elf has access to 57 million new potential listeners through broadcast via digital radio.

The new digital radio standard DAB+ not only enables 90elf to broadcast a 90-minute match, but also allows the parallel distribution of full-length matches via multi-channels.

Police operation to rescue Norway terror attack victims hampered by communications blunder.

Southgate ARC have a report in from the Daily Mirror which says that Norwegian police were plunged into "total chaos" by a catastrophic breakdown in communications after mass killer Anders Breivik struck.

Breivik slaughtered 69 people on Utoya Island just hours after killing eight with a bomb in Oslo on but it took police 79 minutes to reach the island. Paramedics did not arrive for another 10-15 minutes.

The blunder occurred because district police used an old analogue radio system while the elite Delta unit, dispatched to tackle the gunman, and paramedics had switched to a new secure digital network.

Police commanders had to contact different units via email and even fax, as the mobile network was down.

Amateur radio enthusiast Finn Johannessen listened in to the ambulance chief.

He said: "He was in a panic, shouting, 'Where is the police, where is the police?' It sounded like total chaos."

Read the Daily Mirror story at:
http://www.mirror.co.uk/news/top-stories/2011/08/02/police-operation-to-rescue-norway-terror-attack-victims-hampered-by-communications-blunder-115875-23313809/

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Hello Listeners. I am peter Harding, VK4OD the WIA RD Contest Manager.
Today being the 7th August, next weekend is the RD Contest.

As I have asked in the past, I would ask if when you send your log in either by Electronic or postal means please ensure that you have you correct postal address.

Anybody requiring any of the forms posted to them please contact me ASAP.
In the coming week I will finalize the Opening speech and send out a special email via the usual weekly news server. (If you are not subscribed, and all rebroadcasters should be.. drop a BLANK email to

wiabroadcasters-subscribe@yahoogroups.com

AND write the word subscribe in the subject or title field)

For those people that are hand writing their logs, " PLEASE" write your logs in a legible manner, as in the past some logs have been VERY HARD to decipher.

With available variations of categories for the RD Contest if you are unsure of which you wish to enter, then please drop me a line to

rdlogs@wia.org.au

and I will do my best to answer them.

Good Luck in the Contest and I look forward to more receiving more logs than last year.

That date again, Aug 13-14 for the WIA Remembrance Day Contest

Aug 20-21 WW I.L.L.W.

Oct 22 WIA Jack Files Contest

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

1 Month and counting !!!

Oceania DX Contest preliminary notice

PHONE - The first full weekend in October each year from 0800 UTC Saturday to 0800 UTC Sunday

CW - The second full weekend in October each year from 0800 UTC Saturday to 0800 UTC Sunday

Log deadline for PH and CW logs - 28 days after the end of the CW contest

Keep an eye on this site :

http://www.oceaniadxcontest.com/

At this stage I can't confirm that this is on nor the 2011 rules but I anticipate that is it and the 2011 rules will appear very soon ..

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

South Sudan DXpedition

Here is information from Paul, N6PSE regarding the South Sudan DXpedition:

Dispatch Juba:

The ST0R team continues to work through the pile ups, now passing the 60,000 QSO mark. Continuing to run five stations and trying to get QSOs into the hands of all who need them.

As is the custom and practice of the Intrepid-DX Group, local youth have visited the operation. 25 boys from the Juba Secondary Boy's Academy. Boys toured the ST0R shack and were shown the various aspects of amateur radio. We allowed them to listen as we made QSOs across the world. We have recorded this visit on the ST0R photos page: http://www.dxfriends.com/SouthernSudan2011/photos.php

At the half-way mark of the DXpedition and active until August 10th, 2011.

DX

WB 6 OJB will be on the air as 7P8JK from Lesotho between September 15th to the 22nd. While other information was given, during his last Lesotho operation he was on the High Frequency bands from 40 to 10 meters using mostly SSB with some CW.
QSL direct to his home callsign WB 6 OJB.

PB 2 JJ will be active as 9H3JN from Malta between September 2nd and the 14th. Operations will be on 80 through 10 meters mostly CW but with the possibility of some SSB. QSL this operation via his home callsign PB 2 JJ.

Entries mount for International Lighthouse and Lightship Weekend

With just weeks to go, the big entry improvements are from Australia, Chile, Portugal and the USA. They have already exceeded previous records and a few more countries are about equal with last year's total.

Organisers believe that the International Lighthouse and Lightship Weekend on August the 20th and 21st is on track to match the total of 447, with many entries expected in coming days.

Around Australia we VK2 on 17, VK4 with 12, followed by VK3 on 11, then VK7 with 9, VK6 has 6 and VK5 on 5. The total exceeds 60.

Welcome to our newest country Thailand to be put on air by Simon Luttrell HS0ZIB, from the Golden Jubilee Lighthouse, at Phromthep Cape, Phuket.

The 48-hour event is not a contest but is plenty of fun. Those participating are requested to take the time to work others as well as the slow operator, new licensee or QRP stations.

Visit the revamped website for the latest and an online entry form at illw.net

(Jim Linton VK3PC)

INTRUDER WATCH - ENFORCEMENT ZONE

24.890 to 24.990
28.000 to 29.700

Prosecution for illegal radio jamming

In ZL a man has been sentenced for supplying illegal radio jamming transmitters after a combined effort between government agencies.

The man admitted supplying radio jammers and transmitting outside the terms of his radio licence and was fined $2000 in Porirua District Court last month.

This is a good example of government agencies working together to reduce crime in the community, says Radio Spectrum Management National Compliance Manager, Chris Brennan.

Radio jammers are increasingly being used as part of criminal activity. Our team of inspectors works hard to stop criminals getting access to this type of equipment.

New Zealand's Ministry of Economic Development laid charges under the Radio Communications Act after Police found the transmitters during a house search for drugs.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

BAE Systems tests T-shirt antennas

Wired reports that BAE Systems have teamed up with the UK's National Physical Laboratory to measure the efficiency of radiation emitted from wearable antennas embedded into T-shirts.

Wearable antennas could be a useful way of building communications networks in warzones or of monitoring and transmitting the health of the wearer.

Given that they are worn on the body, it is particularly important to understand their performance. The human body absorbs electromagnetic signals so researchers were concerned that the signal could lose power if worn too close.

Sep 23-28 R3 Region 3 ARDF Championship Bendigo VK3
http://r3.ardf.org.au/

Things are really hotting up in preparation for the 8th IARU Region 3 ARDF Championships which will be based at the Blue Light Camp in Maldon Victoria.

International participants are getting very excited about traveling to VK and compete in these Championships. If you are planning to pay the venue a visit and see what it is all about we suggest that Saturday 24th of September will be the best opportunity. Here you can watch Competitors test out receiving equipment and get a feel for the Australian Bush. This event will be followed

by an orienteering event and later in the afternoon there will be the opening ceremony where WIA President Michael Owen VK3KI representing IARU will welcome participants. Both the main events on Sunday 25th and Tuesday 27th will be conducted on closed courses plus the start locations are kept secret from competitors until they step off the bus. For this reason there will be little opportunity to attend and view the competition unless you intend to compete or even volunteer.

We are currently taking registrations from VK amateurs who are interested in attending and representing WIA at these Championships. Volunteers are also welcome and if you can spare some time on either or both of the competition days we would love to hear from you. You will find more information regarding the event on www.r3.ardf.org.au or send an email to vk3www@wia.org.au

World first for digital television

The final touches are being put on the World's First DATV QSO Party to be held by VK3RTV and around the world via the streaming media portal of the British Amateur Television Club (BATC).

Organiser Peter Cossins VK3BFG said it was most fitting that the event is part of the Amateur Radio Victoria Centenary which runs from August 1 through to November 30.

He has been with the amateur television scene through its black and white days, to colour imagery and more recently has, with the help of others, the digitisation of VK3RTV.

Peter VK3BFG said, "Major funding of VK3RTV from Amateur Radio Victoria from the WIA Club Grants program enabled it to be digitised well ahead of time and renewed interest in it throughout the expanded coverage area.

"What is planned is a DATV QSO Party to celebrate the 100th the anniversary of Amateur Radio Victoria. While the actual times are not fixed, it's planned to be over the last weekend of August starting on the Friday evening."

Already there's interest around Australia and testing has been held while negotiations are being finalised with the BATC and the Amateur Television Network of California via Don Hill KE6BXT.

==> + AMATEUR RADIO IN SPACE: AFTER DELAYS, ARISSAT-1 DEPLOYED FROM ISS

Amateur Radio has a new satellite! Despite concerns that led to an
almost four hour delay in deployment from the International Space
Station, ARISSat-1/KEDR is in operation. According to reports flowing
in from around the world, both the transponder and telemetry are
working. Cosmonauts Sergei Volkov, RU3DIS, and Alexander Samokutyaev,
successfully deployed Amateur Radio's newest satellite: ARISSat-1/KEDR.
The deployment -- originally scheduled to occur at 1457 UTC on
Wednesday, August 3 -- was delayed due to antenna concerns. Read more
here <http://www.arrl.org/news/arissat-1-finally-deployed-from-iss>.

==> + AMATEUR RADIO IN SPACE: HAMS REPORT ARISSAT-1'S LINEAR
TRANSPONDER IS WORKING
```

After its eventful deployment yesterday
<http://www.arrl.org/news/arissat-1-finally-deployed-from-iss>,
ARISSsat-1 is definitely working. Hams from all over the world have
reported hearing the voice, CW and SSTV transmissions. Despite concerns
that the UHF antenna was either missing or damaged, the linear
transponder is working and some people are already making contacts with
it. The August 3 deployment was delayed nearly four hours after
cosmonauts Sergei Volkov, RU3DIS, and Alexander Samokutyaev, expressed
concerns that only one antenna -- the VHF antenna -- was visible.

"I was able to hear myself with as little as 1 W on the 0425 UTC
pass," AMSAT Vice President for Operations Drew Glasbrenner, KO4MA,
wrote on the AMSAT e-mail reflector. "Antennas are a M2 CP42 on RHCP
up, and a 10 element horizontal Yagi down. ARISSat-1 sounded very good,
and cycled on and off with the telemetry. I also managed to grab two
frames of telemetry right after AOS." Glasbrenner posted a video
<http://www.youtube.com/watch?v
FyZNAbOeA> of his transponder test.

Calling it a "very good first day," ARISSat-1/KEDR Project Manager
Gould Smith, WA4SXM, said that hams are submitting SSTV images to ARISS
SSTV Gallery <http://www.amsat.org/amsat/ariss/SSTV/>, and BPSK-1000
telemetry and experiment data is coming into the telemetry server.
"ARISSat-1/KEDR continues to work well with good reports coming in from
around the world," he said. "The satellite is warmer than we expected,
so we will continue to monitor this."

The 435 MHz/145 MHz linear transponder operates in Mode U/v (70 cm up,
2 meters down). It is a 16 kHz wide inverting passband, and the
convention is to transmit LSB on the 435 MHz uplink and receive USB on
the 145 MHz downlink.

==> + AMATEUR RADIO IN SPACE: ARISS TEAM EXCITED BY NEW PROPOSAL
PROCESS

Earlier this year, the education office at NASA's Johnson Space
Center (JSC) sent a message to more than 18,000 US educators,
describing the Amateur Radio on the International Space Station (ARISS)
program. This kicked off the first step in a new process used by the
ARISS team in selecting US schools for ARISS educational events, such
as an Amateur Radio contact between the ISS and the classroom. Early
last fall, staff from JSC's Teaching From Space program approached
ARISS leaders, looking to revise how they work with schools in order to
greatly increase the number of educators who know about ARISS.

According to ARRL ARISS Program Manager Rosalie White, K1STO, the
ARISS team has worked steadily for the past six months on an end-to-end
transition for the new proposal process. The work began last October
with ARRL Education Services Manager Debra Johnson, K1DMJ, hosting a
meeting at ARRL Headquarters for representatives from NASA, ARRL and
AMSAT. In May, White and four NASA and AMSAT team members gathered in
Maryland for a two day meeting to hammer out the final details. Read
more here

<http://www.arrl.org/news/ariss-excited-by-new-proposal-process>.

==> + ARRL RECOGNIZES: ARRL BOARD NAMES ANGEL SANTANA, WP3GW, WINNER OF SILVER ANTENNA AWARD

Angel Santana, WP3GW, has been named the winner of the 2011 Philip J. McGan Memorial Silver Antenna Award for his volunteer public relations work on behalf of Amateur Radio. Santana was recognized for his work and recommended for the award by the ARRL Public Relations Committee; the ARRL Board of Directors conveyed the award at their 2011 Second Meeting last month. "It came as a surprise when ARRL Southeastern Director Greg Sarratt, W4OZK, sent me the notification about winning the 2011 Philip J. McGan Award," Santana said. "I had about two hours of shock before landing again to Earth!" ARRL Media and Public relations Manager Allen Pitts, W1AGP, called Santana a "sparkplug for a major surge of good publicity" in Puerto Rico. Read more here <http://www.arrl.org/news/arrl-board-names-angel-santana-wp3gw-winner-of-silver-antenna-award>.

==> + INVESTIGATION BY ARRL OOS, RESEARCHERS LEADS TO RESOLUTION OF 60 METER INTERFERENCE

Collaboration between ARRL Official Observers and researchers at Rutgers University has resulted in a change of operating frequency of coastal HF radars, eliminating interference to amateur stations using two frequencies in the 60 meter (5 MHz) band.

In July 2003, radio amateurs in the US received secondary privileges on 60 meters. Its strict guidelines -- no CW, operation just on five distinct channels using USB, a maximum effective radiated power of 50 W and only open to General, Advanced and Amateur Extra class licensees -- have prevented it from being popular. At first, amateurs interested in operating on 60 meters had to make modifications to the radios in use at the time. But now, more rigs are available that are designed to operate on 60 meters directly, or with a simple manipulation of menus.

Over time, radio amateurs heard various signals on the channels; users assumed these signals were those of government users and protected as such. Normally, advice to amateurs is to "use it or lose it" in regard to band usage, but on 60 meters, the watchword seemed to be "misuse" the band and lose it. So amateurs were cautious and compliant and when the band was made available to radio amateurs, users reported that everyone on the band was friendly and courteous, with at least one amateur reporting "that it was the way all the other bands used to be."

But recently, with more users and people monitoring and using the band, amateurs began hearing more Coastal Ocean Dynamics Applications Radar (CODAR) signals on the channels. CODAR is a form of HF radar used by a number of institutions to research and study ocean currents and waves. Amateurs frequently reported CODAR sounds as that "repetitive loud swishing sound" on the band. Read more here

lution-of-60-meter-interference>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that
the ARRL is doing on behalf of its members. This installment -- which
covers the month of July -- takes a look at the 2011 Second Meeting of
the ARRL Board of Directors, the Republic of South Sudan -- the newest
DXCC entity, the latest equipment and resource grants awarded to
schools, the League's request to the FCC to keep open a proceeding
regarding 2300 MHz, reports from the Official Observer Desk and more.

==> SOLAR UPDATE

Tad "The Sun in my disgrace
<http://www.youtube.com/watch?v=3mbBbFH9fAg&ob=av3e>" Cook, K7RA,
reports: Solar activity increased markedly this week, with the sunspot
number rising to 130 on August 1, the highest since a reading of 131 on
April 14, 2011. The average daily sunspot number for this week rose
nearly 54 points to 99.3. But the big news is a couple of coronal mass
ejections hurtling clouds of energy toward Earth, which should upset
geomagnetic conditions from their recent quiet. The CMEs came from
sunspot group 1263, which is quite large and centrally located on the
solar disc. The latest forecast has the planetary A index for August
4-11 at 5, 25, 20, 25, 20, 12, 5 and 8. The predicted solar flux for
August 4-5 is 120; August 6-10 is 115, 110 for August 11, and 100 on
August 12-16. Geophysical Institute Prague predicts active conditions
on August 5-7, unsettled to active August 8, quiet to unsettled August
9 and quiet conditions August 10-11. Look for more information on the
ARRL website on Friday, August 5. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation
page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by Soundgarden's Black Hole Sun
<http://en.wikipedia.org/wiki/Black_Hole_Sun>.

==> + ARRL RECOGNIZES: JERRY CLEMENT, VE6AB , WINS JULY QST COVER
PLAQUE AWARD

The winner of the QST Cover Plaque Award for July is Jerry Clement,
VE6AB , for his article "Gain Twist 75 Meter Mobile Monobander. "
Congratulations Jerry! The QST Cover Plaque award -- given to the
author or authors of the best article in each issue -- is determined by
a vote of ARRL members on the QST Cover Plaque Poll Web page
<http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your
favorite article in the August issue today.

==> THIS WEEK ON THE RADIO

This week:

- August 5 -- NCCC Sprint Ladder
- August 6 -- TARA Grid Dip Shindig; European HF Championship
- August 6-7 -- ARRL UHF Contest
<http://www.arrl.org/news/the-bands-heat-up-for-the-2011-arrl-august-uhf-cont
est>;
North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 7 -- RSGB RoPoCo CW; SARL HF Phone Contest
- August 10 -- NAQCC Straight Key/Bug Sprint
- August 10-11 -- CWops Mini-CWT Test

Next week:

- August 12 -- NCCC Sprint Ladder
- August 13-14 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 14 -- SKCC Weekend Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out

RADIO LAW: FCC DISMISSES PETITION TO BAR ALL CONVICTED FELONS FROM HOLDING HAM LICENSES

The FCC has turned away a petition for rule making that asked that convicted felons be barred from holding an amateur radio license. Amateur Radio Newslne's Bruce Tennant, K6PZW, has the details:

--

In its July 29th letter to Bernard J. Parker, K5BP, of Dallas Texas, the FCC stated that it was dismissing his Rule Making request filed May 25, 2011 that dealt with a rules change request to bar convicted felons from holding amateur radio service licenses.

In its dismissal order the FCC stated that before it will revoke a license or deny an application based on the felony conviction, that it takes into consideration factors that may mitigate a licensee's felonious misconduct.

For example, the Commission says that it reviews the willfulness of the misconduct; the frequency of the misconduct; how recently the misconduct occurred; the seriousness of the misconduct; efforts made to remedy the wrong and the persons overall record of compliance with FCC rules and policies. It also takes under consideration any form of rehabilitation that a convicted felon may have been subject to.

The FCC went on to say that Parker has not presented grounds for the Commission to revisit this policy. It stated that Parker's argument that the policy is contrary to the basis and purpose of the amateur service fails to recognize that the Commission has an established

process for assessing whether a felony conviction is grounds for denying participation in the amateur radio service.

The FCC then continued that Parker offered no persuasive argument for barring anyone convicted of any felony from ever obtaining an amateur radio operator license and that he gave no evidence that the current policy is undermining the purpose of the amateur radio service. Nor that it is otherwise contrary to the public interest.

Rather, says the Dismissal order, Parker's petition relies entirely on the case of a single amateur licensee and does not discuss why a higher standard should apply to the amateur service than to other communications services.

Thus, says Scot Stone who is Deputy Chief of the FCC's Mobility Division, a felony conviction does not necessarily disqualify all people from holding am amateur service license. Rather, the question of disqualification is addressed on a case-by-case basis.

Based on its findings the FCC has concluded that the regulatory change petition filed by Bernard J. Parker presents no evidence of an existing problem that has not been considered before, or other evidence meriting a rule change. Therefore, Parkers petition has ben dismissed.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Who the amateur the Parker petition was referring to was not mentioned by name or call in the FCC dismissal order. Nor is it known if Parks will appeal the staff decision dismissing his petition to ban convicted felons from the amateur service to the entire commission or possibly into the Federal courts. (FCC)

DX NEWS: ST0R CONTINUES TO RACK UP CONTACTS FROM THE SOUTH SUDAN

The ST0R operations from the newly created Republic of the South Sudan continues to work through the pile ups. By Monday, August 1st U-T-C time the contact number was passing the 60,000 QSO mark. They continue to operate five stations and are trying to get as many QSO's as possible before its time for them to secure their operations.

As is the custom and practice of the Intrepid-DX Group, they invited local youth to visit see the operation. 25 boys from the Juba Secondary Boy's Academy have already visited. They were given a tour of the ST0R where they were the various aspects of amateur radio were demonstrated. They also listened in as QSO's were made around the world. Their visit was recorded in photos now posted at tinyurl.com/juba-students

The ST0R DXpedition and will continue to be active through August 10th. We will have more DX news later on in this weeks Amateur Radio Newsline report. (Intrepid DX Group)

**

HAM RADIO IN SPACE: ARISSAT-1 NOW ON ORBIT

The ARISSAT One ham radio satellite is now on-orbit. Bill Pasternak, WA6ITF, is in our Newsroom with the latest

--

ARISSat-1 telemetry: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

In NASA-ese, that's the sound of a satellite on-orbit. In this case it's the two meter downlink of the brand new ARISSat-1 that was successfully deployed from the International Space Station at 14:43 EDT on Wednesday, August 3rd .

Russia's Sergei Volkov, RU3DIS, was the space walking cosmonaut who actually hand-tossed the box-like satellite into space. This, after he and fellow space walker Alexander Samokutyaev pushed the 57 pound ARISSat-1 through an air-lock and away from the ISS, but not without incident.

Soon after the spacewalk began, the astronauts and flight controllers realized one of two 70centimeter antennas may have somehow broken off the satellite. Experts on the ground have no idea how or when it may have happened, but after debating for close to three hours, Mission Control instructed Volkov to release it. As he did, Samokutyaev photographed the event as ARISSat-1 left the space station at a rate of just over 3 feet per second. Not long after ARISSat-1 was in space, its telemetry beacon was received by JR8LWY as the satellite passed over Japan.

According to several sources, the transmitting capability of ARISSat-1 will not be affected by the loss of that antenna, but the reception of signals from the ground might be somewhat degraded. None the less, test transmissions its voice transponder by AMSAT Vice President for Operations Drew Glasbrenner, KO4MA, proved that ARISSat-1 is a viable relay station in space at power levels on the uplink as low as 1 watt:

--

KO4MA test audio: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

According to Glasbrenner, he was able to hear himself with as little as 1 watt on the 0425 UTC pass. His antenna system consisted of an M2 CP42 with right hand circular polarization on the uplink and a 10

element horizontal yagi for reception. We took the audio file supplied to us by Dave Marthouse, N2AAM, applied a bit of digital filtering magic and KO4MA, literally popped out of the background noise. Take a listen:

--

KO4MA test audio noise reduced: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

So whats next for ARISSat-1. According to a news release from AMSAT, full operational capability of the satellite is still under underway to evaluate its performance with the missing UHF antenna. Those hearing ARISSat-1 are asked to submit reception signal reports on amsat-bb and via the mission's e-mail boxes on located at www.amsat.org.

In the meantime, you can keep an ear on the bird and listen not only for the sound of its telemetry, but also for the voices of people from around the world speaking in many languages and sending greetings like this recorded by Richard Flagg, AH6NM during an earlier test of ARISSat-1 while it was still on-board the ISS:

--

Greetings audio: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

Right now, the best place to listen out for ARISSat-1 is on 145.95 MHz. If it passes overhead, you will hear it even with as modest antenna such as the dual band vertical in the attic we have here.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, on the U-S West coast in the City of Angels.

--

More on ARISSAT One in future Amateur Radio Newsline reports. (ANS, ARISS, AH6NM, AH6RH, N2AAM, others)

HAM RADIO POLITICS: IARU REGION 1 MEETING TO BE WEBCAST

The upcoming International Amateur Radio Union General Conference to be held August 12th to the 19th in Sun City, South Africa will be streamed live to the Internet. To access it in real time, you will need to take your web browser to live.datamatix.at:8032/listen.pls to activate the stream. If you do so before the meeting begins you should hear the following announcement:

--

IARU Audio: "Welcome to the IARU Region 1 audio stream from the General Conference in Sun City. The live vtransmission will start with the opening meeting."

--

We tested the audio stream on a PC running the Windows 7 operating system using several popular media players. These included Real Player, Microsoft Media Player and Winamp. All three brought up the stream with no problem, albeit in our case we found Winamp to give the best overall quality.

Again the dates to the IARU Region 1 conference is August 12th to the 19th. The planners welcome you to listen in on-line. (IARU R1)

**

HAM RADIO AND 911: KCRA TO OPERATE COMMEMORATIVE STATION FROM CONFERENCE HOUSE

New York City's Kings County Repeater Association has announced that it will be a part of the 911 events commemorative events to be held at the historic Conference House on Staten Island. The group plans to operate under the clubs KC2RA call sign to honor those who lost their lives on September 11th, 2001. This after middle-East fanatics high jacked four U-S flag carrying jetliners, crashing two into the World Trade Center towers in New York and a third into the Pentagon near Washington DC. The forth plane crashed in rural Pennsylvania when the passengers on-board challenged the al Quida lead air pirates.

The operation by the Kings County Repeater Association will take place on September 10th from 1300 to 2100 hours UTC on 7.250 lower and 14.295 MHz upper sideband. There will also be local operation on the New York City 146.430 Mhz repeater that uses an access tone of 136.5 hertz and world-wide using Echolink node 132967 which is the KC2LEB repeater. Frequencies on the high frequency bands may vary due to conditions and usage. Operations may not be on all frequencies at the same time. Please QSL with a a self addressed stamped envelope to the Kings ounty Repeater Association 911 Memorial Event, PO Box 280288, Brooklyn, NY 11228-0288

By way of background, the museum from where the operation will occur is named in memory of the September 11, 1776 conference convened at that location in an attempt to end the Revolutionary War. In attendance were British Admiral Lord Richard Howe, and American representatives

including John Adams and Benjamin Franklin. The conference failed because of Howe demands the colonists revoke the Declaration of Independence. (KCRA)

**

HAM RADIO AND 911: N3U TO COMMEMORATE 911 FROM PENNSYLVANIA

Also, listen out for special event station N3U stroke Flt93 to be activated once again from September 8th to the 15th. Its stated purpose is to remind amateur radio operators world-wide of the tragic events that happened near Shanksville, Pensylvania, New York City and Washington DC on September 11, 2001.

United Airlines Flight 93 was a scheduled morning transcontinental flight across the United States from Newark International Airport in to San Francisco International Airport. On Tuesday, September 11, 2001, the Boeing 757 aircraft was hijacked by four al-Qaeda terrorists as part of the September 11 attacks. It subsequently crashed into a field near Shanksville, Pennsylvania during an attempt by some of the passengers to regain control. Although the evidence remains inconclusive, it is widely presumed the intended target was the United States Capitol or possibly the White House.

Its known that after the hijackers had taken control of the plane, several passengers and flight attendants were able to make telephone calls and learn that attacks had been made on the World Trade Center in New York and the Pentagon in Virginia. As a result, some of the passengers decided to try to regain control of the aircraft. During the attempt, the plane crashed into a field in Stonycreek Township, near Shanksville in Somerset County, Pennsylvania, about 80 miles southeast of Pittsburgh. All on board were killed.

This year's operation will take place during 10th anniversary and the Memorial Dedication for the victims of United Flight 93. If you happen to make contact with N3U, QSL's for this special commemorative operation go with a stamped self addressed envelope to N3U/Flt 93 via W3PN, either direct or via the bureau. (OPDX)

**

RESCUE RADIO: HF LINK ALE TEST AUGUST 5 TO 15

Hams world-wide are being invited to participate in 10 days of High Frequency Automatic Link Establishment activity on the air. The purpose of this event is to encourage A-L-E communication techniques among amateur radio operators globally. The operation will begin at 00:01 UTC on Friday August 5th and continue through 23:59 UTC on Monday August 15th. This H-F Interoperability Event is an on-the-air international exercise to determine readiness for High Frequency Emergency Disaster Relief and Networking communications for the amateur radio service. More is on-line at hflink.com/aotaw. (HF LINK)

ENFORCEMENT: SACRAMENTO WOMAN ACCUSED OF MAKING 2457 CALLS TO 911 SINCE JUNE

The California Highway Patrol says that while there was never any emergency, that didn't stop a Sacramento woman from allegedly making 2,457 calls to the states 911 emergency response number since June.

According to CHP Officer Adrian Quintero, the woman identified as Jennifer Arguelles, age 44 was arrested after allegedly placing more than 130 non-emergency calls to 911 dispatchers on one Wednesday morning alone. Authorities claim that Arguelles dialed 911 some 180 times for non-emergencies on July 4 and during the month of June, called 911 for non-emergencies 2,147 times.

News reports say that Arguelles was always polite when she called in but would eventually hang up on dispatchers. By law they were required to call her back and make sure she didn't have an emergency.

Officer Quintero told the press that Arguelles used three different cell phones to make the 911 calls. Arguelles is facing a misdemeanor for unlawful use of the 911 system. (Published news reports)

**

RADIO LAW: MICROSOFT NAMED TO BE A WHITE SPACE DATABASE ADMINISTRATOR

Microsoft Corporation has been designated a white-spaces database administrator by the Federal Communications Commission. This brings the number nationwide to 10.

The purpose of the database and its administrator is to provide a reference for the unlicensed devices now authorized to operate between TV channels. Under the FCC's rules governing the use of white spaces, unlicensed devices must ping a database to make sure frequencies aren't occupied by licensed users. A white-space database must maintain a registry of fixed unlicensed devices and protected services such as full- and low-power TV transmissions, broadcast auxiliary facilities, private land mobile and commercial radio operations.

The commission issued a call for white-space database managers in late 2009. Nine responded, and all were conditionally designated in January of this year. Microsoft didn't apply until April of this year. The FCC now has made Microsoft administrator number 10. Along with the other nine designated administrators, Microsoft's database will be subject to a trial period of at least 45 days. (TVB)

**

HAM HAPPENINGS: EASTERN VHF/UHF CONFERENCE IN ENFIELD CT IN OCTOBER

Turning to the ham radio social scene, word from the North East Weak Signal Group that it will sponsor the combined Eastern VHF/UHF Conference and Microwave Update 2011 Conference in Enfield, Connecticut

from October 13th to the 16th. The venue this year is the Holiday Inn Hotel in Enfield. This is the hotel formerly known as the Crowne Plaza. More information on the convention, its participants and the planned program, along with hotel and conference registration information can be found on-line at www dot microwaveupdate dot org. (WZ1V)

**

HAM HAPPENINGS: AMSAT SEEKS PRESENTATIONS FOR 2011 SPACE SYMPOSIUM

A first call has gone out to solicit papers to be presented at the 2011 AMSAT Space Symposium. The event is slated for Friday, November 4th through Sunday, November 6th at the Wyndham San Jose Hotel, San Jose, California. Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community. A tentative title of a presentation is required as soon as possible. The final copy must be submitted by October 1st for inclusion in the printed proceedings. Abstracts and papers should be sent as soon as possible to Dan Schultz, N8FGV, by e-mail to n8fgv (at) amsat (dot) org (N8FGV)

**

NAMES IN THE NEWS: LEO LAPORTE NOW KJ6QGP

And a warm welcome to amateur radio to TWIT.TV network founder Leo Laporte who now sports the call letters KJ6QGP. But not for long.

With the urging and guidance of both Bob Heil in Gordon West, the self proclaimed "Chief Twit and President of the Internet" has already applied for a vanity call sign and expects W6TWT to reflect the name of his fledgling media empire: "This Week in Technology." He may already have that callsign as we go to air.

Leo, who is known quite well in the world of both the media and by the public as the go-to tech guy, has been a fixture on radio and television for many years. He became involved in the hobby through his association with ham radio's Mr. Audio, Bob Heil, K9EID. This, when he discovered Bob's professional line of microphones and made them his standard mic for all of his live to air and recorded programming.

Bob has been a guest on several Twit interview shows. But the impetus to get his license and perhaps the thing that convinced Leo to launch the "Ham Nation" podcast was when Leo attended Bob's amateur radio reception at the 2011 National Association of Broadcasters convention last April. The two became close friends and with a little help from Bob and ham radio educator Gordon West, WB6NOA, Leo has now become a member of the ham radio fraternity.

Leo studied for and passed his Technician class license while maintaining his nearly 20 hours per week live broadcast schedule and while overseeing the construction of his new 10,000 square ft. studio

and transmission center which opened July 24. Word is that he's planning to take the "General" in about a month. We wish him the very best. (ARNewsalineT)

RADIO SCIENCE: WHAT LIGHT BULB DESIGNATIONS MEAN

Light bulb descriptions can seem mysterious and at times totally unfathomable. That said but they tell a lot about any given lamp.

Many bulb descriptions include a letter followed by a number. A few examples are such nomenclatures as BR30, PAR20, ED28 and T8. The letters are a code for bulb shape and the number is the diameter of the bulb, at the widest point, in 1/8inch increments. To calculate the diameter in inches, simply divide the number by 8.

Now look at a typical fluorescent bulb description: F32T8/841. Translation: F is fluorescent, 32 is watts, T is shape , in this case tubular. The second set of numbers such as an 8 is diameter 1 inch and 841 gives you the color temperature information. Here the first number tells you the color temperature range while the second two numbers indicate color temperature In ths example 41 means 4100K. And as Mr. Spock of Star Trek fame might say: Its all quite logical after its explained. (Science OnLine)

RADIO FROM SPACE: MISSING SPACE ORBITER FOUND ON THE MOON

NASA scientists believe they may have found the final resting place of a 1960's space probe which took what some consider as being the definitive picture of the 21st century. This, before it crash-landed on the far side of the Moon.

The information comes in new imagery radioed back to Earth from the Lunar Reconnaissance Orbiter. This is a spacecraft sent up to circle the Moon under the Bush administration's plan for a manned return to the lunar surface as a precursor to manned missions to Mars. The orbiter was intended to map the lunar surface in unprecedented detail, perhaps discovering useful ice deposits or crater-rim landing sites where solar power would be available year round.

All that became moot when Congress refused to fund the Moonbase plans and president Obama eventually axed them. But the lunar probe has nonetheless produced many fascinating finds. Now, NASA believe that it may have discovered the crash site of a previous Lunar Orbiter 2.

Lunar Orbiter 2 had a similar mission to the Lunar Reconnaissance Orbiter, in that it was sent up to help with selection of landing sites for the Apollo moon missions. However the instrumentation of that era was far less sophisticated than todays.

Despite not being a total success in the matter of moon mapping, Lunar Orbiter 2 did achieve lasting fame when it sent back a stunning oblique image of the Copernicus crater in 1967 dubbed "the picture of the century" by news media. Later that year, its mission complete, the Orbiter was disposed of by commanding it to crash-land on the far side of the moon.

Its exact resting place has never been known, but now the operators of the Lunar Reconnaissance Orbiter have found what they believe is a tell-tale impact site just at the coordinates where the Orbiter should have come down.

It's not yet certain that this marks the final resting place of the greatest robot photographer of the last century, but scientists are working on confirmation. They say, stay tuned for more. (Science On_Line)

**

WORLDBEAT: SOUTH AFRICAN RADIO LEAGUE CONSIDERS ON-AIR YOUTH FORUM

The South African Radio League Council is considering the formation of an on-the-air youth forum. The objective is to create a space where young radio amateurs can share ideas and talk to each other. The forum will be run with connections to various repeaters and HF. One proposal is to run it once a month at an early evening time slot. The Council would like to begin operations sometime in early December. (SARL)

**

RADIOSPORTS: WRTC2014 RELEASES NEW PROMOTIONAL VIDEO

A new promotional video for the 2014 World Radiosport Team Championship games has been released by the events planners. Produced for the planners by noted film maker James Brooks, 9V1YC, the video showcases the aspect of radiosports along with showing the planning that goes into preparing to host an event of this magnitude.

For those not aware, the World Radiosport Team Championship or WRTC is held every four years. The games consist of approximately 50 two-person teams of amateur radio operators from around the globe competing in a test of operating skill. Unlike most on-the-air competitions, all stations are required to use identical antennas and to operate from the same geographic region. This eliminates all variables except operating skill and ability.

Hosting rights for the 2014 WRTC have been awarded to the New England WRTC2014 Organizing Committee. This organization is a newly-formed independent group, and not part of any existing organization, national society, or club and has taken the point position oin preparing for this ham radio Olympian-like event. You can see the new promotional video on-line at tinyurl.com/wrtc2014. More information on the planning of the 2014 World Radiosport Team Championship 2is on-line at wrtc2014.org.

(WRTC2014, Southgate, ARNewsline(tm))

**

ON THE AIR: 8J1A TO CELEBRATE HAM FAIR 2011

To celebrate the Ham Fair amateur radio convention in Tokyo, Japan, special event station 8J1A will be activated between August 1st and the 28th. Planners say to expect stations to be active on all bands and using all modes. If you contact 8J1A, QSL via the J-A-R-L bureau.

(JARL, ICPO)

**

DX

In DX, word that I2DMI, will be on the air as CE0Y from Easter Island through Monday, August 8th. His operations are on 80 through 10 meters, including 17 and 12 meters using mostly RTTY. QSL via his home callsign, direct or via the bureau. His log will be uploaded to Logbook of the World and eQSL.

Members of the Dutch Low Land DXpedition Team are planning a trip to Luxembourg from August 30th to September 6th. Operators PA3EWP, PA9JO, PA7FM and PA1AW will be signing their individual home callsigns portable LX for this operation which will encompass all bands from 160 through 2 meters. The team is willing to accept activity requests reflecting the demand for the LX prefix worldwide. More details are available on line at lx2011 dot lldxt dot nl QSL all callsigns via PA1AW.

Another Netherlands-based team who are all members of the Dutch Amateur Radio Contest and Expedition team will be active as PA9M stroke MU from Guernsey between October 23rd to the 30th. Operations will be on 160 through 6 meters using CW and SSB. QSL via PA9M, direct or by the via the bureau.

Lastly, KBZ0ZIA is now active from Djibouti City as J28FJ and will be there through the spring of 2012. New to DXing, he is currently set up to work 40 through 10 meters mostly SSB, but he may do some changes later. He plans to make a special QSL card for his stay in Africa. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: BATC OFFERS FREE STREAMING SERVICE TO HAM RADIO EVENTS

And finally this week, if you want to webcast a ham radio happening to the world, the British Amateur Television Club is ready and eager to supply the assistance that you might need. According to an e-mail from Ian Abel, G3ZHI, the club has a high capacity streaming server available to any individual radio amateur or ham radio group that would like to use it for webcasting a ham radio event. According to G3ZHI, the server capacity was large enough to stream the recent AMSAT UK Space Colloquium:

--

G3ZHI: "Last weekend we has AMSAT on for the whole of the weekend. We had about 100 in, and we had people all over the world watching the AMSAT-UL webcast."

--

Nor is live netcasting the only aspeact of this free video streaming operation. Abel says that the BATC site is also a video repository for those who want to have their video material made available on-line:

--

G3ZHI: "The other good thing that may be of interest is that on the website you can not only watch live events of other peoples webcasts happening in real time, but there is also on the film archive so that any webcasts that have happened are also saved on the server if people wan't to do that. Then they can thn save it in the Film Archive so that others can look at them. So it's a great resource."

--

Ian tells Newsline that it is very easy to webcast and only requires the Adobe video encoder which is a free download and that use of the British Amateur Television Club streaming service is also free. If you are interested in making use of this service please contact Ian by e-mail to g3zhi (at) hotmail (dot) com. More information and the video archive is on-line at www dot batc dot tv. (G3ZHI)

GB2RS NEWS

Sunday 7 August 2011

The news headlines:

* ARISSAT-1 deployed from ISS

* Portugal gets amended 6m band

* Dutch amateurs get new frequencies

After a long history of delays, AMSAT-built amateur satellite ARISSAT-1 was successfully deployed from the International Space Station on Wednesday 3 August. Cosmonauts Sergei Volkov and Alexander Samokutyaev hand-released the satellite, also known as Radioskaf-V, around 0243UTC. Initial reports say that the 2m downlink is working well, but full operational capability is not yet active. More information on the satellite can be found at www.arissat1.org.

The National Communications Authority of Portugal has accepted a proposal to amend the upper frequency limit on the 6m band, effective from 4 April 2012. That coincides with the date of the complete switch-off of the analogue TV broadcasting transmissions and the changeover to digital terrestrial television. The new limits of the band allocation for Portugal will be from 50 to 52MHz once analogue television disappears from that spectrum.

Amateurs in the Netherlands now have access to bands at 500kHz and 70MHz. This after the Dutch Minister of Economic Affairs, Agriculture & Innovation issued a Decree on 6 July changing the National Frequency Plan. The revised band plan shows an amateur service bands at 501 to 505kHz that will remain available until 1 January 2014. It also shows a new allocation from 70.0 to 70.5MHz that has no time limit.

Pic-A-Star is an SDR radio designed by Peter Rhodes, G3XJP, which was serialised in RadCom. It also appears in the RSGB Radio Communication Handbook. Milton Keynes ARS and Milton Keynes Museum are inviting all constructors of Pic-A-Stars to a one-day get together. This will be on Sunday 11 September from 11am to 4pm at the Milton Keynes Museum. Constructors of the Pic-A-star project are invited to bring their radios for a gathering and exchange of ideas. Star add-on circuits are also welcome. Entry will be free, but it would be nice to leave a small donation to the Museum. Constructors of other equipment designed by Peter are also welcome but the emphasis will be on the Pic-A-Star project. There will be test equipment and an antenna available on the

day. Further details and directions are available online at www.radio-kits.co.uk/pic_a_star/event.htm.

The Limerick 2m repeater on 145.725MHz is now on the air again after being shut down due to vandalism at the repeater site. Limerick Radio Club is grateful for the many generous donations received, which have gone towards installation of a new security door. A new run of hardline coax has also been installed from the hut to the mast.

On Friday 12 August, Itchen Valley Amateur Radio Club will be holding a fun ARDF event and barbecue at the IBM Sports Clubhouse, Hursley. The ARDF event will take place from 6.30pm onwards with the barbecue starting at 7.30pm. All equipment will be supplied and, as this is a fun and social event, spouses and children will be welcome to participate. There is no requirement to hold an amateur radio licence. Full details are available on the club website, www.ivarc.org.uk. Itchen Valley club members should note that this is a change of venue and there will be no meeting at the club house in Brickfield Lane.

Advance notice now. To celebrate their 80th anniversary, Midland Amateur Radio Society will be holding an open day at the club from 10am to 4pm on 24 September. There are plans are for displays of photographs, QSL cards, the original 1931 minute books and the cups and awards. There will also be refreshments and the opportunity to meet the training staff, plus the chance to operate GB8OTH. More information on the society, which is based in Stirchley, Birmingham, can be found on the club web site at www.radioclubs.net/mars.

And now for the details of rallies and events for the coming week

King's Lynn ARC Rally & Car Boot will take place today, 7 August, at Gaywood Community Centre, PE30 4DZ. Doors open at 10am and admission is £1.50. There will be trade stands and a car boot area. Details from Ray, G3RSV, on 01553 671 307.

The Lorn Radio Amateur Rally also takes place today, 7 August, at Crianlarich Village Hall, Crianlarich, near Oban, FK20 8QN. Doors open at 10am and there will be trade stands and a Bring & Buy. Details from GM0ERV by email to stewart.mciver@btinternet.com.

Cockenzie & Port Seton ARC is holding its 18th Annual Mini-Rally Night on Friday 12 August in the Community Centre, Main Hall, Port Seton. Bring along your own junk and sell it yourself. Tables are on a first come first served basis, £2 for everyone. Doors are open from 8.30 to 9.30pm.

Flight Refuelling ARS will be holding its annual Hamfest rally next Sunday, 14 August at the Cobham Sports and Social Club Ground at Merley, near Wimborne, Dorset, BH21 3DA. Gates open to the public at 10am. Talk-in will be on S22.

The Friskney & East Lincolnshire Communications Club Rally and General Car Boot Sale will be held on Sunday 14 August in the Friskney Village

Hall, Church Road, Friskney, Lincs. This is approximately 6.5 miles south of Skegness. Doors open from 10am to 4pm and admission is £1.50. Details from Bren, 2E0BDS, on 01754 820 060.

Now for the news of special events

Today, 7 August, a few amateurs in the Morecambe Bay area are putting a special event station on for the Heysham Classic Car Rally. They are trying to show the fun of amateur radio to a new audience. So if you're in the Morecambe area, please feel free to drop in or contact them on air. They will be operating 2m and HF between 10am and 4pm.

Today, Sunday 7 August, Chorley and District Amateur Radio Society is running a special event station from Fleetwood Model Yacht Club, who is celebrating its centenary. The callsign to listen out for is GB2MYA. Further information is on QRZ.com. And now the HF DX news compiled from 425 DX News and other sources

VA3ITA will be on the air from 8 to 11 August, signing as /portable ZB2 in a VHF-only operation from Gibraltar. Operations will be on 6 and 2 metres using a mix of digital, SSB and CW from the east side of the Rock, facing the Mediterranean Sea. Please check his QRZ.com page for the latest news and e-mail him directly to schedule a contact. QSL direct via home callsign either direct or via the bureau.

KF8UN will be in Peru until 16 August. He will be active stroke OA4 and says that he plans to work 20 metres with particular emphasis all day on 8 August. At other times he will be operating holiday style. QSL via his home callsign.

Daniel, DK3CH will be active as 9A/DK3CH from Dugi Otok, which is IOTA reference EU-170, until 10 August. QSL via his home callsign.

TM5SM will be on the air from the Saint Marcouf Islands, which is IOTA reference EU-081, on 11 to 15 August. They will operate CW, SSB and RTTY on all bands except 160 metres. QSL via F5RJM either direct or via the bureau.

Ron, WA8LOW and four other operators will be active as WA8LOW/KH8 from Tutuila in American Samoa, IOTA reference OC-045, until 17 August. They will run four high power stations on 160 to 6 metres using all modes. QSL via WA8LOW.

Now the contest news

The 432MHz Low Power Contest takes place today, 7 August, from 0800 to 1200UTC. Using all modes the exchange is signal report, serial number, locator and the first two letters of the postcode.

Also today, 7 August, is the 2nd RoPoCo event. It's a 90-minute Sunday morning event from 0700 to 0830UTC in which you really need to be on your toes to do well, because the rolling exchange of postcodes is a real challenge. This is the CW leg, the SSB leg having taken place in April.

Tuesday 9 August sees the 432MHZ UK Activity Contest taking place between 1900 and 2130UTC. Using all modes on the 70cm band, the exchange is signal report, serial number and locator.

The new series of 80m Club Sprints starts in August and lasts four months. It begins with CW on the 10th from 1900 to 2030UTC. The Sprint contest exchange is both callsigns, a serial number and your name (or nickname in the case of some people). After soliciting a QSO you must QSY a minimum of 2kHz before you can call another station or solicit another QSO. Most of the time this will result in you having two QSOs on a frequency before you have to QSY, the first when you call someone and the second when you have taken over the frequency and called QRZ or CQ.

On 14 August the 70MHz Cumulative takes place between 1400 and 1600UTC. Using all modes the exchange is signal report, serial number and locator.

For the entire 48 hours of 14-15 August, European stations work non-Europeans only in the Worked All Europe DX CW Contest. Using CW on the 3.5 to 28MHz bands the exchange is signal report and serial number. And now the solar factual data for the period from the 25th to the 31st of July, compiled by Neil Clarke, G0CAS on the 1st of August.

Right at the start of the period on the 25th a large sunspot group rotated into view. This was followed by another on the 26th and yet another on the 28th. All these three groups were complex enough to produce large solar flares, and this is just what they did. Solar activity increased to high on the 30th when a M9 class solar flare occurred, and moderate on the 27th when a M1 flare took place. The remaining days' activity was low with numerous C class solar flares of varying strength taking place. Several sudden ionospheric disturbances accompanied some of the larger flares. Solar flux levels increased steadily from 87 units on the 25th to 119 by the 31st. The average was 104 units. The 90 day solar flux average on the 31st was 95 units, that's the same level as last week. X-ray flux levels increased from B1.7 units on the 25th to B5 units by the 29th and the average was B3.7. Geomagnetic activity was slightly unsettled on the 25th due to a small coronal hole when the Ap index was 12 units. The following few days saw quiet conditions till the next coronal hole disturbance arrived around midday on the 30th. The most disturbed day was the 30th with an Ap index of 16 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds at 650 kilometres per second on the 25th but then to 280 by the 29th. Speeds then increased to end the period at 700 kilometres per second. Particle densities were low every day. Bz varied between minus 12 and plus 10 nanoTeslas on the most disturbed day and between minus 3 and plus 2 nanoTeslas when activity was quiet.

And now the solar forecast. This week the quiet side of the Sun is expected to be rotating into view. Solar activity is expected to be very low to low. Solar flux levels should be around the 90 mark most days. Geomagnetic activity is expected to be at quiet levels for the

next few days but on Thursday a recurring coronal hole is expected. On its last rotation the hole was small and on the most disturbed day the Ap index only reached 13 units. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 12MHz. Paths this week to Middle East should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 16MHz. The best time to try this path will be between 1100 and 1700 hours. Sporadic-E should take place on most days; there is a chance that the Middle East could be worked via multi-hop Es.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS Derby Wireless Club is celebrating its 100 years of continuous service to the amateur radio community. As part of this celebration, it will be operating GB100D constantly from Monday 8 August to Saturday 13 August and from Monday 15 August to Saturday the 20th. Operation will be from 80m to 70cm. The station will be at the club HQ, the United Reform Church Carlton Road, Derby. It will be open to the public, and there will be a display of historic radio equipment. More information is on the club website, www.derbywirelessclub.org.uk.

On Monday 8 August South Birmingham Radio Society is painting and renovating the shack. Contact Don, on 01214 581 603.

On Monday 8 August Sutton Coldfield Amateur Radio Society is having a general meeting with discussions and is on the air. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 9 August Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 9 August Eagle Radio Group is having a talk on the early history of telegraphy by Peter Day, G3PHO. Details from Terry, G0SWS, on 01507 478 590.

On Tuesday 9 August Loughborough & District Amateur Radio Club is holding a 160m DF event. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 9 August Telford & District Amateur Radio Society is having a Hamfest committee meeting at Stafford Park. Contact Mike, G3JKX, on 01952 299 677.

On Wednesday 10 August Lincoln Short-Wave Club is putting G6COL on the air. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 10 August Midland Amateur Radio Society is holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 10 August South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 10 August Telford & District Amateur Radio Society is holding a competition with G3UKV. Contact Mike, G3JKX, on 01952 299 677. On Thursday 11 August Gloucester Amateur Radio & Electronics Society is holding its club picnic and draw at Beechenhurst in the Forest of Dean. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Thursday 11 August Salop Amateur Radio Society is having its summer social BBQ. Details on the club website at www.salop-ars.org.uk.

On Friday 12 August Coventry Amateur Radio Society is having a portable night and BBQ at Newbold Comyn. Contact John, G8SEQ, on 07958 777 363.

On Friday 12 August South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 13 August Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Sunday 14 August Friskney and East Lincolnshire Communications Club is holding its radio rally. Contact Chris, M0MFP, on 01507 442 240.

NEWS FOR THE NORTH OF ENGLAND On Sunday 7 August Hornsea Amateur Radio Club is taking part in the RoPoCo CW contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 8 August Angel of the North Amateur Radio Club starts its Advanced course, continues the Intermediate course, is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 8 August Bolton Wireless Club is having a talk on homebrew G0KSC VHF/UHF Yagis by Mick, M0ICK. For details, send an email to boltonwireless@gmail.com.

On Monday 8 August Sheffield Amateur Radio Club is having a talk by David Littlewood, G6DCT, on his OCFD antenna. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 8 August Thornton Cleveleys Amateur Radio Society is holding an auction. Details on the web at www.tcars.org.uk.

On Tuesday 9 August Halifax & District Amateur Radio Society is at the Old Post Office, Winding Road, Halifax, from 7pm. Contact Martin, M0GQB, on 01422 341 317.

On Wednesday 10 August Hornsea Amateur Radio Club is participating in the 80m CC CW plus watching a DVD. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 10 August Chorley and District Amateur Radio Society commences its Foundation and Intermediate courses. Details from Nessie, M0NES by email to nessie68@hotmail.com.

On Thursday 11 August Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 07876 085 631. On Thursday 11 August South Manchester Radio and Computer Club is watching the Japanese Morse DVD. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 11 August Wakefield & District Radio Society is having a talk on feedline by Dave Evans, G0EVA. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 12 August East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 12 August Tynemouth Amateur Radio Club is operating, holding discussions and offering Morse training. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND Mid Ulster Amateur Radio Club will be holding a Foundation course and exam over the weekend of Friday 9 to Saturday 10 September. Any interested persons can complete an application form at www.muarc.com/courseapplicationform.htm or contact the exam secretary Martin, MI0YMF on 02838852712. Please note all forms must be completed and returned to the exam secretary before Tuesday 9 August 2011.

On Monday 8 August Greenisland Electronics Amateur Radio Society is on the air on 2m. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND On Tuesday 9 August Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 9 August Livingston & District Amateur Radio Society is holding an operating evening. Details from Norman, on 07740 946 192.

On Thursday 11 August Aberdeen Amateur Radio Society is having a talk on antenna tuners by Tony, GM4HTU. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 12 August Cockenzie & Port Seton Amateur Radio Club has its 18th annual mini-rally night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 7 August Chelmsford Amateur Radio Society is spending the afternoon operating SSB as GB100MWT from the Marconi Hut, Sandford Mill. Contact Martyn, G1EFL, on

01245 469 008.

On Sunday 7 August Worthing & District Amateur Radio Club is holding its breakfast meeting in Goring. Contact Phil, G4UDU, on 01903 816 684. On Monday 8 August Bedford and District Amateur Radio Club is visiting the Museum of Military Intelligence. Details from Bob Leask, G3XNG, by email to g4ceotalk21.com.

On Monday 8 August Coulsdon Amateur Transmitting Society is holding a BBQ at the QTH of G4RWW. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 8 August Felixtowe & District Amateur Radio Society is holding a field activity evening at Felixstowe Beach. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 8 August West Kent Amateur Radio Society is holding a club meeting. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 9 August Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 9 August Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 9 August Harwell ARS is closed. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 10 August Chelmsford Amateur Radio Society is holding a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 10 August Chesham & District Amateur Radio Society invites members to bring their equipment for a members' forum. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 10 August Norfolk Amateur Radio Club is having an informal, construction and shack evening, plus taking part in the RSGB 80m Club Sprint CW contest. Details from Chris Danby, G0DWV, on 01603 898 678.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1021.2
BID: $OPDX.1021.2
August 5, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network, NC1L, K4UUE and N6PSE for the following DX information.

DXCC NEWS.....
* DXCC CONTACT INFORMATION CHANGE - Bill Moore, NC1L, Awards Branch
Manager reports, "Changes have been made to the DXCC E-mail contact
system. Please check your address book and make note of the following:
dxcc@arrl.org is no longer in use.
In an effort to better serve our clients, we have created a number
of new E-mail addresses that will be delivered to the most appropriate
person depending upon the subject.
Please visit <http://www.arrl.org/awards-branch-contacts> for a
listing of the new e-mail addresses and the general topics that they
cover.

* Bill Moore, NC1L, Awards Branch Manager, reports the following
operation is approved for DXCC credit:
ST0R South Sudan; Current operation

HK0, MALPELO ISLAND (Press Release). FOR IMMEDIATE RELEASE -
"Malpelo DXpedition 2012 (August 5, 2011)
Contact: bob@k4uee.com
The Malpelo 2012 DXpedition is pleased to announce that the HK0NA
operating team is now complete with 16 operators. This is an international
team of excellent operators, representing 8 different countries, and
includes 3 members of the CQ DX Hall of Fame.
The team will depart from Buenaventura, Colombia on January 22, 2012,
for the 235 mile trip to Malpelo. Depending on sea and landing conditions,
we expect to be QRV within 36 hours after landing for about 10-12 days.
The team will return to Buenaventura on Feb. 6, 2012.
Operations are planned on 160 through 6 meters on CW, SSB and Digital
modes.
We wish to thank Elecraft for the loan of seven K3 transceivers and
five of the new KPA 500 amplifiers. RF Concepts (Alpha) has agreed to

loan the team three Alpha 8410 amplifiers for use on the low bands and
DX Engineering will supply most of the DXpedition antennas.
Thanks to N2OO and the SJDXA who have graciously agreed to handle QSL
duties. You may recall the expert job they did for 3Y0X and K5D recently.
Contributions are being sought from DX Foundations, DX Clubs and
individual DXers. Your financial assistance is kindly requested. You may
contribute directly to DXARC (Colombia) or to K4UEE (North America), DJ9ZB
(Europe), or JA1ELY (Asia/JA). See our website: www.hk0na.com for further
details on how you can help.
We plan periodic press releases with information of interest. Also,
watch the website for breaking news.
Thanks,
Jorge Prieto, HK1R
DXpedition Leader"

ST0, SOUTH SUDAN UPDATE. Here is the latest information regarding the
South Sudan DXpedition from Paul, N6PSE:
Dispatch Juba:
"Today, the Undersecretary of the Ministry of Communications and his
staff visited the ST0R team and observed our operations.
The Undersecretary has been very supportive of our plans to conduct
this DXpedition to the new country of the Republic of South Sudan.
Following the visit to the radio shack, we enjoyed a cordial lunch
and exchanged documents to commemorate the first DXpedition to the
Republic of South Sudan.
The ST0R team is also assisting the Ministry of Communications with
the ITU application for their own prefix. We are also providing them
guidence to establish their own Amateur Radio activities.

Thank you,
The ST0R team."

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.swap (and currently archived at
http://www.faqs.org/faqs/radio/swap-guide/ ):

radio/swap-guide
Subject: Rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 6 Nov 2001 19:25:51 GMT
Posting-Frequency: Monthly

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

NZART Headquarters Infoline Issue 235

7 August 2011

NZART Website: www.nzart.org.nz

In this issue:

- From the desk of HQ
- IARU R 3 News update
- Intruder Watch story
- Situation Vacant - job opportunity
- FMTAG Notes
- News from around the World
- Housekeeping

Debby says.

Break In will be a little late but you should all receive it by the end of this coming week. This is due to a couple of important notices which will be inserted in this issue.

Subscription invoices will be just behind the front label, if you do not receive an invoice, it means you have already paid your subscription for 2012.

A small number of members sometimes overpay their subs when they see the reminder notice that our Editor John Walker includes on the front label in October and December. This is not an invoice, just a reminder to those who have yet to pay.

The Association Treasurer Evan Sayer and I initially tried to contact those who had overpaid in earlier years so we could reimburse these payments. It was very time consuming and in the end was not cost effective to do so, therefore we credited the members account. Rest assured the money has definitely been accounted for in the correct financial year and our auditors have also approved such a method.

The second insert in Break In, is a brochure from Icom, advertising the nice little VHF hand held Radio that will be won by some lucky member who pays their 2012 sub before the end of November this year. This includes the ones mentioned above.

I have received a number of queries regarding non receipt of HQ Info-line, usually if an e-mail address fails to deliver this sends an error report to the Webmaster, so if you know of someone who should have received the last few issues, but haven't get them to confirm their address is still current.

Finally I notice volunteers have been conspicuous by their absence regarding the Webmaster and HQ Info-line Editor positions. If there is anyone interested please contact me at NZART headquarters.

Talk soon.Debby ZL2DL

Intruder Watch Story

Well an interesting time has been had by all in the past week. A Radio Amateur in Northern California, inadvertently pushed a keyboard up to his keyer, which produced a stream of dots at 25 WPM for well over a week. An international effort from Region 3 bringing in Region 1 via the Intruderwatch and various posts to DX Clusters and Yahoo groups eventually resulted in the Radio Amateur being contacted via the ARRL in the USA.

Signal reports were received from Europe, USA, Afica and Australia and New Zealand (who heard it first and raised the alarm).

The resultant HF DF hunt resulted in a solid triangulation on the USA states from Radio Amateurs from all over the world.

Finally, we can only imagine a slightly embarrassed Radio Amateur within the US was contacted and the stream nicknamed "Dotty" ceased yesterday.

Excellent collaboration throughout the Intruderwatch organisations across Europe, USA and New Zealand, which could only have occurred with the support of the Radio Amateurs who participated in the hunt, providing signal and reports. For a week the 18085.5 signal was an excellent HF beacon for propagation.

Another exciting tale from the NZART Monitoring Service - who says monitoring is boring?
John ZL1GWE

****
ZL6RWC Special Event callsign.

Earlier this year, NZART officers discussed the issuing of special callsigns to celebrate the Rugby World Cup during September and October 2011.

A request has been made and granted by Council for the special call ZL6RWC be issued to Papakura Radio Club inc. for NZ amateur radio operators use from 1st September through to and including 31st October 2011.

John Balsillie, ZL1ALZ will manage the special ZL6RWC callsign. John will run a spread sheet to record operator details and the band / modes

used during their allocated time.

If you would like to operate with this special callsign, contact John at gibit@xtra.co.nz and give John the date/dates, bands and modes you would like allocated for your use.

All operators who use this special call will be required to supply an electronic log to John via email. For anyone who does not have email or a way to generate and supply an electronic log, it will be their responsibility to have someone complete this for them as 'paper' logs will not be accepted and John will not be converting any hand written logs received. This will not exclude anyone, just requires them to take an extra step to ensure that their contacts get recorded in the master log. John will normally upload logs daily to the master log.

We suggest that QSL confirmation is via Club Log and LOTW... printed QSL cards will also be exchanged via the bureau.

Another NZART initiative.

FMTAG NOTES FOR THE NZART WEBSITE AND FOR HQ INFOLINE 235

PROPOSALS

Branch 25 Napier has applied to change the channel, and invert the input-output frequency split, of its 8425 repeater located at Taraponui, Topo50 map reference BH38 233618. The repeater's transmit frequency will be 434.050 MHz and its receive frequency will be 439.050 MHz.

ZL2AJ has applied for an APRS Digipeater located at Kauahei Topo50 map reference BL38 166828. The digipeater's transmit and receive frequency will be 144.575 MHz.

FINAL RECOMMENDATIONS

At its meeting on Tuesday the 2nd of August, NZART Council approved the following actions:

Add 146.600 MHz to the NZART Bandplan for P25 Simplex.

Branch 63 Upper Hutt has applied to add the D-STAR DV digital mode to, and change the location of, its Mount Climie 5425 repeater. The new location will be Topo50 map reference BP32 798.83 423.94. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 145.425 MHz and the receive frequency can remain on 144.825 MHz, and that there will be no interference to other stations.

Branch 66 Auckland VHF has applied for a D-STAR DV digital mode repeater at Klondyke, Topo50 map reference BC32 602.01 641.50. The repeater's transmit frequency will be 145.650 MHz and the receive frequency will be 145.050 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

News from around the World

Larry Price, W4RA, Named ARRL President Emeritus: Dr Price served as ARRL President from 1984-1992 and served previously as a Vice Director, Director and Vice President of the ARRL Board of Directors. He also served for 10 years as Secretary of the International Amateur Radio Union (IARU) and another 10 years as that organization's President. Dr Price continues to serve the IARU as an expert consultant and has been recognized as President Emeritus by the IARU's Administrative Council. In celebration of Dr Price's service to the Amateur Radio Service and in recognition of his 60th anniversary as a radio amateur, the Board named him President Emeritus of the ARRL.

731. [RAC-Bulletin] RAC Bulletin 2011-022E - Industry Canada Responds Favourably to RAC request for access to 60M. Public consultation to begin shortly.

Newsgroup: rec.radio.amateur.misc
Date: 2011-08-07 17:16:28 UTC

RAC Bulletin 2011-022E - Industry Canada Responds Favourably to RAC request for access to 60M. Public consultation to begin shortly.
2011-08-07

Over the last year RAC has been in discussions with Industry Canada with the objective of obtaining access to 60M. This has been a policy objective of RAC since Spring of 2010.

At the last CARAB meeting between RAC and Industry Canada on May 17, 2011, two of the major items discussed were updates to Industry Canada's regulatory documents (RBR-4 and RIC-3), and the RAC request for an assignment of certain frequencies in the 60m (5 MHz) band to the amateur service in Canada. Neither of these subjects was finalized at the time of the meeting, but Industry Canada undertook to respond to RAC on both ofthem this summer.

Industry Canada has now informed RAC that at this point is sees no reason not to respond favourably to the RAC request for frequencies at 60m on a no protection, non-interference basis.

The new frequencies would be included in the schedule of amateur frequencies in the updated edition of RBR-4 to be released for public consultation in the future. Public submissions will be considered by Industry Canada in preparation for the final version of RBR-4. Any new frequencies it contains would become available to Canadian amateurs at the time of release of the updated RBR-4. Thus, if all goes well, Canadian amateurs may expect to gain access to frequencies at 60m, basically the same as those in the US, some time this fall.

The anticipated success of this initiative is the result of many months of effort from the RAC executive and volunteers, including the HF Band Planning Committee, and also from all of those amateurs who have made observations on the use of these frequencies and relayed their comments to RAC on the need for this band in Canada. We would not have been successful without all of your help and input.

Geoff Bawden, VE4BAW
President and Chair Radio Amateurs of Canada
Co-Chair of Canadian Amateur Radio Advisory Board

August 8, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, NG3K & ADXO, N4AA & QRZ DX, W4VQ, K5ZD, KH6BZF, WA6ITF, K8GI, K8YSE, W8GEX (60m News), 9M6DXX, AT International, CO2WF, DL1SBF, DL1THM, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, F6BFH, I1JQJ/IK1ADH & 425 DX News, IZ8CCW, JH1ROJ, OZ6OM & 50 MHz DX News, PA1AW, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VE2XB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st-July, through Sunday, 7th-August there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, ST0, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

9N, NEPAL (Update). A multi-national team, all members of Mediterraneo DX Club (MDXC), will be active as 9N0MD from Nepal during November. Operators mentioned are Dov/4Z4DX, Ziv/4Z4OQ, Marco/CE6TBN, Henri/F1HRE, Bernard/F9IE, Gabriele/I2VGW, Pino/I8YGZ, Dario/IT9SSI, Antonello/IT9YVO,

Al/IV3BSY, Giuliano/IV3RLB, Fabricio/IZ2KXC, Tony/IZ2ESV, Marco/IZ2GNQ, Sergio/IZ3NXC, Ant/IZ8CCW, Eric/ON7RN, Luis/XE1L, Guillermo/XQ3SA and Adhi/YB3MM. The pilot stations are Pino/IZ8BGY (EU & RotW) and Don/N1DG (N & S America). Activity will be on all HF bands and modes. NO QSL route announced yet. For more details and updates, visit their new and improved Web page at: http://www.mdxc.org/nepal2011

A6, UNITED ARAB EMIRATES. Members of the South East Europe Contest Club will be active as A61K during the CQWW DX SSB Contest (October 29-30th) as a Multi-2 entry. Operators mentioned are Romeo/S52RU, Khalid/A61BK, Khalid/A61K, Nenad/YU2M, Marko/YT2T, Suad/DK6XZ and possibly others. QSL via EA7FTR. Visit the South East Europe Contest Club's Web page at: http://seecc.net/A61K_TEAM.html

CE/XR, CHILE. Hector, CE3FZL, Manager for the Diploma Faros de Chile (FEDERACHI), announced that several Chilean groups will be activating several lighthouse (both north and south in Chile) for the upcoming International Lighthouse/Lightship Weekend (ILLW). Look for the following to be on the air between August 19-21st:
CE2C - Faro Cofradia Nautica del Pacifico; Radio Club Direcci&#65533;n General de Aeron&#65533;utica Civil/CE3RAC
CE2UNE - Baliza Rio Limari, Ovalle; Manuel/CE2UNE
XR2FCU - Faro Punta Curaumilla (CL0017); Radio Club de Valparaiso/CE2AA
XR2FPC - Faro Punta Condell (CL0015); Radio Club de Valparaiso/CE2AA
XR2FPD - Faro Punta Duprat (CL0016); Radio Club de Valparaiso/CE2AA
XR2Q - Faro Quintay (CL0018); Radio Club Carabineros de Chile/CE3ETE
XR6Z - Morro Gonzalo (CL0019); Carlos/CE6AMN
XR7F - Faro Corona, Chiloe; Radio Club Provincial Chilo&#65533; Castro/CE7BLI

CO9, CUBA (NA-015). Members of "Baracoa Radio Club" (CO8RCJ), with the support by the Guant&#65533;namo HQ - "Federaci&#65533;n de Radioaficionados de Cuba", will be active as CO9OBB on August 12th. Activity is to celebrate the 500th anniversary of the very first Cuban Village founded in 1511. Operators mentioned are: Oriol/CO8CY, Sinesio/CO8AW, Rafael/CM8RRM, Gamez/CO8ZQ, Walfredo/CM8WAL, Rafael/CO8RS and CO8MT. Special event station will be on the air between 1800z, August 12th, and 1800z, August 14th. Activity will be on 80/40/20/15 meters using CW, SSB and RTTY. QSL via "Federaci&#65533;n de Radioaficionados de Cuba" Bureau.

CS, PORTUGAL. Members of the Association of Radioamadores of the Village of Moscavide (ARVM) will be active as CS2HNI from the lighthouse (ILLW PT-0012, DFP FES-12, ARLHS POR-021) at Forte do Cavalo - Sesimbra (DCFP F-038, DMHP ST-028, WCA CT-00214) during the International Lighthouse/ Lightship Weekend (August 20-21st). Activity will be on 40/20/15/10 meters SSB. QSL via CT1RVM, by the Bureau is preferred. PLEASE NOTE: This special event station is in memory of their good friend Arthur Gil, CT2HNI.

EA6, BALEARIC ISLANDS. Adrian, AA5UK, will once again be active as EA6/AA5UK from Ibiza (EU-004, DIE E-023, MIA MB-003, WLOTA 0958, Grid Loc. JM09tb), between October 20th and November 3rd. Activity will be holiday

style on 80-10 meters using mostly SSB and various Digital modes. He will also be in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/ All-Band/Low-Power entry. Operations will be 100 watts and wire antennas. QSL via his home callsign, by the Bureau, direct, LoTW or eQSL.

FP, ST. PIERRE & MIQUELON. Mike, VE2XB, will be active as FP/VE2XB from St. Pierre & Miquelon Islands (NA-032, DIFO FP-002, WLOTA 1417) between August 14-21st. Activity will have a special focus on 6 meters, but he will also be active on all bands from 80-6 meters. QSL via VE2XB (see QRZ.com).

FP, ST. PIERRE & MIQUELON. Martin, G3ZAY, will be active as FP/G3ZAY from Miquelon (NA-032, DIFO FP-002, WLOTA 1417) between September 24-29th. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau.

FREE COUNTRY AND PREFIX LISTS. Pete, SWL G-13038, from the "DX Newsdesk" is providing a FREE "Country and Prefix Lists" on his Web page that have been updated to show the 341 DXCC countries. ST0 has been used for South Sudan - as per the current DXpedition. However, all lists will be updated again as soon as the ITU issues a new prefix allocation for the new country. The files can be downloaded from DX Newsdesk at:
http://www.dx-newsdesk.co.uk
If requested, Pete will also E-mail you the 8+meg zipped file via:
dx_newsdesk@yahoo.co.uk --or-- pete@dx-newsdesk.co.uk

HB0, LIECHTENSTEIN. Jan, OK1XD, will be active as HB0/OK1XD between September 1-10th. Activity will be holiday style on 80-10 meters using mainly RTTY and PSK31, with some SSB and CW. QSL via his home callsign, by the Bureau (preferred) or direct. PLEASE NOTE: Begin and end dates uncertain - actual info will be on QRZ.com.

HI3, DOMINICAN REPUBLIC. Operators "Yukon John"/KL7JR and XYL Claire/WL7MY will be back to their Dominican Republic ocean front condo on the north shore of Hispaniola Island (NA-96) around mid-September through 2013. The HI3/KL7JR license has been renewed for a year, so expect to hear them on HF SSB concentrating on 12, 17, 40 and 80 meters and 6 meters! They also plan to continue their antenna experimenting with MFJ mobile verticals and Wilson FGT-2 CB verticals as mini yagis from their 3rd floor patio. Rigs include Kenwood TS-570D and Ten Tec 599. Antennas: Vertical Loop (10-20m), TAK-tenna 80 (40 and 80m) and misc. 6 meter wires. QSL per info on QRZ.com. E-mail for skeds are welcome <KL7JR@Yahoo.com>. They expect to check in on 40 and 80 meters (OMISS and 3905 CCN) frequently. Check out John's article on "An Indoor Reduced Size Rectangular Loop" at:
http://www.hamuniverse.com/kl7jrindoorloop4010.html

IOTA NEWS.....
AS-026. Operators Ki-Sun/HL4MC, Gyeong/HL4CEL, Wang-hyun/HL4RBR, Kei/HL2UVH, Eun-Gwang/DS4EOI, Nao/JA1HGY and Zorro/JH1AJT will be active as D9A from Cheju Island between August 19-26th. This special callsign will be used during the 20th Asian Conference on Intellectual Disabilities from the Ramada

Plaza Jeju Hotel. Activity will be on 160-10 meters, 6 and
2 meters, using CW, SSB, RTTY and FM. QSL via DS4EOI.

EU-081. (Update) A French-Belgium group will be active as TM5SM from
Saint Marcouf Island (WLH LH0060, DIFM MA0001) between August
11-15th. Operators mentioned are Jean-Bernard/F4RTE, Jean-
Claude/F5IL, Jacques/F5JY, Jean/F5NKX, Denis/F5RJM, Alan/
F6BFH, Maryse/F8FDN (YL), Benoit/F8PDR and Francois/ON4LO.
Activity will be on 80-10 meters using CW, SSB and RTTY. They
will have three stations on 24 hours a day. QSL via F5RJM,
direct or by the Bureau. 32% of IOTA community needs EU-081.
Alan informs OPDX, "Now it's extremely difficult to obtain all
permissions to stay on this island (Birds reserve), and access
is dangerous. Please respect the rules of the traffic and of
the 'HAM SPIRIT', we will try to satisfy a maximum of you."
By the way, this is Alan's, F6BFH, 70th IOTA activity on 5
continents!

EU-156. Members of the "INVOKER TEAM" will be active as TM0INT from
Tombelaine Island between late Saturday morning, September
10th, to early afternoon Sunday, September 11th. Operators
mentioned are Christian/EA3NT, Vincent/F4BKV and Simon/IZ7ATN.
They will have two 100w stations on the air using vertical
dipoles. QSL via EA5KA only.

EU-189. A team of four highly experienced IOTA activators are planning
to operate from the extremely rare and dangerous Isle of
Rockall possibly between the end of May or the beginning of
June 2012. The team will land and stay on top of Rockall for
a maximum 48 hours. Operators mentioned are George/EA2TA,
Christian/EA3NT, Simon/IZ7ATN and Col/MM0NDX. All operators
were part of the recent larger MS0INT IOTA operation this
past June. The team is looking for funds to help offset some
of this expense. Significant contributors will be added to
their QSL card. To donate, you can use paypal at:
rockall.eu189@gmail.com
A Web site is currently under construction.

OC-130. Maarten, PA3GZU, will once again be active as DU9/PA3GZU
from Mindanao Island (OC-130, WLOTA 2803) between August
12th and September 4th. Activity will be on 40-10 meters
using SSB and PSK31. Operations will be with a TS520SE and
TH6DXX. QSL via his home callsign, the Bureau is preferred.

KC2, UNITED STATES (Special Event). Members of the Kings County Repeater
Association (KCRA) will be on the air as KC2RA honoring the memory of
the 911 tragedy. Activity will take place on September 10th, between
1300-2100z (9:00 am until 5:00 pm DST). Watch the following frequencies
and links:
20m - 14.295 USB KC2RA repeater: 146.430 MHz (1.0) PL 136.5
40m - 7.250 LSB Echo link: KC2RA-R
EchoLink node # 132967 (KC2LEB-R)

Frequencies may vary due to conditions and usage of the bands. They may not be on all frequencies at the same time. The KCRA will be a part of the 911 events held at the historic Conference House on Staten Island. The museum is named in memory of the 1776 conference convened at the house in an attempt to end the Revolutionary War. On September 11, 1776 - A peace conference was held on Staten Island with British Admiral, Lord Richard Howe, meeting American representatives including John Adams and Benjamin Franklin. The conference fails as Howe demands the colonists revoke the Declaration of Independence. KCRA will send a special confor-mation QSL card honoring this event if you send them a SASE (self addressed stamped envelope) to: KCRA 911 Memorial Event, PO Box 280288, Brooklyn, NY 11228-0288. Visit the KCRA Web page at: http://www.kc2ra.com

KH6BZF PROPAGATION FORECAST/REPORT (August 8-14th)....
Aug 08 HN-AN SOLAR REFERENCE KEYS

Aug 10 HN-AN BN - Below Normal
Aug 11 HN-AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 12 AN-AN LN - Low Normal
Aug 13 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 14 HN-AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PJ2, CURACAO. Operators YL Anja/DH2AK and Torsten/DL1THM will be active as PJ2/DH2AK and PJ2/DL1THM from Curacao (SA-099, WLOTA LH-0942) between August 21st and September 8th. Activity will be holiday style using an IC-7000 and a buddipole, maybe portable from a beach depending on the local circumstances. QSL via their home callsign, by the Bureau or direct. See details QRZ.com.

PJ6, SABA. Fred, K9VV, will be active as PJ6/NP2X from Saba Island (NA-145) between September 4-9th. Activity will be holiday style primarily on CW with some SSB (No Digital). QSL via K5WW.

PJ7, ST. MAARTEN (Update). Isao, JH1ROJ/KG8XV, will be active as PJ7ROJ (possibly) from St. Maarten (NA-105) between August 18-25th. Activity will be on all HF bands using CW and SSB. He will use a FT-450 with a 500w amp into a HF6V and 2 element beam for the higher bands. He informs OPDX that he would like to emphasize working JA and Asia on higher bands. QSL via his home callsign. Log will be uploaded to LoTW after the operation.

QSL BY THE BUREAU. Alan, F6BFH, is the QSL Manager for TO5SM, TO5SM/P and FG/F6BFH. If you want a QSL via the Bureau, don't send the QSL but give him the informations about the QSO(s) via E-mail at: qsl@f6bfh.net He will answer via Bureau (very quickly).

QSL RECEIVED VIA LoTW: 3DA0VB, 5B4AIF, 5H3VMB, 5Z4/UA4WHX, 7Q7VB, CE1WZ, CT1HFS, DL4MCF, DU3/N0QM, E77DX, EB1LA, EF1S, EU7A, F4BKV, F4FQH, F5BSB, FJ/OS1T, FP/K9OT, FP/VA2WA, HK1R, HK3O, HP1/IZ6BRN, KH7Y, LU2FE, LU4FLJ, LZ910PNO, MM0TFU/P, OX3XR, PJ4/N5WR, PJ4LS, PU8TEP, PV8ABC, R6AF/P, S21YZ, ST2VB, SU9VB, T93J, TG9AJR, TM7CC, TV6BFE, V47KP, V48M, VE6CMV, VK4IR, VK9HR and XE1/DM3DL

QSLS RECEIVED VIA MAIL: 3DA0TM, 4A4A, 4S7AB, 5M2TT, 5N/LZ1QK, 5V7CC, 8P0P, 9P9NX, BU2AQ, CO6RD, CO6WD, CT1HZE, CU2/G7VJR, D2EB, DU1IST, EA6/AA5UK, EA8BLL, EI9JU, EL2DT, EX9T, FJ/OS1T, G4RCG, GB4CI, GR4RCG, IG9E, J6/W0SA, JX/G7VJR, JX/SQ4MP, K6VVA/VE7, MS0INT, OH0R, PJ2/W8QID, PJ4E, PJ76, PW2D, PY2MTV, RA3CQ, S21YZ, SV2ASP/A, SV5AZP, T6JC, T6TL, T8XO, TG7/HR2DMR, TG7WW, TL0A, TM0Z, UO5OOW, VK0KEV, VO1KT, VP5CW, VR2XMT, YN7SU, YV5KM/OA4, ZD7FT, ZD8W and ZK2A

QSLS RECEIVED VIA THE BUREAU: 4A4A, A35AY, TJ9PF

ST0, SOUTH SUDAN (Update). The ST0R team is expected to be active until August 10th; word has it they will go QRT between 0700-0800z. Totals as of 1623z, August 7th, are 108029/QSOs with 25734/Unique callsigns. The breakdown is: 50342/CW, 42707/SSB and 14980/RTTY. By continent: 14.97%/AF,

20.36%/AS, 34.73%/EU, 14.37%/NA, 5.99%/OC and 9.58%/SA. For more details and updates watch: http://www.dxfriends.com/SouthernSudan2011
QSL via EA5RM direct. Their OQRS will be activated after the DXpedition. Online log is available on the Web page at:
http://www.dxfriends.com/SouthernSudan2011/log.php
ADDED NOTE: To see which actual operator you worked, hover your cursor over the green check mark and their picture and callsign comes up. Cool!

T32, CHRISTMAS ISLAND (Update). Don Field, G3XTT, FSDXA Publicity Officer, has sent out a press release (Bulletin #3) from the Five Star DXers Association (FSDXA) with updates on their T32C DXpedition to Kiritimati (Christmas Island) that will take place between September 27th and October 25th. Excerpts from the bulletin state that their container of equipment has reached Fiji and is due to ship soon to T32, to await the T32C team's arrival. The team is now pretty much complete with no less than 41 operators, some of whom will be there for the whole period, others will be there for the first or second half. At any one time there will be around 30 operators on the island permitting them to operate round the clock on all bands with propagation and other factors permitting, two stations active on each of 80-10 meter bands. The team consists of Neville/G3NUG (Team Leader), Chris/G3SVL (Co-Leader), John/G3WGV (Co-Leader), Michael/DG1CMZ, Franz/DK1II, Falk/DK7YY, Paul/EI5DI, Dave/EI9FBB, Gerard/F2JD, Ian/F5VKT/G3YBY, Michel/FM5CD, Vincent/G0LMX, Tony/G0OPB, Nobby/G0VJG, Richard/G3RWL, Fred/G3SVK, Laurie/G3UML, David/G3UNA, Gordon/G3USR, Dave/G3WGN, Mike/G3WPH, Don/G3XTT, Mark/G4AXX, John/G4DRS, Nick/G4FAL, Mike/G4IUF, Tony/G4LDL, Justin/G4TSH, Michael/G7VJR, Clive/GM3POI, Bob/GU4YOX, Kazu/JA1RJU, Dave/K4SV, Paul/KG4UVU, Bob/MD0CCE, Arnie/N6HC, Bob/N6OX, Frank/ON7RU, Ronald/PA3EWP, Maury/W3EF and Paul/WF5T. Internet access to and from Christmas Island is limited. However, logs will be uploaded to ClubLog (www.clublog.org) on a daily basis and any news posted with be on the T32C website. The T32C DVD can be pre-ordered at the on-line shop on the T32C website. Full details are given there. In addition to the T32C story, the DVD will include the video made during the FSDXA DXpedition to St. Brandon Island (3B7C) in September 2007. For more details/updates and the complete update bulletin #3, visit their Web page at: http://www.t32c.com

TY, BENIN (Update). The TY1KS team is now active from Grand Popo until August 14th. Activity will be on all HF bands and 6 meters, using three Elecraft K3s, and two Elecraft KPA500 new solid state amplifier. Due to the high demand for this country, the focus will be on the lower bands and the Digital modes, but also SSB and the higher band will be well worked especially during the TEP openings. QSL via IZ8IYX or by the OQRS (for direct/Bureau) and LoTW. Their Web site is at:
http://www.dxcoffee.com/ty1ks
The group is looking for sponsors for this DXpedition. Details for funding this operation are available on their Web page.

VP2V, U.S. VIGRIN ISLANDS. Art, N3DXX, will be active as VP2V/N3DXX from Virgin Gorda (Tortola) between November 23-30th. Activity will be focused on 160 meters and the CQWW DX CW Contest (November 26-27th) as a Single-Op/

All-Band entry. QSL via AA7V.

WRTC2014 PROMOTIONAL VIDEO AVAILABLE. The WRTC2014, Inc., host of the 2014 World Radiosport Team Championship competition is pleased to announce the release of a promotional video about the upcoming event. Using footage from previous WRTC competitions, the video conveys the energy, excitement, and sporting goodwill that results when amateur radio contesters from around the world come together to compete on a level playing field. The WRTC2014 video is available for viewing from the home page of the WRTC Web site at: http://www.wrtc2014.org
Video is professionally produced by well-known DXpeditioner and videographer, James Brooks, 9V1YC, with narration provided by Erik Thompson, KA6UAI.

YB, INDONESIA. Operators John/9M6XRO and Steve/9M6DXX, will be active as YB9/GM3OOK and YB9/G4JVG from Bali (OC-022) between September 12-15th. This is a stopover on their way to Timor-Leste for the 4W6A DXpedition. Activity will be holiday style on all bands, 80-6 meters using CW and RTTY (John - YB9/GM3OOK) and SSB (Steve - YB9/G4JVG). Operations will be 100 watts into beam antennas. QSL both callsign via M0URX, direct, by the Bureau, LoTW and OQRS (see <www.m0urx.com/qsl-request-form>).

ZF, CAYMAN ISLANDS. Operators John/K6AM, Bob/K5WA and Stephen/AC6T will be signing ZF1A from Grand Cayman Island (NA-016, WLOTA LH-1042) during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via K6AM, direct, by the Bureau or LoTW.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 7th August 2011

Islands On The Air

The annual Islands On The Air (IOTA) contest took place last weekend. This contest is always well supported in Ireland and this year was no exception.

A number of groups activated offshore islands for the contest. The "Polish Team" (Adam EI5JQ, Jurek SQ7JT, Bronek EI4JZ and Ark EI9KC) were on Great Blasket Island with the call sign EJ0PL; the Blasket Islands have a unique IOTA reference, ensuring they were in great demand during the contest. Members of the Shannon Basin Radio Club were back on Inisbofin, while an EI / GI group were on Rathlin Island - this group included Rathlin veterans Declan EI9HQ, Pete GI4VIV and Peter EI4GZB.

>From the mainland we heard the Dalkey Island Contest Group (EI1DD) operating from Tipperary. Nearby, also in Tipperary, Olivier EI8GQB operated on his own for the full 24 hours; Olivier tried out a number of new antennas for this contest, including a very unusual 10 element 20m wire beam. Other mainland stations heard during the contest included Thos EI2JD, Oleg EI7KD, Colin GI0RQK, Tony EI7JN, Joe EI7GY as well as MI0M -the Northern Ireland DXers Group.

Reports on propagation for this year's contest suggest a mixed picture. 10 metres was once again disappointing, with the Sporadic-E propagation for this band living up to its name; nevertheless there were some 10 metre openings both on Saturday and Sunday, providing worthwhile multipliers. The lower bands were perhaps better than usual, with low atmospheric noise; most participants have reported good runs on 40 metres and, to a lesser extent, on 80 metres.

The results of this contest will be announced before the year end.

The Mid Ulster Amateur Radio Club

The Mid Ulster Amateur Radio Club has been invited by Coleraine Council to attend the NI International Airshow in Portrush, from the 3rd September till the 4th September 2011. The club and its members will be

promoting amateur radio, to members of the public attending the show, with information leaflets and radio equipment on display.

The Mid Ulster Amatuer Radio Club will be holding a foundation course and exam over the weekend of Friday 9th Sept to Saturday 10th Sept 2011. Any interested persons can complete an application form at www.muarc.com/courseapplicationform.htm or contact the exam secretary Martin MI0YMF on 02838852712. Please note all forms must be completed and returned to the exam secretary before the 9th August 2011.

Mayo Radio Experimenters Network

The annual Mayo Radio Experimenters Network club radio rally will take place on Sunday 20th November 2011. Doors open at 11.00 am.

The venue will be the Welcome Inn Hotel in Castlebar.

If you would like further details please contact: Rally Organiser - Padraic Baynes EI9JA on 087 - 695 7154 (email pbaynes1 at eircom /dot /net), or email club PRO. David Hatfield EI3ECB on ei3ecb at gmail /dot /com or text or phone the club mobile phone number 086 20 89 777.

Dundalk Amateur Radio Society EI7DAR

Dundalk Amateur radio Society continues to be as busy as ever. Anthony EI2KC was applauded in his absence for reading the IRTS News the previous Monday night for his first time. DXCC: Tom EI9CJ got well deserved praise from his club members for his recent inclusion in the DXCC listings. Tom has submitted cards to the ARRL for his Mixed, Phone and 10m awards. DXing: Thos, EI2JD, gave a brief talk on the ST0R DXpedition and urged all to try work them on one band (at least). D.A.R are looking forward to hosting the IRTS AGM 2012 at the Fairways Hotel, Dundalk and plans are well on the way to ensure a great success as in previous years. Last but certainly not least. Congratulations were given to those who studied, sat and passed the Radio Exam recently. A big round of applause for Des Sharp KB3LKM and Sean McKeown, two members of the club who were successful and passed the exam.

Amateur Radio satellite ARISSat-1 deployed

The Amateur Radio satellite ARISSat-1 has been deployed from the ISS during EVA-29 on Wednesday, August 3. First signals have been received by JR8LWY reporting copy of the telemetry beacon as the satellite passed over Japan. Full operational capability of ARISSat-1/KEDR is still under evaluation pending performance evaluation of the UHF antenna. This amateur satellite is one of the most dynamic amateur satellites ever deployed in space and provides us with unique opportunities to conduct amateur radio experiments. Please submit your reception signal reports on amsat-bb and via the mission's e-mail boxes

on http://www.amsat.org.

Thailand enters the ILLW

Welcome our newest country, Thailand to the International Lighthouse and Lightship Weekend, which is on August the 20 and 21. Simon Luttrell HS0ZIB will be operating from the Golden Jubilee Lighthouse, at Phromthep Cape, Phuket. With just days to go, the big entry improvements are from Australia, Chile, Portugal and the USA. They have already exceeded previous records and a few more countries are about equal with last year's total. The 48-hour event is not a contest but is plenty of fun.

DX News

Carsten DF1XC is nearing the end of his stay on the Caribbean island of Barbados. He can still be heard until 15 August using the call 8P9XC. QSLs go via the home call.

A team from Spain and Italy are active from now until 15 August from Benin in West Africa. signing TY1KS. They are to be found on all bands including 6m. QSL info is via IZ8IYX and further details can be found on www.dxcoffee.com

OJ0UR will be QRV from Market Reef from 13-20 August. Operators are ON5UR, ON8AK, PA5R and PD9DX. This one counts as EU-053 for the Islands on the Air Award as well as being a separate DXCC entity. QSL Manager is M0URX.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

734. [RAC-Bulletin] RAC Bulletin 2011-023E - Deputy Director Appointed at St. John's AGM.

Newsgroup: rec.radio.amateur.misc
Date: 2011-08-09 03:43:06 UTC

RAC Bulletin 2011-023E - Deputy Director Appointed at St. John's AGM.
2011-08-07

The 2011 AGM was hosted by the Society of Newfoundland Radio Amateurs [SONRA].

Atlantic Director Everett Price, VO1DK, took advantage of the recent AGM in St. John's Newfoundland to announce the appointment of Len Morgan, VE9MY, to the newly created position of Deputy Director for the Atlantic Region.

Len is well known to the Region having served as Atlantic Director for two terms ending in December 2010. This appointment will allow for greater representation for Atlantic members. Everett, VO1DK is a resident of Newfoundland and Labrador while Len 's home is in New Brunswick.

The position of Deputy Director was approved by the membership at the Halifax AGM in 2010 and subsequently approved by the federal government in February 2011. The Deputy Director position provides for continuity of organization and greater access by members. The Deputy differs form the position of Assistant Director in that the incumbent fullfills the duties of Director when the Director is not available and serves as an observer at Board meetings.

Geoff Bawden, VE4BAW
President and Chair Radio Amateurs of Canada

In another news group (the support for my news service group) it was
mentioned that Google Groups is broken,

Well, More broken than usual
So it's a Google problem,, Not uncommon at all

Google's search engine was down a while ago (right when I seriously
needed it) and it appears they are still "Working on things that got broke"
So the problem is

QSLs direct to: Fernando A Cardona, PO Box 88, Kathmandu, Nepal

CO9, CUBA,NA-015
Some members of the Baracoa Radio Club (CO8RCJ) supported by the
Guantanamo HQ "Federacion de Radioaficionados de Cuba" will be active
as CO9OBB from Aug 12 (1800 UTC) until Aug 14 (1800 UTC) to celebrate
the 500th anniversary of the first Cuban village founded in 1511.
The operators CO8CY, CO8AW, CM8RRM, CO8ZQ, CM8WAL, CO8RS and CO8MT will
be QRV in CW, SSB and RTTY on 80m/40m/20m/15m. QSL via bureau.

CP, BOLIVIA
Rene,CP6/DF9GR, is QRV in CW, SSB, RTTY and PSK on 80m-10m till Aug 20.
QSL via homecall.

DU, PHILIPPINES, OC-130
Maarten,DU9/PA3GZU, will be QRV in SSB and PSK31 on 40m/20m/15m/10m in
"holiday style" from Mindanao Island (OC-130) from Aug 12 until Sep 4.
QSL via homecall.

FP, ST PIERRE ET MIQUELON, NA-032
Mike,FP/VE2XB, will activate Saint Pierre et Miquelon (NA-032) on HF
and especially on 6m from Aug 14-21. QSL via VE2XB.

GU, GUERNSEY, EU-114
Bob,M0MCV, wants to work holiday style as MU0MCV from Guernsey (EU-114) from Aug 9-16. QSL via homecall.

HK0/M, MALPELO ISLAND, SA-007
The team for the DXpedition to Malpelo (end of January/beginning of February 2012) is complete with 16 experienced OMs from eight countries including three members of the CQ DX Hall of Fame.
The team will leave Buenaventura/Colombia on Jan 22 for the 235 miles to Malpelo Island (SA-007). Depending on the conditions they plan to hit the airwaves within 36 hours after landing for about 10-12 days.
Operations are planned in CW, SSB and digital modes on 160m-6m.
Elecraft supports them with seven K3 radios and five KPA 500 amplifiers while RF Concepts (Alpha) loans three Alpha 8410 amps for the lowbands and DX Engineering supplies most of the antennas.
QSLs are handled by N2OO and the SJDXA (who managed also 3Y0X and K5D).
Donations can be sent direct to DXARC (Colombia), DJ9ZB (Europe), K4UEE (North America) or JA1ELY (Asia/JA).
More information is available on their website: http://www.hk0na.com

OJ0, MARKET REEF, EU-053
Dervin,PD9DX, Marc,ON8AK, and Max,ON5UR, will be active as OJ0UR from Market Reef (EU-053, ARLHS MAR-001, TWLHD WLH OJ0-001, WLOTA LH-0542) from Aug 13-20. They will use a Stepp-IR Big Vertical and a Stepp-IR 2-ele-yagi on HF.
QSLs via bureau or direct to M0URX (SAE plus 1 IRC/2 USDs) or via LoTW.
OQRS is possible on: http://www.m0urx.com/qsl-request-form
More information can be found on: http://www.united-radio.be

PJ7, SINT MAARTEN, NA-105
Travis,PJ7/AF6WU, and Kjerstin,PJ7/KJ0DVA, will be active in SSB mainly on 15m, 17m and 20m from Sint Maarten (NA-105) from Aug 11-15.
QSLs via AF6WU (direct preferred) and LoTW.

ST0, SOUTH SUDAN
Paul,N6PSE, writes from South Sudan: "Today, the Undersecretary of the Ministry of Communications and his staff visited the ST0R team and observed our operations. The Undersecretary has been very supportive of our plans to conduct this DXpedition to the new country of the Republic of South Sudan.
Following the visit to the radio shack, we enjoyed a cordial lunch and exchanged documents to commemorate the first DXpedition to the Republic of South Sudan.
The ST0R team is also assisting the Ministry of Communications with the ITU application for their own prefix. We are also providing them guidence to establish their own Amateur Radio activities."
They will go QRT on Aug 10 around 0700-0800. ST0R is good for DXCC.

T32C, EASTERN KIRIBATI, OC-024
The team is almost complete and includes 41 OPs already. Some of them will be on Kiritimati (Christmas Island, OC-024) during the whole time from Sep 28 until Oct 26, while others will be there only during the first or second half. They will be active with about 30 OPs on 80m-10m

all around the clock. The team includes Neville,G3NUG (team leader),
Chris,G3SVL (co-leader), John,G3WGV (co-leader), Michael,DG1CMZ,
Franz,DK1II, Falk,DK7YY, Paul,EI5DI, Dave,EI9FBB, Gerard,F2JD,
Ian,F5VKT/G3YBY, Michel,FM5CD, Vincent,G0LMX, Tony,G0OPB, Nobby,G0VJG,
Richard,G3RWL, Fred,G3SVK, Laurie,G3UML, David,G3UNA, Gordon,G3USR,
Dave,G3WGN, Mike,G3WPH, Don,G3XTT, Mark,G4AXX, John,G4DRS, Nick,G4FAL,
Mike,G4IUF, Tony,G4LDL, Justin,G4TSH, Michael,G7VJR, Clive,GM3POI,
Bob,GU4YOX, Kazu,JA1RJU, Dave,K4SV, Paul,KG4UVU, Bob,MD0CCE, Bob,N6OX,
Arnie,N6HC, Frank,ON7RU, Ronald,PA3EWP, Maury,W3EF, and Paul,WF5T.
See also: http://www.t32c.com

TY, BENIN
The "DXCoffee" team of C31CT, IW3SQY, IT9YVO, IZ8GCE, IZ4AKS and SP3DOI
is signing TY1KS with two stations in CW, SSB and RTTY on all HF bands
including 6m from Aug 6-15. QSL via IZ7KHR.
See also: http://www.dxcoffee.com/ty1ks

VP8/A, ANTARCTICA, AN-016
Gerard,ZS6KX, is QRV as ZS6KX/7 from the SANAE IV Base. He has been
spotted in SSB on 20m from 1400-1700 UTC. QSL via ZS6KX.

W, USA
Butch,N8CHS/4, is working from Santa Rosa (NA-142) until Aug 12.
QSL via homecall, unfortunately only direct.

The Old Barney ARC (http://www.obarc.org) will activate the special
event station W2T from the Tucker Island lighthouse (USA-911) with
two stations in SSB mainly on 40m, 20m and 17m on Aug 13/14, from
1300-2100 UTC. QSL via N2OO.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The logs of the 2010 CQWW SSB Contest were published on:
http://www.cqww.com/cq-ww-ssb-2010.htm

UPCOMING CONTESTS

Aug 13-14: WAE DX Contest, CW

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-055, R0B, Vize Island: OM Oleg,ZS1ANF (also R1ANF, UA1PBA), is active as
UA1PBA/mm on the way to Franz Josef Land (IOTA EU-019). An activity
from there may be possible. Much more interesting is the possibility
that he may show up also from Vize Island (AS-055) afterwards.
QSL via UA1PBA/ZS1ANF.

EU-012, GM, Shetland and Fair Isle: GS4WAB wants to activate some rare
WAB squares (HZ16, HZ17, HZ26 and HZ27) on Fair Isle from Aug 16-22.
QSL via bureau or direct to G4IAR.
His website is: http://www.worked-all-britain.co.uk

EU-020, SM1, Gotland County (Gotland Island) group: SM1/DK3PZ announced to
become active from Gotland from Aug 13-20. QSL via DK3PZ.

EU-026, JW, Svalbard: Didi,JW/OE9SDV, is working from Longyearbyen until
Aug 26. Listen for him on the usual IOTA frequencies.
QSLs via bureau to his homecall.

EU-038, PA, Noord Holland/Friesland/Groningen Province group: PA/IZ4AMS will
stay on Texel Island from Aug 14-17. QSL via IZ4AMS.

EU-064, F, Pays de la Loire Region group: The first IOTA DXpedition of F4FVI
and HB9ELV leads them to Noirmoutier where they will sign TM0NOI from
Aug 12-14. Bureau QSLs via F4FVI, Direct QSLs via HB9ELV.
Their website is: http://www.qrz.com/db/TM0NOI

EU-081, F, Basse-Normandie (Manche East) Region group: F4RTE, F5IL, F5JY,
F5NKX, F5RJM, F6BFH, F8PDR and ON4LO plan to show up as TM5SM from
Saint Marcouf working in CW, SSB and RTTY on all bands on Aug 11-15.
QSL via F5RJM.

EU-127, DL, Schleswig-Holstein South West group: DL/IZ4AMS is going to visit
the German island Helgoland from Aug 11-13. QSL via homecall.

EU-129, DL, Usedom Island: DK2AI/p (DLFF-075) will show up on the bands in
CW/SSB on Aug 12/13.

EU-136, 9A, Kvarner group: 9A/DG9MA, 9A/DO1DMI and 9A/DG1TK will be QRV
from Krk Island on Aug 11-13.
QSLs for 9A/DO1DMI and 9A/DG9MA via homecall (bureau/direct),
QSLs for 9A/DG1TK only direct.

EU-181, LZ, Bulgaria group: LZ/HA0HW, LZHA4DX and LZ1PJ/p will be QRV in CW
and SSB on 40m-17m during the second half of his Bulgaria trip from the
island Sveta Anastasia or Sveta Ivan until Aug 21. QSLs via homecalls.

NA-045, XF3, Quintana Roo State North group: OM Keith who is momentarily
active as XF1/K5ENS from Isla de Mujeres QRV states that he is using
the callsign which is written on his licence.
XF3/IZ2LSC is active from there as well (see last DXNL).

SA-045, PQ8, Amapa State group: PY2XB and PT2OP have a landing permission
for Balique in the Natural Reserve of Parazinho. They plan to become
active as PQ8XB and PQ8OP from Aug 17-24.
PQ8XB via PT7WA (bureau/direct) and PQ8OP via PT2OP (bureau/direct).

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
01 - 07 August 2011

Solar activity ranged from very low to high levels during the period. The period began with low activity on 31 July - 01 August, with C-class flares predominantly from Regions 1261 (N15, L=332, class/area Dai/380 on 04 August) and Region 1263 (N17, L=301, class/area Ekc/720 on 04 August). Activity increased to moderate levels on 02 August due to a long-duration M1/1n at 02/0619Z from Region 1261, with associated Type IV, Type II (estimated speed of 1067 km/s), and Tenflare (220 sfu) radio emissions. LASCO C3 imagery indicated a full halo coronal mass ejection with this flare. Activity increased to high levels on 03 August with three M-class flares. The largest of these was an M6/2b at 03/1348Z from Region 1261, with associated Type IV, Type II (estimated speed of 812 km/s). A CME was subsequently observed in STEREO-A Cor2 imagery at 03/1409Z. Solar activity remained at high levels on 04 August due to an M9/2b from Region 1261 at 04/0357Z, with associated Type IV, Type II (estimated speed of 750 km/s), and Tenflare (720 sfu). A CME was also associated with the M9 flare with an approximate speed of 2100 km/s in STEREO-A COR-2 imagery. Activity decreased to low levels on 05 - 07 August, with C-class flares predominantly from Regions 1261, 1263, and 1267 (S17, L=243, class/area Bxo/010 on 05 August). A long duration C1 flare was observed at 06/1807Z. Two CMEs were observed by SOHO/LASCO C2 at 06/1036Z and 06/1736Z, but the majority of the ejecta was directed to the west and not geoeffective. Late on 06 August, a recurrent positive polarity CH moved into a potentially geoeffective position.

No proton events were observed at geosynchronous orbit during 31 July - 03 August. The 100 MeV proton flux at geosynchronous orbit exceeded 1 pfu beginning at 04/0510Z, reaching maximum at 04/0740Z, and ending at 04/1110Z. The maximum 100 MeV proton flux was 1.8 pfu. The 10 MeV proton flux at geosynchronous orbit exceeded 10 MeV beginning at 04/0635Z, reaching maximum of 96 pfu at 05/2150Z, and ending at 06/0515Z. The 10 MeV proton flux remained enhanced, but

below threshold and trailing towards quiet background on 07 August.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal levels on 31 July. Fluxes increased from normal to moderate levels during 01 - 02 August. Flux values returned to moderate levels on 03 and 04 August. Normal to moderate levels were observed on 05 - 07 August.

Geomagnetic activity was quiet to unsettled, with isolated active levels on 31 July due to a coronal hole high-speed stream (CH HSS). Quiet to unsettled levels were observed on 01 August as the CH HSS subsided. Activity remained quiet on 02 - 03 August. Predominantly quiet levels were observed on 04 August, before the first of three CME shocks was observed transiting ACE at 04/2105Z, followed by a 20 nT sudden impulse observed by Earth based magnetometers at 04/2155Z. A magnetopause crossing was also observed by the GOES 13 and 15 satellites. Quiet to unsettled levels were observed between 04/2100 - 05/1800Z. Two additional shock passages were seen by ACE at 05/1722Z and 05/1834Z, accompanied by a noticeable increase in solar wind density, velocity and magnetic field, which included Bz fluctuation to -20 nT. Activity increased to minor to severe storms during 05/2100 - 06/0600Z due to effects from the CME shock arrivals. Early on 06 August, activity steadily declined from active to quiet levels, before the polarity transitioned to a mostly positive Phi angle and recurrent CH HSS effects began. This triggered an isolated minor storm at high latitudes between 06/1200-1500Z. Otherwise, geomagnetic activity remained mostly quiet for the remainder of 06 August and throughout 07 August.

Forecast of Solar and Geomagnetic Activity
10 August - 05 September 2011

Solar activity is likely to be at Moderate (R1 - Minor) during 10 August, with a chance for M-class flares from Region 1263. Activity is expected to decrease to very low to low levels during 11 - 17 August with the absence of mature spot groups on the disk. Activity is expected to increase to very low to low levels, with a chance for M-class flares from 18 August - 03 September from old regions; 1260 (N19, L=001), 1261 (N15, L=332), and 1263 (N17, L=301). Activity is expected to decrease to very low to low levels 04 - 05 September. However, there is a chance that new, rapidly emerging flux regions could increase activity to moderate or greater levels at any time during the outlook period.

The greater than 10 MeV Proton flux levels at geosynchronous orbit are likely to remain above threshold (S1 - Minor) on 10 August, as an event that is currently in progress carries over early into the period. No proton events are expected at geosychronous after 10 August though the end of the period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high levels on 10 and 11 August.

Normal to moderate levels are expected 12 - 15 August. Moderate to high levels are expected again 16 - 31 August. Normal to moderate levels are expected 01 - 03 September.

The geomagnetic field is expected to be at quiet to unsettled levels, with a chance for active levels 10 - 11 August, due to a CH HSS. Activity is expected to decrease to predominantly quiet levels during 12 - 15 August. Activity is expected to increase to quiet to unsettled levels, with a chance for active levels 16 - 18 August and again 21 - 22 August due to two recurrent CH High Speed Streams. Activity is expected to decrease to quiet to unsettled levels on 23 August CH HSS effects subside. Quiet levels are expected 23 - 25 August, before increasing to quiet to unsettled levels, with a chance for active levels at high latitudes 26 - 28 August due to another CH HSS. Mostly quiet conditions are again forecast to return from 29 August until 03 September, before another CH HSS ends out the period (04 - 05 September) with unsettled and active conditions.

739. [RAC-Bulletin] RAC Bulletin 2011-024E - RAC Task Force to Seek an Exemption for Ontario Amateurs.

RAC Bulletin 2011-024E - RAC Task Force to Seek an Exemption for Ontario Amateurs.
2011-08-09

At its Annual General Meeting in St. John's, Newfoundland, Radio Amateurs of Canada announced that a task force has been formed to seek a permanent exemption for Ontario Amateurs from the ban on operating mobile devices in a vehicle under Article 5 in Ontario Regulation 366/09 made under the Highway Traffic Act. It is also commonly known as the Distracted Driving Legislation. The ban would take effect on January 1, 2013.

The task force is composed of Steve Pengelly, VE3STV, Former Honorary Legal Counsel, Ian Snow, VA3QT, Special Advisor to RAC, Jeff Stewart, VA3WXM, Southern Ontario Regional Director, Marcel Mongeon, Honorary Legal Counsel, VA3DDD, Geoff Bawden, VE4BAW, President and Chair RAC, and ex officio to the Task Force. It is chaired by Bill Unger, VE3XT, Ontario North/East Director.

The Task Force has already obtained letters of support from groups that we assist ranging from hospitals, communities, agencies and NGO's. All of the letters indicate that limiting Radio Amateurs. ability to provide communications while mobile would not be in the Ontario's best interests. If you would like to submit a letter of support from an external group to the RAC Task Force, please contact the chair Bill Unger.

The Task Force will present the letters as part of our case to Kathleen Wynne, Ontario.s Minister of Transportation, that Amateur Radio operators in Ontario should be exempt from this regulation. The objective of the Distracted Driving Task Force is to convince the Ontario Government that the regulation, as currently written, will actually decrease public safety in Ontario.

Amateur Radio Operators provide countless hours of public service work in their communities and by doing so we are prepared to assist with communications in the event of an overload or total failure or the existing telecommunications infrastructure. The change in the regulations that RAC will request, would align Ontario with seven other provinces and one territory that have introduced exemptions which allow Amateurs to operate while mobile.

The RAC Task Force will shortly initiate discussions with officials in the Minister's Office on the need for this regulatory change.

Information on the progress will be updated through the RAC Bulletin
system, TCA or the RAC Report. If you are interested in assisting
please contact Bill Unger, VE3XT at ve3xt@rac.ca

Bill Unger, VE3XT
RAC Director - Ontario North/East
Chair: Task Force - Distracted Driving Legislation/Bill 118

Ohio/Penn DX Special Bulletin No. 1022.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1022.1
BID: $OPDX.1022.1
August 10, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and N6PSE for the following DX information.

ST0, SOUTH SUDAN UPDATE. Here is the latest information regarding the South Sudan DXpedition from Paul, N6PSE:
"This afternoon, the DX Friends and the Intrepid-DX Group departed Juba and are now resting in Cairo before our long trips home to our respective countries.
We are very excited about how well the ST0R DXpedition went. The DX Friends and the Intrepid-DX Groups worked well together and really enjoyed our three weeks together. We are already talking about our next DXpedition/Adventure!
We are quiet happy that we met our goal of 120,000 QSOs and set a record for RTTY contacts during a new country activation.
We wish to thank all of our donors and supporters. Ordinarily we thank our donors with an individual message, however the Internet in Juba was very unreliable and we were often without any connection to the outside world other than Amateur Radio.
This week, we held another meeting with the Engineering staff of the Ministry of Communications to guide them in their ITU prefix application. We are also providing them with guidance to develop and improve their Amateur Radio program and policies.
Team Co-Leader, Tony-EA5RM is also our QSL Manager, He will also investigate your "busted call" requests, if you email Tony directly.
Here are our final statistics, watch for updates to the ST0R web-page:

121,286 QSO in ST0R Database.
27,994 Unique Callsigns. 176 DXCC. 40 CQ Zones.
First QSO at 22/07/2011 @ 15:36 | Last QSO at 10/08/2011 @ 07:01

CW: 55,458
SSB: 47,696
RTTY: 18,132 (New world Record)

Thank you,
The ST0R Team."

** PERSEIDS - METEORSHOWER in August 2011 **

The Perseids: Only the ï¿½normalï¿½ peak, with ZHR around 100 hr-1, is
expected to occur this year. According to IMO, the maximum in 2011
is expected to occur on August 13, between 01h and 13h30m UT, with
peak around 06h UT having ZHR = 100 hr-1. No encounters with other
trails are expected this year. Lastest News on our MMMonVHF MS
Propagationpage: www.MMMonVHF.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** PERSEIDS - a word of the NEWSLETTER Editor **

After the forecast for the Shower a word from the editor:
PERSEIDS - in past years one of the biggest events for every VHF
enthusiast. Early in june and july we did get several expedition
news and spread it around - and 2011 ??? There were several medium
Sporadic E openings and we have had visitors of the MMMonVHF page
day by day in the high of 600-800 people... more than 900 people
will read the newsletter week by week, and we have asked for input
a lot of times - BUT - we have just 3-4 inputs or there are nearly
NO Expeditions anymore? Maybe its as well only the trend that a
lot people running EME instead of hunting the meteors nowadays?
So please again our wish: if you ever hear or plan yourself a trip
and/or any activity use:

For active Squares in PERSEIDS >>> http://www.mmmonvhf.de/ms.php
INPUT of VHF-ACTIVITIES >>> www.mmmonvhf.de/newsuser.php
INPUT of UPDATES to NEWS >>> www.mmmonvhf.de/newsuserup.php

Thanks in the name of all USER of MMMonVHF and the team which is
always trying to pass you as soon as possible the latest News...

** MMMonVHF and DUBUS 144 MHz Meteorscatter-Sprint Contest **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part in
our 144 MHz Meteorscatter Sprint Contest, which took place for the
first time in the 2008 Perseid shower. The 144 MHz Meteorscatter
Sprint Contest will take place each year on the day of the from IMO
(International Meteor Organization) announced maximum of the Perseid
shower. 2011 contest period: Date: 12./13. August 2011 Time period
for 48 hours: start 12.August 00:00hrs till end 13.August 2011
23:59hrs "UT" (End time of the last complete QSO) !! NEW !!
Reference data for 2011 by the IMO: expected Perseids Maximum 2011:
August 13th. 07:09UT with a expected ZHR of 100. Read all in detail
at the overview and rule page: http://www.mmmonvhf.de/ctest.php

** NEW DIGITAL EME RECORD ON 144 MHz BETWEEN RSA & HAWAII **

Congratulations to Allan ZS1LS and Jeremy W7EME for establishing
a new SARL EME record on 144 MHz. It occurred at 20:20 UTC on
03 August 2011 using the JT65b mode and covered a distance of
18383 km. This contact occurred close to moonset in the RSA and
0,7 degrees of moonrise in Hawaii. Signal reports varied between
-26 dB and -31 dB at Allan's QTH. Jeremy copied Allan at -21
dB on the night before but Allan could not copy him at the time.

** LA9DFA - Perseids from JP60bg **

Will be QRV from JP60bg during Perseids. The activity will be sporadic due to family issues in the weekend. Will go there with another HAM and use his cabin. Will put up antennas for 6m and 4m on friday evening, and try to work some MS QSO's after getting antennas up. Then I will return home and will be back at the cabin on saturday afternoon/evening and start working again. If family situation allow I will try to work a little in the morning as well. Then QRV sunday morning and during the afternoon/evening. No excact times can be given. Will announce on Shout when QRV. It's a short drive from my ordinary QTH (JP50xh) so returns home for dinner etc :) QRG 50.232 and 70.283 +- QRM, using FSK441 and JT6M prima ry. Possibly some CW and SSB.
SOURCE: tnx to Morten LA9DFA, direct to MMMonVHF

** QE29 activation by Rex, VK7MO **

On the weekend of 21 and 22 August I will be joining Eric VK7NFI and Wayne VK7NET for the international lighthouse weekend operating from Table Cape Lighthouse in QE29 North West Tasmania. The top of the lighthouse gives an excellent take-off all across Bass Strait. I will operate on 144, 432, 1296 and 10368 both SSB and digital on XXX.225. I will also try meteor scatter during the normal activity sessions on 144.230. SOURCE: Rex VK7MO via [VK-VHF]

** Running 222 during Perseids... **

Hello to everyone....I would like to work some 222 FSK441 during the Perseids Meteor Shower. I especially would like to work some new states this time. Except for AZ and MN, I need just about everything outside the EM field....NE, N, and the Western states. If anyone would like to run with me on 222, please write me for a sched. My tropo station for 222 is fairly large with stacked antennas at 135ft and QRO. Thanks in advance..... 73

** FP, ST. PIERRE & MIQUELON **

Mike, VE2XB, will be active as FP/VE2XB from St. Pierre & Miquelon
Islands (NA-032, DIFO FP-002, WLOTA 1417) between August 14-21st.
Activity will have a special focus on 6 meters, but he will also be
active on all bands from 80-6 meters. QSL via VE2XB (see QRZ.com)
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1022

** HI3, DOMINICAN REPUBLIC **

Operators "Yukon John"/KL7JR and XYL Claire/WL7MY will be back to
their Dominican Republic ocean front condo on the north shore of
Hispaniola Island (NA-96) around mid-September through 2013.
The HI3/KL7JR license has been renewed for a year, so expect to
hear them on HF SSB concentrating on 12, 17, 40 and 80 meters and
6 meters! They also plan to continue their antenna experimenting
with MFJ mobile verticals and Wilson FGT-2 CB verticals as mini
yagis from their 3rd floor patio. Rigs include Kenwood TS-570D and
Ten Tec 599. Antennas: Vertical Loop (10-20m), TAK-tenna 80 (40
and 80m) and misc. 6 meter wires. QSL per info on QRZ.com. E-mail
for skeds are welcome <KL7JR"at"Yahoo.com>. They expect to check
in on 40 and 80 meters (OMISS and 3905 CCN) frequently. Check out
John's article on "An Indoor Reduced Size Rectangular Loop" at:

** IOTA operation from AS-026 **

Operators Ki-Sun/HL4MC, Gyeong/HL4CEL, Wang-hyun/HL4RBR, Kei/HL2UVH Eun-Gwang/DS4EOI, Nao/JA1HGY and Zorro/JH1AJT will be active as D9A from Cheju Island between August 19-26th. This special callsign will be used during the 20th Asian Conference on Intellectual Disabilities from the Ramada Plaza Jeju Hotel. Activity will be on 160-10 meters, 6 and 2 meters, using CW, SSB, RTTY and FM. QSL via DS4EOI. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1022

** HK0NA Malpelo Isl. DXpedition 2011/2012 **

The Malpelo 2012 DXpedition is pleased to announce that the HK0NA operating team is now complete with 16 operators. This is an international team of excellent operators, representing 8 different countries, and includes 3 members of the CQ DX Hall of Fame.
The team will depart from Buenaventura, Colombia on January 22, 2012 for the 235 mile trip to Malpelo. Depending on sea and landing conditions, we expect to be QRV within 36 hours after landing for about 10-12 days. The team will return to Buenaventura on Feb. 6, 2012 - Operations are planned on 160 through 6 meters on CW, SSB and Digital modes. We wish to thank Elecraft for the loan of seven K3 transceivers and five of the new KPA 500 amplifiers. RF Concepts (Alpha) has agreed to loan the team three Alpha 8410 amplifiers for use on the low bands and DX Engineering will supply most of the DXpedition antennas. Thanks to N2OO and the SJDXA who have graciously agreed to handle QSL duties. You may recall the expert job they did for 3Y0X and K5D recently. Contributions are being sought from DX Foundations, DX Clubs and individual DXers. Your financial assistance is kindly requested. You may contribute directly to DXARC (Colombia) or to K4UEE (North America), DJ9ZB (Europe), or JA1ELY (Asia/JA). See our website: www.hk0na.com for further details on how you can help. We plan periodic press releases with information of interest. Also, watch the website for breaking news. Thanks
SOURCE: Jorge Prieto, HK1R, DXpedition leader via GOTO List

** DXpedition to Kiritimati (Christmas Island) T32C (BJ12HA) **

LATEST NEWS from Lance, W7GJ, dated 2011-08-05: 6m EME from T32C
The T32C DX Pedition is getting closer. I'm doing starting the preparation for T32 trip. My T32C operation schedule was changed to four weeks stay in Kiribati. It became operation of the full expedition time can do try to EME for best time Europe. I wishes for EME/QSO with a lot of East coast US and Europe station. I plan to use two antennas for the operation of on 6m. an original antenna of the ionosphere propagation is Trident 7EL long yagi. As for M2 6M8GJ (8EL), it is scheduled to use it in the different location only for EME. In EME without the angle, there is a thing tried with 7EL horizontal, use original antenna. 6m EME. Mode: WSJT - JT65A Frequency: 50.198 MHz T32C will transmit the first sequence

Grid Locator: BJ12HA (N = 2.0.48 W = 157.23.44)

** Lighthouse Insua Island qrv (IOTA EU-150, WW Loc. IN51NU) **

Antonio CT1EPV, Hermann HB9CRV and Siggi DL2HYH will be active from the lighthouse on Insua Island (IOTA EU-150, WW Loc. IN51NU) until 7 August 2011 as CS2W. QSL via HB9CRV. Due to the fact, that there is no accommodation on the island, the operators will sail every morning to INSUA island and return every evening to the main land. A stay overnight may only happen in case of good propagation. The CS2W activity is valid for the Portuguese awards DIP MI-001, DCFP F-006, DMP 1602, DDFP CMN-12, DFP FM-101 and CVC 046 & 047 and ARLHS POR-028, WLOTA LH-2869. QRV on 40m-6m CW, SSB.

** Announcment of HG50MHZ Special Event Station **

At midnight on August 14 2011 the Budapest television broadcasting transmitter will cease operation on VHF channel one. The termination of Broadcasting Band I transmissions after 54 years of television broadcasting will be followed by four days of ham radio activity organized by Haros Radio Club, using the antenna system of the former TV transmitter. This activity at the special event station HG50MHZ is a memorial event celebrating more than half a centuryï¿½s operation and at the same time publicizes the closure of a broadcasting transmitter which is well known to the six metre amateur radio community. The webpage of HG50MHZ http://www.hg50mhz.tv summarizes the 54 year history of Budapest channel one television broadcasting, the 6 years of HA activities on the six metre (50MHz) band and additionally provides details of the special event station. Channel one television broadcasts from Budapest are well known by radio amateurs all over the world and have in the past been widely used as a propagation indicator. This period of amateur radio activity will allow two way

communications facilitating actual amateur radio contacts utilizing
the antenna system of the television transmitter. The web-site
http://www.hg50mhz.tv will also broadcast a video and audio stream
in real-time from the stationï¿½s operating position, thus everybody
will be able to listen to how his or her transmission can be copied
at the former television station. The chat and guestbook pages of
the site also provide another means of communications amongst the
interested amateur radio community. The location of the station is
at the Szechenyi-hill broadcast station of Antenna Hungaria (JN97II)
Station operators are either employees of Antenna Hungaria who are
licensed radio amateurs or are members of the Haros Radio Club.
The planned modes of operation are: CW, SSB, FM and digital. Besides
being available for normal tropospheric and sporadic E modes of
propagation EME earth-moon-earth experiments are also planned at
HG50MHZ. SOURCE: ha5pt, Tamas, via Magic Band EME

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next wednesday 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

==> + PROPAGATION NEWS: SOLAR EXPLOSIONS COULD IMPACT EARTH

The National Oceanic and Atmospheric Administration is keeping an
eye on a set of solar storms and explosions that could disrupt
satellite, telecommunications and electric equipment here on Earth in
the next few days. While activity had reportedly returned to somewhat
normal levels when solar winds calmed the morning of Monday, August 8,
another explosion at 0805 UTC on Tuesday, August 9 was three times
larger than the February 15 flare, which, until now, was the most
significant flare of Solar Cycle 24.
```

Given the location of the activity, any coronal mass ejection (CMEs) from the flare would likely be directed away from Earth. As such, the Space Weather Prediction Center is not forecasting "significant Geomagnetic Storm activity," and the most recent storms should not affect radio amateurs. But when a CME does hit the Earth's atmosphere -- approximately 72 hours after exploding on the Sun -- the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF) -- the highest frequency by which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible. Read more here <http://www.arrl.org/news/solar-explosions-could-impact-earth>.

==> + FCC NEWS: VANITY CALL SIGN FEE TO GO UP IN SEPTEMBER

On August 10, the FCC announced via a Final Rule in the Federal Register that the cost of an Amateur Radio vanity call sign will increase 90 cents, from to $13.30 to $14.20. The new fees take effect 30 days after publication, making September 9, 2011, the first day the new fee is in effect. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal five years ago. The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. Read more here <http://www.arrl.org/news/vanity-call-sign-fee-to-go-up-in-september>.

==> + ARRL VEC TEAM ATTENDS NATIONAL VEC CONFERENCE

Representatives of 12 of the nation's 14 Volunteer Examiner Coordinators (VECs) -- either in person or via proxy -- met July 29 in Gettysburg, Pennsylvania for the 26th Annual National Conference of Volunteer Examiner Coordinators (NCVEC) Conference. NCVEC Chairman Larry Pollock, NB5X presided over the gathering that offered an opportunity for representatives of the VECs to discuss issues facing the volunteer examination program and to meet face-to-face with FCC staff members. The ARRL's delegation to the conference included ARRL VEC Manager Maria Somma, AB1FM, and Assistant VEC Manager Perry Green, WY1O, as well as ARRL Regulatory Information Manager Dan Henderson, N1ND. Read more here <http://www.arrl.org/news/arrl-vec-team-attends-national-vec-conference>.

==> + ON THE AIR: ATTENTION RTTY ROOKIES -- THE 2011 RTTY ROOKIE ROUNDUP IS HERE!

For the first time since the Rookie Roundup <http://www.arrl.org/rookie-roundup> came into being last year, the digital modes will get their day in the Sun: On August 21, the Rookie Roundup meets RTTY! "Created to give the budding operator a place to

learn about contesting at an easier pace, the Rookie Roundup is a six hour contest open to all amateurs who have been licensed for three years or fewer," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "If you were licensed in 2009, 2010 or 2011, you qualify as a Rookie. The Rookie Roundup is run three times per year: SSB in April, RTTY in August and CW in December." But "Old Timers" have a place in the Rookie Roundup, too. "Elmering is a critical component of the Rookie Roundup, and OTs are encouraged to not only get on and work the Rookies, but to host a Rookie and assist them with learning how to participate," Kutzko said. "Rookies can work anybody, but non-Rookies can only work Rookies." Read more here <http://www.arrl.org/news/attention-rtty-rookies-the-2011-rtty-rookie-roundup-is-here>.

==> + ON THE AIR: GO HIGH FOR THE 2011 ARRL 10 GHZ AND UP CONTEST

If you enjoy the being on the cutting edge of Amateur Radio's technical side, take a look at the microwave bands. The 2011 ARRL 10 GHz and Up Contest gives you the perfect chance to explore this portion of the radio spectrum. This contest boasts two weekends of activity: August 20-21 and again on September 17-18. The contest period for both weekends starts at 6 AM (local time) on Saturday and runs until midnight (local time) on Sunday. Points are awarded based on the distance of a QSO, and operating from several locations during the contest period is not only allowed, it's encouraged! "Most amateurs use SSB, although there is some CW, as well," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "Power levels are relatively low compared to HF; most stations run several hundred milliwatts. A station running a few watts is considered a 'Big Gun.' Antennas are usually dishes, like those used for receiving satellite TV." Read more here <http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>.

==> SECOND CENTURY CAMPAIGN COMMITTEE MEETS IN NEWINGTON

The year 2014 marks the end of the first 100 years of the ARRL. In these 100 years, amateurs have seen spark gap give way to CW, FM and AM, SSB and the numerous digital modes, with the ARRL leading the way. In celebration of the beginning of a second century of Amateur Radio, the ARRL has formed the Second Century Campaign Committee. This group -- led by David W. Brandenburg, K5RQ, of Osprey, Florida -- had their first formal meeting in Newington on Thursday, August 11.

The Second Century Campaign Committee will develop and lead a multi-million dollar campaign, focused on building the ARRL Endowment to further secure resources to fund the League's commitment to the future. The ARRL Second Century Campaign will open the path to meaningful involvement in Amateur Radio by new generations, providing opportunities for educational enrichment, community service and personal achievement through the exploration and use of the magic of radio communication.

Members of the Second Century Campaign Committee are: Mike Valentine, W8MM, of Cincinnati, Ohio; Bob Allphin, K4UEE, of Marietta, Georgia; Frank Donovan, W3LPL, of Glenwood, Maryland; Ken Byers, K4TEA, of Atlanta, Georgia; L. Dennis Shapiro, W1UF, of Chestnut Hill, Massachusetts, and Glenn Johnson, W0GJ, of Bemidji, Minnesota. ARRL President Kay Craigie, N3KN, and Vice President Rick Roderick, K5UR, are also on the Second Century Campaign Committee, as are ARRL Chief Executive Officer David Sumner, K1ZZ, Chief Financial Officer Barry Shelley, N1VXY, and Chief Development Officer Mary Hobart, K1MMH. All members of the committee serve in a volunteer capacity.

==> GENERAL CLASS Q&A NOW AVAILABLE FOR KINDLE

The fourth edition of ARRL's General Q&A
<http://www.amazon.com/ARRLs-General-Q-A-ebook/dp/B005F0GPYU/ref=sr_1_1?s=digital-text&ie=UTF8&qid=1312818226&sr=1-1>
is now available from Amazon.com for the Kindle. This e-book is your authoritative guide to every question in the General (Element 3) question pool -- everything you need to pass your General class license exam. When you use ARRL's General Q&A, you can be sure that you are using the best way to review for the 35 question exam. The e-book includes every question -- and answer -- in the General class question pool, utilizing a multiple-choice format similar to the one on the actual exam. The current General class question pool is valid through June 30, 2015.

Kindle is shaped much like a book, with a paper-like screen that displays text and pictures. You do not need a Kindle to download and purchase the General Q&A: those who have the Kindle application installed on their Apple <http://www.apple.com/> iPhone <http://www.apple.com/iphone/> iPod touch <http://www.apple.com/ipodtouch/>, Android smartphone -- or even on their computer -- can download the book for use on these devices. Each version of the Q&A lets you review questions and answers from that element's entire question pool so you can pass your exam. The Tech Q&A
<http://www.amazon.com/ARRLs-Tech-Q-5th-ebook/dp/B003NE6D10/ref=sr_1_2?s=digital-text&ie=UTF8&qid=1312818226&sr=1-2>,
General Q&A
<http://www.amazon.com/ARRLs-General-Q-A-ebook/dp/B005F0GPYU/ref=sr_1_1?s=digital-text&ie=UTF8&qid=1312818226&sr=1-1>
and Extra Q&A
<http://www.amazon.com/ARRLs-Extra-Q-A-ebook/dp/B0032Z74TU/ref=sr_1_3?s=digital-text&ie=UTF8&qid=1312818226&sr=1-3>
are available from Amazon.com for $9.99 each. The soft cover version of the General Q&A is also available
<http://www.arrl.org/shop/ARRL-s-General-Q-and-A-4th-Edition/> for $17.95. Upgrade and enjoy more frequency privileges today.

==> AMATEUR RADIO TECHNOLOGY: 30TH ANNUAL ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE SET FOR SEPTEMBER

The Four Points Sheraton Hotel at Baltimore Washington International Airport is home base for the 30th annual ARRL/TAPR Digital

Communications Conference, September 16-18. This conference is an international forum for radio amateurs to meet and publish their work, as well as present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results and practical applications. Read more here <http://www.arrl.org/news/30th-annual-arrl-tapr-digital-communications-conference>.

==> + MALPELO DXPEDITION TO GET UNDERWAY IN JANUARY 2012

The HK0NA DXpedition to Malpelo -- an island located approximately 235 miles from Colombia's Pacific coast -- is scheduled for January 22-February 6, 2012. Organized by the DX Radio Amateur Club out of Colombia, the DXpedition boasts an international team of 16 operators from eight countries. Malpelo is currently #12 on DX Magazine's 100 Most Needed Countries Survey. According to DXpedition leader Jorge Prieto, HK1R, the HK0NA Team will depart from Buenaventura, Colombia on January 22 for the boat trip to Malpelo. Depending on sea and landing conditions, they expect to be on the air within 36 hours after landing on Malpelo. They will be using SSB, CW and Digital modes on 160-6 meters. Operations are planned on 160-6 meters on CW, SSB and Digital modes, including EME. Read more here <http://www.arrl.org/news/malpelo-dxpedition-to-get-underway-in-january-2012>.

==> SOLAR UPDATE

Tad "The Sun is zooming in <http://www.youtube.com/watch?v=FiVvA9YQpiI>" Cook, K7RA, reports: The average daily sunspot numbers declined more than 24 points to 75.1 this week, while the average daily solar flux was down more than 12 points to 104.3. We saw solar flares recently, with a substantial geomagnetic upset on Friday and Saturday -- August 5-6 -- when the planetary A index was 49 and 31. The largest solar flare of the current sunspot cycle <http://www.arrl.org/news/solar-explosions-could-impact-earth>, an X7 flare, occurred at 0805 UTC on August 9, emerging from sunspot group 1263. This does not appear to be Earth-directed. The latest forecast from NOAA has solar flux at 85 through August 17, then 90, 98, 98 and 100 on August 18-21, and then 105 on August 22-30. The planetary A index is expected to be 7 on August 11, 5 on August 12-15, then 15, 18, 10, 8, 5, 12 and 8 on August 16-22, 5 on August 23-25, and 15, 10, 8, 5 and 5 on August 26-30. Look for more information on the ARRL website on Friday, August 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Clash's London Calling <http://en.wikipedia.org/wiki/London_Calling_%28song%29>.

==> + RTTY DXCC AWARD NOW KNOWN AS DIGITAL DXCC AWARD

At the 2011 Second Meeting of the ARRL Board of Directors
<http://www.arrl.org/news/arrl-board-of-directors-gathers-in-connecticut-for-2011-second-meeting>,
the Board voted to change the name of the RTTY DXCC Award to the Digital DXCC Award. In changing the name, the Board took into account that Amateur Radio technology has advanced to include many variations of digital communications. On July 25, the word "Digital" began replacing "RTTY on these DXCC certificates.

==> + FORMER "WORLD ABOVE 50 MHZ" CONDUCTOR RECEIVES CSVHFS'S PRESIDENT'S AWARD

At the recent Central States VHF Society (CSVHFS <http://www.csvhfs.org/>) Convention -- held July 29-30 in Irving, Texas -- CSVHFS President Chuck Clark, AF8Z, presented the President's Award to Gene Zimmerman W3ZZ <http://www.arrl.org/news/gene-zimmerman-w3zz-to-retire-from-the-world-above-50-mhz>.
"I truly appreciate this award," Zimmerman told the ARRL. "Central States is one of the best known VHF organizations in the United States, and as a former CSVHFS Director, I know what an honor all CSVHFS awards are." The award was given in recognition of Zimmerman's work on E-skip propagation and being the VHF Editor and conductor of QST's "The World Above 50 MHz" column for the past nine years.

==> THIS WEEK ON THE RADIO

This week:

- August 12 -- NCCC Sprint Ladder
- August 13-14 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 14 -- SKCC Weekend Sprint

Next week:

- August 19 -- NCCC Sprint Ladder
- August 20 -- Feld Hell Sprint
- August 20-21 -- ARRL 10 GHz and Up Contest (local time) <http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>; SARTG WW RTTY Contest; North American QSO Party (SSB); Russian District Award Contest; CWOps CW Open
- August 21 -- ARRL Rookie Roundup (RTTY) <http://www.arrl.org/news/attention-rtty-rookies-the-2011-rtty-rookie-roundup-is-here>; SARL Digital Contest
- August 22 -- Run for the Bacon QRP Contest
- August 24 --
- August 24-25 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out

the ARRL Special Event Stations Web page

WIANEWS WEEK COMMENCING AUGUST 14 2011.

All go for television hook-up
VK6APH receives Award
Only days left to register for the ILLW

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING AUGUST 14 2011.

Remembrance Day 2011
Author VK4OD Peter Harding WIA Contest Manager

Each year since the conclusion of World War Two the WIA pays homage to those
Australian Radio Amateurs who paid the Supreme Sacrifice during those
tumultuous years.

We do that in the form of the Remembrance Day Contest, This year August 13-14.

Prior to the commencement of the RD contest at 0800UTC Saturday (6pm AEST)
An opening address is given by Australian Dignitaries and the WIA.

This address , 2011, runs for some 39 minutes prior to the 6pm contest start.

It is heard on the vast WIA News Network, check out the weekly news link on
this wia.org.au site under "where to hear us".

Right now the RD Contest Opening Speech file is available for download from this site

http://www.wia.org.au/members/contests/rdcontest/documents/2011_rd_opening_64.mp3

http://www.wia.org.au/members/contests/rdcontest/documents/2011_rd_opening_128.mp3

It is also on the WIAQ backup site:

http://wiaq.com/ftp/index.htm

The whole file runs for 39Min 26Secs

PLEASE be sure to start running the whole file at EXACTLY 07:20.34 UTC, in order to finish at 08:00 precisely.

73 and "Good Luck In The Contest", Peter.
vk4od@wia.org.au

THE sun has unleashed the largest solar flare in five years, this as it burst forth on the far side of the sun so little impact to satellites and communication systems. However the USA's Space Weather Prediction Centre says there were reports of brief short-wave radio disruptions in our part of the world, mainly Asia.

Scientists estimate there will be more such solar eruptions over the next 3 to 5 years.

All go for television hook-up

The world's first DATV QSO Party will be on Melbourne's VK3RTV repeater later this month.

The QSO Party has been organised by Peter Cossins VK3BFG as control station and will include the Amateur Television Network of California and the British Amateur Television Club (BATC).

Peter VK3BFG said that 8pm (AEST) Friday the 26th is quite good timing to kick off the two-day event as part of the Amateur Radio Victoria celebration of its centenary.

Current arrangement includes VK7TW (Hobart), VK7EM (Penguin), VK3CE (Bendigo) and VK4XRL (Brisbane). Their video will come via Skype which will then be put on DVB-S to VK3RTV2.

Melbourne stations will respond via VK3RTV1. VK3BCU is in Thailand and expects also to be Skype-linked.

On Saturday the 27th of August at 1pm (AEST) there be a link up with Don Hill KE6BXT in California and also connected with the W6ATN ATV Repeater. As on Friday, VK3BFG will take the Skype feed through to VK3RTV2.

Anyone anywhere in the world can watch the proceedings via the BATC streaming website (AEST is plus 10 hours UTC).

(Jim Linton VK3PC)

Only days left to register for the ILLW

On Wednesday came the 400th entry in the International Lighthouse and Lightship Weekend from Bill Tinnion M0DXT at the Maryport old lighthouse, in Cumbria to the northwest of England.

Octagonal cast iron shape makes it the first of that construction type in England and possibly the world's oldest using the technique.

As far as totals go the USA has taken the lead on 65, followed by Australia on 63. The pair is followed by Germany, England and the Netherlands. Then Sweden, Scotland, Canada, South Africa, Finland, Portugal, and New Zealand. In all up to 50 countries have entered.

Among the Australian entries is Evans Head Light by Graeme Battistuzzi, who does so in the memory of former operator Bob Peterson VK2AAG a recent silent key.

The Oxley Region Radio Club VI40BOR celebrates its 40 years at Tacking Point Lighthouse. Ipswich and District Radio Club signs VI4FI from Sandy Cape on Fraser Island, and VK3WI Amateur Radio Victoria Centenary bonus point station is at Williamstown.

If you're looking for first time activated lighthouses in Australia, try for VK4 and Point Cartwright, Bustard Head and Lady Elliot Island, to VK5 there's Corny Point and VK6 we have Casurina.

In VK2 or shall we say "off the coast of", the Hellenic Amateur Radio Association of Australia, will operate from 19-22nd of August from Montague Island OC-223 for the Light house weekend with 15 members operating from 3 stations using the club call of VK2CL

Catherine Stokes, VK2FEME, Secretary - Hellenic Amateur Radio Association of Australia Inc. says the team expects all the equipment to arrive back in Sydney this weekend from Lord Howe Island after their major DX'Pedition where HARAOA made some 17000 qso and 140000 hits to their website www.vk9hr.com

Tommy VK2IR club president & team leader reports all went to plan and HARAOA again continues to set the standard with its world wide DX'Peditions. The logs for VK9HR were uploaded daily as were the LOTW onto their amazing website full of stats and they are printing 8 sided full colour qsl cards.

Check out at the website illw.net which includes an online entry form and the guidelines for this fun 48-hour event being held next weekend.

VK6APH receives Award

Bob Bristow - VK6POP Reports.

On Sunday the 7th of August at the NCRG Hamfest, Bob Bristow presented to Phil Harman VK6APH the Ron Wilkinson Award certificate.

The award was announced at the recent WIA AGM in Darwin. Phil agreed to be presented with the award at Hamfest. Phil received the award in recognition of his contribution to Amateur radio, especially in digital techniques and for his contributions to Amateur radio literature.

Phil said he was honoured to receive the award.

The presentation of the certificate was done live, on-air, during the NewsWest broadcast.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been reflecting.

The Remembrance Day Contest is the quintessential amateur radio activity honouring all those who served and those who died in the service of our country.
We celebrate ANZAC Day as well as Remembrance Day, in November but it is the special recognition of those whose interest in peace and occupation in war was radio and electronics.

At times we lose sight of the those other people who fought in different ways. I met one amateur who joined the merchant navy and was rescued 3 times from sunken ships. We had the great army of civilians designing, refining and building equipment for the military forces - much of this to become radio surplus in the early years of peace time.

We have heard the story of Florence Mackenzie, Mrs Mackenzie as she was known to her students learning Morse Code to aid the war effort. But there were hundreds of civilians who passed through similar doors to wear a uniform in aiding the fighting forces. The efforts of the YL sorority was shown on a new program on ABC TV just before ANZAC Day. "Girl's Own War Stories" recognises the efforts of the women who became nurses, auxiliaries to the armed forces, populated the land army and maintained Red Cross services as well as all war efforts.

In remembering let us include not only the military but the broad range of our community who gave in times of peril so that we can enjoy today.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
http://ipswichdistrictradioclub.webnode.com/
email - vk4wip@wia.org.au

This is Allan VK4FABR with news from the Ipswich and District Radio Club.

Sandy Cape Lighthouse will be home to four club members for the International Lighthouse and Lightship weekend, next weekend August 20 and 21.

The 4WD permit for travel on Fraser Island has now been obtained, and also the special callsign VI4FI.

A TH3 Junior Tribander will be used for 10, 15 and 20 on a 10m Clark Mast and the Butternut HF6V for the lower bands in addition to a Multi-band dipole in an Inverted V configuration.

The main radio will be a Yaesu FTDX-5000 with back up rigs consisting of an Icom IC-7600 & a Kenwood TS-480HX.

Power will be supplied 24 hours a day via a RAPS Solar System so on air time will be around the clock as much as possible.

A special QSL Card to celebrate this activation will be designed by UX5UO QSL Print Services.

The DXpedition to Fraser Island is supported by club sponsors Ipswich City Council and VK4ICE Communications.

All updates via the website at www.sandycape2011.com and LIVE status updates via Twitter @VI4FI which links directly with the VK4WIP Facebook page at www.facebook.com/vk4wip as the Twitter updates are posted

The Ipswich Sandy Cape team of Paul VK4FPDW, Derek VK4MIA, Mike VK4QS and Graham VK4FGCC are looking forward to working you on the bands.

I'm Allan VK4FABR.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

The club's portable station, VK4IZ/p, in the recent VHF/UHF Winter Field-day was awarded 2nd place in the Multi-operator 8-hour section of the contest having scored 2000 points. Kevin VK4UH said that it was a big effort but well worth the effort. David, VK4DC and Peter, VK4EA have been busy building uhf transceivers to be ready for the next field day contest and possible moon bounce activities.

The club has its regular technical talks on the third Monday night of the month however this month there are 2 talks. Next Monday night James, VK4TJF will give a presentation on RFI and the following week, Kerry, VK4FKGG will give a presentation on fibre optics. This will occur as the equipment for the fibre optics presentation was not available.

The planned working bee to do the gutter replacement to the clubhouse has now been deferred to the month of October due to other activities.

As this weekend is the Remembrance Day Contest, VK4IZ will be active from the clubhouse this weekend. So if you hear our club's competition callsign, give us a call for those very important points.

A number of club members have expressed a desire to undertake a morse code course. Whilst the format and times of the course have not yet been determined as yet, further details will be forth coming. Stewart, VK4TSB has been practising by himself and wants other with limited morse speed, up to 10 words a minute, to assist him in his learning.

A big reminder that Jota is coming up in October and that about 30 members will be required to assist during the weekend. This is a major function of the club and showcases our hobby to the scouting movement. Club members will be assisting with kit assembly and other radio related activities during the weekend.

Mark VK4DGG has found a website that will produce a azimuth map from any place on Earth using a couple of different location methods. The site is http://ns6t.net/azimuth/azimuth.html

It will construct a map in about in about 20 seconds.

So now it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

ROCKHAMPTON
IRLP NODE 6973
e-mail vk4jym@wia.org.au
Secretary Jim 04 2948 4734
http://www.radarclub.org.au

Greetings from The Rockhampton and District Amateur Radio Club, The RADAR CLUB.

With the International Lighthouse and Lightship Weekend being held next weekend, two boat loads of keen radio operators - and fishermen--- will leave Yeppoon on Friday for Cape Capricorn Lighthouse on the north east corner of Curtis Island to activate the site under the club's callsign, VK4WIR.

This is the third year the club has participated and past experience has operators concentrating on quality rather than quantity of gear due to carrying capacity. Importance this year focuses on filters and antennas, with some decent long wires and a three element yagi on the gear list.

Operations are expected to be mainly on 20, 40 and 80 metres.

If you wish to arrange a contact you may also contact us during the weekend via the RADAR club's repeater on 146.700MHZ offset, IRLP, node 6973.

For further details and easy access, check out VK4WIR on QRZ.com

I'm Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'Day again from the Atherton Tablelands this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

Once again TREC members are out and about on the Atherton Tablelands providing check point manning and communications for the Far North Equestrian Riders. This event is an overnight one to coincide with the full moon. John, VK4TL, who normally coordinates things between TREC and the horsy mob is unavailable due to illness but TREC President Stu, VK4SDD, has stepped up and has got things running smoothly. The weather is being kind with temperatures slightly warmer than the 0 degree experienced on the last ride.

The next TREC meeting will be on Saturday 20th August at the clubrooms in Atherton. Visitors are always welcome so if you're in the area please call in and say G'Day. Location of the clubrooms is on the WIA website under clubs.

Well that's your lot for this week.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to the WIA news. Travel Well!

Central Highlands ARC AGM Weekend - Friday 30 Sept to Sun 2 Oct

The famous and popular Central Highlands Amateur Radio Club AGM weekend at Camp Fairbairn near Emerald will be on from 3-30pm Friday 30th September to Midday Sunday 2nd October 2011.

Thanks to Gavin and the Townsville Amateur Radio Club we learn the basic costs are the same as last year, ie $13.20 per person per night or $6.60 for day visitors.

Caravaners please book into Lake Maraboon Holiday Village, as soon as possible.

CHARC Secretary Gordon VK4KAL needs to know from you if you are attending, so can plan catering for the acclaimed Saturday Night Gastronomic Feed Up, arrange the troops to get enough chairs and treasure together for the coveted AGM Monster Auction, divvy up the available beds available in the on site dormitory and ensure there is enough grub for the Sunday Recovery Breakfast.

All you need to do is lift a digit or two and let Gordon know before the booking deadline of 25th September of your intentions to attend.

ILLW - NW Microwave Activation

On the weekend of 21 and 22 August Rex VK7MO will be joining Eric VK7NFI and Wayne VK7NET for the International Lighthouse Weekend operating from Table Cape Lighthouse in QE29 North West Tasmania.

The top of the lighthouse gives an excellent take-off all across Bass Strait.

Rex will operate on 144, 432, 1296 and 10368 both SSB and digital on XXX.225. Rex will also try meteor scatter during the normal activity sessions on 144.230.

With this fast approaching weekend for the International Lighthouse and Lightship brigade teams are planning to activate several lighthouses across VK7, Devonport, Winston VK7EM, and Scott VK7NWT, are preparing to activate Mersey Bluff lighthouse.

Eric VK7NFI, and Wayne VK7NET, are doing the usual at Wynyard with the Table Cape lighthouse. After last years event, the Wynyard council offered to make available the lighthouse structure which is now open for inspection tours. There will be much opportunity to improve the antenna locations as the lighthouse is in the order of 20 m high.

Dion VK7DB will be doing a first time activation of the Sandy Cape lighthouse on the rugged west coast. Getting to this remote location will be an adventure in itself as the only access is via about 20km of beach and tracks heading south from Temma.

The event will be run on the 20th and 21st of August. Please drop in and give some support to these operators doing their bit to promote Amateur Radio and keeping the airwaves active. They will look forward to both personal visits and on air contacts.

DISCUSSION POINT

What use is an f-call?

When I was learning to fly an aeroplane my instructor at the time told me that every pilot has to do something called "Going Solo", that's flying on your own for the first time. It's not the end of instruction, it's one in the path towards becoming a pilot. He also told me that this was true for pilots flying Cessna's, Boeing 747's and Space-Shuttles.

The same is true for your f-call. The time you've spent learning how Amateur Radio works, where things are written down, basic etiquette and procedure are all designed to prepare you for the wider world of Amateur Radio. Your f-call license is the first step in the process of mastering this technical hobby.

Think of your f-call as the keys to the front door. It's what allows you to participate at what ever level you'd like to. You can of course go on to get extra licenses, just like in flying, going solo is only step one on the way to the moon. The joy is in the process of discovering your niche in the path along the way.

So, your f-call is but one aspect of your hobby.

On the air last week, an amateur had purchased a radio which turned out to be not such a great bargain. Through trial and error you learn what this hobby is all about. Talking to like-minded people will help you find out what the tips and traps are.

I realise that there are more than a few listeners who either haven't got their kit ready, or if they do, are afraid to talk and use it. Over the coming months a few of us are going to get together to come up with a way that you can participate on the air without being afraid to make mistakes.

And I should also say that you should find ways of participating in events as they happen. The people turning up at those events come from all different walks of life, but they all have in common that they have an interest in this hobby of amateur radio.

I'm Onno Benschop - vk6flab

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

911 Special Event Station

Look for special event station N3U/Flt93 (N3U/United Flight 93) to be activated once again between September 8-15th, to remind 'Amateur Radio operators world-wide' of the tragic events that happened near 'Shanksville, New York City and Washington DC on September 11, 2001.'

This year's activity will take place during the 10th anniversary and the
Memorial Dedication for the victims of United Flight 93.

QSL N3U/Flt 93 via W3PN, by the Bureau or direct (Please include SASE and
enough return postage. If additional postage is needed... your QSL will be
returned via the BUREAU).

For more details, QRZ.com

Another call will be KC2RA, New York City's Kings County Repeater Association
who have announced they will be a part of the 911 events commemorative events
to be held at the historic Conference House on Staten Island.
The group will operate under the clubs KC2RA call sign to honour those who lost
their lives on September 11th, 2001.

>From Nine Eleven to Nine One One

The California Highway Patrol says that while there was never any emergency,
that didn't stop a Sacramento woman from allegedly making 2,457 calls to the
states 911 emergency response number since June.

According to one CHP Officer, she was arrested after allegedly placing more
than 130 non-emergency calls to 911 dispatchers on one Wednesday morning alone.

She actually used three different cell phones to make the 911 calls.

==========

NEWS FROM ARNEWSLINE USA

REMEMBERING THE FIRST DECADE SINCE 911

This coming September 11th will be the 10th anniversary of the al-Queda backed
terrorist attacks of September 11th of 2001. These attacks felled the two
World Trade Centre tower buildings in New York City and damaged the Pentagon
when radical Islamic extremists high-jacked four United States flag carrier
jetliners and crashed them into the two structures. Over 3000 American
citizens were killed as well as a number of foreign nationals who worked
in the twin towers buildings.

Over the years there have been several ham radio operations in remembrance
of those whose lives were lost in this senseless and wanton carnage.
With this being the first decade anniversary of the September 11th, 2001
tragedy, we here at the Amateur Radio Newsline are trying to compile a list
of radio clubs and individual hams who are planning any form of amateur
radio memorial operation to honour those whose lives were lost that day.
If you have plans to commemorate 911, please drop us an e-mail to Newsline
at ARNewsline dot org and let us know all of the details. We in turn will
list as many as we can on our website at www.arnewsline.org.

Those whose lives were lost on 911 deserve to be remembered. We will do our
part by providing web-space to list ham radio commemorative activities.
It's up to you to do the rest.

==========

WEIRD AND WONDERFUL

TEN COMMANDMENTS OF ELECTRONICS

1. Beware of the lighting that lurks in an undischarged capacitor lest it cause three to be bounced upon thy backside in a most ungentle manly manner.

2. Cause thou the switch that supplies large quantities juice to be opened and thus tagged, so thy days may be long in the world.

3. Prove to thy self that all circuits that radiateth, and upon which thou worketh, are grounded lest they lift thee to high frequency potential and cause thee to radiate.

4. Take care thou useth the proper method when thou taketh the measure of high voltage circuits so that thou doth not incinerate both thee and the meter, for verily, though hast no account number and can be easily replaced, the meter doth have one and as a consequence bringeth much woe upon the supply department.

5. Tarry not amongst those who engage in intentional shocks, for the yare surely non-believers and not long for this world.

6. Take care thou tampereth not with interlocks and safety devices, for this will incur the wrath of thy seniors and bring the fury of the safety officer down upon thy head and shoulder.

7. Work not upon energised equipment, for if thou doeth, thy buddies will surely be buying beer without thee, and the space at the bar will be filled by another.

8. Verily I say unto thee, NEVER service high voltage equipment alone, for electric cooking is a slothful process, and thou might sizzle for hours on end before thy maker sees fit to end thy misery and drag thee into his fold.

9. Trifle not with radioactive equipment les thou commence to glow in the dark like unto a lightning bug.

10. Commit thee to memory the words of the prophets, which are written in instruction books, which giveth thou the straight dope, and which consoleth thee, and thou canst not make mistakes.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Historic RAAF Station active for RD Contest this weekend.

RAAF Commemorative Station VK4KG will be operating portable for this years RD Contest August 13th to 14th somewhere in North Queensland at a significant historic military site and would appreciate any support on-air.

EA 3 PT will be active /EA6 on Menorca Island until August 21.
This operation will be holiday style meaning that he will be on the air as he feels the need or as time permits.
Bands announced are 40 through 10 using SSB only.
QSL via Logbook of the World or by paper QSL to his home callsign EA 8 PT.

KF 8 UN will be in Peru until August 16th. He will be active /OA4 and says that he plans to work 20 meters. He too is operating holiday style.
QSL via his home callsign KF 8 UN.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

IEEE 802.22 to use VHF and UHF TV frequencies

The IEEE has recently released the new 802.22 standard for Wireless Regional Area Network (WRAN) using white spaces in the TV frequency spectrum.

The IEEE 802.22 standard is designed to provide Rural Broadband Wireless Access using Cognitive Radio Technology.

It uses VHF and UHF TV channels between 54 and 862 MHz and is claimed to have a theoretical range of up to 33 km. It is envisaged that subscribers would use directional antennas on the roof.

IEEE 802.22 can deliver a data rate of up to 19 Mbps in a 6 MHz wide USA TV channel. Channel Bonding, using more than one channel for Tx / Rx, can provide greater bandwidth. A single channel might be able to support 12 simultaneous users in the coverage area.

Read The Register article - Rural white space wireless standard signed off

www.theregister.co.uk/2011/08/01/rural_wireless_standard/

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

A Radio Amateur in Northern California, inadvertently pushed a keyboard up to his keyer, which produced a stream of dots at 25 WPM for well over a week.

NZART InfoLine says an international effort from Region 3 bringing in Region 1 via the Intruder watch and various posts to DX Clusters and Yahoo groups eventually resulted in the Radio Amateur being contacted via the ARRL in the USA.

Signal reports were received from Europe, USA, Africa and Australia and New Zealand (who heard it first and raised the alarm).

The resultant HF DF hunt resulted in a solid triangulation on the USA states from Radio Amateurs from all over the world.

Finally, we can only imagine a slightly embarrassed Radio Amateur within the US was contacted and the stream nicknamed "Dotty" ceased yesterday.

Excellent collaboration throughout the Intruder watch organisations across Europe, USA and New Zealand, which could only have occurred with the support of the Radio Amateurs who participated in the hunt, providing signal and

reports. For a week the 18085.5 signal was an excellent HF beacon for propagation.

Another exciting tale from the NZART Monitoring Service - who says monitoring is boring?

(John ZL1GWE nzart info line)

BATC OFFERS FREE STREAMING SERVICE TO HAM RADIO EVENTS

If you want to webcast a ham radio happening to the world, the British Amateur Television Club is ready and eager to supply the assistance that you might need.

Amateur Radio Newsline say "According to an e-mail from Ian Abel, G3ZHI, the club has a high capacity streaming server available to any individual radio amateur or ham radio group that would like to use it for webcasting a ham radio event.

Nor is live netcasting the only aspect of this free video streaming operation. The BATC site is also a video repository for those who want to have their video material made available on-line:

It seems very easy to webcast and only requires the Adobe video encoder which is a free download and that use of the British Amateur Television Club streaming service is also free.

If you are interested in making use of this service please contact Ian by e-mail

g3zhi@hotmail.com

More information and the video archive is on-line at www dot batc dot tv

Net is held each Mondays on 3.570 MHz, commencing at 1030 UTC.
(1000utc during daylight saving)

geencee@picknowl.com.au

Hello, I'm Tina VK5TMC organiser of the 2012 YL International Meet in Adelaide, Australia, from 3rd May to 9th May 2012 with an optional 9 day Ghan luxury train and bus adventure.

We currently have 50 YLs and OMs registered and at least another 25 who have expressed interest in attending our Meet. Countries represented so far besides Australia, are Norway, Germany, UK, Japan, New Zealand, USA, and Canada.

The web page has itineraries, a list of those hoping to attend, and lots of information including final prices. You can check out everything at

www.ylinternational2012.com

Or just search for YL International 2012.

We are trying regular skeds on Echolink at the conference station ALARA on the second Tuesday of the month at 0500UTC, 1100UTC and 2200UTC which hopefully will allow most people to check in at a convenient time. Join us for a chat or to get your questions answered. We would be happy just to meet you.

If no one is there after 10 minutes we probably won't be there by a quarter past the hour. You contact me directly at VK5TMC@bigpond.com (all in lower case.)

Registration is now open waiting for your name to be added.

I hope you are all working on your plans for the meet and looking forward to it as much as I am

REWIND

HITCHHIKERS GUIDE TO DXING RADIO PARODY RE-RELEASED

And finally this week, it's been thirty years since former Radio Netherlands Media Network host Jonathan Marks, G8WGN, wrote a parody on international radio broadcasting. One based on his favourite radio series at the time, the Hitch-Hikers Guide to the Galaxy. He called it the Hitchhikers Guide To DX'ing and it was an overwhelming hit when it first aired back in 1980.

As Marks writes in his on-line blog, there seemed to be so much to make fun of at the time because of the boring propaganda at the height of the Cold War. According to Marks, several segments of this classic series are now available for download from the Media Network Vintage Vault at jonathanmarks.libsyn.com. The rest says G8WGN, will follow shortly.

Jonathan also invites everyone to browse through other material stored at the Media Network Vintage Vault and he encourages you to share your stories as well.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Amateur Radio Newsline(tm) Report 1774 - August 12 2011

Amateur Radio Newsline report number 1774 with a release date of
Friday, August 12th 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Only a short time left to comment on a
proposal to grant almost any ham with an expired license full credit
for past examinations; Canadian hams may get a permanent 60 meter
allocation; a possible solution to coordinarting digital voice
repeaters in Texas and the Sun emits a giant X-Class flare. Find out
what this means to your on the air operations on Amateur Radio
Newsline(tm) report number 1774 coming your way right now.

RESTRUCTURING: COMMENT PERIOD ON ANCHORAGE VEC LICENSING WAIVER
REQUEST CLOSES JUNE 19

There's just a bit more than a week left to voice your opinion to the
FCC on a July 6th request by the Anchorage Volunteer Examiner
Coordinator. One that would permit individuals whose amateur radio
operator licenses have expired and are beyond the grace period for
renewal to receive credit for examination elements previously passed.
Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

Section 97.505(a) of the FCC Amateur service requires that the
administering VE's give an examinee holding specified license grants or
documents credit for certain examination elements. Generally, an
examinee must hold an unexpired or expired but within the grace period
for renewal license to receive examination credit. As such, and an
examinee whose license has been expired for more than two years is not
eligible to receive credit for examination elements previously passed.

But the Anchorage VEC's petition requests that that the FCC permit
volunteer examiners to give former holders of Technician, General,
Advanced, and Extra Class licenses appropriate element credit so that
they can obtain new licenses without retaking the examinations. This,
regardless of when a license expired.

In making its argument, the Anchorage VEC says that allowing
examination credit for individuals who previously held an amateur radio
license which has expired and is beyond the grace period for renewal,

would allow these individuals to obtain a new license grant at an early date and thereby allow them to again participate in normal amateur radio activities.

The Anchorage group asserts that a waiver of this sort is in the public interest because it would result in the immediate expansion of the pool of experienced operators. Volunteers that would be available in time of national or regional emergency. It also notes that many of the potential beneficiaries of such a waiver are of advanced years and are interested in prompt resolution of this matter.

The proceeding has been designated as WT Docket 11-130. Comments on it are due no later than August 19th with reply comments due no later than August 29th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Again the proceeding to address is WT Docket 11-130. Comments on it are due by August 19th with reply comments due no later than August 29th. (ARNewsline(tm), FCC)

**

PROPAGATION: SUN EMITS X-CLASS FLARE - COULD AFFECT HF PROPAGATION

Space Weather reports that on Tuesday August 9, at 0805 UT, sunspot 1263 produced an X7-class solar flare. Tis is only the third X-flare of new Solar Cycle 24 and the most powerful so far.

The brunt of the explosion was not Earth directed, however what's being described as a minor proton storm was in progress around our planet that could have affected satellites in high-altitude orbits. Also, radiation from flare created waves of ionization in Earth's upper atmosphere, briefly disrupting communications at some Very Low Frequency and High Frequency radio frequencies. What we hams call band outages.

According to Space Weather, images from NASA's Solar and Heliospheric Observatory radioed back images to Earth showed a Coronal Mass Ejection emerging from the blast site on the Sun. Astronomers believe the solar cloud created by this C-M-E will probably miss Earth however they would not rule out a glancing blow from its flank on or about the time this newscast went to air. (Space Weather)

**

WORLDBEAT: CANADIAN HAMS MAY GET PERMANENT 60 METER ALLOCATION THIS FALL

Canadian hams could have a permanent 60 meter allocation in the not to distant future. According to a news release by the Canadian national

amateur radio society Radio Amateurs of Canada, telecommunications regulator Industry Canada has now informed the society that it responds favorably to its request for frequencies at 5 MHz on a no protection, non-interference basis.

The new spectrum would be included in the schedule of amateur frequencies update to be released for public consideration in the future. Comments will be considered by Industry Canada in preparation for the final version of the new frequency plan. Any new frequencies it contains would become available to Canadian amateurs at the time of its release. Thus, if all goes as expected, Canadian amateurs may expect to gain access to frequencies at 5 MHz that are basically the same as those in the United States, some time this fall. (RAC)

**

WORLDBEAT: RAC FORMS TASK FORCE TO EXEMPT ONTARIO HAMS FROM DISTRACTED DRIVING LAW

Turning to news from around the world, Radio Amateurs of Canada has announced the formation of a task force to seek a permanent exemption for Ontario Amateurs. This from the ban on operating mobile devices in a vehicle under the provinces new Distracted Driving ban scheduled to take effect on January 1, 2013.

The Task Force has already obtained letters of support from groups that it assists ranging from hospitals to communities to served agencies and others. All of the letters indicate that limiting the ability of ham radio operators to provide communications while mobile would not be in the Ontario's best interests.

The Task Force will present the letters as part of its case to Kathleen Wynne who is Ontario's Minister of Transportation. The objective of the Distracted Driving Task Force is to convince the Ontario government that the regulation, as currently written, will actually decrease public safety in that province. (RAC, VE3XT)

RADIO IN SPACE: CERTIFICATES OFFERED FOR ASSISTING ARISSAT - 1

ARISSat One controllers can also use your assistance to keep track of their new bird as it circles the Earth. That being keeping tabs on the satellites telemetry as it downlinks its condition while on-orbit. And you will get a certificate of appreciation for assisting.

Monitoring the telemetry requires no computer or special programs to decode. It is made up from internal monitoring of certain selected satellite operations that are transmitted in a female voice. This voice data consists of Mission Elapsed Time in minutes, Internal Housekeeping and Control Panel temperature in degrees Centigrade, battery voltage and battery current draw. This information along with who you are, where you are and when you heard the telemetry goes by

e-mail to tlmreport (at) arissat1 (dot) org. Those who take part in this telemetry reporting program will receive a certificate in recognition of their contribution to the ARISSat One satellites flight.

Certificates are also available to anyone that receives the voice, digital or Morse code signals signals from ARISSat One. These can be heard using any 2 meter FM transceiver or a scanner radio tuned to 145.950 MHz.

ARISSat One transmits continuously in a round robin format a Voice ID, a greeting from space, voice telemetry, a voice ID and lastly a Slow Scan television image. A Secret password is included in most greetings. If you can catch it, simply e-mail it along with your name, the date, time, location where you heard the transmission along you're your e-mail address to secretword (at) arissat1 (dot) org to receive the certificate. (ARISSAT)

**

SELF POLICING: ACCIDENTAL DOT STATION LOCATED THROUGH GLOBAL INTRUDER WATCH COOPERATION

An unidentified ham in Northern California who inadvertently pushed a keyboard up against his Morse keyer is likely a bit contrite right now. This after the accident wound up producing a stream of dots at 25 words per minute heard world-wide for over a week.

The signal caused what might loosely be called a minor international incident. In fact it caused a global effort beginning in TU Region 3 and eventually involving stations in Region 1 via the Intruder Watch program. It also lead to various posts to DX Clusters and Yahoo groups which eventually resulted in the suspected radio amateur being contacted via the ARRL and being asked to check his station.

Signal reports were first received in New Zealand who's ham radio community heard it and raised the alarm. Others that became involved were hams in Europe, the United States, Afica and Australia. The result was a well coordinated global High Frequency hidden transmitter hunt that resulted in a solid triangulation on the Western United States and eventually right to the front door of the station where the never ending stream of dots were coming from. Once notified, the unwanted signal quickly disappeared from the airwaves. (ZL1GWE, NZART News)

REPEATER COORDINATION: REFARMING OF SIMPLEX FOR DIGITAL VOICE
REPEATERS DEFEATED IN TEXAS NEW PLAN BEING CONSIDERED

A possible solution to a nagging problem that has pitted simplex users against digital repeaters in Texas. Amateur Radio Newslines Don Carlson, KQ6FM, has the details:

--

A highly controversial plan by the Texas VHF FM Society that would have allowed +1 Mhz split, 10 kHz spaced narrowband digital relay modes using channels in the 146 and 147 simplex range has been voted down by a 2 to 1 margin. In its place, the Society has agreed to study an alternative idea submitted by Chris Boone, WB5ITT, to permit narrowband digital duplexed paired systems to use splinter channel pairs on all bands from 2 meters and up.

In the case of Texas, that would mean both 2 meters and 222 MHz which use 20 kHz separation spacing for analog repeater systems would put digital relay devices on the 10 kHz split pairs between them. Likewise, for 70 centimeter UHF operation where the state embraces 25 kHz between analog FM repeaters, digital machines would be placed at the 12.5 kHz points in-between. This same plan would work itself all the way up through all of the bands on which the Texas VHF-FM Society coordinates repeater systems. To help insure that the new plan would work, a minimum 50 mile separation between all new adjacent split channel repeater pairs, analog or digital, would be imposed on all bands.

What this all means is that digital repeaters that have unilaterally set up shop on simplex channels on a temporary basis will be in limbo until mid 2012. This is because in accordance with the Society By-laws regarding changes to the coordination standards in Texas, the WB5ITT proposal was tabled. This gives the Society the time need for the membership to be polled on the idea and then the issue to be voted on at the next summer meeting.

In the meantime, digital repeaters already on the air will remain on their current frequencies but will be expected to move to new channels if the motion passes. That will mean normal 600 kHz input to output separation with non-inverted operation. Until then, no new digital coordination's on simplex frequencies will be allowed since the original proposal to allow these systems onto the simplex channels failed to pass.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

If the membership of the Texas VHF-FM Society buys off on the WB5ITT proposal it holds the potential of quieting the furor over digital voice relay systems that has plagued the state for about the past 24 months. It also could set the precedent for the standardized

integration of digital voice repeaters in a crowded analog FM world that repeater coordination councils and band planners nationwide have been seeking. At least it's a place to start for those regions that already use 20 KHz spacing between repeaters on the 2 meter band. (ARNewsline(tm))

**

ENFORCEMENT: NEW ZEALAND CONVICTION FOR SELLING RADIO JAMMERS

An unidentified New Zealand man has been fined $2000 after being convicted in Porirua District Court of supplying illegal radio jamming transmitters. This following a combined effort between government agencies.

New Zealand's Ministry of Economic Development had filed charges under the Radio Communications Act after Police found the transmitters during a house search for drugs. At the hearing the man admitted supplying the radio jammers and also to transmitting outside the terms of his radio license. (Southgate)

**

ENFORCEMENT: BOSS FORCED TO PAY FORMER EMPLOYEE FOR INSULTS MADE OVER CB

If you live in Australia and make disparaging comments about someone over a CB radio, it could cost you big bucks. That's just what has happened down-under as we hear from WIA News reporter Graham Kemp, VK4BB:

--

A southeast Queensland-based security worker who was called insulting names on CB radio has won a $5000 payout from her former boss.

The woman from Eagleby, south of Brisbane, hailed from the former Yugoslavia and complained to the former Anti-Discrimination Commission over offensive comments allegedly made by a security business owner.

The 65-year-old woman's complaint shone a light on the abusive culture of some UHF/CB radio transmissions, with one witness admitting he had even encouraged his four-year-old daughter to use racially loaded terms.

The tribunal was told the security firm had previously employed the complainant and her son, but fell out with the son in 2008 prior to the alleged abuse.

"The culture of the CB radio conversations between the parties, witnesses and other users is carried out in an abusive tone with racially vilifying and sexually harassing words and connotations," the tribunal said.

Im Graham Kemp, VK4BB, of the WIA News reporting for the Amateur Radio Newsline.

--

You can read more about this interesting court finding on line in the Brisbane Times at tinyurl.com/vk-cb-fine. (WIA News)

**

HAM RADIO READING: THE CHINESE CONNECTION - A CQ EDITORIAL

The Chinese Connection is the title of a thought provoking editorial dealing with the emergence of ham radio gear made in China here in the United States marketplace. This at prices considerably lower than similar radios from Japan and other manufacturing nations.

Authored by CQ Magazine editor Rich Moseson, W2VU, the editorial takes a look back in time to when radio gear from Japan first emerged in the domestic U-S marketplace some 40 years ago and eventually lead to the stalwarts of the time such as Hallicrafters, E.F. Johnson, National Radio and others eventually leaving the ham radio marketplace. The article also asks the paradoxical question as to whether this might be happening again and if the Japanese ham radio manufacturing community will adapt to meet this new challenge. It also notes that this is all happening at a time when the domestic U-S ham radio manufacturing industry is making a major comeback.

The Chinese Connection is an excellent read for any ham that has an interest in the economics of the amateur radio supply industry and how it affects them. You will find it on page 8 of the August issue of CQ Magazine. (CQ)

**

HAM HAPPENINGS: CELEBRATING THE 80th ANNIVERSARY OF THE MIDLANDS ARS

On the social scene, the United Kingdom's Midland Amateur Radio Society plans to celebrate its 80th anniversary by hold an open house day on September 24th from 10am to 4pm local time. Plans are for displays of historic photographs, QSL cards, the original 1931 minutes books and the awards the ckub has received. There will also be refreshments, an opportunity to meet the groups training staff, and the chance to operate club station GB8OTH. More information on the society, which is based in Birmingham, in the U-K can be found on the club web site at www (dot) radioclubs (dot) net/mars. (GB2RS)

**

NAMES IN THE NEWS: DR. LARRY PRICE W4RA NAMED ARRL PRESIDENT EMERITUS

Some names in the news. First some words of congratulations to Dr. Larry Price, W4RA, on his being named ARRL President Emeritus.

Dr. Price served as the League's President from 1984 to 1992 and previous to that as a Vice Director, Director and Vice President of the

ARRL Board of Directors. He also served for 10 years as Secretary of the International Amateur Radio Union and another 10 years as that organization's President. In fact, Dr. Price continues to serve the IARU as an expert consultant and has been recognized as President Emeritus by the IARU's Administrative Council.

The naming of W4RA as ARRL President Emeritus was made in celebration of his ongoing dedication to the Amateur Radio Service and in recognition of his 60th anniversary as a radio amateur. (ARRL)

**

NAMES IN THE NEWS: WD5K BECOMES 5th HAM TO RECEIVE FRED FISH MEMORIAL AWARD

And congratulations also to Thomas Johnson, WD5K, of Dallas, Texas. This for becoming only the fifth radio amateur earning to earn the ARRL Fred Fish Memorial Award.

The Fred Fish Memorial Award was created in honor of the late Fred Fish, W5FF, who was the first amateur to have worked and confirmed all 488 Maidenhead grid squares in the 48 contiguous United States on 6 Meters. The award is given to any amateur who can duplicate this feat. Johnson application was reviewed and approved by ARRL on July 28th. (ARRL)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

RADIO AND SPACE: ACMA EXTENDS RADIO QUIET ZONE TO PROTECT RADIO ASTRONOMY DOWN-UNDER

The Australian Communications and Media Authority has enhanced the radio quiet protections for the Mid West Radio Quiet Zone or RQZ in remote Western Australia. Ewan MacLeod, VK4ERM, of the WIA News is here with the details:

--

The RQZ was established in 2005 to provide an environment that protects highly sensitive equipment used for radio astronomy from unwanted radio-communications signals. These arrangements protect the radio telescopes currently in place at the Murchison Radioastronomy Observatory, as well as those proposed in the Australian-New Zealand bid to host the Square Kilometre Array or SKA.

"A clear regulatory framework to support radio quiet arrangements will further assist Australia to create the world's best radio astronomy facility,' said ACMA Chairman, Chris Chapman. `This will provide a platform that should be ideal for future radioastronomy projects, including the $1.5 billion SKA project."

Mr Chapman said the new protection measures provide greater clarity and certainty to the arrangements that protect radioastronomy services in the RQZ.

"The new measures continue to provide for radio quiet while supporting the use of spectrum by other users and placing the lowest feasible burden on industry in the region,' said Mr Chapman. Mr Chapman said the new protection measures will not significantly change the nature of spectrum access and radio quiet arrangements in the Mid West RQZ.

"This will enhance protection for the RQZ by upgrading the existing statements of ACMA administrative practice to more formal regulation," Mr Chapman said.

The introduction of the enhanced protections for the RQZ follows a very extensive consultation process in which the ACMA sought the views of interested stakeholders."

This is Ewan VK4ERM

--

The Australian Communications and Media Authority has also released a Response to Submissions paper. It outlines the regulatory agency's rationale behind its decision and the final package of measures it has instituted to protect radio astronomy resources down-under. (WIA News)

**

RADIO IN SPACE: MARS ROVER OPPORTUNITY ORDERED BY RADIO TO SPIRIT POINT

NASA's Mars Exploration Rover Opportunity will revisit the rim of Endeavour crater on Mars, where its rover twin Spirit finished its 6-year-long mission in May.

The rover scientific research vehicles had completed their three-month prime missions on Mars in April 2004. Both went on to extended missions and in the process each made important discoveries about the environment on ancient Mars which suggested the possibility for microbial life on the red planet.

Driving commands sent by radio to Opportunity directed the rover to make its final push toward Endeavour crater. This is a 14-mile-wide depression near the Martian equator could be the research vehicle's final destination.

The target for Opportunity is a site on the rim of the Endeavour crater named Spirit Point. It was given that designation by the Mars Rover

Controllers in honor of the Opportunity's lost twin. Opportunity should be at that location and beaming signals back to Earth by the time this newscast goes to air. (NASA, other news reports)

**

WORLDBEAT: NEW WSJT EME RECORD CLAIMED

What's believed to be a new digital EME record on 2 meters was set at 20:20 UTC on August 3rd. This when Allan Saul, ZS1LS, in Sunset Beach, South Africa and Jeremy Alexander, W7EME, in operating portable KH6 in Hawaii established a new South African Radio League record of 18,383 Kilometers between the to terrestrial stations.

The contact was established using WSJT during a small window close to moonset in South Africa and only 7 degrees of moonrise in Hawaii. Signal reports varied between minus 26 dB and minus 31 dB below S zero. Signals that would not be audible to the human ear but which are decodable using WSJT. .

For those who never have tried it, WSJT is a digital noise reduction program used for weak-signal radio communication written by Joe Taylor, K1JT. The digital signal processing techniques in WSJT make it substantially easier for radio amateurs to enjoy esoteric propagation modes, such as high speed meteor scatter and moon bounce to name only two. (SARL, Southgate)

**

DX

In DX, Bill Moore, N1CL, at the ARRL DXCC desk, the just concluding ST0R operation has been approved for DXCC credit. This means you can file cards for this one via the usual means of accreditation.

TM5SM will be on the air from the Saint Marcouf Islands through August 15th. Operations will use CW, SSB and RTTY on 80 through 10 meters. QSL via F5RJM either direct or via the bureau.

WA8LOW and four other operators will be active stroke KH8 from American Samoa, until the 17th of August. The group is running four high power stations on 160 to 6 meters using all modes. QSL via WA8LOW.

IZ2DPX will be active from stroke CT9 from Madeira Island on all of the High Frequemcy bands and possibly 6 meters. He will be there through August 21st. QSL via bureau or direct to IK2DUW.

Last, but by no means least, EA3PT is operating portable EA6 from Menorca through August 21st. Operation is SSB only holiday style using SSB only on 40 through 10 meters for at least an hour a day. QSL via Logbook of the World or direct via his home call.

(Above from various DX sources)

**

THAT FINAL ITEM: SWEDISH MAN TRIED TO BUILD A NUCLEAR REACTOR IN HIS KITCHEN

And finally this week, from the truth is stranger than fiction file comes the story of a Swedish man who was arrested after trying to split atoms in his kitchen. No, we are not kidding as we hear from Amateur Radio Newsline's producer Bill Pasternak, WA6ITF:

--

News reports say that Richard Handl was only doing it as a hobby. Trying to build a nuclear reactor, that is.

In an interview, Handl told the media that he had the radioactive elements radium, americium and uranium in his apartment in southern Sweden. That he said was when police showed up and arrested him on charges of unauthorized possession of nuclear material.

The 31-year-old Handl said he had tried for months to set up a nuclear reactor at home and kept a blog about his experiments. He even described how he created a small meltdown on his stove.

Only later did he realize it might not be legal and sent a question to Sweden's Radiation Authority. That appeared to be his downfall. This is because instead of a response by letter or telephone, his information request was answered by an unexpected visit by the police.

Handl went on to say that he has always been interested in physics and chemistry, adding he just wanted to see if it's possible to split atoms at home. Although he says the police didn't detect dangerous levels of radiation in his apartment, Handl now admits that the project might not have been not such a good idea after all. And if I might editorialize a bit: Neither do we.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the City of Angels.

--

The news reports say that the raid on Handl's residence took place in late July, but authorities have refused to comment. If convicted, Handl could face fines or up to two years in prison.

And folks, you just can't make these things up. (GeekNewz, Xydo, others)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.

You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that this coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks on September 11th of 2001. Attacks that felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Moslem extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures and killing over 3000 American citizens.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we are trying to compile a list of radio clubs and individuals who are planning any form of ham radio memorial operation to honor those whose lives were lost that day.

Already a group in Pennsylvania and another in New York City are planning on-the-air commemorative operations. If you of any others please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org starting this week.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, in Vero Beach, Florida, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 14th August 2011

The news headlines:

* IARU Region 1 Conference webcast

* UK Licence Examinations available at the RSGB Convention in October

* ARISSat-1 Deployed

The International Amateur Radio Union General Conference takes place from 12 to 19 August in Sun City, South Africa and will be streamed live via the internet. To listen to the IARU conference stream you need to have iTunes installed. Here are the instructions for installing and setting up iTunes. Download the latest version of iTunes, which is free, from www.apple.com/uk/itunes. Double-click on the downloaded file to start installation. To prevent iTunes from automatically updating and managing the music on your PC or MAC, un- tick all the options in the Installation Options screen that's shown during the installation. To set up the Stream, run iTunes, open the Advanced drop down menu and select Open Stream and place the following link into the URL field, http://live.datamatix.at:8032/listen.pls and press OK. That's it; the conference will now show as an Internet song and can be played and paused at will. For more information please refer to the iTunes help file.

The RSGB is offering those wishing to obtain a UK amateur radio licence the opportunity to complete one, or more, of the required Radio Communication Examinations over the weekend of the RSGB Convention, 8 to 9 October. Candidates must book their examinations prior to the event and must provide evidence they have completed the required practical assessments. The contact for further information and for booking examinations is the RCE Department at RSGB HQ on 01234 832700. Candidates for the Foundation or Intermediate examinations must also contact Brian Reay, G8OSN by e-mail to g8osn.rsgb@gmail.com or telephone 01634 376316. This is so that their progress on practical assessments can be verified. If required, Brian can also advise on finding a local tutor to complete practical assessments in advance of the Convention. It is essential that Foundation and Intermediate candidates have their progress verified by Brian before the Convention.

The amateur radio satellite ARISSat-1 has been deployed from the International Space Station and its 145.950MHz FM/SSTV and 145.920MHz BPSK signals have been received around the world. The signal levels

from ARISSat-1 should be similar to those expected from the AMSAT-UK FUNcube-1 satellite. The AMSAT-UK team are keen to discover what will be the minimum and best type of antennas for schools to use with a FUNcube Dongle software defined radio. Therefore, user experience with the ARISSat-1 signals will be very valuable in making this determination. To encourage everyone to receive the 145.920MHz BPSK ARISSat-1 telemetry signal, AMSAT-UK are offering a FUN reward for listeners. Check out www.uk.amsat.org for more details.

At the end of today, 14 August, the Early Bird booking discount for the RSGB Convention comes to a close. There is a full programme of lectures on a wide variety of topics from microwave to DXpeditions and antenna design to propagation. On Friday 7 October the Martin Lynch and Sons Buffet Dinner will be accompanied by entertainment and the Saturday DX dinner is being MC'ed by Radio Four presenter Jim Lee, G4AEH. For more information, including booking, take a look at www.rsgb.org/rsgbconvention.

The Northern Ireland HF Conference takes place on Saturday 20 August at the Technology Education Centre, Omagh BT78 1FA. Registration is from 11am and admission is £3. Several speakers have been booked, including Malcolm, GI8AFS speaking on HF Beacons, Paul O'Kane, EI5DI talking about DXpeditions and Logging and the RSGB's Carlos Eavis, G0AKI, speaking about the IOTA programme. More information can be found on the internet at http://wtarc.co.uk/GIHFConference.aspx.

Thailand is the latest country to join the International Lighthouse and Lightship Weekend that takes place next weekend, 20 and 21 August. Simon Luttrell, HS0ZIB, will be operating from the Golden Jubilee Lighthouse at Phromthep Cape, Phuket. With just days to go, the organisers have already exceeded previous records of participation. The 48-hour event is not a contest but is plenty of fun. More information on all the stations taking part can be found on the internet at http://illw.net.

Over the last year, Radio Amateurs of Canada has been in discussions with Industry Canada with the objective of obtaining access to the 60m band. Industry Canada has now informed RAC that, at this point, it sees no reason not to respond favourably to the RAC request for frequencies at 60m on a no protection, non-interference basis. If all goes well, Canadian amateurs may expect to gain access to frequencies at 60m some time this autumn.

And now for the details of rallies and events for the coming week

Flight Refuelling ARS are holding their annual Hamfest rally today, Sunday 14 August, at the Cobham Sports and Social Club Ground at Merley, near Wimborne , Dorset. BH21 3DA. Gates open to the public at 10am. Talk-in will be on S22.

The Friskney & East Lincolnshire Communications Club Rally and General Car Boot Sale is being held today, Sunday 14 August, in the Friskney

Village Hall, Church Road, Friskney, Lincs. This is approximately 6.5 miles south of Skegness. Doors open from 10am to 4pm and admission is £1.50. Details from Bren, 2E0BDS, on 01754 820 060.

The GI HF Conference takes place on 20 August at the Technology Education Centre, Omagh, BT78 1FA. Registration from 11am. More details from Philip, MI0MSO, e-mail mi0mso@yahoo.co.uk.

The Rugby Princethorpe Annual Radio Rally takes place on 21 August at Princethorpe College, Princethorpe, Rugby CV23 9PX. Doors open from 10am to 4pm and admission is £2. Contact Tony on 07759 684 411.

Now for the news of special events

On 20 August Sutton Coldfield Radio Society will be running a demonstration station at the charity fun mile held at Mile Oak Rovers Recereation Group, Price avenue, Mile Oak, Tamworth from 1 to 5pm. Probably using the club call of GX2RSC, members and non members are welcome. And now the HF DX news compiled from 425 DX News and other sources

>From until 22 August, MM5AHO and crew will operate maritime mobile from a 10m yacht on Scotland's west coast visiting inaccessible lighthouses. This year prime target destinations are Skerryvore, which is 12 miles off Tiree in the Atlantic, and Dubh Artach (pronounced "doob arr-tack") 15 miles off the isle of Colonsay. Both are rock mounted Stevenson built lights and both are subject to heavy weather. Sixty foot waves have been measured at Dubh Artach, so both operations are strictly weather permitting. In the event of poor weather, a series of lesser, but never-before-activated lighthouses will be visited. Equipment on board comprises an FT-857, running 100W into an antenna formed by the insulated backstay of the yacht's mast, plus two verticals. It is hoped to land on each rock, but radio operations are unsafe ashore so they will be conducted from the boat, anchored as close as is safe.

A group of Worked All Britain members aims to be active from Fair Isle from Tuesday 16 August for a week. Whilst this is not particularly rare from an IOTA viewpoint, being part of the Shetland, EU-102 group, it is in the extremely rare HZ 100km Ordnance Survey square from a WAB perspective. Accommodation has been secured in the South Lighthouse and the stay there will also coincide with International Lighthouse & Lightship Weekend on 20 and 21 August, when it is hoped to also activate the North Lighthouse. They hope to have facilities for all bands from 160m to 2m. The South Lighthouse itself is located in the WAB 10km square HZ16 and is only a few hundred metres from the other three squares, HZ17, HZ26 & HZ27. The transportation of their vehicle to the island has been arranged on the ferry Good Shepherd IV so mobile, as well as portable operation is possible. The group will use the callsign GS4WAB from the South Lighthouse and GS7WAB for other mobile and portable operations. Activity on 5MHz is possible and the callsigns of individual members with NOVs will be used on this band. Operation from other islands in the Shetland group may be possible

prior to and after the week on Fair Isle. Any changes to these plans will be published on the WAB website, www.worked-all-britain.co.uk.

OJ0UR will be on the air from Market Reef from until 20 August. This one counts as EU-053 for the Islands on the Air Award as well as being a separate DXCC entity. QSL Manager is M0URX.

PA/IZ4AMS will stay on Texel Island, which is EU-038, from 14 to 17 August. QSL via IZ4AMS.

PY2XB and PT2OP have landing permission for Balique in the Natural Reserve of Parazinho. They plan to become active as PQ8XB and PQ8OP from 17 to 24 August. QSL PQ8XB via PT7WA either via the bureau or direct and PQ8OP via PT2OP, again either via the bureau or direct.

Now the contest news

Today, 14 August, the 70MHz Cumulative takes place between 1400 and 1600UTC. Using all modes the exchange is signal report, serial number and locator.

Tuesday 16 August sees the 1.3GHz UK Activity Contest taking place between 1900 and 2130UTC. Using all modes the exchange is signal report, serial number and locator. The Brazilian CVADX Contest CW leg takes place on 20 and 21 August from 2100 to 2100UTC. There are lots of different categories and most points to be gained by working Brazilian stations. Full rules are online at www.craec.info/2010/images/docs_pdf/cvarules.pdf.

And now the solar factual data for the period from the 1st to the 7th of August, compiled by Neil Clarke, G0CAS on the 8th of August.

Coronal mass ejections, sudden ionospheric disturbances, polar cap absorption events, proton flares, auroras and coronal mass ejection cannibalism all took place during the period. The three large sunspot groups reported in last week's news continued to rotate across the visible disc. They were large and magnetically complex, just what is needed for strong solar flares. Solar activity was high on the 3rd and the 4th with large M class solar flares taking place, the largest was a M9/2N proton flare early on the 4th. On the quieter days numerous C class solar flares took place. In total five M and over sixty C class solar flares took place. Solar flux levels declined from 125 units on the 1st to 105 by the 7th. The average was 115 units. The 90 day solar flux average on the 7th was 96 units, that's one unit up on last week. X-ray flux levels declined slightly and averaged B4.1 units. Geomagnetic activity started at quiet levels but on the 4th the first of three coronal mass ejections arrived, which was barely noticeable, unlike the other two. The coronal mass ejection of the 3rd was well on its way to Earth when the much larger and faster coronal mass ejection from the 4th caught it up and, as a result, a coronal mass ejection cannibalism took place. The most disturbed day was the 5th with an Ap index of 49 units, the most disturbed day so far this year. The average was Ap 15 units. Data from the ACE spacecraft showed solar wind speeds

decline from 710 kilometres per second on the 1st to 340 by the 4th, however, on the 5th speeds had increased to 660 kilometres per second due to the arrival of the CME. Particle densities increased to 36 particles per cubic centimetre on the 5th, otherwise they were low every day. Bz varied between minus 2 and plus 3 nanoTeslas on the quiet days but at the height of the disturbance on the 5th varied between minus and plus 21 nanoTeslas. Also at the height of the storm there were fine visual auroral displays and a radio aurora that spread well to the south on 50, 70 and 144MHz. More unusually, one or two 432MHz contacts were reported from high latitudes.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at very low levels most days. There is, though, a slight chance of a C class solar flare taking pace on the occasional day and therefore solar activity would increase to low levels. Solar flux levels should be around the 100 mark or slightly lower for most of the week. Geomagnetic activity could be quiet today but activity is expected to increase due to a recurring coronal hole that could last till almost the weekend. On its last rotation it lasted four days and the highest daily Ap figure was 19 units. MUFs during daylight hours at equal latitudes should be about 20MHz for the south and 17MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of about 21MHz. The optimum working frequency with a 90 per cent success rate will be around 15MHz. The best time to try this path will be between 0900 and 1200UTC. There should be a long path opening of similar values during the late evening. Sporadic-E is expected on some days with openings now on 144MHz unlikely to take place.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 14 August Friskney and East Lincolnshire Communications Club is staging its radio rally. Contact Chris, M0MFP, on 01507 442 240.

On Monday 15 August Gloucester Amateur Radio & Electronics Society have no meeting as the school is closed for the summer. Apologies to any members who were confused with last week's GB2RS when we inadvertently gave the wrong meeting details. Contact Anne, 2E1GKY on 01452 548478

during the daytime for further details.

On Monday 15 August Lincoln Short-Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 15 August South Birmingham Radio Society is having a contest planning meeting. Contact Don, on 01214 581 603.

On Monday 15 August Welland Valley Amateur Radio Society is having a CW night. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 16 August Derby & District Amateur Radio Society is visiting the Network Rail East Midlands Control Centre in Derby. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 16 August Loughborough & District Amateur Radio Club is holding an open forum. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 17 August Derby RAYNET Amateur Radio Group is having a Walking Fox Hunt. Contact Martin, G7MKS, via email to contactus@derbyraynet.co.uk.

On Wednesday 17 August Lincoln Short-Wave Club is having a formal meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 17 August Midland Amateur Radio Society laptop computers evening and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 17 August Telford & District Amateur Radio Society is planning for Hamfest. Contact Mike, G3JKX, on 01952 299 677. On Thursday 18 August Cheltenham Amateur Radio Association invites members to bring something from their shacks. Contact Derek Thom, G3NKS, on 01242 241 099.

On Thursday 18 August Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Friday 19 August Coventry Amateur Radio Society is holding the 3rd round of the G4ZMC Trophy at Hartshill Hayes. Contact John, G8SEQ, on 07958 777 363.

On Friday 19 August South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Friday 19 August Telford & District Amateur Radio Society commences its 6 day DXpedition to Guernsey. Contact Mike, G3JKX, on 01952 299 677.

On Saturday 20 August Derby & District Amateur Radio Society starts its weekend event operating GB2WHL from Lighthouse UK0062 in conjunction

with Yorkshire Dales Contest Group. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Saturday 20 August Lincoln Short-Wave Club is in the Shack and putting GB2CWP East Kirkby on the air. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Sunday 21 August there is an emergency services event from 10am to 5pm at Thorpe Camp Visitor Centre, Tattershall Thorpe, LN4 4PE. Attractions include representatives from many full time and volunteer emergency services and a visit by the Lincolnshire and Nottinghamshire Air Ambulance between 1 and 2pm. Details from Alan Waddington on 01526 323 013.

On Sunday 21 August South Birmingham Radio Society is visiting the Rugby Radio Rally. Contact Don, on 01214 581 603.

On Sunday 21 August Welland Valley Amateur Radio Society is at the Rugby Bring and Buy sale. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

NEWS FOR THE NORTH OF ENGLAND On Monday 15 August Angel of the North Amateur Radio Club is having a talk on transmission lines and impedance matching by Zolly Derzsi, M0MBA. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 15 August Sheffield Amateur Radio Club is having a talk on the SARC website by M6KSH. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 15 August Thornton Cleveleys Amateur Radio Society is having a talk on vintage wireless by Ted, G3WBB. Details on the web at www.tcars.org.uk.

On Tuesday 16 August Chester & District Amateur Radio Society is closed. Details from Barbara Green on 07957 870 770. On Tuesday 16 August Halifax & District Amateur Radio Society is operating /P from Lower Wyke from about 18:45 BST. Participants are invited to bring their own transmitters and aerials although there will be some club equipment available. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 16 August Wakefield & District Radio Society continues its Foundation and Advanced licence courses from 13:30. Details from David, G4CLI, on 07748 221 855.

On Wednesday 17 August Chorley and District ARS is starting Morse classes for anybody that wants to learn Morse code. Details from Nessie, M0NES, by e-mail to nessie68@hotmail.com

On Wednesday 17 August Hornsea Amateur Radio Club is holding a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 18 August Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 07876 085

631.

On Thursday 18 August South Manchester Radio and Computer Club is having a 2m DF Report by Peter, G0BHP and Bill, G4SVR. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 18 August Wakefield & District Radio Society is on the air, holding a committee meeting and celebrating the birthday of Ken, 2E0SSQ. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 19 August Angel of the North Amateur Radio Club is going on a river cruise with STARS club, arriving at 6.30pm for boarding at 7. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Friday 19 August East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 19 August Tynemouth Amateur Radio Club is having a briefing for International Lighthouse weekend. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 20 August Tynemouth Amateur Radio Club is taking part in International Lighthouse Weekend from St Mary's Island. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 16 August Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946 192.

On Thursday 18 August Aberdeen Amateur Radio Society is preparing for Lighthouse weekend. More information from Lewis, GM4AJR, on 01224 575 663. On Saturday 20 August Aberdeen Amateur Radio Society commences its weekend event for International Lighthouse Weekend at Walker Park. More information from Lewis, GM4AJR, on 01224 575 663.

On Saturday 20 August Cockenzie & Port Seton Amateur Radio Club commences its weekend event for Lighthouse Weekend, operating GB2LBN at Barns Ness. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 14 August Chelmsford Amateur Radio Society is spending the afternoon operating CW as GB100MWT from the Marconi Hut, Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Monday 15 August Braintree & District Amateur Radio Society is holding a rig clinic. For more information contact John, M5AJB, on 01787 460 947.

On Monday 15 August Burnham Beeches Radio Club is on the air. Contact Dave, G4XDU, on 01628 625 720.

On Monday 15 August Surrey Radio Contact Club is having an SDR update by Martin, G3OQD. Contact John, G3MCX, on 02086 883 322.

On Tuesday 16 August Bedford and District Amateur Radio Club is having a talk on amateur radio in New Zealand by John, 2E0XZL. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 16 August Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 16 August Bromley & District Amateur Radio Society is holding a natter evening and barbecue. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 16 August Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 16 August Verulam Amateur Radio Club is having a barbecue social from 8pm at Aboyne Lodge School. Details from Tony, 2EOWAP, on 01727 853 087.

On Wednesday 17 August Bury St Edmonds Amateur Radio Society is having a talk by Cliff Fullam on the history of Rougham airfield and the 94th Bomb Group stationed there. Details from George Woods, G3LPT on 01359 259 518.

On Wednesday 17 August Chesham & District Amateur Radio Society is having a talk by Terry, G0VFW, about his shack. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 17 August Worthing & District Amateur Radio Club is having a talk on HPSDR by John, G0ORX / N6LY. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 18 August Colchester Radio Amateurs is having a talk on four metres by Kevan, 2E0WMG. More information from Kevan, 2E0WMG, on 07766 543 784. On Thursday 18 August Cray Valley Radio Society is on the air and having a natter night. Details from Bob, M0MCV, on 02082 657 735 after 8pm.

On Thursday 18 August Horndean & District Amateur Radio Club is having a talk by Andrew Perrin on the history of Purbrook and Widley. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 18 August Horsham Amateur Radio Club is having a social evening at the Sussex Oak, Warnham RH12 3QW. Details are on the web at www.harc.org.uk.

On Thursday 18 August Sutton & Cheam Radio Society is having a talk on 3D TV by Mike Cox. More information from John, G0BWV, on 02086 449 945.

On Friday 19 August Mid-Sussex Amateur Radio Society is having a boules evening at the Crown public house Newick. Contact Peter, G4AKG, on 01444 239 371.

On Friday 19 August Southgate Amateur Radio Club is holding a barbecue. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Friday 19 August Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 20 August Bittern DX Group commences its weekend event operating GB2BML at Blakeney Mariners' Light for ILLW. Details from Linda, G0AJJ, on 01692 404 154.

On Saturday 20 August Hastings Electronics and Radio Club is holding an auction of used & surplus equipment at Holy Redeemer Church Hall, Upper Church Road. Doors open 9am for Auction at 10.15am. Details from Gordon, on 01424 431 909.

On Saturday 20 August Norfolk Amateur Radio Club commences its weekend event for International Lighthouses on the Air. Details from Chris Danby, G0DWV, on 01603 898 678.

On Saturday 20 August Worthing & District Amateur Radio Club starts its weekend activation of Shoreham lighthouse for Lighthouse weekend. Contact Phil, G4UDU, on 01903 816 684.

On Sunday 21 August Chelmsford Amateur Radio Society is operating SSB using GB100MWT from the Marconi Hut, Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

NEWS FOR THE SOUTH WEST On Sunday 14 August Blackmoor Vale Amateur Radio Society is at the FRARS Rally. Contact Tony, G0GFL, on 01258 860 741.

On Monday 15 August Appledore & District Amateur Radio Club is having a summer solstice natter night. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Tuesday 16 August Blackmoor Vale Amateur Radio Society is setting up for the Gillingham & Shaftesbury Show. Contact Tony, G0GFL, on 01258 860 741. On Tuesday 16 August West Devon Radio Club is having a homebrew construction and QRP evening. Further information from Jules Cuddy, M1AGY, on 01752 291 588.

On Wednesday 17 August Blackmoor Vale Amateur Radio Society is at the Gillingham & Shaftesbury Show. Contact Tony, G0GFL, on 01258 860 741.

On Wednesday 17 August Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 17 August Trowbridge & District Amateur Radio Club is having a presentation entitled 60 Days to Christmas Island, T32C, by Tony Bettley. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 18 August Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 18 August South Bristol Amateur Radio Club is holding its summer darts match. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 18 August Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 18 August Yeovil Amateur Radio Club How is having a talk by G7LNJ on how rotary converters work. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 19 August North Bristol Amateur Radio Club is on the air. More information from Dick on 01454 218 362.

On Friday 19 August Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 15 August Dragon Amateur Radio Club is planning for SSB Field Day and having a general chat. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 16 August Wrexham Amateur Radio Society is having a DVD night. More information from Patrick, 2W0HUU, on 07947 701 927.

INDEED !
Dick is a great name for teh "head" of a VE team. Speaking of head, i
think exam credit should be givin for sucking off teh VE team. Thets
how me an gav got our general ticketts. get kelp.

Bozo, you were born Jay Smilkstein, here is your
hideous gruesome ugly picture :
http://www.hfunderground.com/wiki/Bozo

"Bozo <Jay Smilkstein> De Niro!!!..."
http://www.coloneljake.com/BAM1BAM/BDN00/

NEW MOVIE AUDIO TRAILER FOR:
WATER FOR REPUBLICAN ELEPHANTS
----------> http://www.exorcist.org.nz/bozo_wild_jew.wav

JEWS = RATS
VERMIN = JEWS
http://www.exorcist.org.nz/jew_rats.wav

Bozo The Jew !

* Promotes Sorcery (Babylon) That Is In Clear Contradiction
To The Teachings Of The Old Testament

* Promotes Child-Adult Sex, Which Is Clearly Satanic
http://www.exorcist.org.nz/music_mafias.html
* Promotes Ever Form Of Filthy Talk, Behaviour, And Actions,
Again I Point Out That It Is Direct Contradiction To The
Teachings Of The Old Testament
* Promotes Jewry (Judaism) Judaic Talmud (Torah \ Kabbalah)
Where The Talmud Is Actually Called By The Jews:
The Babylon Talmud !
* Promotes Pride In The Fact That The Jews Were Going Around
In Circles For 40 Years In The Desert. 40 Years Circling Around
And Around -- Is That Complete Stupidity Or What ?
Finally Discovering "Zion" (Israel \ Judah), Yet Have Now, As
Jews, Hi-Jacked The Entire Hebrew Race Into Clearly Satanic
Babylon Teaching, Babylon Sorcery, Babylon Pedophilia
* Bozo de Nero (Jay Smilkstein) Is Actually A Babylonian,
Which Is In All Actuality Been Labelled As:
"worse than a nigger"
* Jay Smilkstein Like Lucifer Is So Ugly. Lucifer Was Created
As Beutiful (scriptural fact), However Now Has Turned Into
A Hideous Ugly Creature, Of Which The Smilkstein Spawn
Shows Their DNA "Beauty" Which Is Clearly Evolved Ugly
Hideous Flesh.
* Jay Smilkstein (Jew) Is A Babylonian !
'Babylonian Talmud'
* Bozo de Nero (Jay Smilkstein) Is Clue-Less To These Facts
And Thus As *Confused* (Confusion = definition of Babel),
As Nimrod Himself !
* It Is Quite Obvious To Students Of Demonology (Myself) That
Jay Smilkstein (Bozo de Nero) Is Clearly Possessed. I Highly
Speculate That Jay Smilkstein Also Hears Voices, Just As Do
Multitude Of Other Individuals In Today's Society -- For That
Is A Manifestation That Needs Further Study -- The Recent
Increase In People Who Hear Voices !
* Bozo de Nero Is Destined For The Flames Of Hell, I Do Think
That His Seed (DNA) Is Beyond Salvation !
For Curses Do Run Into The 4th Generation At Least
(scriptural warning- fact)
* Hebrews Are Blessed - Jews Are Satanic !
* Go Away Jay Gay Smilkstein, Your Anal Fetish Desires Are
Tantamount To Being Always Labelled A Sick Feces Freak
Of Outstanding Vulgarity On The World Stage !

http://www.exorcist.org.nz/music_mafias.html

* Just Up-Dated !
w/ New Photo Of KFJC 89.7 FM Fundraising Event
w/ New Audio-Mix Attached To Web-Page (longer)

KFJC 89.7 FM <--- You Always Choose To Be Satanic !

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 14th August 2011

IRTS 2 Metres Counties Contest

The IRTS 2m Counties Contest will take place Sunday 28th August 2011. The closing date for the submission of the log to the contest manager is 27th September 2011.

South Sudan DXpedition

The first DXpedition to South Sudan went QRT during the week, having made over 120,000 QSOs on all bands from 6 metres to 160 metres.

The DXpedition call sign was ST0R [Sierra-Tango-Zero-Romeo] and its log shows 279 QSOs with EI stations. John EI7BA tops the list, with 21 QSOs, covering all the bands used by ST0R, followed closely by Doug EI2CN with 20 QSOs. Both John and Doug managed QSOs on 160 metres, a fine achievement given that ST0R had less than 700 QSOs on that band, due to various problems with antennas, not to mention propagation and atmospherics.

CASHOTA

CASHOTA will be holding a UK & Ireland Heritage event over the month of September 2011 to coincide with European Heritage Month. This is an opportunity to access locations which may previously have been closed to the public or inaccessible. The different regions have set different dates, so for more information go to www.cashota-ireland.org where all of the information regarding Irish Castles and their activation and numbers may be found.

The dates have been set for CASHOTA's annual Castles weekend in 2012. The event will be held over 2 weekends on the 18th - 19th May 2012 and the 25th - 26th May 2012. We would like to invite both last year's participants and any new persons to apply to be an award station. The award is open to any individual, groups or clubs who wish to chase castles or activatethem.

CASHOTA in Ireland is co-ordinated by CASHOTA-IRELAND and to obtain a CASHOTA designator for a Castle in Ireland please contact Steve EI5DD

via "ei5dd \dot\ steve \at\ gmail \dot\ com"

Limerick Radio Club

Members of Limerick Radio Club will activate Tarbert Island Lighthouse IE0002 using the callsign EI4LRC/P for the International Lighthouse weekend 20/21 August. Activity will be on SSB & CW

GI HF Conference

The West Tyrone Amateur Radio Club is holding a HF Conference on Saturday 20th August 2011. This Conference comes following the very successful DigiCon 09 Conference back in September 2009. A range of speakers from around GI, EI and G will be in attendance to share their various perspectives on aspects of HF operation. There will also be in attendance Traders such as, Tyrone Amateur Electronics (TAE) along with exhibits from the RSGB and the IRTS. The Event is supported by Practical Wireless, TAE, JBT, IRTS and RSGB. So come along for what will be a Fun Day Out for all the family. The town of Omagh has a range of top class shopping along with a wide range of other tourist attractions http://www.omagh.gov.uk/culture_leisure_and_tourism/ We look forward to seeing you there. For details of the Venue etc go to http://wtarc.co.uk/GIHFConference.aspx

---

North Cork Radio Group

The North Cork Radio Group is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477.www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 086-3357100 Email:ei7gtb/ at /gmail/ dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

Cork Radio Club

Cork Radio Club will meet on Monday August 15th at 8 p.m. at the Community Centre in Carrigtwohill. New members and visitors will be

very welcome. Final details of the Club's Summer social will be discussed. This barbeque will be held at the Brook Inn in Glanmire on Sunday August 21st starting at 4 p.m. This will a family event and again visitors will be very welcome.

The clubs planned trip to the Old Head of Kinsale for International Lighthouse weekend will not now go ahead due to a late double booking by another club.

The next group activity will be a trip to Garbally College in Ballinasloe for the SSB Field Day on the first weekend of September.

Enquiries to Dave EI9FBB at 083-3317940.

Shannon Basin Radio Club

Once again the Shannon Basin Radio Club will be hosting the SSB field day on the weekend of 3rd and 4th September 2011. The grounds of Garbally College in Ballinasloe in Co. Galway have again been made available to any clubs or individual operators who wish to take part in the event. The club will also be hosting its very popular barbeque which is one of the highlights of the weekend. Anybody wishing to receive more information may contact Brian ei8iu by email "brianei8iu/ at / eircom dot /net or any club member.

DX News

Mike VE2XB will be QRV as FP/VE2XB from the St. Pierre and Miquelon Islands from now until 21 August. Activity will be on all bands with emphasis on 6m. For the IOTA Award the reference is NA-032. QSLs go via the home call.

A number of operators from South Korea and Japan will operate from the South Korean island of Cheju from 19-26 August using the callsign D9A. This is in connection with the 20th Asian Conference on Intellectual Disabilities. This one counts as AS-026 for IOTA and the QSL Manager is DS4EOI.

Peter EI7CC is returning to Lesotho for a short holiday from 18- 30 August and will be active again as 7P8PB. He hopes to upload his logs to Logbook of the World on a daily basis. As with his previous visit to Lesotho he will be operating from the shack of Gerry 7P8CC better known to us as EI8CC. It is hoped that many EI/GI stations will make it into the log.

German operators DH2AK and DL1THM will be active as PJ2/DH2AK and PJ2/DL1THM from the island of Curacao from 21 August to 8 September. They will be using an IC-7000 and buddipole and operating holiday style.

A special event station with the callsign UE90K will be active till the end of August from the Komi Republic in Russia. The station will operate from different districts and will be of interest to those chasing the Russian District Award.

For the Rugby enthusiasts look out for ZL4RUGBY operated by ZL4PW from 19 August until 31 October. This is to celebrate the 2011 Rugby World Cup being played in New Zealand.

ARISSat-1 and EI

The ARISSat-1/KEDR amateur radio satailte was launched on Wed 3rd August. Among its contents are entries from schools of students' science experiments. One EI school, Gaelchol�iste na Mara, Arklow Co. Wicklow had the work of 6 students accepted. They include experiments on Ohms Law, Magnetic field, Acid & Base neutralisation, Dissolved Solids, & Periscopes. The students' work was under the guidance of their science teacher, P�draig EI7GK. Other schools accepted were in USA, Canada, U.K. Australia Switzerland & Portugal. Being a Gaelchol�iste the work is presented as Gaeilge with an English Translation. The work can be seen at www.ariss-eu.org/arissat-1.htm There are links to each student's work.

Unlicensed broadcasting now illegal in New York State

Governor Andrew Cuomo has signed legislation making the operation of an AM or FM radio station without a license illegal in the state of New York. Violations will be treated as a "Class A" misdemeanour. The new law gives local law enforcement an important tool to protect consumers and stem the tide of illegal radio operation in New York. USA.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

August 15, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & ARRL DX, NG3K & ADXO, N4AA & QRZ DX, W5JON, KH6BZF, K8BL, K8YSE, W8GEX (60m News), A35A, AT International, CX3AL, DL1SBF, DG8KAD & The DX News Letter, DxCoffee.com, DX-World.Net, EI7CC, F6AJA & Les Nouvelles DX, HP1AC, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PY2XB, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), YT3W and ZL2AL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-August, through Sunday, 14th-August there were 211 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, ST0, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TL, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2 METER DXCC ACHIEVEMENT. Lee, ZL2AL, reports that Bob McQuarrie, ZL3TY, has just achieved the first and only 2 Meter DXCC in ZL and the Oceania region. Only 62 2M DXCCs have ever been awarded world-wide, so it is an amazing achievement to confirm 102 countries on this band from this part of the world. Lee had the pleasure of checking Bob's cards before sub-

mission and was astounded to see so many rare QSLs from AF and EU.

3D2R, ROTUMA. Excerpts from a press release from Acim, YT3W, informs OPDX that "a team of experienced amateurs and friends prepared a serious amateur expedition to the far island Rotuma, which belongs to the state Fiji". Their goal is to activate the beautiful island of Rotuma on all amateur frequencies from 1.8 MHz to 144 MHz and all amateur modes. Their team will operate on CW, SSB, FM, RTTY, SSTV, PSK, etc... Operators mentioned are: Hrane/YT1AD, David/K3LP, Krassimir/K1LZ, Aleksej/UA4HOX, Atilano/PY5EG, David/WD5COV, Vangelis/SV2BFN, Joe/AA4NN, Paul/N6PSE, Vel/YT3WW, Victor/UA4HBW, Victor/RU4SU, Chuck/JT1CO, Badruun/JT1DO, Danail/LZ1VVV, Choi/HL5FUA, Vasily/RW4NW and Acim/YT3W. They have the landing permit and the amateur radio license for the callsign 3D2R. The team of experienced amateur and friends will gather in Fiji on September 24th, and expect a departure from the port of Suva on the 25th of September around noon. The journey takes 36 hours. They expect the first activity on the amateur radio frequencies on September 27th, and will be active the next 10 days. Return to Fiji is expected on October 8th, in the morning. QSL via YT1AD, direct or by the Bureau.

7P, LESOTHO. Peter, EI7CC, will once again be active as 7P8PB from Lesotho between August 18-30th. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. QSL via EI7CC, by the Bureau or direct. Logs will be uploaded to LoTW immediately upon his return to Ireland. If possible, Peter may try to upload them while in Lesotho.

9H, MALTA. Jasper, PB2JJ, will once again be active as 9H3JN from Maseru, Malta (EU-023), between September 2-14th. Activity will take place during the 24th "VRZA Malta Expedition" organized by the Dutch Society of Radio Amateurs (VRZA). Operations will be on 80-10 meters using CW and SSB. QSL via PB2JJ by the Bureau. Online log will be available at: http://members.casema.nl/pb2jj/9h3jn

A2, BOTSWANA. Gert, ZS6AYU, will be active as A25/ZS6AYU from Jwaneng between September 9-11th. Activity will probably be on 40-10 meters including the 17/12 meters using CW only. QSL via ZS6AYU (see QRZ.com).

A3, TONGO. Craig, KI0SO, has been active as A35CT from Lifuka Island in the Ha'apai IOTA group (OC-169, Grid Loc. AH20te). Activity will be on 20-6 meters mostly SSB. He is using an Elecraft K3 and a Yaesu FT-450 into Force-12 C-3 antenna and an M2 6m antenna operating mostly 10 watts. He has been heard on 20 meters SSB between 0830-1030z. The length of his activity is unknown. QSL via KI0SO CBA (probably a lengthy delay in response).

CW, URUGUAY (Lighthouse Op). Members of the "Radio Club Uruguayo" will be active as CW1R, the special event callsign for the Punta del Este Lighthouse (ARLHS URU-008, ILLW UY0005, Grid Loc. GF25ma), during the upcoming International Lighthouse/Lightship Weekend (August 19-21st). Activity will be on 80-10 meters using CW, SSB and the Digital modes with at least two stations on the air. QSLs for this activity is via

Bureau or direct to: Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY, SOUTH AMERICA, with a SAE and 1 new IRC or 2 green stamps.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports "In accordance with Minute 29 of the July 2011 ARRL Board of Directors meeting, the DXCC award for RTTY is now changed to Digital. Digital will now replace RTTY on these certificates effective July 25, 2011."

E5, SOUTH COOK ISLANDS. Andy/AB7FS (E51AND, ZK1AND and ZK2AND) and his XYL Kathy/KB7SCH (ZK1SCH) will once again return to Arorangi Beach on Rarotonga Island (OC-013) between August 15th and September 3rd, and December 19-31st. Andy will be active as E51AND. As a member of the Straight Key Century Club (SKCC #7723), he plans to operate straight key CW at or around 14050 kHz, and he will be looking especially for SKCC members. Andy states, "This is NOT a DXpedition - just a vaction with some hamming -- so frenetic issuing of signal reports will be a low priority :-) though I'll try to make contact with those who want them. I often check into the ANZA net which meets at 0515z daily at 14183 kHz -- so that's a good place to find me for a sked or to QSY down to the CW part of the band --- or you can try E-mailing me - we'll have limited connectivity but I'll check at least every second day...and..... band conditions are MUCH improved from last December." QSL via AB7FS. Andy's E-mail address is: Kiaorana@minetfiber.com

E5, SOUTH COOK ISLANDS. Ron, ZL1AAO, will once again be active from Rarotonga Island (IOTA OC-013), South Cook Islands, beginning August 19th, for 10 days. He will sign as E51AAO. Activity will be holiday style, and he will be operational on SSB only, 40-10 meters, using 100w to a dipole or 1/4 wave GP antennas. QSL via LoTW, eQSL and direct only; sorry no Bureau cards. He will upload the log when he returns home.

HP, PANAMA (Lighthouse Op). Members of the "Radio Club de Panama" will be active as HP2TP from Toro Point Lighthouse (PAN-021, Grid Loc. FJ09ai) during International Lighthouse/Lightship Weekend (ILLW), August 20-21st. Activity will be on CW and SSB. QSL via HP1RCP. ADDED NOTE: Toro Point Lighthouse was built by the French in 1894 and designed by Gustav Eiffel and was called Pointe le Taureau. Today it still marking the Northside entrance of the PANAMA CANAL in the Atlantic side of the Isthmus of PANAMA.

IOTA NEWS.....
AF-040. By the time you read this, Simon, IZ7ATN, will be active as 5Z4/IZ7ATN/p from Lamu Island until August 15th. Activity will be on SSB only. QSL via his home callsign, direct or by the Bureau.

AF-068. (Update). Operators Ruggero/IK2PZC (5C2P), Leo/I8LWL (5C2L), Fred/IK7JWX (5C2J), Simon/IZ7ATN (5C2SG), Ampelio/IS0AGY (5C2B), Mounaim/CN8QY and Belkaid/CN8QX will be active from Herne Island between September 22-29th. Activity will be on all HF bands and modes and 6 meters.

EU-020. Hans, DK3PZ, will be active as SM1/DK3PZ from Gotland Island (WLOTA 2969) between now and August 20th. QSL via his home callsign, by the Bureau or direct.

OC-223. Members of the Hellenic Amateur Radio Association of Australia (HARAOA) will be active as VK2CL from Montague Island's light-house (ILLW AU0071, Grid QF53CR) during the 2011 International Lighthouse/Lightship Weekend (August 19-22nd). Operators mentioned are Tom/VK2IR, Raffy/VK2RF, Binu/VK2BNG, Al/VK2VEC and possibly others. QSL via VK2IR. Visit the HARAOA Web page at: http://www.haraoa.com

SA-045. (Update) A press release by Fred, PY2XB, states that the Brazilian team will start their trip to Macapa, capital city of Amapa State, on Sunday, May 14th, to head towards Parazinho Island in the Balilique archipelago to activate it. Fred/PY2XB and Orlando/PT2OP will use PQ8XB and PQ8OP callsigns, respec-tively, between August 17-25th. They plan to be active on 40-10 meters using CW, SSB and RTTY. The island is located in the mouth of the Amazon River where it encounters the sea. Life in this region is governed by tides; and therefore, dates and boat schedules are tide dependent. They will stay at the Parazinho Environmental Reserve. There are links for 2 shorts videos about the reserve at: http://www.qrz.com/db/pq8xb
Logistics are complicated to accomplish their task. Orlando had to fly to Macapa a few months ago to check all priors before their departure. They will carry fuel, food, water, batteries, a spare generator, etc... in a 12 hours boat trip from Macapa to Vila Progresso, a fishermen village, plus a 30-40 minutes small boat trip to the Reserve, all tide de-pendent. There are very few operators in PQ8 land, so they will be glad to give everyone a first contact to this rare Brazilian spot and callsign. Contacts will be valid for IOTA, DIB, DFB, WLOTA and ARLHS awards. When returning home, they will stop over in Macapa for a couple of days. They may activate S�o Jos� de Macap� fortress using their callsigns /PQ8, if possible. QSLs for PQ8XB will be handled by PT7WA and for PQ8OP by PT2OP. Additional information when available will be posted at: http://www.qrz.com/db/pq8xb
Fred states, "We would like to thank everyone who helped us to put this operation together. Special thanks to Mr. Manoel Reinaldo from Amapa Environmental Office, Policarpo/PY8JPS, and Sandro/PQ8SL, Luciano/PT7WA, and Ed/PY4WAS and Alex/PY2WAS."

KH5, JARVIS ISLAND (Update to OPDX.974.1). It was reported this week - "Due to a scheduling conflict with the Braveheart, the Jarvis DXpedition has been postponed to 2012 November-December." For updates, visit the N3E Web page at: http://dxinsight.org/expeditions/current/news.php?dxid=
KH6BZF PROPAGATION FORECAST/REPORT (August 15-21st)....
Aug 15 HN SOLAR REFERENCE KEYS
Aug 16 HN ----------

Aug 17 HN BN - Below Normal
Aug 18 HN AN - Above Normal/Geomagnetic Level is QUIET
Aug 19 HN LN - Low Normal
Aug 20 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 21 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OJ, MARKET REEF (Update/Reminder). Just a reminder that the "United Radio DX Team" will be active from Market Reef between now and August 20th. Operators Max/ON5UR, Marc/ON8AK, Jelmer/PA5R and Dervin/PD9DX will be active as OJ0UR from Market Reef (IOTA EU-053, ARLHS MAR-001, TWLHD WLH OJ0-001, WLOTA LH-0542 and Admiralty C4472). Activity will be on the HF bands using a Stepp-IR Big Vertical and a Stepp-IR 2 element beam. QSL via M0URX, direct (w/SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at:
http://www.m0urx.com/qsl-request-form
For more info, visit their Web page at:
http://www.united-radio.be/index.php

P2, PAPUA GUINEA. Renzo, I2KRR, a volunteering technical support person to the Catholic mission in Vanimo, on the north coast of the main island, will be active as P29FR in Papua New Guinea (PNG) until March 2012. Activity will be on 40/20/15 meters SSB. Operations will be limited to the local evenings, plus Saturday and Sunday afternoons. QSL via I2RFJ, direct or by by the Bureau. PLEASE no IRCs. For more details about P29FR, see QRZ.com.

QSL RECEIVED VIA LoTW: 4O3A, D2SG, FJ/OS1T, J7A, J45K, JT1DX, R1MVA, R1MVI, SV9CVY, V47KP, V48M, VK9HR, VK9LA, VP6BR, YJ0HA, Z2/UA4WHX, Z21BB, ZD8D, ZP6CW and ZS8MI

QSLS RECEIVED VIA MAIL: 3D2A, 5N6/YL2SW, 5Z4KI, 8R1AK/P, 9H4JX, 9H5PF, 9Y4D, C6AGU, CN8SG, CO2WF, FJ/OH2YL, HA5JI, HK4CZE, LA4UOA, LY2SA, PJ2/N0VD, S21YZ, SV2ASP/A, TE8X, UK8UWG, VK9NN, YB0AKM, YL2UZ, YU3AA, YW5M and ZD7XF

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

RI1, FRANZ JOSEF LAND. Victor, RI1FJL (ex-R1FJM, UA3ME), will be the new replacement for the August 2011- September 2012 research season at Kheysa Island in the Franz Josef Land Island group (EU-019). Victor replaces Eugeny, RI1FJ (ex-R1FJT, UA4RX), who left FJL on August 9th, onboard the "MV Somov". QSL RIFJL via RX3MM only direct (see QRZ.com for details). By the way, RX3MM is also the QSL Manager for Andrey, RI1FJA, (also on Kheysa Island).

S7, SEYCHELLES. Sam, DL5RDO, will be active as S79DO from the Seychelles (AF-024) between August 21st and September 6th. Activity will be on 40-10 meter mainly on CW using a Elecraft K2 w/100 watts and a vertical, and possibly some dipoles, depending on the location. Sam states, "Please note, that on Seychelles, 40m starts at 7050 kHz. So please look for me at 7055 kHz +/- on CW, somewhat higher in SSB." QSL via DL5RDO, by the Bureau or direct. Also via LoTW.

ST0, SOUTH SUDAN (Wrap-up). The ST0R team is now QRT (as of August 10th). Totals as of 0701z, August 10th, are 121,286/QSOs with 27,994/Unique callsigns. The breakdown is: 55458/CW, 47696/SSB and 18,1320/RTTY (New world Record). By continent: 15.52%/AF, 20.11%/AS, 34.48%/EU, 14.94%/NA, 5.75%/OC and 9.20%/SA. For more details and updates watch: http://www.dxfriends.com/SouthernSudan2011
QSL via EA5RM direct. Online log is available on the Web page at: http://www.dxfriends.com/SouthernSudan2011/log.php
The OQRS (Online QSL Request System) is now up and running at: http://www.dxfriends.com/SouthernSudan2011/qsl_service/index.php

SV9, CRETE. Christo, LZ3FN, will be active as SV9/LZ3FN from Crete (EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA 1400) between September 15-24th. Activity will be on all bands using CW and SSB. QSL via LZ1PM.

TC2, TURKEY. Only a few more days to work TC2X from the Asiatic side of Istanbul until August 16th. The operator is Pertti, OH2PM. He did participate in the WAE DX CW Contest this past weekend. QSL via OH2BH.

UM20, UZBEKISTAN (Special Event). Look for special event station UM20Y between August 25th and September 10th. Activity is to celebrate the 20th anniversary of the Republic of Uzbekistan's independence. Activity wil be on the HF bands using CW, SSB and RTTY. QSL via UK8AR.

V4, ST. KITTS. Jon, W5JON, will once again be active as V47JA from the Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG), hillside QTH located 300 feet from overlooking the Caribbean Sea and Atlantic Ocean, between October 10th and November 5th. Activity will be on 80-10 meters (including 60m) using a Kenwood TS-590S, Yaesu FT-857D, and SB200 Amplifier. Antennas include: a 80-10m Multi-band Dipole, and metal roof mounted S9, 18' and 31' Verticals and 3 element Yagi for 6m. His operations will include the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. XYL Cathy (W5HAM) will occasionally operate as V47HAM. ALL QSLs go to W5JON.

V5, NAMIBIA. A German team of operators will activate Namibia between early December and mid-January (2012) as V5/homecall. Operators mentioned are Mathias/DJ2HD, Wolfgang/DH3WO, Ulmar/DK1CE and Ewald/DJ2BQ. Their tentative schedule is as follows:
V5/DJ2BQ – Decemeber 2nd-January 16th (2012)
V5/DJ2HD – December 26th-Janusry 16th (2012)
V5/DH3WO – December 26th-January 5th (2012)
V5/DK1CE - December 26th-January 5th (2012)
Activity will be on all bands 160-10 meters using CW, SSB and RTTY. Mathias, DJ2HD, states that he will focus on 160/80/40m and on RTTY on each band as well. QSL via the operator's home callsign, except QSL both V5/DH3WO and V5/DK1CE via DH3WO.

VU9, INDIA (Lighthouse Op). Members of the Bangalore Amateur Radio Club (VU2ARC) and Lions Clubs International Amateur Radio Club Station (VU2LCI) will be active as VU9LHA from the Alleppey Lighthouse (F 0706, WLOL 071, ILLW IN0004, Grid Loc. MJ89dl) in Alappuzha - Kerala between now and August 22nd, during the International Lighthouse/Lightship Week. Their

activity is also celebrating the 150th anniversary of the lighthouse.
QSL info and more details about the event can be found on QRZ.com.

ZA, ALBANIA. Ignatius, IW7DZJ, will be active as ZA/IW7DZJ between
now and August 22nd. Activity will be on the HF bands, and he plans
to activate a few lighthouses. QSL via IW7DZJ.

ZD8, ASCENSION ISLAND (Early Contest Announcement). Jim, N6TJ, will once
again be active from Ascension Island (AF-003) as ZD8Z next year. Activity
will be during the ARRL DX CW Contest (February 18-19th, 2012) as a
Single-Op entry. QSL via his new manager AI4U, direct or by the Bureau.

ZF, CAYMAN ISLAND. Bill, K9HZ, will be active as ZF2HZ from Rum Point,
Grand Cayman Island (NA-016, WLOTA 1042, WW Loc. EK99II) in December.
QSL via his home callsign.

Highlights of Solar and Geomagnetic Activity
08 - 14 August 2011

Solar activity began the week at moderate levels with an M3/1b flare
at 08/1810 UTC from Region 1263 (N17, L=301, class/area Ekc/720 on
04 August). This event was associated with a type II radio sweep and
a partial-halo coronal mass ejection which was mostly directed away
from the west limb. Region 1263 produced an additional M2/1b flare
at 09/0354 UTC. Activity levels increased to high as Region1263
produced an X6/2b flare at 09/0805 UTC which was associated with
type II and type IV radio sweeps as well as a full halo CME, which
also appeared to be primary travelling away from the west limb.The
X6 is the largest x-ray event for cycle 24 so far. Activity levels
dropped down to low levels on 10 August as Region 1263 rotated
around the west limb. Activity levels further decreased to very low
levels on 12 August and remained there through the end of the
summary period.

A greater than 10 MeV proton enhancement was observed beginning at
08/1905 UTC in association with the M3 flare from Region 1263. The
enhancement peaked at 4 PFU at 08/2000 UTC. Greater than 100 MeV and
10 MeV proton events began on 09 August in association with the X6
flare described previously. The greater than 100 MeV proton event
began at 09/0825 UTC, reached a peak of 2.6 PFU at 09/0840 UTC, and
dropped below threshold at 09/1035 UTC. The greater than 10 MeV
proton event began at 09/0845 UTC, reached a peak of 26 PFU at
09/1210 UTC, and ended at 09/1715 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit reached
high levels on 08 August and stayed high through the end of the day
on 13 August. The electron flux levels were at normal to moderate
levels on 14 August.

Geomagnetic field activity began the week at generally quiet to
unsettled levels with isolated active and minor storm periods at the
high latitudes. Activity decreased to quiet levels for 11-12 August
```

and then increased slightly to quiet to unsettled levels for 14 August. Solar wind observations from the ACE spacecraft showed a positive polarity coronal hole high speed stream from 08-10 August. Solar wind data also indicated a solar sector boundary on the 13th at about 2000 UTC, followed by the onset of a negative polarity coronal hole high speed stream.

Forecast of Solar and Geomagnetic Activity
17 August - 12 September 2011

Solar activity is expected to be very low to low for 17-23 August. An increase to low to moderate is expected as old Region 1263 returns and transits the disk from 24 August to 06 September. Activity levels are likely to return to low or very low levels for the remainder of the outlook interval from 07-12 September. In addition there continues to be a chance that a new, rapidly emerging flux region could increase activity to moderate or greater levels at any time during the outlook period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to increase to high levels for 18-23 August. Moderate levels are expected for 24-27 August, followed by a few days for high levels for 28-29 August. Low to moderate levels should prevail for 30 August through 04 September, followed by another increase to high levels for 05-07 September. Normal levels should resume on 08 September and continue through the end of the outlook period.

Geomagnetic field activity is expected to be generally quiet to unsettled for 17-22 August as there may be weak driving from a coronal hole high speed stream (HSS). Quiet levels should prevail for 23-25 August and another increase to quiet to unsettled is expected for 26-28 August from another HSS. Quiet levels are expected to return for 29 August through 02 September. An increase to unsettled with a chance for active periods is expected for 03-05 September due to another recurrent HSS. Quiet levels should predominate for 06-10 September, and another increase to quiet to unsettled from a recurrent HSS is expected for 11-12 September.

759. [DXNL] DXNL 1741 (Aug 17, 2011)

DXNL 1741 - Aug 17, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5W, WESTERN SAMOA, OC-097
W7GJ plans to work on 6m via EME signing 5W0GJ from Western Samoa from
Aug 23-31. QSL via homecall.

7P, LESOTHO
EI7CC will be active as 7P8PB during his holidays from Aug 18-30.
QSL via homecall and the log will be uploaded to the LoTW also.

A3, TONGA, OC-169
Craig,KI0SO, is working as A35CT mainly in SSB on 20m-6m from Lifuka
in the IOTA group Ha'apai (OC-169, Loc AH20te). He is using an Elecraft
K3, a Yaesu FT-450 with Force-12 C3 antenna and a M2 6m antenna.
Craig has been spotted on 20m SSB from 0830-1030 UTC. The length of
his stay is not known. QSL via CBA an KI0SO (with some delay).

DL, GERMANY
A few HAM will test several monoband verticals (80m-10m) as DL0M using
large kites flying up to 100m high. Listen for DL0M in CW, SSB and
digital modes on Aug 20/21.
Reports are welcome, also via e-mail to marcus@dl1mh.de

E5, SOUTH COOK ISLANDS, OC-013
Bruce,ZL1AAO, plans to show up from Rarotonga (OC-013) signing E51AAO
on the HF bands from Aug 19-28, besides his touristical activities.
QSL via homecall, the log will be uploaded to eQSL and LoTW as well.

Andy,AB7FS (E51AND/ZK1AND/ZK2AND), and his XYL Kathy,KB7SCH (ZK1SCH),
are working from Arorangi Beach on Rarotonga (OC-013) between Aug 15
and Sep 3. Andy is a member of the Straight Key Century Club (#7723)
and planst CW around 14050 kHz listening especially for SKCC members.
This is NOT a DXpedition, only holiday with some amateur radio. A good
time for skeds is the ANZA DX net on 14183 kHz, daily around 0515 UTC.
Despite limited connections you may also try via e-mail to:

Kiaorana@minetfiber.com
QSL via AB7FS.

G, ENGLAND, EU-005
Members of the Otley Amateur Radio Society will activate the special event station GB0YAA to support the Yorkshire Air Ambulance Charity on Aug 20/21. QSL via bureau.

GU, GUERNSEY, EU-114
A large group of the Telford and District Amateur Society will be QRV as GP3ZME/p from Guernsey (EU-114) from Aug 19-24. Operations will take place on 80m-2m and the SHF bands. QSL via G3ZME.

KH5, JARVIS ISLAND, OC-081
The DXpedition to Jarvis was postponed again to November/December 2012.

PJ2, CURACAO ISLAND, SA-099
Anja,PJ2/DH2AK, and Torsten,PJ2/DL1THM, will be active "holiday style" from Curacao mainly in SSB on 20m between Aug 21 and Sep 8.
QSLs via bureau to their homecalls, for direct QSL route see QRZ.com.

PJ7, SINT MAARTEN, NA-105
Isao,JH1ROJ/KG8XV, plans to be QRV as PJ7ROJ from Sint Maarten (NA-105) in CW and SSB on all bands from Aug 18-25. He has a FT-450, a 500w PA, a HF6V and a 2-ele-yagi for the high bands. Isao will listen especially for JA and Asia on the high bands. QSL via his homecalls.
The log will be uploaded to the LoTW after the operation.

PY, BRAZIL, SA-045
Orlando,PT2OP, will sign PQ8OP and Fred,PY2XB, will sign PQ8XB from the Parazinho Biological Reserve on the Bailique archipelago (SA-045). They will activate the island in SSB, CW and digital modes on 40m-10m from Aug 17-24. They have also equipment for 6m and will listen for band openings there. QSLs for PQ8OP via PT2OP and PQ8XB via PT7WA.

RI1, FRANZ JOSEF LAND, EU-019
Andrey,RI1FJA (RA3MD), and Victor Ivanov,RI1FJM, started their over-winterung on Heyss Island on Franz Josef Land in early August. Andrey can be found on the bands using his SteppIR yagi while Victor wants to focus on the EME business. Both OMs will stay until September 2012.
QSLs for both calls unfortunately only direct via RX3MM.

S7, SEYCHELLES, AF-024
Dieter,DL5RDO, and family will spend their holidays on the Seychelles from Aug 21 until Sep 6. He will be active as S79DO from La Digue until Sep 2 and after that from the main island Mahe (both IOTA AF-024).
QSL via homecall anf the log will be uploaded to the LoTW.
His equipment includes a K2/100 and a vertical. Dieter will work mainly in CW and some SSB on 40m/30m/20m/15m/10m. Note: On the Seychelles the 40m band starts only at 7050 kHz so his CW operation can be expected around 7055 kHz.

ST0, SOUTH SUDAN
The DXpedition ST0R is history. They have set-up a new world record in RTTY for the first activation of a new DXCC. The DXpedition has logged 121.286 QSO with 27.994 different callsigns in 176 DXCC entities and all CQ zones. For the friends of statistics:
CW: 55.458 QSOs, SSB 47.696 QSOs and RTTY: 18.132 QSOs.

T32, EASTERN KIRIBATI, OC-024
Giovanni,I5JHW, will show up as T32JB wotking in SSB, CW and RTTY from the Captain Cook Hotel on Kiritimati (OC-024, Christmas Island) from Aug 17-24. QSL via I5JHW. See also: http://i5jhw.weebly.com

TK, CORSICA, EU-014
Lee,F5MUX, will be QRV again as TK5UX working mainly in CW on HF from Corsica (IOTA EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between Aug 20 and Sep 3. Every QSO will be confirmed via eQSL.
QSL via F5MUX, via bureau preferred.

VP8/A, ANTARCTICA, AN-016
Brian,VK0BFG, will leave Casey Station by the end of December 2011. He can be found on 40m on saturday/sunday afternoons on 7095 kHz usually. His radio is an Alinco DX70 with Ameritron AL811 and an Inverted-V dipole. The center of his dipole is about 100 meter high.
See also following websites:
http://no.nonsense.ee/qthmap write OC53GR32 and click Show
http://brianantarctica.blogspot.com
http://www.french-polar-team.fr/VK0_Casey_Station_Antarctica.php

ZA, ALBANIA
Ignatius,ZA/IW7DZJ, is working on HF until Aug 22 and plans to activate some lighthouses as well. QSL via IW7DZJ.

ZL, NEW ZEALAND
Paul,ZL4PW, will activate the special callsign ZL4RUGBY from Aug 19 until Oct 31 to mark the Rugby World Cup. QSL via ZL4PW.
The log will be uploaded to the LoTW as well.

DXCC: Since July 25 the DXCC award is not issued in RTTY anymore. It is replaced by the DXCC Digital.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 20/21: SARTG RTTY Contest
Aug 20/21: CW Open Competition
Aug 20/21: DARC HF-Fax-Contest
Aug 20/21: Keymen's Club of Japan Contest
Aug 20/21: North American QSO Party

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-026, HL4, Cheju Island group: The OPs HL4MC, HL4CEL, HL4RBR, HL2UVH,
DS4EOI, JA1HGY and JH1AJT will activate the special callsign D9A in CW,
SSB, RTTY and FM on 160m-10m and 6m/2m from Aug 19-26. QSL via JA1HGY.
Logsearch: http://www.clublog.org/charts/?c=d9a

EU-016, 9A, Dalmatia South group: OM Csaba,9A/DH7KU, will be QRV from Ciovo
in CW on 40m and 20m from Aug 21 until Sep 2. QSL via DH7KU.
His website is: http://www.mydarc.de/dh7ku

EU-038, PA, Noord Holland/Friesland/Groningen Province group: PD/DO1BEN and
PD/DO1IQ will be active from Texel from Aug 22-28. QSLs via homecalls.
Their website is: http://www.do1ben.de

EU-073, I7, Puglia (Taranto) Region group: A few HAMs are going to activate
Isola San Pietro as IJ7DX from Aug 18-21. QSLs via IZ7LDC.
Their website is: http://www.armi.ta.it/ij7dx

EU-125, OZ, Jylland West group: OZ/DL2GF will show up from Fanoe Island in
CW/SSB on 40m-10m from Aug 22 until Sep 3. QSL via DL2GF.

EU-129, DL, Usedom Island group: DL0MFK will activate the lighthouse in
Karnin on Usedom (WFF DLFF-075) during the ILLW on Auf 20/21.

NA-026, W2, New York State group: A team of the Great South Bay Amateur
Radio Club will be QRV as W2GSB from the lighthouse on Fire Island.
They plan to work all 24 hours during the ILLW on Aug 20/21.
QSL direct via W2GSB (see QRZ.com).
Their website is: http://www.gsbarc.org

OC-142, VK4, Queensland State (South Coast) Centre group: VI4FI is working
during the ILLW on Aug 20/21 as well from the Sandy Cape lighthouse on
Fraser Island. QSL via VK4MIA. See also: http://www.sandycape2011.com

OC-187, VK4, Queensland State (North Coast) North group: JA1NLX/VK4 will be
QRV from Lizard Island in CW/SSB on the usual IOTA-QRGs from Aug 19-23.
QSLs via bureau, direct or via LoTW.
His website is: http://ja1nlx-aki.blogspot.com

OC-223, VK2, New South Wales State South group: VK2IR, VK2RF, VK2BNG, VK2VEC
and others are activating Montague Island as VK2CL from Aug 19-22.
QSL via VK2IR. More information can be found at: http://www.haraoa.com

SA-018, CE7, Los Lagos Region South group: An ILLW team will sign XR7F from
Isla Grande de Chiloe on Aug 20/21. QSL via CA7PGO (bureau/direct).

SA-055, LU, Buenos Aires (Delta Del Parana) Prov group: The Radio Club
Argentino is going to hit the airwaves from the lighthouse on
Martin Garcia Island (SA-055) from Aug 18-22. They will sign LR5D in
the SARTG WW RTTY Contest. See also: http://www.lu4aa.org
QSLs via LU4AA.

14th International Lighthouse/Lightship Weekend (ILLW): Not less than 420 stations announced to join the upcoming ILLW on Aug 20/21 or hand out at least an IOTA group. A few ILLW operators are using their own light-house numbers, parallel to the ARLHS or WLOTA numbers.

July 26 -- New Mexico Hams Provide Communications Support During Wildfires <http://www.arrl.org/news/new-mexico-hams-provide-communications-support-during-wildfires>

The Hope for the Warriors Foundation Run for the Warriors is a 10k, 5k and 1 mile run taking place in Lindenhurst, New York, November 13. John Melfi, W2HCB <http://www.qrz.com/db/w2hcb>, EC/RO of Babylon, New York and President of the Great South Bay ARC is seeking communicators to work the event. "We have had operators from Staten Island, Manhattan and as far east as the twin forks on eastern Long Island," said Melfi. "For the past two years we have had 65 operators and would like to see an increase this year. This organization helps Veterans and their families with medical and housing needs." To volunteer, please see the Great South Bay Amateur Radio Club <http://www.gsbarc.org/> Web site.

Follow ARRL EMCOMM on Twitter here <http://twitter.com/#%21/ARRL_EMCOMM>.

The 2012 edition of EMCOMMWEST <http://www.emcommwest.org/> will be held the first weekend in May, 2012. Starting on Friday, May 4, and running through Sunday, May 6, EMCOMMWEST will again be hosted in Reno, Nevada at the Grand Sierra Resort.

The ARRL Minnesota Section has an excellent ARES Web site. Check it out here <http://www.minnesotaares.org/>.

==> ECAC STUDYING ARES/NTS ISSUES

A committee of the ARRL Board of Directors has tasked the League's Emergency Communications Advisory Committee (ECAC) with studying and making recommendations for possible changes in the structural and functional relationships between the venerable National Traffic System and ARES. Specifically, the charge to the committee states: "The Amateur Radio Emergency Service and the National Traffic System exist as the ARRL's implementation of the basic principle stated in 97.1(a), 'Recognition and enhancement of the value of the amateur service to the public as a voluntary non-commercial communication service, particularly with respect to providing emergency communications.' The Emergency Communications Advisory Committee is hereby tasked by the Programs and Services Committee to recommend improvements to ARES and NTS so that the amateur service can better serve the public in providing emergency communications. Specific topics should include, but not be limited to, the following: (1) ARES and NTS objectives and organizational structures; (2) integration between ARES and NTS; (3) Training, certification, and credentialing; and (4) relationships with served agencies. Progress reports should be submitted to the PSC every 90 days and the final report should be submitted by June 1, 2012."

In discussions with ECAC Chairman Dale Williams, WA8EFK, his feeling is that the study is an opportunity to take a fresh look at the overall organizational structure and look for improvements in several areas, including how we are perceived by served agencies: local EMA versus FEMA at the national level, and the programs' roles in multi-jurisdictional incidents. Williams says the committee should study questions such as how well we fit our goals with their needs; how they view our ability to fill their needs; and how promptly we are able to respond.

On the messaging side of the equation, questions the committee will consider are how well we handle messages including tactical versus strategic messaging, and speed versus accuracy. What is our error rate? Is the standard NTS message format sufficient for contemporary needs?

Williams said that there is a feeling that the "last mile relationship between traffic handlers and ARES members seems to be broken. Neither feels an affinity towards the other. NTSers in general don't join ARES and vice-versa, yet both groups have claims on abilities to handle traffic in an emergency. Fixing this may also be a goal of the committee."

The committee met in teleconference on August 3 to consider and edit drafts of surveys planned for release to gain field input on these questions of ARES and NTS, and possible integration. The surveys should be sent to the field soon. The committee meets again on September 7.

Readers are invited to contact their ECAC representatives to provide their own input on these questions: Chairman Dale Williams, WA8EFK <dale.wms1@frontier.com> (Great Lakes); Jim Cross, WI3N <jcross3@gmail.com> (Atlantic); Bill Niemuth, KB9ENO <bniemuth@new.rr.com> (Central); Jim Zahradnicek, KD0S <kd0s@kd0s.com> (Dakota); Jim Coleman, AI5B <wpcde911@itsfast.net> (Delta); Jim Mezey, W2KFV <w2kfv@aol.com> (Hudson); Reynolds Davis, K0GND <reynoldsD1@aol.com> (Midwest); Dave Colter, WA1ZCN <dbcolter@myfairpoint.net> (New England); Gordon Grove, WA7LNC <gorgrolnc@juno.com> (Northwestern); James Latham, AF6AQ <jrlatham@sbcglobal.net> (Pacific); Charlie Miller, AE4UX <ae4ux@bellsouth.net> (Roanoke); Jeff Ryan, K0RM <k0rm@arrl.org> (Rocky Mountain); Rick Palm, K1CE <k1ce@arrl.net> (Southeastern); Grant Hays, WB6OTS <ghays@cis-broadband.com> (Southwestern); Glen Reid, K5FX <k5fx@arrl.net> (West Gulf), and Doug Mercer, VO1DTM <vo1dtm@hotmail.com> (Radio Amateurs of Canada). The Board liaison is Mickey Cox, K5MC, and the ARRL HQ liaison is Emergency Preparedness Manager Mike Corey, W5MPC.

==> EC-001 UPDATES

Field Classes and Exams for Introduction to Emergency Communication Ready to Launch

The infrastructure to re-launch field instruction in ARRL's Emergency Communications training program is now in place.

The printed course transcript is now available in the ARRL store: www.arrl.org/shop/The-ARRL-Introduction-to-Emergency-Communication-Course/ <http://www.arrl.org/shop/The-ARRL-Introduction-to-Emergency-Communication-Course/>

Field exams for the new course have been developed and are available from the ARRL Continuing Education Program office. You can review requirements for registering as a Field Examiner and find the information you'll need to perform those responsibilities, including instructions for ordering exams, at: www.arrl.org/emergency-communications-field-examiners <http://www.arrl.org/emergency-communications-field-examiners>

You can find authorized ARRL Field Instructors and Field Examiners by conducting a search of our database at: www.arrl.org/find-a-fi <http://www.arrl.org/find-a-fi> and www.arrl.org/find-a-fe <http://www.arrl.org/find-a-fe>.

We've also just launched a new searchable database for Field Instructors and Field Examiners to register their classes and/or exam sessions on our website www.arrl.org/find-an-emcomm-class-exam <http://www.arrl.org/find-an-emcomm-class-exam>.

EC-001 Field Instructors Needed

Field Instructors are volunteers who commit their time and expertise to offer classroom instruction of the ARRL Amateur Radio Emergency Communications Course. Volunteer instructors may now conduct classroom instruction covering the material in the new Introduction to Emergency Communication course.

Field Instructors must be registered with the ARRL Continuing Education Program and must meet certain requirements:

- Completion of EC-001 (old or new version)
- Completion of FEMA IS-100, 200, 700 and 800
- Must be 18 years of age with Technician or higher license
- ARRL member
- Recommendation of Section Manager

If you are interested in serving as an ARRL Field Instructor for EC-001 you may submit an application here <http://www.arrl.org/application-for-emcomm-mentor-or-field-instructor>.

==> ARRL PARTNERS' ROUNDUP

American Red Cross <http://www.redcross.org/> - Here is an excellent heat wave safety check list <http://www.redcross.org/portal/site/en/menuitem.86f46a12f382290517a8f210b80f78a0/?vgnextoid=8cc6a5f0f013b110VgnVCM10000089f0870aRCRD>.
Summer heat is at record highs in many parts of the country. Be safe out there.

Federal Emergency Management Agency <http://www.fema.org/> - September is a time to remember, and a time to prepare. Here is information on the National Preparedness Month <http://community.fema.gov/connect.ti/READYNPM>, of which ARRL is a coalition member. ARRL Media and Public Relations Manager, Allen Pitts, W1AGP, offers the following advice on National Preparedness Month.

There are only 3 weeks left before September, (yikes!) so time to sign up is short. In the past years, clubs and ARES groups have been among the very top activities for National Preparedness Month and listed on their national government website - and it got noticed! It doesn't require you to do much more than what your groups is probably doing already, so there's no reason not to sign in. Besides that, you can get good materials for newsletters and promotional media for free from them.

Once you sign up, look around their website - there are places you can post pictures and stories on their national website too.

It's a no-brainer for PIOs and national exposure.

APCO International's 77th Conference and Expo <http://www.apco2011.org/> ARRL Staff members Mike Corey, W5MPC, and Ken Bailey, K1FUG, attended the Association of Public Safety communications Officials International (APCO) Conference held in

Philadelphia August 7 - 10, 2011.

During this four day event attendees could sit in on numerous presentations on topics such as interoperability, the FCC's narrowbandings mandate that impacts Public Service Communications, P25 modes of operations, ICS structures, and a host of other public safety communications concerns. Opportunities abounded to learn new skills, explore new products and services and connect with public safety officials and hams alike.

The Salvation Army <http://blog.salvationarmyusa.org/?p=6871> - published photos from the recent, worst local flood in history (Minot, North Dakota) here <http://blog.salvationarmyusa.org/?p=6871>. They show the extreme devastation and caseworkers preparing for long-term assistance.

REACT International <http://www.reactintl.org/> has its Board meeting on August 14. The REACTer <http://www.thereacter.com/> is the official publication of the organization, which has the following objectives: (1) To assist in any emergency by supplying volunteer radio communications in cooperation with authorities and other volunteer organizations; (2) To practice and encourage operating excellence through professional communication techniques; (3) To maintain equipment at peak efficiency and operate in accordance with all government regulations; and (4) To advise the public of correct effective use of the emergency frequencies, such as Citizens Band (CB) channel 9, General Mobile Radio Service (GMRS) frequency 462.675 MHz, and Cellular 9-1-1.

National Weather Service SKYWARN® <http://www.nws.noaa.gov/skywarn/> -- Complete information on this critical volunteer spotter program in which radio amateurs play a major part can be found here <http://www.nws.noaa.gov/skywarn/>. The ARRL recently updated its memorandum of understanding (MOU) with the NWS. See the new document here <http://www.arrl.org/files/media/News/ARRL-NWS_MOU_June2011.pdf>.

National Public Safety Telecommuncations Council <http://www.npstc.org/> -- NPSTC's quarterly newsletter is online and available for viewing <http://www.npstc.org/newsletter.jsp?vol=11&issue=2> .

==> LETTERS

Force Multiplier, Not Last-Ditch Fall Back

In re last month's Op-Ed piece, one of the first questions I was asked a number of years ago in Tempe, Arizona, is why [public safety communications systems are] going to fail. My answer was I didn't know they would fail, but I was pretty sure that in a major disaster, they would become channel limited and their trunked systems would be operating at capacity. Amateur Radio adds capacity when needed. As the author noted, it's not free, but it's close.

Walt Schucknecht, N7IZM has another way to illustrate it: he puts us in the role of the "color commentator." Sure, you could listen to the ball game without Mark Grace telling you what the players are going through, but Mark adds a richness to the presentation because he's been in the batter's box. Presenting Amateur Radio in the same way sets achievable expectations and if your served agencies have issues, your team is positioned to quickly and quietly step in. Later boasting about how you saved the day, however, is probably not a smart way to win relationships and be invited back at a later date. Keeping a low profile, and being able to deliver a meaningful response when requested will keep you in demand.

In my opinion, which is likely not shared by everyone, the days of a Katrina-like total system failure are largely behind us. The big boys had their butts handed to them, and have since spent a lot of effort, time and money to dissect the underlying problems and strengthen them appropriately. A case in point was when well over 500,000 citizens were evacuated during the California Wildfires in San Diego. The system was strained, but it didn't collapse.

Where these systems frankly don't play well is with the more local issues, like coordinating the evacuation of a nursing home or smaller neighborhoods. This is being a force multiplier as the author points out. What I mean is, do you want to tie up a bunch of firemen or sworn officers, or does it make sense to use volunteers to go house to house thus multiplying the effect of those few professionals? Having a wide area communications system in place that we can bring to the party makes us only that much more valuable.

I really believe that Al hit the nail right on the head.-- Rick Aldom, W7STS, Assistant Section Emergency Coordinator, Arizona

Just wanted to comment that I am in 100% agreement with the op-ed piece in the last issue: It's time we started touting our capabilities as a "force multiplier," but to be able to do that, we need truly trained operators, and that means training in radio basics. Those of us on the sharp end of the rope serving our cert teams, etc. and people in our neighborhoods and workplaces need competent people to man net control and to actually handle our traffic. That's the part NTS is supposed to play: training, as well as long haul messaging capability. We're rapidly losing this capability. Operators aren't used to thinking beyond infrastructure, such as repeaters, etc. That's where we fall down -- our operators don't have the access to the training they need to acquire the skills they must have. -- Richard Webb, NF5B, Chairman, NTS Central Area Staff

Re: The Dan Woll/Barneveld Tornado Story

Wow! You are quite right. Woll's story <http://host.madison.com/ct/news/local/article_fb1f9c80-9140-11e0-84c2-001cc4c002e0.html> is gripping, compelling. It should be compulsory reading for every Amateur Radio operator who thinks that he/she is ready to handle emcomm duties. No amount of net affiliation, parades, bicycle rallies or

general drill duty can train a volunteer for what to expect in the way of the charged atmosphere of a real disaster. Unfortunately, just getting people to read Woll's account doesn't mean that it will be understood or taken to heart.

I'm certainly not advocating that we all become licensed amateur psychiatrists, in addition to radio operators. But I think, in addition to an equipment check and a basic personal appearance scrutiny, there should also be some compulsory, basic sensitivity training provided for anyone volunteering for duty in a disaster area. - Dick Montgomery, N3DV <http://www.qrz.com/db/n3dv>, Bedminster, New Jersey

==> BASIC TRAINING: ICS

The government's Incident Command System (ICS) was developed in the 1970s following a series of fires in California's urban interface. Property damage ran into the millions, and many people died or were injured. The personnel assigned to determine the causes of these outcomes studied the case histories and discovered that response problems could rarely be attributed to lack of resources or failure of tactics. Surprisingly, studies found that response problems were far more likely to result from inadequate management than from any other single reason.

The Incident Command System was developed as a standardized management tool for meeting the demands of small or large emergency or non-emergency situations. The ICS represents "best practices" and has become the standard for emergency management across the country. It may be used for planned events, natural disasters, and acts of terrorism. It is a key feature of the National Incident Management System <http://training.fema.gov/EMIWEB/IS/is700.asp> (NIMS).

The ICS is a management system designed to enable effective and efficient domestic incident management by integrating a combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure. ICS is used by all levels of government--Federal, State, local, and tribal--as well as by many private-sector and nongovernmental organizations. ICS is also applicable across disciplines. It is normally structured to facilitate activities in five major functional areas: command, operations, planning, logistics, and finance and administration. More in the next issue. - FEMA

==> HURRICANE SEASON HEATS UP: REVIEW ARES DISASTER PRINCIPLES

1. Keep the QRM level down. In a disaster, many of the most crucial stations will be weak in signal strength. It is essential that all other stations remain silent unless they are called upon. If you're not sure you should transmit -- don't. Our amateur bands are very congested. If you want to help, study the situation by listening. Don't transmit unless you are sure you can help by doing so. Don't ever break into a disaster net just to inform the control station you are there if

needed.

2. Monitor established disaster frequencies. Many localities and some geographical areas have established disaster frequencies where someone is always (or nearly always) monitoring for possible calls. When you are not otherwise engaged, it is helpful simply to sit and listen on such frequencies, some of which are used for general rag-chewing as well as disaster preparedness drilling.

3. Avoid spreading rumors. During and after a disaster situation, especially on the phone bands, you may hear almost anything. Unfortunately, much misinformation is transmitted. Rumors are started by expansion, deletion, amplification or modification of words, exaggeration or interpretation. All addressed transmissions should be officially authenticated as to their source. These transmissions should be repeated word for word, if at all, and only when specifically authorized. In a disaster emergency situation, with everyone's nerves on edge, it is little short of criminal to make a statement on the air without foundation in authenticated fact.

4. Authenticate all messages. Every message which purports to be of an official nature should be written and signed. Whenever possible, amateurs should avoid initiating disaster or emergency traffic themselves. We do the communicating; the agency officials we serve supply the content of the communications.

5. Strive for efficiency. Whatever happens in an emergency, you will find hysteria and some amateurs who are activated by the thought that they must be "sleepless heroes." Instead of operating your own station full time at the expense of your health and efficiency, it is much better to serve a shift at one of the best-located and best-equipped stations. This station will be suitable for the work at hand, and manned by relief shifts of the best-qualified operators. This reduces interference and secures well-operated stations.

6. Select the mode and band to suit the need. It is a characteristic of all amateurs to believe that their favorite mode and band is superior to all others. For certain specific purposes and distances, this may be true. However, the merits of a particular band or mode in a communications emergency should be evaluated impartially with a view to the appropriate use of bands and modes. There is, of course, no alternative to using what happens to be available, but there are ways to optimize available communications.

==> EMCOMM EAST: SEPTEMBER 25, ROCHESTER, NEW YORK

The fourth annual EmComm East emergency communications conference is set for September 25, 2011, at the St. John Fisher College, Rochester, New York. EmComm East is an ARRL-sanctioned Amateur Radio emergency communications conference where Amateur Radio operators involved in emcomm can attend training sessions on technical topics, learn from served agencies, and interact with other emcomm operators from all over

the area.

Featured speaker this year is Mike Corey, W5MPC. Corey is the Emergency Preparedness Manager for the ARRL. His major responsibilities include interfacing with ARRL's national partners, emergency communications training, support and guidance for the ARRL field organization on emergency communications issues, organization of the ARRL HQ Emergency Response Team, MOU compliance, and addressing the development and implementation of an organizational disaster response plan complete with supporting procedures and training.Register on-line at: EmComm East <http://www.emcommeast.org/>. The $30 registration fee includes continental breakfast and lunch. See you in September! -- EmComm East, September 25, 2011, 8:00 AM - 5:00 PM, St. John Fisher College, Rochester, New York

==> K1CE FOR A FINAL

This is my last chance to communicate with readers before the upcoming tenth anniversary of 9/11 next month. I know I mentioned this in another issue earlier this year, but if you missed it, here is another chance to read a first-person report <http://www.w2ik.info/> by 9/11 first responder and radio amateur Bob Hejl, W2IK, that I found to be raw and powerful. Hejl was among the first to be on the scene on 9/11. The author is suffering from PTSD as a result of his experience. For me, it is a good way to remember and memorialize those courageous responders who helped others in one of world history's most horrific events. -- Rick, K1CE <http://www.qrz.com/db/k1ce>, Flagler County, Florida

ARRL - Your One-Stop Resource for Amateur Radio News and Information

Join or Renew Today! <http://www.arrl.org/join> ARRL membership includes QST <http://www.arrl.org/qst>, Amateur Radio's most popular and informative journal, delivered to your mailbox each month.

Subscribe to NCJ - the National Contest Journal <http://www.arrl.org/ncj>. Published bimonthly, features articles by top contesters, letters, hints, statistics, scores, NA Sprint and QSO Parties.

Subscribe to QEX - A Forum for Communications Experimenters <http://www.arrl.org/qex>. Published bimonthly, features technical articles, construction projects, columns and other items of interest to radio amateurs and communications professionals.

Free of charge to ARRL members: Subscribe <http://www.arrl.org/myarrl-account-management#%21/edit-info-email_subscriptions> to The ARRL Letter (weekly e-letter filled with news and features), the ARRL Contest Update (bi-weekly contest newsletter), Division and Section news -- and much more!

- A Personal Touch

NEW HF OPERATORS - THINGS TO DO

I hope new operators will take a spin in the ARRL's RTTY edition of the Rookie Roundup <http://www.arrl.org/rookie-roundup> - it's geared to a pace that operators new to HF will find comfortable. Don AA5AU's website on RTTY Contesting <http://www.aa5au.com/rtty.html> has loads of "how to" and "getting started" tips and guidelines. I hope to hear you on Sunday!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Your editor's spelling having improved "considerable", the Busted QSO section will remain quiet for this issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Aug 20-21

- ARRL 10 GHz and Up Contest
- ARRL Rookie Roundup--Digital

- SARTG WW RTTY Contest
- Russian District Award Contest
- CWops CW Open
- Keymen's Club of Japan Contest--CW
- North American QSO Party--Phone
- Feld-Hell New Member Sprint
- SARL Digital Contest
- Run For the Bacon--CW

Aug 27-28

- ALARA Contest
- Hawaii QSO Party
- SCC RTTY Championship
- YO DX Contest
- Kansas QSO Party
- Ohio QSO Party
- South Africa DX Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The North East Weak Signal Group (NEWS) is proud to sponsor the combined Eastern VHF/UHF Conference and Microwave Update 2011 Conference <http://www.microwaveupdate.org/> in Connecticut October 13-16. The conference committee consists of volunteers from NEWS, the Mt. Airy VHF Radio Club (PackRats) and others. The program begins on Thursday with a tour of the Haystack Observatory in Massachusetts and numerous speakers already lined up to give presentations on Friday and Saturday. There will be vendor's displays, Lab Measurement sessions, both indoor and outdoor selling, and much more. (Thanks, Ron WZ1V)

If you are interested in the ongoing competition for WRTC 2014 positions, you should visit the WRTC Rank <http://wrtc-rank.com/> website! The qualification standings are based on claimed and final contest scores to help operators seriously interested in qualifying to WRTC2014 to track their scores and other competitors. The website has recently made some changes and improvements - take a look! Site manager Marek SQ2GXO reminds us that WRTC Rank is not an official site - official scores <http://wrtc2014.org/team-selection/qualification-standings/> are maintained by WRTC 2014 committee member Dan K1TO.

Don't forget about the inaugural CW OPEN contest coming on Aug 20 and 21 to a band near you! Logging modules are supported on: N1MM, WriteLog, TR4W, and other contest logging software (see www.cwops.org/cwopen.html <http://www.cwops.org/cwopen.html>). The unusual format of multiple operating periods should be fun to try! (Thanks, Alan AD6E and Rob K6RB)

Tree N6TR has been off in the land of Zone 19 recently as judge of the Friendship Radiosport Games <http://en.wikipedia.org/wiki/Friendship_Radiosport_Games>. He is the

judge for the CW events and will be participating in the direction-finding event with his daughter, Theresa.

Dave W9ZRX <%20zephd@indy.rr.com> would like to put out an update to the VHF Super Partial Check files before the ARRL September VHF Contest. He would appreciate it if you would send him a copy of the Cabrillo from the July CQ VHF Contest.

DXCC Manager, Bill NC1L notes that dxcc@arrl.org is no longer in use. A number of new e-mail addresses <http://www.arrl.org/awards-branch-contacts> will be used to insure that your email will be delivered to the most appropriate person depending upon the subject.

The Scandinavian Activity Contest pre-issue of Pileup! <http://www.helsinki.fi/%7Ekorpela/PU/PU.html> will be published in early September. The editors are looking for any contest-related materials, serious or humorous, perhaps even both. Your experiences and tips in working SAC from outside Scandinavia would be especially welcome. (Thanks, Ilkka OH1WZ <ilkka@sral.fi>)

Hector XE2K reports on a new project or experiment from the Grupo DXXE <http://www.dxxe.org/gaceta/> led by Joaquin XE1R. The new gazette will share experiences and writeups from the members. The gazette will be in Espa&#65533;ol to begin with and they have just published edition numero uno. A second issue may be available as this newsletter is published. The editors will appreciate your comments and recommendations.

The Northern Lights Radio Society (NRLS) sponsors the Limited Rover Award with rules based on participation in the ARRL's UHF contest. If you submitted a log for that contest, you might quality! Check out the rules and rewards <http://www.nlrs.org/home/contest-activities/august-uhf-contest> on the NRLS website. (Thanks, Todd KC9BQA)

Todd also reports on another VHF+ participation-stimulating program - the Wisconsin V/UHF County Hunters Award or WIVUCH <http://www.wivuch.com/>. If you work at least 20 WI counties on any mix of bands 50 MHz and above - no repeater contacts allowed - you will receive an initial certificate. I can think of several regional VHF+ clubs that could sponsor a local equivalent!

The Aleutians are easy to find on a map but not so easy to get to! Nevertheless, Yuri N3QQ, John KE7V, and Yuri UA9OBA were able to hitch a ride from VP8DEU and put St Matthew on the air as KL7RRC as described in this ARRL website story <http://www.arrl.org/kl7rrc-challenges-the-aleutians>. (Thanks, Yuri N3QQ)

Very sad news comes from the U. S. heartland about the death of Tom Hammond N0SS after a very long battle with cancer. Contesters who attended the Dayton Hamvention will remember Tom, especially his increasingly sophisticated and challenging CW Pileup competitions

sponsored by the Kansas City DX Club. Tom was a personal friend for many years and Elmered many, many hams and contesters in the mid-Missouri area, including multiple world-record-holder Jeff N5TJ, then N0AQK. Tom was also a linchpin of the state's emergency communications team and made countless other contributions to Amateur Radio, including the Elecraft community.

Web Site of the Week - AMSAT <http://amsat.org/> is happy to announce the ARISSat-1 Chicken Little Contest. This is your opportunity to calculate, or guess, when ARISSat-1 falls out of orbit, defined as the time it crosses an altitude of 78 kilometers, which is considered to be the point of no return. While not part of the contest, the actual reentry may be visible depending on location. There are two student divisions and one adult division for the contest. Group submissions are encouraged with a limit of one per group or individual. (ANS thanks ARISSat-1/KEDR team for the above information and we thank AMSAT for the information from AMSAT bulletin ANS-226)

==> SIGHTS AND SOUNDS

The recent Contest University <http://contestuniversity.com/> held in Brazil generated a lot of Latin America buzz! Diego LU8ADX snapped a whole lot of photographs <http://picasaweb.google.com/LU8ADX> during the festivities and you'll recognize many familiar call signs from your contest logs.

John W0UN reminded me of this interesting video of coupled pendulums <http://www.youtube.com/watch?v=yVkdfJ9PkRQ&feature=player_embedded>. It makes a restful lesson in physics, doesn't it?

WORD TO THE WISE

Equinox - the vernal (spring) and autumnal (fall) equinoxes are the days on which there are equal amounts of light and dark. Hams known them also as the days on which the grey line goes directly over the poles, making for some very long-haul DX QSOs! Contest season is ramping up and is considered to be in full swing after the autumnal edition.

==> RESULTS AND RECORDS

There are loads of contest results to announce in this issue - we must have been very busy this past six months!

Results for the 2011 ARRL DX SSB Contest <http://www.arrl.org/contest-results-articles> are now online. Certificates <http://www.arrl.org/plaques-and-certificates> for the 2010 ARRL 10 GHz & Up Cumulative Contest have also been mailed - you can track the status of ARRL contest award processing online, as well. Make sure your club or group's Field Day submission is in the files by having a look at the Field Day Submissions <http://www.arrl.org/files/file/Field-Day/2011/August%201.pdf> page. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Sean KX9X also congratulates Thomas Johnson WD5K of Dallas, TX for earning The ARRL Fred Fish Memorial Award <http://www.arrl.org/ffma> (FFMA) #5. Tom submitted confirmation of his last-needed grid, CN77 and Tom's application was reviewed and approved by ARRL on July 28, 2011.

Sam VE5SF reports that results for the 2010 Canada Winter Contest <http://www.rac.ca/en/rac/programmes/contests> are now available on the RAC website.

We also have a basket full of state QSO party results:

Alabama QSO Party <http://www.alabamaqsoparty.org/> (Thanks, Jim KC4HW)

Georgia QSO Party <http://gqp.contesting.com/> (Thanks, John K4BAI)

Michigan QSO Party <http://www.miqp.org/> (Thanks, Dave K8CC)

Wisconsin QSO Party <http://www.warac.org/> (Thanks, Lynn K9KR)

Gmail users might want to check their system's Spam folder as there have been a number of reports about email containing notices of CQ WW Log Checking Reports (LCR) winding up there and not in the Inbox. This is apparently the result of some aggressive spam filtering and may not be a long-term issue but if you participated in the CQ WW and haven't received email for your LCR, take a look. Putting noreply@cqww.com in your Contacts list will also notify the spam filter to pass messages from that address. (Thanks, Bob N6TV)

OPERATING TIP

Be prepared when you get on for a busy contest weekend - if there are several contests active, print up some paper log sheets to record contact information from contests other than the one on which you're focusing. That way you can hand out points to everybody and probably add QSOs to your contest log, as well. After the contest, enter the QSOs into your computer log and generate a Cabrillo file by using the LogConv <http://www.ka5wss.com/Software/LogConv/> program from KA5WSS or other Cabrillo-friendly software. You may get an unexpected certificate for your troubles!

==> TECHNICAL TOPICS AND INFORMATION

Tom K8AZ has some good advice for stack builders. Measure or frequency sweep the feed lines to be odd λ-wave multiples. Make sure you include in the length any jumper from the tower to the antenna balun and the balun, too. When building feed lines, use coax off of the same spool.... and sweep it with an MFJ 259 or equivalent. Use identical baluns and make sure you know the phasing. Once installed, mark one side of the DE with red tape so you'll be able to tell what the proper phasing is years later when you're likely to have forgotten. (Of course, you do keep a station notebook, don't you?) The point about including baluns in the λ-wavelength is well taken - the phase shift through a balun is generally not specified and can be significant. If you want a specific electrical length of feed line between your

transmitter and the antennas, be sure to include the entire feed line including baluns, PL-258 adaptors, jumpers, and so forth.

Speaking of baluns, if your choke balun is getting warm, why? Choke balun dissipation occurs when it doesn't have sufficiently high common mode impedance at the frequency of use. For the reasons why, read Kevin Schmidt W9CF's paper on the effects of balun location <http://fermi.la.asu.edu/w9cf/articles/balun.pdf> in your antenna system and the necessary impedance to get the job done!

Peter PC2A points us to a good discussion of how to use one Beverage antenna at different frequencies by using band-pass filters as a splitter <http://wiki.contesting.com/index.php/VP6DX_receiving_antennas#Bandpass_filter-splitter>. The VP6DX group used this technique and it worked very well! More on Beverage antennas is waiting for you on Mike W0BTU's web site <http://www.w0btu.com/Beverage_antennas.html>. Just about every question you have on Beverages is addressed.

You've probably heard that placing dissimilar metals in contact with each other promotes corrosion but which combinations are better or worse than others? The farther apart the metals are in the Galvanic Series <http://www.corrosionsource.com/handbook/galv_series.htm>, the stronger the corrosion effects. The Corrosion Source website is full of good information about corrosion and how to prevent it.

Russ KB8U has placed pictures and text describing his portable Moxon rectangle <http://kb8u.ham-radio-op.net/moxon> for 6m on his website.

It assembles in about a minute, not counting hooking up the coax. There's plenty of life left in the summer sporadic E season and the ARRL September VHF QSO Party is not far away!

Another multi-antenna resource page <http://hem.passagen.se/sm0dtk/> is published by Martin SM0DTK. There are lots of antenna designs including the "Mini Horse" beam with dimensions for 40 through 2 meters.

Technical Web Site of the Week - There are lots of cookbook solutions to guy cable selection but if you really want to know the details, check out K7NV's excellent engineering analysis <http://k7nv.com/notebook/topics/guycable.html>. Each common type of guy cable is described and characteristics compared. Good stuff! (Thanks, Pete N4ZR)

==> CONVERSATION

A Personal Touch

Not so long ago, I was outside just after a warm summer's dusk with a group of friends, enjoying the good weather and clear skies. I also knew that the International Space Station was going to make a long, high-elevation pass at about the same time and suggested that the group move into the clear where they could see it. Several were amazed to

find out they could see it from the ground without a telescope and I assured them it would be surprisingly bright. (You can find visible passes of the ISS, optical flares from the Iridium satellite solar panels, amateur birds, and many other space objects at the Heavens-Above <http://heavens-above.com/> website.)

As we scanned the southwestern skies, I fielded questions about how high the station was (about 200 miles) and how fast it would travel (this pass was going to last more than four minutes) and how I knew this (the web is pretty useful at times). Then, right on time, a bright spot of light suddenly became visible and the questions turned to appreciative comments as it climbed up toward the zenith and passed overhead. As an added bonus, just before the pass was over, the station passed into the Earth's shadow and abruptly winked out, so I got to explain that, too. I fielded a lot more questions and I'm sure several of the watchers have done the same on their own since that evening.

What does this have to do with ham radio? Well, quite a bit, actually. While my friends knew of the station, they had never actually seen it. It was an abstract bit of knowledge that had little connection to their daily lives. But standing outside on a summer evening, watching it travel overhead and knowing that there were astronauts on board changed everything. That personal, visceral experience gave them a personal connection to what was just some initials an hour before.

Less long ago (like last weekend) I attended the annual Pacific Northwest DX Convention this weekend - I had a great time seeing all my friends again and catching up on how things were going in this far-flung corner of the U.S. It's said you can't go home again and that may be true...but you can sure visit! As I pulled into the Everett Holiday Inn parking lot, I noticed a large semi-trailer out front on the street painted a raucous lime green and festooned with insignia and logos. As it turned out, the Endurocross <http://www.endurocross.com/> motorcycle race was being held on the same weekend and we were sharing the hotel with a lot of racers and fans.

As you might expect, there was some overlap between the two groups, such as at breakfast. They were curious about the badges and call signs and after we got past the inevitable, "Ham radio - do you still do that?" they were quite interested in our "radio cross" events and DXing and that sort of thing. The key point, though, is that they were completely unaware of our existence.

The big semi had on its side a logo for the "world's fastest radio control technology" - so it's not like the race crowd is unaware of wireless technology. They are just unaware of us - that people are still using radio for fun and not as a kind of "smart wire" was news to them. We've essentially dropped out of that conversation because they had no connection with their lives. Without that personal connection, ham radio has little chance of re-entering their conversation with the world.

Here's where you and maybe your club come in. Unless we - as in you and I - get out there and put ourselves in the public eye, we (and ham radio) are going to stay a caricatured mystery to the lay public even though they may be technically savvy and bright. People are not going to pick up a brochure and somehow get interested enough to participate in ham radio. They need to see real people doing something that looks useful (such as building a kit or antenna) and fun (such as radiosport).

The "real people" I mentioned - that's you and me, folks. We have to get out of our basements and garages and spare bedrooms and put feet on the ground where people are. We need to be doing something where and when other people are around. A club can set up shop every so often at a mall or near sports fields (kids everywhere!) or in a favorite public park - anywhere people are likely to see you and have enough free time to ask questions.

Just get out there and be yourselves! Laugh a lot. Smile and shake hands. Don't sit behind a table like it was a castle wall - stand out front and greet people in a friendly way. Talk to them and hand them a flyer with your website and lists of local clubs and stores - don't wait for them to take it. Look like you're having a good time, for crying out loud! It's amazing how well just having fun works as a marketing tool.

A simple station will do - have somebody building a kit or accessory or antenna. You don't have to work DX, just make a few contacts a couple of states away. Have some test equipment - hint, kids love to talk into a microphone and see an oscilloscope trace jiggle. Print up some flyers about ham radio in your town - invite them to a club meeting. Have a demonstration of some special technique like working through a satellite or using a digital mode with a computer. If you can operate during a contest when contacts are made far and wide - set up a map on a piece of foam-core board and stick pins in to show where you've contacted.

Just as a bright point of light in a darkening azure sky can open a mind in unexpected ways, so can a chance encounter with you and your radio, having a good time. You, too, can be an astronaut right here on Earth.

73, Ward N0AX

==> CONTESTS

17 Aug to 30 Aug 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Rookie Roundup--Digital, from Aug 21, 1800Z to Aug 21, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See Web. Rules <http://www.arrl.org/contests>

SARTG WW RTTY Contest--Digital, from Aug 20, 0000Z - see website. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Oct 10. Rules <http://www.sartg.com/contest/wwrules.htm>

Russian District Award Contest--Phone,CW, from Aug 20, 0800Z to Aug 21, 0800Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Russian district. Logs due: 30 days. Rules <http://rdaward.org/rdac1.htm>

CWops CW Open--CW, from Aug 20, 1200Z to see website. Bands (MHz): 1.8-28. Exchange: Serial and name. Logs due: 5 Sep. Rules <http://www.cwops.org/onair.html>

Keymen's Club of Japan Contest--CW, from Aug 20, 1200Z to Aug 21, 1200Z. Bands (MHz): 1.8-28, 50. Exchange: RST and JA pref/dist or continent. Logs due: Sep 21. Rules <http://www.kcj-cw.com/>

North American QSO Party--Phone, from Aug 20, 1800Z to Aug 21, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and state. Logs due: 14 days. Rules <http://ncjweb.com/>

Feld-Hell New Member Sprint--Digital, from Aug 20, 2000Z to Aug 20, 2200Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

SARL Digital Contest--Digital, from Aug 21, 1300Z to Aug 21, 16009Z. Bands (MHz): 3.5-14. Exchange: RST and serial. Logs due: 7 days. Rules <http://www.sarl.org.za/>

Run For the Bacon--CW, from Aug 22, 0100Z to Aug 22, 0300Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

ALARA Contest--Phone,CW, from Aug 27, 0400Z to Aug 27, 1359Z and Aug 28, 0400Z to Aug 28, 1359Z. Bands (MHz): 3.5-28, 144,440. Exchange: RS(T), serial, ALARA nr, name. Logs due: Sep 30. Rules <http://alara.org.au/>

Hawaii QSO Party--Phone,CW,Digital, from Aug 27, 0400Z to Aug 28, 2200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and HI county/island or S/P/C. Logs due: Oct 1. Rules <http://www.karc.net/>

SCC RTTY Championship--Digital, from Aug 27, 1200Z to Aug 28, 1159Z. Bands (MHz): 3.5-28. Exchange: RST, 4-char year first licensed. Logs due: Sep 15. Rules <http://lea.hamradio.si/%7Escc/rtty/rtty.htm>

YO DX Contest--Phone,CW, from Aug 27, 1200Z to Aug 28, 1159Z. Bands (MHz): 3.5-28. Exchange: RS(T), serial or YO district. Logs due: 30 days. Rules <http://www.hamradio.ro/>

Kansas QSO Party--Phone,CW,Digital, from Aug 27, 1400Z to Aug 28, 0200Z and Aug 28, 1400Z to Aug 28, 2000Z. Bands (MHz): 3.5-28, 50,144, Frequencies: CW--40 kHz above band edge; Phone--3.840, 7.240, 14.240, 21.340, 28.440. Exchange: RS(T) and KS county or S/P/"DX". Logs due: Sep 30. Rules <http://www.ksqsoparty.org/>

Ohio QSO Party--Phone,CW, from Aug 27, 1600Z to Aug 28, 0400Z. Bands (MHz): 3.5-28. Exchange: Serial and S/P or "DX". Logs due: 30 days. Rules <http://www.ohqp.org/>

South Africa DX Contest--CW, from Aug 28, 1400Z to Aug 28, 1600Z. Bands (MHz): 3.5-14. Exchange: RST and serial. Logs due: 4 Sep. Rules <http://www.sarl.org.za/>

VHF+ CONTESTS

ARRL 10 GHz and Up Contest--Phone,CW,Digital, from Aug 20, 6 AM to Aug 21, 12 AM. Bands (MHz): 10G+. Exchange: 6-character grid locator. Logs due: Oct 19. Rules <http://arrl.org/contests>

ARRL Rookie Roundup--Digital, from Aug 21, 1800Z to Aug 21, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See Web. Rules <http://www.arrl.org/contests>

Keymen's Club of Japan Contest--CW, from Aug 20, 1200Z to Aug 21, 1200Z. Bands (MHz): 1.8-28, 50. Exchange: RST and JA pref/dist or continent. Logs due: Sep 21. Rules <http://www.kcj-cw.com/>

ALARA Contest--Phone,CW, from Aug 27, 0400Z to Aug 27, 1359Z and Aug 28, 0400Z to Aug 28, 1359Z. Bands (MHz): 3.5-28, 144,440. Exchange: RS(T), serial, ALARA nr, name. Logs due: Sep 30. Rules <http://alara.org.au/>

Kansas QSO Party--Phone,CW,Digital, from Aug 27, 1400Z to Aug 28, 0200Z and Aug 28, 1400Z to Aug 28, 2000Z. Bands (MHz): 3.5-28, 50,144, Frequencies: CW--40 kHz above band edge; Phone--3.840, 7.240, 14.240, 21.340, 28.440. Exchange: RS(T) and KS county or S/P/"DX". Logs due: Sep 30. Rules <http://www.ksqsoparty.org/>

** A3, TONGA, OC-169, qrv HF and 50 MHz **

Craig,KI0SO, is working as A35CT mainly in SSB on 20m-6m from
Lifuka in the IOTA group Ha'apai (OC-169, Loc AH20te). He is
using an Elecraft K3, a Yaesu FT-450 with Force-12 C3 antenna and
a M2 6m antenna. Craig has been spotted on 20m SSB from 0830-
1030 UTC. The length of his stay is not known. QSL via CBA an
KI0SO (with some delay). [DX-ENG] Ohio/Penn DX Bulletin #1023

** GU, GUERNSEY, EU-114, qrv HF and 144 MHz **

A large group of the Telford and District Amateur Society will
be QRV as GP3ZME/p from Guernsey (EU-114) from Aug 19-24.
Operations will take place on 80m-2m and the SHF bands.
QSL via G3ZME. SOURCE: DXNL 1741 (Aug 17, 2011)

** RI1, FRANZ JOSEF LAND, EU-019, soon on EME ?? **

Andrey,RI1FJA (RA3MD), and Victor Ivanov,RI1FJM, started their
overwinterung on Heyss Island on Franz Josef Land in early August.
Andrey can be found on the bands using his SteppIR yagi while
Victor wants to focus on the EME business. Both OMs will stay
until September 2012. QSLs for both calls unfortunately only
direct via RX3MM. SOURCE: DXNL 1741 (Aug 17, 2011)

** Rotuma DX NEWS **

The team of experienced amateur and friends prepared a serious
amateur expedition to the far island Rotuma, which belongs to the
state Fiji, but it is very important for the amateur, because it

counts as a separate country by DXCC list. Our goal is to activate
the beautiful island of Rotuma in all amateur frequency from 1.8 MHz
to 144 MHz and all amateur modes. Our team will work CW, SSB, FM,
RTTY, SSTV, PSK etc...
TEAM is: YT1AD, K3LP, K1LZ, UA4HOX, PY5EG, WD5COV, SV2BFN, AA4NN,
N6PSE, YT3WW, UA4HBW, RU4SU, JT1CO, JT1DO, LZ1VVV, HL5FUA, RW4NW,
YT3W.
Landing permit and amateur radio license for CAL 3D2R already
existing. The team of experienced amateur and friends will gather at
the 24th Fiji September 2011 and expect a departure from the port of
Suva 25th In September 2011 around noon. The journey takes 36 hours.
We expect the first activity at amateur frequencies on 27th September
2011 and will be active the next 10 days. Return to Fiji is expected
8.oktobra 2011 in the morning in the same harbor where we came from!
We hope that the whole amateur world will enjoy the amateur activity
and QSO's with our team. POZ, Acim - SOURCE: YT3W via [GOLIST]

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next wednesday 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

73 de Guido "Guy" DL8EBW

==> + ARRL FIELD DAY: 2011 FIELD DAY LOGS POSTED

A record 2654 submissions have been received for the 2011 running of
ARRL Field Day. According to ARRL Field Day Manager Dan Henderson,
N1ND, this is the highest number of entries received for what is one of
Amateur Radio's most popular on-the-air operating events. The combined
list of Logs Received for Field Day has been posted online. The list
includes all logs submitted via the website, as well as those submitted
via e-mail and US Mail. Read more here
<http://www.arrl.org/news/2011-arrl-field-day-logs-posted>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTE ON
WIRELESS TECHNOLOGY OPENS HORIZON OF LEARNING OPPORTUNITIES

This summer, the ARRL offered five sessions of the Teachers
Institute on Wireless Technology (TI). Veteran instructors Miguel
```

Enriquez, KD7RPP, and Nathan McCray, K9CPO -- along with new Instructors Tommy Gober, N5DUX, and Matt Severin, N8MS -- led the instruction. A total of 55 educators from 24 states, ranging from elementary teachers to university PhDs, took part in the 2011 TIs.

The first TI session of 2011 was held at Desert Ridge Middle School in Albuquerque, New Mexico, and was hosted by Diane Nihart, KE5UHB, a 2010 TI graduate. Other sessions took place at Parallax, Inc's corporate office in Rocklin, California (Parallax provides the robotics equipment for each TI session); at Mohawk Valley Community College in Utica, New York -- hosted by Bob Decker, AA2CU; and at ARRL Headquarters. The Dayton Amateur Radio Association hosted the TI-2 seminar, Space in the Classroom. The TI-2 curriculum focuses on the nuts and bolts of setting up and operating a satellite ground station. While TI participants do not need to have an Amateur Radio license to attend a session, TI-2 participants must have at least a Technician class license and have already attended a TI session. Read more here <http://www.arrl.org/news/arrl-teachers-institute-on-wireless-technology-opens-horizon-of-learning-opportunities>.

==> + ARRL AND CALIFORNIA RESEARCHERS TEAM UP TO END 12 METER INTERFERENCE

After the resolution of the recent 60 meter Coastal Ocean Dynamics Applications Radar (CODAR) situation on the East Coast, the ARRL noted an earlier report by John Terrell, N6LN, of Palos Verdes, California. Terrell described CODAR activity on the 12 meter band, from 24.93 to 25.058 MHz. Since it appeared likely it was originating on the West Coast -- possibly near Orange Section Official Observer Coordinator Dan Welch, W6DFW -- ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, contacted Welch for assistance. Read more here <http://www.arrl.org/news/arrl-and-california-researchers-team-up-to-end-12-meter-interference>.

==> + CHECK OUT THE SEPTEMBER ISSUE OF QST

The September issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. This issue focuses on Emergency Communications and Public Service, activities that many hams enjoy. >From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

Victor Cid, W3CID, and Andrew Mitz, WA3LTJ, know that radio amateurs have a long history of tinkering, of taking something and adjusting it to their purposes. These two hams -- who work at the National Institutes of Health in Washington, DC -- did just that when they developed a unique way to link a group of Maryland hospitals during major disasters via Amateur Radio. Find out how they did it in their article "Optimizing Amateur Radio Resources for Major Disasters." When your ARES® group is activated during an emergency, you know to grab your go-kit. Geoff Haines, N1GY, took this idea a bit further with his article "An Emergency Radio Package - or The Radio in a Box II." Haines

developed a box to hold a dual-band VHF/UHF radio, a battery and paperwork using only materials and equipment he already had on hand.

David Gillespie, W4LHQ, looks back at the devastating Alabama tornadoes earlier this year in his article "Alabama Slammer." Gillespie recounts that thanks to the the training hams had before the storm -- as well as the experiences they brought with them from past disaster deployments -- was crucial to providing top-notch communications support to the area served agencies. Speaking of practice, it's time to get ready for the 2011 Simulated Emergency Test (SET), set for October 1-2. ARRL Field Organization Supervisor Steve Ewald, NV1X, takes a look at this annual event that tests emergency operating skills and the readiness of communications equipment and accessories in an emergency-like deployment.

QST Contributing Editor Howard Robins, W1HSR, takes a look at the Yaesu VX-8GR dual-band handheld transceiver in this month's Product Review. He says that this radio "incorporates GPS and a slew of features into a rugged, compact package. With so many features in a small package, it will be most appropriate for advanced amateurs wanting to explore and master APRS and GPS technology." QST Contributing Editor Phil Salas, AD5X, also checks out the Ameritron ALS-1300 HF power amplifier. He says this amplifier "delivers the goods and provides a good value for those interested in a solid state near-legal-limit linear power amplifier for 160-10 meters."

Ward Silver, N0AX, delivers the results of the 2011 ARRL International DX Phone Contest. With the bands wide open during the contest, Silver noted that "more butts in more chairs [meant] a 24 percent increase in QSOs reported by US and Canadian stations. There were more single-band logs than ever this year and the big increase was -- no surprise -- 10 meters, which went from 13 logs submitted in 2010 to 60 in 2011."

Of course, there are the usual columns you know and expect in the September QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your September issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join>.

==> + QSL CARD EXHIBIT IN MARYLAND THROUGH SEPTEMBER 15

HPE 2 WRK U AGN SN: Ephemeral Communiqu&#65533; 1920-1980 -- a design exhibit of more than 550 QSL cards -- will be on view until September 15, 2011 at the Chesapeake Gallery on the campus of Harford Community College in Bel Air, Maryland. It is curated by Harford CC Professor of Art and Design Kenneth Jones. Jones will present a talk at the closing reception September 14 from 6-8 PM.

"In an age of communicating wirelessly with avatars, tweets and friending through Facebook. QSL cards are sophisticated communication

devices that reconnect two people to the past," Jones told the ARRL. "Today, the pace of communication is so much faster, and the memory of that communication may be stored or in most cases hidden in histories, caches and the recesses of hard drives and servers. The act and art of QSLing is an act of respect, unity and friendship."

Jones said that he "rediscovered" his grandfather's QSL cards a few years ago: "When I opened [the box], I was overwhelmed by the aroma contained in the contents. The box was full of items from my grandfather (he passed in 1987) and included QSL cards, which transported me to the shack he used which was part of his kitchen. I remembered the big antenna on top of his little home, and how he would let me turn the dial to change its direction. The cards in the box sparked my interest in their design and history, so I began to research and collect them. After collecting about 10,000 of them, I started to think about writing a book about the design history of the cards and applied for a sabbatical, which I was awarded and then took in the fall of 2010."

HPE 2 WRK U AGN SN is a design exhibition of more than 550 QSL cards from the Golden Age of Amateur Radio (1920-1980), presented and arranged by style. Jones selected the cards from the more than 10,000 in his collection. Read more here <http://www.arrl.org/news/qsl-card-exhibit-in-maryland-through-september-15>.

==> + AMATEUR RADIO TECHNOLOGY: 30TH ANNUAL ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE SET FOR SEPTEMBER

The Four Points Sheraton Hotel at Baltimore Washington International Airport is home base for the 30th annual ARRL/TAPR Digital Communications Conference, September 16-18. This conference is an international forum for radio amateurs to meet and publish their work, as well as present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results and practical applications. Read more here <http://www.arrl.org/news/30th-annual-arrl-tapr-digital-communications-conference>.

==> SOLAR UPDATE

Tad "The warmth of the Sun is in your smile <http://www.youtube.com/watch?v=LgJsBuJF1So>" Cook, K7RA, reports: Solar activity was down again this week -- the sunspot number on Sunday went all the way to 0 for the first time since January 27, which was 29 weeks ago. The average daily sunspot numbers declined nearly 50 points, to 25.6, while the average daily solar flux was down nearly 16 points to 88.5. The latest prediction from NOAA/USAF on August 17 has the solar flux at 98 on August 18, 100 on August 19-21, 105 on August 22-24, then 110, 115, and 115 on August 25-27, and back to 110 on August 28-31. The predicted planetary A index is 5 on August 18-20, 8 on August 21, 5 on August 22-25, 15, 10 and 8 on August 26-28, and 5

again on August 29-31. Thanks to Max White, M0VNG, of Worcester, England, for sending along this story from NASA, "Solar Flares: What Does It Take to Be X-class? <http://www.nasa.gov/mission_pages/sunearth/news/X-class-flares.html>" Look for more information on the ARRL website on Friday, August 19. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Bangles' Waiting for You <http://en.wikipedia.org/wiki/The_Bangles>.

==> + SILENT KEY: TOM HAMMOND, N0SS

Tom Hammond, N0SS, of Lohman, Missouri, passed away August 4 from cancer. He was 67. Hammond was the first and only Life Member of the Kansas City DX Club, playing an invaluable role in the club for more than three decades, creating his world famous CW pileup files each year for the annual CW Pileup Competition at the Dayton Hamvention. Read more here <http://www.arrl.org/news/tom-hammond-n0ss-sk>.

==> THIS WEEK ON THE RADIO

This week:

- August 19 -- NCCC Sprint Ladder
- August 20 -- Feld Hell Sprint
- August 20-21 -- ARRL 10 GHz and Up Contest (local time) <http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>; SARTG WW RTTY Contest; North American QSO Party (SSB); Russian District Award Contest; CWOps CW Open
- August 21 -- ARRL Rookie Roundup (RTTY) <http://www.arrl.org/news/attention-rtty-rookies-the-2011-rtty-rookie-roundup-is-here>; SARL Digital Contest
- August 22 -- Run for the Bacon QRP Contest
- August 24 -- SKCC Sprint
- August 24-25 -- CWops Mini-CWT Test

Next week:

- August 26 -- NCCC Sprint Ladder
- August 27 -- ARCI Welcome to QRP
- August 27-28 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party; ALARA Contest; YO DX HF Contest; SCC RTTY Championship
- August 28 -- SARL HF CW Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Amateur Radio Newsline(tm) Report 1775 - August 19 2011

Amateur Radio Newsline report number 1775 with a release date of
Friday, August 19th 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISSat One continues to amaze ham radio but its battery is growing weaker as the days pass. Also, Heathkit says that it plans to return to the kit supply business, the cost of vanity calls are going up, the worlds first ever Digital Amateur Television contest is almost here and don't forget to remove the batteries. Find out why on Amateur Radio Newsline(tm) report number 1775 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ARISSAT-1 DROPPING TO LOW POWER EVEN IN SUNLIGHT

According to several reports ARISSat-1 has been switching into low duty cycle mode. This, even while in complete sunlight. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the latest:

--

When ARISSat One is in darkness, in order to conserve battery power, it switches into a mode where it transmits for 40 seconds and then shut down for 2 minutes. However, on Thursday, August 11th and Friday the 12th a number of hams began reporting that ARISSat One was in low duty cycle mode when the satellite appeared to be fully illuminated by the sun.

Now comes a probable explanation from hardware developer Tony Monteiro, AA2TX. He reports that at certain bad sun angles, the solar panels may not provide enough power to run the satellite even though it is in full sunlight.

AA2TX says that the power from the panels can actually drop to as low as 2.5 watts at really bad angles but the satellite needs around 8 watts average to run in high power mode. This means that the satellite would have to draw current from the battery to run in high power mode even though it is in the sun. This discharge would reduce the life of the battery so to minimize the damage and prolong the life of the satellite, it will switch itself to low power mode under these conditions.

Monteiro adds that he does not know for sure if this is what is happening but this condition is within the predicted nominal operation of the satellite.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Meantime, ARISSat One controllers have confirmed that the battery voltage of the satellite has been decreasing during eclipse at a faster rate than expected. Specifically, the battery voltage is getting lower with each eclipse period. It therefore is taking longer for the battery to charge up to 32.5V to allow the switch from Low Power to High Power when the satellite enters an illumination period. (AMSAT, ARISSat)

**

HAM RADIO IN SPACE: CHICKEN LITTLE CONTEST FOR ARISSAT 1

Meantime, Amsat has announced that its again holding another of its famed Chicken Little contests. This one to see if anyone can guess or predict as to when ARISSat One will fall out of orbit.

According to AMSAT, this is defined as the time ARISSat One crosses an altitude of 78 kilometers, which is considered to be the point of no return. And as in the past, there will be three Chicken Little divisions. These are a student category for Kindergarten through grade 8 grades, another student category for High School, grades 9 through 12 and then one for the rest of us.

Submissions will close on September 15th at 23:59:00 UTC. Once ARISSat One actually falls from the sky the closest predictions in each category will be recognized for their achievement. Submissions go by e-mail to CHICKENLITTLE (at) ARISSAT1 (dot) ORG

And less we forget, while not part of the contest, the actual re-entry of ARISSat One into the Earts atmosphere may be visible depending on the location where it takes place. As such, reports are encouraged.

And for those not aware, Chicken Little is a fable about a chicken who believes the world is coming to an end. The phrase "the sky is falling" features prominently in the story. As such it has become a rather common expression indicating a hysterical or mistaken belief that disaster is imminent.

(AMSAT)

**

RADIO RULES: VANITY CALL SIGN COST TO RISE STARTING SEPT 9

The price of a vanity call sign in the United States is on the rise. On August 10th the FCC announced that the cost of an Amateur Radio vanity call will increase 90 cents to $14.20 for a 10 year license term. The new fee take effect 30 days after publication in the Federal Register

making September 9th the first day the new fee is in effect. (ARRL)

**

RADIO BUSINESS: HEATHKIT SAYS IT IS RETURNING TO THE KIT SUPPLY MARKETPLACE

Heathkit says it is re-entering the kit business that it abandoned almost two decades ago. In an announcement posted to its www dot heathkit dot com website, Heathkit Educational Systems which is the current name for the company states that in late August the company will debut its new line of do-it-yourself kits for common around-the-house items.

Don't look for ham radio gear to be a top priority even though the word on the street is that kits for the amateur radio market may be down the pike. Right now the company is starting off with more general interest kits with their first entry being a Garage Parking Assistant or G-P-A for short. The Garage Parking assistant kit lets someone build their own system that uses ultrasonic sound to locate a car as it enters the garage. The system signals to the driver using LED lights mounted on the wall when the car is detected and in the perfect spot for parking. Next on the market will be a Wireless Swimming Pool Monitor kit followed by many more novel items.

For those of you to young to remember, it was on March 30, 1992, that the then managers of Heathkit announced that after some 45 years the company was closing out its kits and leaving the business. In its hey-day, Heathkits were products of the Heath Company of Benton Harbor, Michigan. Their build it yourself product line included everything from electronic test equipment to high fidelity home audio equipment, television receivers, and of coarse amateur radio gear. It was the emergence and subsequent domination of the world electronic marketplace by Pacific Rim manufacturers who could produce and market completely assembled equipment at prices far less than Heathkit or anyone else could supply a do it yourself version that lead to the demise of names like Eico, Paco, and of coarse Heathkit.

So why has Heathkit decided to re-enter the kit market? To hazard a guess you have to remember that the current incarnation of Heathkit is an educational materials supplier. As such it has likely taken notice of the burgeoning maker and hacker community. This is an ever expanding group of technology hobbyist's world wide that in recent years has grown into a multi-million dollar business opportunity for those smart enough to recognize it and are ready to fill the void. These are also the people that many believe will be the next generation of technology leaders and radio amateurs.

The Heathkit announcement says nothing about the business rationale for going back into the kit supply business but it does state that the company wants to bring to its customers interesting and unique products. As such it is interested in learning what types of products

that kit builders would like to see brought to the marketplace. Anyone interested can submit their suggestions by mail addressed to 2024 Hawthorne Avenue St. Joseph, Michigan, 49085 or at www.heathkit.com. (ARNewsline(tm) with some information supplied by KC8VWM, N4OZ and others.)

**

ENFORCEMENT: DUTCH AUTHORITIES TO ISSUE INSTANT FINES TO PIRATE BROADCASTERS

According to news reports, the Radiocommunications Agency of the Netherlands will soon launch a new and tougher policy to deal with pirate radio stations. One which could lead to fines of up to 2,500 euros or $3600 imposed on an unlicensed broadcaster as soon as half an hour after they receive a warning letter.

This the agency's latest move in a cat and mouse game with the pirate stations. It used to take months before someone was punished for illegal broadcasting. That has since been reduced to several weeks, and could now be cut to half an hour under the new policy.

There have already been 1600 warnings issued this year, and 60 people have been fined. The fine is not necessarily for the pirate, but handed to the owner of the land which is used for broadcasting.

The pirate radio broadcasters are now increasingly using mobile stations, so after receiving a warning letter they simply move to a different location to broadcast. The Radiocommunications Agency wants to introduce its new instant fine policy as soon as possible as a way to prevent these nomadic broadcasters from escaping punishment. Its said that some of the wandering pirates use transmission mast as tall as 40 meters in height. (Media Network)

ENFORCEMENT: LAUDERHILL FLORIDA UNLICENSED BROADCASTER HAS FINE CUT IN HALF

Back here in the United States. the FCC has cut in half the amount of a fine that it had issued to Christopher M. Myers, of Lauderhill, Florida. This for his alleged operation of an unlicensed radio transmitter on the frequency 95.9 MHz. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

Back on July 12, 2010, the Enforcement Bureaus Miami Office issued a $10,000 Notice of Apparent Liability for Forfeiture to Christopher Myers for operation of an unlicensed radio station. Myers contested the then proposed fine. In his petition to the FCC Myers requested cancellation or reduction of the proposed forfeiture based on his claims that he did not operate the unlicensed station and that he was unable to pay the $10,000 forfeiture.

Specifically Myers asserted that although he owns the residential condominium referenced in the Notice of Apparent Liability that the condominium was occupied and controlled by a renter from 2007 until 2010 and that he resided elsewhere during that period. He also stated that although he was present in the condominium during the inspection on March 7, 2010, the transmitter was not transmitting at that time and that after he received notice of the unlicensed operation, that he took affirmative steps to terminate the lease with the unidentified renter. His response also stated that a broadcasting organization known as WBIG is responsible for any unlicensed operations on 95.9 MHz and 91.7 MHz; and that he does not hold any pecuniary interest in WBIG. Lastly he claimed that the $10,000 fine constituted a financial hardship and provided the required documentation to back up this claim

In its decision on the matter the FCC said that it did not find Myerss statement that he did not reside in the residential condominium reliable. Myerss drivers license and most recent vehicle registration list the condominium as his residence. The FCC says that Myers received and signed for several documents at the condominium. It says that it believes this demonstrates that Myers did in fact reside in the condominium.

Also says the FCC, it disagrees with Myers statement that the station was not transmitting on March 7, 2010. It notes that at approximately 6:50 P.M. on March 7, 2010, agents from the Miami Office determined that an unlicensed station was operating from the condominium. The Lauderhill Police Department executed a search warrant for the condominium at approximately 10:00 P.M. and found only Myers present. A bit later, FCC agents arrived and found the same. It says that the unlicensed station continued to transmit until FCC agents disconnected the transmitter which was located in the residence, doing so at approximately 11:10 P.M. As such, the FCC says that it finds no reason to cancel or reduce the forfeiture on this basis.

However, regarding Myers inability to pay the entire $10,000 fine, the FCC has determined that, in general, gross revenues are the best indicator of an ability to pay a forfeiture. Based on this it finds that Myers is unable to pay the full proposed forfeiture amount, so it has granted a reduction down to $5,000.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Its unknown if Myers plans to file a further appeal. (FCC)

HAM HAPPENINGS: WORLDS FIRST DIGITAL ATV QSO PARTY AUG 26 -27

The world's first Digital Amateur TV QSO Party will be on Melbourne Australia's VK3RTV repeater next weekend. The QSO Party has been organized by Peter Cossins VK3BFG as control station and will include the Amateur Television Network of California and the British Amateur Television Club.

VK3BFG said that 8 pm Australian Eastern Standard Time on Friday August 26th will be the kick-off time of the two-day event as part of the Amateur Radio Victoria celebration of its centenary. Also, on Saturday the August 27th at 1 pm Australian Eastern Standard Time there be a link up with Don Hill KE6BXT in California and also a connection with the W6ATN ATV Repeater. (VK3PC)

**

HAM HAPPENINGS: PARACHUTE MOBILE TO PERFORM AT PASCIFICON ON OCTOBER 15

Michael Pechner, NE6RD, reports that weather permitting, the group Parachute Mobile will be doing a doing a jump on October 15th. This, in coordination with the Pacificon ARRL Pacific Division Convention being held in Santa Clara, California the weekend of October 14th to the 16th.

Pechner tells Newsline that live video of the flight will be streamed to the World-Wide-Web on Justin dot tv as well at fast scan amateur television outlets. There will also be a live APRS feed using Google Earth mapping showing the APRS beacons with about a 90 second delay. This, due to how aprs-is works.

Sound interesting? Well you can learn more by simply taking your web browser to www.parachutemobile.com, and following the updates. (NE6RD)

**

HAM HAPPENINGS: NEWSLINE TO HOST TOWN MEETINGS AT TWO CALIFORNIA CONVENTIONS

And speaking about Pacificon, it will be one of two venues where Amateur Radio Newsline producer Bill Pasternak, WA6ITF will be hosting two of our popular Ham Radio Town Meetings.

The first of these will take place on Saturday, September 10th at the aRRL Southwest Division Convention to be held at the Marriott Torrance South Bay hotel in the city of Torrance. There the topic will be a repeat of this years Dayton Hamvention Town Meeting titled How to Make a Ham Radio Movie in the 21st century. At airtime the speakers list includes Hollywood Producer Director Dave Bell, W6AQ; video Post

Production Editor Frosty Oden, N6ENV, PBS cameraman George Barker, NA1F and amateur film maker Dennis Smith, KA6GSE. For more information on this event take your web browser to www dot hamconinc dot org and click on the words Tech Talks.

On Saturdary, October 15th Bill will be hosting an Amateur Radio Newsline Ham Radio Town Meeting at Pacificon 2011. The title of this session is "Peering Into the Future: Amateur Radio 100 Years From Now." And helping to give us all a glimpse at ham radio in the year 2011 will be IARU Secretary Rod Stafford, W6ROD; ARRL General Counsel Chris Imlay, W3KD; Nobel Laureate Joe Taylor, K1JT and emergency communications futurist David Witkowski, W6DTW. The venue for this session is the Marriott Santa Clara, in Santa Clara, California in Salons 1, 2 and 3 from 1 to 3 PM Pacific Daylight time. More information on this one is on-line at www.pacificon.org. We hope to see you at one of these two sessions or maybe at both. (ARNewsline(tm))

**

HAM HAPPENINGS: THE HUNTSVILLE HAMFEST

And two major events are taking place at about the time this newscast goes to air. First up is the 2011 Huntsville Hamfest being held August 20th and 21st at the Von Braun Center in Huntsville, Alabama. Activities include DX Card Checking, numerous hospitality suites, license exams and presentation of the 2011 Young Ham of the Year Award to 11 year old Kaitlyn Cole, KS3P, of Harvest, Alabama.

This year's Young Ham of the Year Award ceremony will be hosted by Amateur Radio Newsline's own Don Wilbanks, AE5DW. He will be joined by representatives of the awards principal corporate underwriters Vertex Standard and CQ Magazine.

This years Huntsville Hamfest will again be net-cast live on the World-Wide-Web at W5KUB dot com. Be sure to tune in and enjoy the festivities vicariously if you cannot be there in person. More information on the Huntsville Hamfest itself is on-line at www.hamfest.org. (ARNewsline(tm))

**

HAM HAPPENINGS: THE INAUGURATION OF THE NEW TWIT.TV BRICK HOUSE TV STUDIOS IN PETALUMA CA

August 20th and 21st will also see the grand opening of Leo LaPorte's new TWIT.TV studios in Petaluma, California. According to Bob Heil, K9EID, who hosts the show Ham Nation on the TWIT network, a special event station will be active on 40 and 20 meters in the afternoon and evenings both days to commemorate the official opening of the facility.

The call sign to be used will be W6KB. This is the club call of the Redwood Empire DX Association whose members have been instrumental in

the planning and installation of the ham radio antenna system during the final construction of the new broadcast facility.

Leo Laporte, who now holds the apropos vanity call sign W6TWT will be your host. His TWIT Brick House Studios are located at 140 Keller St. in Petaluma, California. Tours of the new facility, its ham radio station and its classic Collins AM broadcast transmitter will be available 10 am to 7 pm local time each day to all amateur radio operators passing through the area.

And if you happen to work station W6KB during this grand opening event, please QSL direct to W6TWT, P O Box 1018 in Petaluma, California, 94953. You can also drop in and watch the happenings on the web at live.twit.tv. (K9EID)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTRUDER WATCH: CODAR AT 24 MHZ

DK2OM reports via the IARU Region 1 website that a Codar ocean wave radar is disturbing radio operations in the 24.920 to 24.990 MHz and its happening around the clock. The location of the offending system is believed to be at or near Venice, Italy. Those hearing these signals report them to your nations Intruder Watch committee.

Codar is an acronym for the Coastal Ocean Dynamics Applications Radar that describes a type of compact High Frequency radar system developed between 1973 and 1983 at the NOAA Wave Propagation Laboratory. It utilizes High Frequency surface wave propagation to remotely measure surface ocean currents and wave height. (IARU)

**

WORLDBEAT: HUNGARIAN CHANNEL 1 TV TRANSMITTER GOES AWAY

Hams in Hungary are no longer bothered by a Channel 1 television transmitter wiping out the 6 meter band. At 00:00 on August 15th that TV transmitter was finally closed down after 54 years in service. This, as a part of Europe's overall conversion to digital only operations on the UHF bands. Channel 1 TV operations had been causing considerable interference on 50 MHz to amateur radio operators in the Budapest and surrounding areas. (Southgate)

**

WORDBEAT: DUTCH HAM RADIO BULLETINS NOW ON CPMMERCIAL RADIO

A report from the VERON which is the Dutch National Amateur Radio Society headquarters station PI4AA is now a part of that nations RTV Stadskanaal programming. This, as a part of the RTVS Media that covers topics in Amateur Radio, local radio and local news media.

The ham radio report airs every last Tuesday of the month from 8:00 p.m. to 9:00 p.m local Netherlands time. This unique partnership is made possible because the PI4AA broadcasts meet the requirements of the standard for I-C-E local public broadcasting. I-C-E stands for Information, Culture and Education.

The broadcast area is south-east and east area of Holland on terrestrial stations 105.3 and 107.8 MHz FM. The cable frequency is 104.1 MHz FM. Listeners outside of The Netherlands can tune in on the web at tinyurl.com/dutch-hamcast. (VERON)

**

WORLDBEAT: MS0INT ISLE OF ROCKFALL IN SPRING 2012

A team of four highly experienced Isands on the Air activators have plans to operate from the extremely rare and dangerous Isle of Rockall next spring. The four operators are identified as EA2TA, EA3NT, IZ7ATN and MM0NDX. All are part of the larger MS0INT Adventure Group which has previously been on air from several other hard to reach sites.

Completing the team is Nick Hancock, a noted climber with considerable experience in reachinbg inhospitable places. They aim to stay atop Rockall for maximum 48 hours, in what will be considered one of the most ambitious island activations the ham radio world has seen. Hopes are to be on the air in late May or early June of 2012. (Rockall 2012 Team)

**

DX

In DX, word that ZL1AAO, will be on the air from Rarotonga in the South Cook Islands, beginning August 19th for 10 days. He will sign as E51AAO and will operate holiday style using SSB only on 40through 10 meters. QSL only via Logbook of the World, eQSL or direct only. He will upload his log when he returns home.

OK1XD will be active from Lichtenstein portable HB0 between September 1st to the 10th. Operations will be holiday style on 80 through 10 meters using mainly RTTY and PSK31, with some SSB and CW. QSL via his home callsign, either direct or via the bureau.

ZS6AYU, will be active stroke A25 from Botswana between September 9th to the 11th. Operations will probably be on 40 through 10 meters including the 17 and 12 meters using CW only. QSL via ZS6AYU.

KI0SO is active as A35CT from Lifuka Island, Tongo on 20 through 6 meters mostly using SSB. The length of his stay is unknown. QSL via KI0SO to hid Callbook address and expect to wait a while for a response.

A team of German operators will activate Namibia between early December and mid-January of 2012. Operators mentioned are DJ2HD, DH3WO, DK1CE and DJ2BQ, each signing portable V5. Activity will be on 160 through 10 meters using CW, SSB and RTTY. QSL as directed on the air.

And lastly I2KRR is a volunteer technical support person to the Catholic mission in Vanimo and will be active as P29FR in Papua New Guinea until March of 2012. He operates on 40, 20 and 15 meter SSB with his time on the air limited to the local evenings, plus Saturday and Sunday afternoons. QSL without any IRC's to I2RFJ, either direct or by the Bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: PLEASE REMOVE THE BATTERIES BEFORE YOU SHIP ANYTHING THAT TICKS

And finally this week the tale of the ticking box. It comes from Portage, Michigan where an electronic metronome was the cause of a Post Office scare Saturday morning August 13th.

It seems that postal workers noticed a ticking noise coming from a package around 5:30 a.m. Fearing the worst, Portage Police along with the Kalamazoo Department of Public Safety's bomb squad were called in to investigate and the Post Office was evacuated.

In this case, authorities were able to get in contact with the owner of the package, who told police that there was nothing more than an electronic metronome inside. Even so, prior to employees being allowed back inside the building, the bomb squad went in and removed the package. Upon investigation, bomb squad personnel did find nothing more than an electronic metronome inside the package. Postal workers were allowed back into the Post Office just before 8 a.m..

And all this comes with a few words of advice. If you plan to mail a metronome, a clock or anything that makes a ticking noise, take out the batteries before you ship it. That can save your community thousands of dollars spent on an un-needed emergency response and save you a lot of grief. (Kalamazoo News and other published news reports)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)

arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Again, a reminder that this coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks on September 11th of 2001. Attacks that felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Moslem extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures and killing over 3000 American citizens.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we are trying to compile a list of radio clubs and individuals who are planning any form of ham radio memorial operation to honor those whose lives were lost that day.

Already a group in Pennsylvania and another in New York City are planning on-the-air commemorative operations. If you of any others please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org starting this week.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 21st August 2011

The news headlines:

* G5RP Trophy nominations sought

* ComReg grants EI amateurs up to 1500 watts in contests

* IARU Region 1 conference concluded

The G5RP Trophy is an annual award to encourage newcomers to HF DXing. However, the award is not limited to youngsters or the newly-licensed, the HF DX bug can bite at any age or after many years of experience on other bands. If you are an established HF DXer and want to recommend someone to be awarded the G5RP Trophy for 2011, now is the time to send in your nomination. Your nominee should be an up-and-coming HF DXer who has made rapid progress in the last year and has some real achievements to show, for example, a good total of new countries worked or some serious HF DXpedition activity. This prestigious award will be presented this year at the RSGB Convention on 7 to 9 October. Please send your nominations to Ian Greenshields, G4FSU, QTHR, or by e-mail to ian.greenshields@gmail.com, to arrive no later than Friday 23 September.

A few months ago the Irish Radio Transmitters Society announced that, after some two years of negotiations, Irish regulator ComReg had agreed that EI licensees would be allowed to run high power in specified contests. Everything then went quiet for a couple of months, but ComReg has now published a document on their web site implementing the change. Consequently, suitably equipped Irish contesters are now able to run 1500 watts in major HF contests and 1000 watts in VHF/UHF contests. The list of permitted events is similar to the one in which UK stations may use short contest callsigns, although more contests could be added to the list in due course. Interestingly, the increased power limit applies to 4m and the whole of the 160m band, but, curiously, not the 10m band.

The 22nd International Amateur Radio Union Region 1 General conference, held in Sun City, South Africa has now concluded. For details on the papers, discussions and a gallery of photographs go to the IARU Region 1 website, www.iaru-r1.org.

Thanks to the work of volunteers from the British Amateur Television Club, videos of the presentations given at this year's AMSAT-UK

International Space Colloquium are now available online at www.uk.amsat.org.

Telemetry from the recently-launched ARISSAT-1 suggests that the spacecraft's battery is failing faster than expected. The satellite works when it is in sunlight but resets itself when it goes into eclipse. The ARISSAT-1 team is closely monitoring the situation and is posting news updates at www.arissat1.org.

This weekend the 14th Annual International Lighthouse/Lightship Weekend takes place. Stations will be on the air until 2359UTC on the 21st. The basic objective of the fun event is to promote awareness of lighthouses and lightships and their need for preservation, to promote amateur radio, and to foster International goodwill. For an official lists of entrants, which total 439 including 18 lightships, check out the website at www.illw.net.

In addition to scheduled ATV streaming of GB2RS news in the UK via batc.tv and audio podcasts, scheduled transmissions of the GB2RS News are now available courtesy of VK7AX in Tasmania. These broadcasts started on Monday 15 August at 2000hrs local Tasmania time, which is 1000UTC, via voice repeaters, ATV, ATV Video Stream, EchoLink & Allstar.

A Wainwrights on the Air activity weekend will take place on 27 to 29 August. Stations operating from a number of the Lake District Fells, mostly using 2m FM, calling S20, will be on the air. New Activators and Chasers are encouraged to join in. More details can be found at www.wota.org.uk.

And now for the details of rallies and events for the coming week

The Rugby, Princethorpe, Annual Radio Rally takes place today, 21 August, at Princethorpe College, Princethorpe, Rugby CV23 9PX. Doors open from 10am to 4pm and admission is £2. Contact Tony on 07759 684 411.

Milton Keynes ARS Rally takes place on 28 August at Bletchley Park, Sherwood Drive, Bletchley, Milton Keynes MK3 6EB. There will be trade stands, special interest groups and GB2BP will be on the air. Why not make this a family day and visit the Bletchley Park museum too? More details can be seen at www.mkars.org.uk.

On bank holiday Monday, 29 August, Huntingdonshire ARS Rally takes place at St Neots Community College, Barford Rd, St Neots PE19 2SH. Doors open at 10am and admission is £2. There will be trade stands, a car boot sale, Bring & Buy and RSGB bookstall. Contact Clive Burchell, G3NKQ, on 01480 810 473.

Now for the news of special events

The Radio Society of Harrow will be operating GX3EFX and demonstrating amateur radio from a 14th Century small barn at the Harrow Museum for

the Harrow in Leaf Show on 28 and 29 August. The museum site consists of a granary, large 16th century tithe barn, with 12th century moated manor house built by the Bishop of Canterbury.

For rugby enthusiasts, look out for ZL4RUGBY operated by ZL4PW from 19 August until 31 October. This is to celebrate the 2011 Rugby World Cup being played in New Zealand.

And now the HF DX news compiled from 425 DX News and other sources

A group of nine operators from the Telford & District ARS are activating Guernsey under the callsign GP3ZME/P until Wednesday 24 August. They have equipment for all the HF bands, plus 6 and 2 metres, 23cm and all the microwave bands right up to 24GHz. Their locator is IN89QK and further details can be seen on the Telford club website, www.TDARS.co.uk. W7GJ plans to be active from Samoa on a 6m EME DXpedition during the final week of August. His callsign will be 5W0GJ. QSL direct to W7GJ.

A number of operators from South Korea and Japan will operate from the South Korean island of Cheju, which is IOTA reference AS-026, from 19 to 26 August using the callsign D9A. The QSL manager is DS4EOI.

Peter, EI7CC is returning to Lesotho for a short holiday from 18 to 30 August and will be active again as 7P8PB. He hopes to upload his logs to Logbook of the World on a daily basis.

DH2AK and DL1THM will be active as PJ2/DH2AK and PJ2/DL1THM from the island of Curacao from 21 August to 8 September. They will be using an IC-7000 and Buddipole and operating holiday style.

Now the contest news

The Brazilian CVADX Contest CW leg takes place this weekend, 20 and 21 August, from 2100 to 2100UTC. There are lots of different categories and most points to be gained by working Brazilian stations. The SSB leg takes place next weekend, 28 and 29 August. Full rules are online at www.craec.info/2010/images/docs_pdf/cvarules.pdf.

23 August sees the 50MHz UKAC taking place between 1900 and 2130UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

Also on 23 August, the SHF UK Activity Contest takes place at the same time, 1900 to 2130UTC, on the 2.3 to 10GHz bands. Using all modes, the exchange is signal report, serial number and locator.

The 80m Club Sprint takes place on 25 August between 1900 and 2030. It's the SSB leg and the exchange is both callsigns, serial number and name.

The IRTS 2m Counties Contest takes place on 28 August from 1300 to 1500 using both FM and SSB. For stations outside EI/GI, work EIs and GIs only, giving them a signal report and serial number. In return you can

expect to receive a signal report, serial number and County. There are awards for the highest placed entrant in each section `outside of EI'. This often results in them going to GI, but not always indeed, some sections often have no entries from outside EI. For a list of the 32 Irish counties, see EI8IC's website at www.mapability.com/ei8ic/contest/eicounty.php.

And now the solar factual data for the period from the 8th to the 14th of August, compiled by Neil Clarke, G0CAS on the 15th of August.

Right at the start of the period two of the three large active regions had rotated out of view, but before the last group disappeared it produced the largest solar flare so far this cycle. This flare was rated as an X6/2B, which took place on the 9th, taking solar activity to high levels. Before this, on the 8th, activity was moderate when a M3 flare occurred from the same region. By the 14th the visible solar disc was spotless. This is only the second day with a spotless Sun so far this year; the other was the 27th of January. Solar activity was very low from the 12th. Solar flux levels reflected this by declining from 102 units on the 8th to 83 by the 12th and the 13th. The average was 90 units. The 90 day solar flux average on the 14th remained at the same level as the previous week, at 96 units. X-ray flux levels declined from B4.3 units on the 9th to A8.2 by the 13th. The average was B1.8 units. Geomagnetic activity was quiet every day, except for the 8th, which was slightly unsettled with an Ap index of 10 units. Due to the location of the X6 solar flare to the solar limb the ejected material associated with the coronal mass ejection was directed away from Earth and did not cause any magnetic disturbance. The average was Ap 7 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 650 kilometres per second on the 9th to 300 by the 13th. Speeds then increased to around 500 kilometres per second during the 14th. Particle densities were low every day except for late on the 13th and early on the 14th when they increased to 20 particles per cubic centimetre. Bz varied no more than minus and plus 4 nanoTeslas except for the 14th which varied between minus 6 and plus 10 nanoTeslas.

And now the solar forecast. The first of the three large sunspot groups that generated all the solar flare activity on their last rotation are expected to return. The first should already be in view, however, this was the least active of the three. The other two more active groups are expected on the 21st and the 24th. The level of solar activity will depend on how active these regions are. There is a reasonable chance that activity could increase to moderate levels on some days. Close observations of the STEREO behind images will give a clue of their solar flare potential several days before they rotate into view. Solar flux levels are expected to be around the 110 mark but levels could be lower if the returning regions are not active. Geomagnetic activity could be unsettled today due to a coronal hole and again around Friday and Saturday due to another coronal hole. In both instances only a mild disturbance is expected. MUFs during daylight hours at equal latitudes

should be about 22MHz for the south and 19MHz for the north. Darkness hour lows should be around 11MHz. Paths to South America should have a maximum usable frequency with a 50 per cent success rate of about 27MHz. The optimum working frequency with a 90 per cent success rate will be around 22MHz. The best time to try this path will be between 1400 and 2100 hours UTC. We are now approaching the end of this summer's Sporadic-E season, but, saying that, opening are still expected, but not every day and probably not on 144MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

On Tuesday 23 August Mid-Warwickshire Amateur Radio Society is holding a barbecue from 11am. Details from Don, G4CYG, on 01926 424 465.

On Wednesday 24 August Lincoln Short-Wave Club is preparing for SSB NFD. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 24 August Midland Amateur Radio Society is planning for its 80th birthday. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 24 August South Kesteven Amateur Radio Society invites members to bring their DF-100 and show off its progress. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 24 August Telford & District Amateur Radio Society is having a natter night and putting G3ZME on the air. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 25 August Salop Amateur Radio Society is holding its third fox hunt. Details on the club website at www.salop-ars.org.uk. On Friday 26 August Coventry Amateur Radio Society is having a radio workshop evening. Contact John, G8SEQ, on 07958 777 363.

On Friday 26 August South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 27 August Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND On Monday 22 August Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 22 August Bolton Wireless Club is holding a 2m direction finding field event, starting from the Britannia Hotel. For details, send an email to boltonwireless@gmail.com.

On Monday 22 August Sheffield Amateur Radio Club is having its summer junk sale. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 22 August South Manchester Radio and Computer Club is holding a technical forum. Details from Ron, G3SVW, on 01619 693 999.

On Monday 22 August Thornton Cleveleys Amateur Radio Society is having a talk by Ken, G3RFH. Details on the web at www.tcars.org.uk.

On Tuesday 23 August Chester & District Amateur Radio Society is closed. Details from Barbara Green on 07957 870 770.

On Tuesday 23 August Halifax & District Amateur Radio Society continues its Foundation and Intermediate courses, is on the air and will be investigating EMC issues. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 23 August Wakefield & District Radio Society continues its Foundation and Advanced courses from 13.30. Details from David, G4CLI, on 07748 221 855.

On Wednesday 24 August Hornsea Amateur Radio Club is having a visit by RSGB Representative G2DPA. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 25 August Hornsea Amateur Radio Club is taking part in the 80m Sprint SSB. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 25 August Oldham Radio Club is holding its AGM. More information from Chris Cunliffe, on 07749 347 142.

On Thursday 25 August Ripon & District Amateur Radio Society is preparing for SSB Field Day. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 25 August South Manchester Radio and Computer Club is having a PC Clinic with Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999. On Thursday 25 August Tynemouth Amateur Radio Club is taking part in the RSGB 80m SSB Club Sprint as G5N. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Thursday 25 August Wakefield & District Radio Society is having a talk and demo on the new Society node, MB7IWR, by Dave, G4CLI. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 26 August East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND First, we have a message from the QSL bureau for callsign series holders MM0 Maa to Zzz, MM1, MM3, MM5 and MM6. A large number of QSL cards cannot be forwarded for these callsigns due to the lack of appropriately stamped envelopes. Anyone wishing to receive cards via the bureau is asked to send up to 6, correctly stamped, C5 size end fed envelopes to the QSL sub-manager Brian, MM1HMV, in advance. Listeners are reminded that cards will be held for a maximum period of three months, after which time they will be discarded without notification. Further information is available from Brian via email to mm1hmv@hamall.co.uk.

On Tuesday 23 August Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 23 August Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, on 07740 946 192.

On Thursday 25 August Aberdeen Amateur Radio Society is having a VHF fox hunt and preparing for SSB Field day. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Crawley Amateur Radio Club will be running a Foundation course on the weekend of 15 and 16 October, from 9.30am at Hut 18, Tilagate Recreational Park, Crawley. The closing date for entries is Friday 23 September. Crawley ARC will also be running an Advanced exam on Monday 5 December at 7pm, which will be preceded by four or five weekly seminars to help bring students up to speed. Applications for the exam need to be received by 7 November. For further information and details of how to apply, please contact Malcolm, G3NZP who is QTHR and can be reached on 01342 713 573. On

Sunday 21 August Chelmsford Amateur Radio Society is spending the afternoon operating SSB using GB100MWT from the Marconi Hut at Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Monday 22 August Felixstowe & District Amateur Radio Society is holding a holiday season club net on 145.400MHz from 8pm. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 23 August Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 23 August Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 23 August Dorking & District Radio Society is holding a social evening. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 23 August Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 24 August Chesham & District Amateur Radio Society is having a talk on early days in radio telegraphy by Chris, M0GVT. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 24 August Hastings Electronics and Radio Club is having a club meeting. Details from Gordon, on 01424 431 909.

On Wednesday 24 August Newbury & District Amateur Radio Society is having a talk on the Mozambique DXpedition by Tony, G4LDL. For more information contact Rob, G3LMW, on 01635 862 737.

On Wednesday 24 August Worthing & District Amateur Radio Club is having a talk by John, G4BLJ on his recent trip to VK/ZL. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 25 August Bittern DX Group is meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 25 August Edgware & District Radio Society is discussing the autumn programme and having an informal evening. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 25 August Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Sprint SSB contest. Details from Chris Danby, G0DWV, on 01603 898 678.

On Friday 26 August Cambridge & District Amateur Radio Club is having a talk on the techniques of radio repairs by Mark, M1MPW. Contact Ron, G3KBR, on 01223 501 712.

On Friday 26 August Mid-Sussex Amateur Radio Society is having a talk on windmills by Keith Cook. Contact Peter, G4AKG, on 01444 239 371.

On Friday 26 August Wimbledon & District Amateur Radio Society is closed. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 27 August Bedford and District Amateur Radio Club is holding a special event to celebrate Glenn Miller's contribution to morale and music. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com. On Sunday 28 August Bedford and District Amateur Radio Club is exhibiting at the MKARS annual rally & boot sale. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Sunday 28 August Chelmsford Amateur Radio Society is spending the afternoon operating CW as GB100MWT from the Marconi Hut at Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Sunday 28 August Coalhouse Fort Amateur Radio Society is holding an open day. Contact John Parker, M1DUC, by email to coalhouserad1o@yahoo.com.

NEWS FOR THE SOUTH WEST Plymouth Training Team will be starting an Intermediate training course on Monday 5 September at the Cherry Tree, Ham Drive Plymouth, PL2 3NT. The course will be from 7 until 9pm and will last for ten Mondays. The exam is planned for Monday 7th November, but may be varied to suit candidates or availability of the exam centre. For more information contact Bob Griffiths on 01752 343 177 or via g7nhb@hotmail.co.uk.

On Monday 22 August Exeter Amateur Radio Society is having a club night at the Moose Centre. More information from Nick, M6NRJ, on 01363 775756.

On Tuesday 23 August Blackmoor Vale Amateur Radio Society is having an HF evening. Contact Tony, G0GFL, on 01258 860 741.

On Wednesday 24 August Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 25 August South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 25 August Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 25 August Yeovil Amateur Radio Club is holding a committee meeting & putting the club station on the air. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 26 August North Bristol Amateur Radio Club is performing antenna maintenance. More information from Dick on 01454 218 362.

On Friday 26 August Torbay Amateur Radio Society is having a talk on radio in far away places by Roger Western, G3SXW. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NZART Headquarters Infoline Issue 236

21 August 2011

NZART Website: www.nzart.org.nz

In this issue:

- From the desk of HQ
- Doug Gorman Frequency Measuring Contest
- FMTAG Notes
- IARU Monitoring Service News Region 1 - included with this circulation
- Housekeeping

Debby says.

Subs 2012 - Subscriptions for 2012 are now due, and most members who have received their Break In should have received an invoice included behind the front wrapper. Just to clarify, there is no rebate for early payment this year.

Council discussed this at length at their meeting prior to conference, and while they appreciate the tough economic climate, NZART is not immune to these rising costs. I would therefore urge anyone who is unable to pay the total amount in a lump sum, to perhaps consider taking advantage of the $8 monthly payment option.

Please contact me for further details, the Association needs your continued support.

A special Request - I have received the following request from the son of a silent key, hopefully someone in New Zealand will be able to help, if so please contact Dave directly.

My father was an avid HAM operator in the late 40's and 50's. We lived on Waiheke Island in Auckland until he was drowned in a boating accident in 1957. His call sign was ZL1MG. I remember he had a lot of call cards from other operators and he sent out a few as well. I was wondering if any of your members would happen to have one of his original cards and be willing to send me a copy or be willing to sell it.

David Parkin.

E (work) dave.parkin@gen-i.co.nz

Online Call sign lists via NZART web page - The acting NZART web master Alan Wallace ZL1AMW and Call Book Compiler Lorne Douglas ZL2AHB have removed the call sign lists from the NZART web page as it has become out-dated. Radio Spectrum have advised we will be offered a more up to date listing in the near future, however no date has been set at present. Please watch HQ Info-line and the web page for more details.

Doug Gorman Frequency Measuring Contest

Monday 5th September 2011 at 2100 NZST

For the second year the contest will be a blend the old rules with improvements suggested by contestants. Please read the rules carefully.

1. Listen to ZL6A on 3895 kHz LSB for instructions on the frequencies that will be used and the procedure to be adopted. Following the voice instruction an unmodulated carrier will be radiated on 3895 kHz for calibration and/or practice. This frequency will be within +/- 1 Hz of 3895 kHz. Measuring this frequency is not part of the contest but it is to encourage participation with simple equipment.

The contest itself will start at 2115 on the first frequency for five minutes, and every five minutes on a new frequency, for a total of five frequencies. All transmissions will be made within 5 kHz of 3895 kHz. Individual transmission start times may be delayed slightly due to equipment setup and adjustment.

Each transmission will be identified in 10 wpm Morse (CW) for about three minutes to allow the frequency to be located and will then remain key-down for the remaining minutes. At the end of the five minute period the transmission will cease. For station competing in the Ultra Category (see below) note that the last 10 seconds or so of carrier will be considered the reference frequency.

2. Read each frequency as accurately as possible. To qualify for an award it is essential to read at least three of the five frequencies. Only one entry will be accepted for each participant.

3. Post your entry to: Doug Gorman Frequency Measuring Contest, NZART, P0 Box 40-525, Upper Hutt.

4. Entries must be sent within seven days, together with details of equipment used and which section entered (John McKim Cup, Norm Edwards Shield, or Ultra Category). Entries postmarked after Monday 12 Sept will not be considered. Please include your call sign on the actual results entry as envelopes may be discarded.

5. Results

Participants may nominate which of the five frequencies they measured should be considered in their average score, with a minimum of three. The degree of accuracy will be judged by subtracting measurements from the actual transmit frequencies and averaging the nominated results. Do not ask the contest organizer to select your best frequencies.

6. Awards

John McKim Cup for those using simple direct reading type of equipment. This includes a receiver using a calibrated dial or digital readout of kilohertz to one decimal place (100 Hz), or a simple commercial or homemade heterodyne type frequency meter (BC221, LM-10, etc).

Norm Edwards Shield for those using more sophisticated equipment. This includes receivers with digital readout of kilohertz to two or more decimal places (10 Hz or better) and computer methods, oscilloscopes, generators, etc, typically referenced to a local frequency standard (TCXO or ovened oscillator).

Ultra Category for measurements directly referenced to an atomic standard or GPS disciplined oscillator located at the participant's QTH. This does not include off air calibration to WWV, etc, during the contest.

Branch Award certificate to the branch with the lowest average of the three best competitors. If you wish to support your branch, state you branch number and name on your entry form.

Certificates will be provided to all entries with an average deviation of 100 Hz or better.

If you make readings during this activity, but do not wish to have your results published, or if you wish to comment please drop the contest organizers a line so we know how many people were interested.

73 de John ZL4JY

FMTAG NOTES FOR HQ INFOLINE 236 AND NZART WEBSITE

PROPOSALS

None this month.

FINAL RECOMMENDATIONS

Published as Proposals on the NZART website and in HQ Infoline 235. No comments have been received.

Branch 25 Napier has applied to change the channel, and invert the input-output frequency split, of its 8425 repeater located at Taraponui, Topo50 map reference BH38 233618. The repeater's transmit frequency will be 434.050 MHz and its receive frequency will be 439.050 MHz.

ZL2AJ has applied for an APRS Digipeater located at Kauahei Topo50 map reference BL38 166828. The digipeater's transmit and receive frequency will be 144.575 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Sept/October issue of Break-In-closes on 10-September-2011
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 03-September-2011 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use the Call Book address. All other material can go to e-mail:
zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on SUNDAY 28th August 2011 and Next HQ-Infoline e-mailed on SUNDAY 4th September 2011.

777. [RAC-Bulletin] RAC Bulletin 2011-025E - Montreal Amateur Radio Club to Host 2012 RAC Annual General Meeting.

RAC Bulletin 2011-025E - Montreal Amateur Radio Club to Host 2012 RAC Annual General Meeting.
2011-08-21

The location of the 2012 Annual General Meeting was announced during the 2011 Annual General Meeting [AGM] held in St. John's Newfoundland. The 2011 AGM was hosted by the Society of Newfoundland Radio Amateurs [SONRA]. The 2012 AGM will be held in Montreal and will be hosted by the Montreal Amateur Radio Club. The exact dates will be announced in September or October.

RAC is pleased to come to 'la belle province'. RAC members are urged to come to the AGM and to consider arranging their schedules to add a little vacation to take in the sights and sounds of the cosmopolitan city of Montreal and visit other parts of Quebec.

Stay tuned for more information.

Geoff Bawden, VE4BAW
President and Chair Radio Amateurs of Canada

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th-August, through Sunday, 21st-August there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5C, MOROCCO (IOTA, LH and WFF Op!). Operators Ruggero/IK2PZC (5C2P), Leo/I8LWL (5C2L), Fred/IK7JWX (5C2J), Simon/IZ7ATN (5C2SG), Ampelio/IS0AGY (5C2B), Mounaim/CN8QY (CN8QY/p) and Belkaid/CN8QX (CN8QX/p) will be active from the city of Dakhla and the lighthouse (ARLHS WSA-001), which is part of the National Park off the coast of Dakhla (WFF CNFF-007),

Morocco, between September 22-29th. Their main purpose of this DXpedition is to activate Herne Island (AF-068) in South Western Sahara IOTA Group (CN), using the callsign 5C2/homecall/p. Activity will be on all HF bands, including 30/17/12m, and 6 meters, using all modes. The team might try an entry in the CQWW DX RTTY Contest (September 24-25th) using the callsign 5C2P. QSL via their home callsigns, direct or by the Bureau. QSL 5C2SG via IZ7ATN, direct (see QRZ.com). QSL CN8QY/p via I8LWL, direct only. The team is looking for sponsors and contributors to help fund the operation.

5W, WESTERN SAMOA. Lance, W7GJ, will be active as 5W0GJ from Western Samoa (OC-097) between August 23-31st. This will be a 6 meter EME DX-pedition. QSL via his home callsign.

9H, MALTA. Gab, HA3JB, will be on a holiday IPA DXpedition from here and will be active as 9H3IP between September 16-27th. Activity will be on 80-10 meters using CW, SSB, RTTY, PSK31 and SSTV. Operations will also include the CQWW RTTY Contest (September 24-25th) as a Single-Op/ Single-Band (??) entry. QSOs are valid for the HA-IPARC Award. QSL via HA3JB, direct (w/SAE) to: Gabor Kutasi / H-8601 Si&#65533;fok, P.O.Box 243, Hungary. If you are IPA member please write/add your E-mail address.

9U, BURUNDI. Pierre, ON7CIP, is expected to be active from Bujumbura, possibly as 9U7T (requested callsign). Activity will be limited during his spare time as Pierre is there for work, so this is not a DXpedition. Operations will be on 20 meters SSB and/or PSK31. More details will be forthcoming on QRZ.com. QSL via his home callsign.

C5, THE GAMBIA. Members of the Czech and Slovak OM0C Contest Crew have announced another DXpedition to The Gambia to take place in October and November (specific dates not announced). The OM0C Crew plans to be active in the CQWW DX SSB Contest (October 29-30th) and CQWW DX CW Contest (November 26-27th) as Multi-Multi entries. QSL both operations via OM2FY. Operators mentioned are Rich/OK8WW/OM2TW, Jiri/OK1RI, Norbert/OM6NM, Joe/OM5AW, Dan/OK1DIG, Vlada/OK1NY, Petr/OK1FFU, Jiri/OK1DO, Jan/OM2IB, etc... Look for updates at: http://www.om0c.com

CE9, ANTARCTICA. Tomas, CE9VPM, will be active from Chilean Air Base Presidente Gabriel Gonz&#65533;lez Videla in the Antarctica beginning November 2011 through March 2012. Activity is expected to be on 20 meters and possibly other bands. QSL via PO Box 13630, Santiago, Chile.

CN, MOROCCO. Marko, S55EI, will be active as CN2EI between September 3-20th. Activity will be on mostly on 40/6/2 meters using SSB and PSK31. QSL via his home callsign.

CY9 QSLS WANTED FOR MUSEUM. Duane, WV2B (VA1ZZ), announced the following: "I am interested in creating a display of QSLs from DXpeditions to St. Paul Island (Nova Scotia, Canada) CY9, for donation to the St. Paul Island museum located in Dingwall, NS. Sorry, I just can't afford to pay 10 USDs for each one on eBay, but would like to be sure the museum is able to recognize the history of DXpeditions and radio operations from the island

with a display of actual QSL cards issued for contacts from the island. So, if anyone has old cards they no longer want, have duplicates of, from an SK or whatever, I would sure like to have them. Just need one from each activation in good condition for framing and display. Incidently, the lighthouse from SW St. Paul which had been on display at the Coast Guard HQ in Dartmouth is now at the museum and being reassembled there. Check out the St. Paul Island Historical Society on facebook to see pics of the project..... 73 for now, Duane, WV2B (VA1ZZ)."

E5, SOUTH COOK ISLANDS (Update/Correction). Bruce, ZL1AAO (ed. Not Ron as reported last week - I must of been thinking of ZL1AMO), will be active from Rarotonga Island (IOTA OC-013), South Cook Islands, beginning August 19th, for 10 days. He will sign as E51AAO. Bruce told OPDX that this will be his first visit on the island. Activity will be holiday style, and he will be operational on SSB only, 40-10 meters, using 100 watts to a dipole or 1/4 wave GP antennas. QSL via LoTW, eQSL and direct only; sorry no Bureau cards. He will upload the log when he returns home.

EA/EF/EG, SPAIN (Special Event). Look for the following 20 special event stations to be active between August 23rd and September 11th: EF1AST, EF1DFP, EF1DR, EF1HLW, EF2RC, EF2TW, EF4GEL, EF4RCH, EF4TD, EF5AR, EF5DY, EF5GUI, EF7CIN, EF7FT, EF7JB, EF7TV, EF8AKN, EG5DM, EG5FL and EG5KB. Each station active represents a football team competing in the Spanish Football League Teams (EA-FLT). A special "2011 EA - Football League Teams Award" is available. Complete details are available at: http://www.ea-flt.com

ER, MOLDOVA. Victor, ER3MM, from Beltsy, states that he is pretty much on the air daily from 1800-2100z, and usually on 15, 17 or 20 meters. QSL via his address on QRZ.com.

FH/TO, MAYOTTE. Hartwig, DL7BC, will be active as FH/DL7BC from Mayotte Island (AF-027) between March 21st and April 6th (2012). His activity will include an entry in the CQWW WPX SSB Contest, possibly using a TO callsign. QSL via the info on QRZ.com or Hartwig's Web site at: http://www.qslnet.de/member/dl7bc/index.htm

FR, REUNION ISLAND. Willi, DJ7RJ, will once again be active as FR/DJ7RJ from Reunion Island (AF-016) between October 4-26th. Activity will be focused on the lower bands using a Elecraft K2 with a 500 watt amp into an inverted L antenna. QSL via his home callsign, by the Bureau or direct (see details on QRZ.com).

II9, ITALY. Members of the "OK CIAO Contest Club" will be active from IT9GSF's station using the special callsign II9T from Sicily (EU-025) during the CQWW DX SSB Contest (October 29-30th) and the CQWW DX CW Contest (November 26-27th) as a Multi-Op/Two-TX entry. Operators mentioned are Vincenzo/IT9CHU, Marcello/IT9CJC, Antonllo/IT9EQO, Gianni/IT9BUN and an international team of friends. They are looking for operators (contact IT9GSF). They also mention the two stations to take part in the contests will operate as follows:
Station 1 Multi Op/Two TXs - operators required;

Station 2 Sinlge-Op (20m) and Sinlge-Op (80m) during CQWW SSB; PLEASE
NOTE: Station 2 Sinlge-Op (20m) and Single-Op (160m) during
the CQWW DX CW Contest.
QSL via IT9CHU.

IM0/IS0, SARDINIA. Max, IZ4JMA, will operate from two different Sardinian islands between September 3-17th. His tenative schedule is as follows:
September 3-10th - From Isuledda Island (EU-024); callsign IS0/IZ4JMA
September 10-17th - From La Maddalena Island (EU-041); callsign IM0/IZ4JMA
Activity will be on 80-10 meters using CW, SSB and the Digital modes. QSL via his home callsign, direct or by the Bureau.

IOTA NEWS.....
EU-011. Members of the Wessex Contest Group will be active from the Isle of St. Martin's, Isles of Scilly, using the club callsign MX0WCB between September 11-17th. Operators mentioned are Dave/M0SFT, Simon/M0TTE and Dan/M0TGN. Activity will be mainly QRP, on 40/20/17/15/10 meters. The team will use 3 x FT817, a Clansman PR320 and an FT897 as the main shack radio. QSL direct, by the Bureau, eQSL or via M0WAY. Visit the club's Web site at: http://mx0wcb.blogspot.com

EU-065. Operators Dick/F6DXE, Andy/F4ELK and Tartuff/F4ELI will be active as TM5Q from Qu�m�n�s Island (DIFM AT-039) between September 30th and October 2nd. Activity will be on 40/20/15/10 meters using CW, SSB and the Digital modes. QSL via F4ELI, direct or by the Bureau.

EU-138. Fred, SM7DAY, will be active as SM7DAY/P from Senoren Island between now and August 28th. Activity will be on most HF bands using CW and SSB. QSL via his home callsign, direct or by the Bureau.

NA-029. George, K3GV, will be active as K3GV/VY2 from Prince Edward Island between September 1-30th. Activity will be mainly on 20 and 15 meters. QSL via his home callsign.

SA-020. Operators Tonio/F4ACR, Christophe/F4CRE, Denis/F4DNU, Jean-Paul/F5OQK, Jean-Pierre/F6AIM and Jean-Pascal/FY5LH will be active as TO5G from Royale Island, Salut Islands, French Guiana, between January 2-7th, 2012. QSL via F5KDR, direct or by the Bureau. More details will be forthcoming.

KH0, MARIANA ISLANDS. Al, W6HGF, will be active as W6HGF/KH0 from Saipan (OC-086, USI NI002S, WLOTA 1333), Northern Mariana Islands, between September 20-30th. He will be staying at the Saipan Rental Shack, and plans to focus his operation on RTTY. The CQWW RTTY Contest is held during that next weekend, and if all is going well, he will participate. He will use the other modes when time permits. QSL via LoTW is preferred, and will be uploaded daily during operations. QSL direct is also "OK". For more details, check his Web page at:
http://www.qsl.net/w6hgf/SAIPAN-W6HGF_KH0.html

ADDED NOTE: Al is also in the planning stage to make a trip to Ascension Island during November 2011. More details will be available after his Saipan opertaion. He is also thinking of going back to Miquelon Island (FP) next March 2012 (he was there earlier in March of this year), but that is just in the thinking stage.

KH6BZF PROPAGATION FORECAST/REPORT (August 22-28th)....

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NCDXF PRESS RELEASE. Glenn Johnson, W0GJ, NCDXF Vice President, sent out the following press release on August 18th: "The Northern California DX Foundation" (NCDXF) is pleased to announce that G. Kip Edwards, W6SZN, is the new Secretary of NCDXF effective August 1, 2011. Kip rejoined NCDXF as a director approximately two years ago and replaces Tom McShane, NW6P, who resigned for health reasons. The board and officers of NCDXF are pleased that Kip would take on these added responsibilities."

OH0, ALAND ISLANDS. Nao, JA1HGY, will be active as OH0HG from Aland Islands (EU-002) between September 2-4th. Activity will be on CW, SSB and RTTY, and include an entry in the All Asian DX Contest SSB Contest. ADDED NOTE: Nao is expected to also sign as OH0HG/OH2 before and after his trip to the Aland Islands, where he will visit the mainland Finland, and meet Martti, OH2BH, to celebrate their long term friendship (since 1961). QSL via JA1HGY. Online log will be available on QRZ.com.

OJ, MARKET REEF. Operators Hans/PA0VHA, Steef/PA2A, Jack/PA3BAG, Will/PA3ALK and Wim/PA2AM to be active as OJ0CC from Market Reef (EU-053) between August 27th and September 2nd. QSL via PA2A. For more details, look at: http://www.pa2am.nl --or-- http://www.pi4cc.nl

OOOPPPSS DEPARTMENT. WOW! Your editor needs to change his reading glasses and some of his fingers are working ahead of themselves or out of turn on this one. In OPDX.1022, under "VP2V, U.S. VIGRIN ISLANDS." should have read "VP2V, BRITISH VIRGIN ISLANDS.". Please correct last week's bulletin.

P4, ARUBA. Operators Bob/W3BTX (P49T) and Roy/W3TEF will once again be active from Aruba (SA-036) between August 31st and September 7th. Activity

will be holiday style on 160-10 meters using CW and SSB. QSL P49T via W3BTX.

PA11, NETHERLANDS (Special Event). Fred, PA0FAW, will activate special event station PA11WSF between September 1-25th. Activity will take place during the "World Statues Festival" which is held in Arnhem. Operations will be mainly on CW and PSK31, with some activity of which will be from WFF-FF-005. QSL via PA0FAW, direct, by the Bureau, eQSL, no LoTW, and SWL-reports very welcome.

PJ5, SABA AND ST. EUSTATIUS. Operators Wlodek/SP6EQZ and Janusz/SP6IXF will once again be active as PJ5/SP6EQZ and PJ5/SP6IXF from St. Eustatius (NA-145) between October 20th and November 3rd. Activity will be on all HF bands, 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns, direct or by the Bureau.

QSL AT0ULH via VU2CDP. Activity was from the Uttan Point Lighthouse (WLOL IND-119) during the International Lighthouse/Lightship Weekend. Operators were Akshay/VU2BUG, Basappa/VU2NXM, Deepak/VU2CDP and Nandu/VU2NKS.

QSL IL3A via IK3HHX, by the Bureau or direct. Activity was by the Extreme DX & Contest Group, from Vignole Island (EU-131, IIA VE-017). For more info, see QRZ.com or <http://www.extremegroup.org>.

VU4PB on LoTW! Prasad, VU2PTT, informs the DX community this past week that the complete VU4PB log has been uploaded to LoTW.

QSL RECEIVED VIA LoTW: 7Q7VB, EA3IN, IK3ORD, IS0B, IZ6CLN, J7A, JA1BOQ, KH7Y, MO0GSY, PI4CC, PR2P, PY4LH, TY1KS, V31RN, V47KP, V48M, VE9MY, VP6BR, ZD8D and ZL1ALZ

QSLS RECEIVED VIA MAIL: 3DA0ZO, CR2X, J87AB, PV8ADI and PY0FO

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SU, EGYPT. After his 9H3IP operation (see above) Gab, HA3JB, will once again be active as SU/HA3JB - his renewed license is valid until November 30th. Activity will be on on CW, SSB, RTTY, PSK31 and SSTV. He will also be in the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (??) entry. QSOs are valid for the HA-IPARC Award. QSL via HA3JB, direct (w/SAE) to: Gabor Kutasi / H-8601 Si&#65533;fok, P.O.Box 243, Hungary. If you are IPA member please write/add your E-mail address.

T32, EAST KIRIBATI. Only a few more days to work Giovanni, I5JHW, as T32JB from the Captain Cook Hotel on Christmas Island (OC-024) until August 24th. Activity will be holiday style on CW, SSB and RTTY, using an IC-718 and a 7-band vertical antenna. QSL via I5JHW. ADDED NOTE: Giovanni is actually on a family vacation which also includes Fiji (3D2HW) and New Caledonia (possibly his renewed callsign FK/I5JH), but the main operations is from Christmas Island. For more details, visit his Web page at: http://i5jhw.weebly.com

T8, PALAU. Tatsuo, JA8CMC, will be active as T88TO from Palau (OC-009) between September 16-19th. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign.

TK, CORSICA. Operators Patrice/F5RBB and his XYL Mireille/F4FRL will be active as TK/homecall from Corsica between September 10-24th. Activity will be on 40-10 meters using SSB and the Digital modes. QSL via their

home callsign, direct or by the REF Bureau.

V3, BELIZE. Norman, 5B4AIF, will be active as V31NB from Placencia (V31MD's rental QTH) between December 16-27th. He hopes to operate on as many bands as possible, but SSB only. QSL via EB7DX. Norman will upload his log as many times as he can, but does not know how good the InterNet will be so please be patient. Log will be available at:
http://www.clublog.org/logsearch/V31NB

VI6, AUSTRALIA (Special Event - Big Callsign). The Scout Member Amateur Radio Team (SMART) in the VK6 district has been given the special callsign, VI6CHOGM, to be active between October 28-30th. Activity is to celebrate the "Commonwealth Heads of Government Meeting" (CHOGM) in Perth, Western Australia, to discuss global and Commonwealth issues, and to agree on collective policies and initiatives. They plan to operate as much as possible from the Peter Hughes Scout Communications Centre in East Cannington, although other clubs may wish to book a period to operate from their club QTH. Activity will be on 80-6 meters using the "World Scout Calling Frequencies", mostly on SSB, as well as PSK31 and SSTV. There may be some CW. QSL via the Bureau or direct (see QRZ.com). For more details, updates and operating frequencies, see the VI6CHOGM Web page at: http://vi6chogm.com

ZA, ALBANIA. Operators Dusan/YU1EA and Branko/YU1FW are currently active as ZA/homecall until August 22nd. Activity is on all HF bands and modes. QSL via LoTW or by the QSL Bureau to YU1EA.

ZK2, NIUE. Steven, ZL4CZ, will be active as ZK2AB from Namukulu Village between September 9-16th. Activity will be limited because he is on holiday, but hope to fit in as much radio as possible. He will use a Yeasu FT840 (with a FT857 for backup) and a 32 ft. multi-band vertical and Buddipole for antennas. QSL via ZL4CZ; must include SAE and IRC or 2 USDs.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 21st August 2011

Two Metres Counties Contest

This contest, which takes place on Sunday next, 28th August, from 2.00 pm to 4.00 pm local time, provides a great opportunity to liven up the two metre band. The 32 counties in EI and GI are multipliers, so the rarer counties will be in great demand.

Both SSB and FM can be used and a station may be worked on both modes. The contest rules specify that after any QSO in which you are called by another station, you must QSY to another channel (FM), or by at least 3 kHz (SSB), before soliciting another QSO; when you respond to a CQ or QRZ from another station, you then have the right to that frequency for a single additional QSO before QSYing. See www.irts.ie/contests for more details about this and other IRTS contests.

Increased Power for Contests

Following representations from IRTS, ComReg has agreed to allow increased power to all licensed amateurs for a specific list of the major HF and VHF/UHF contests. On HF, 1500 watts can be used and on VHF 1000 watts for the duration of the contests concerned. Through an error the 28 MHz band was omitted from the multiband contests. This will be taken up with ComReg The list of contests and other details can be found on the ComReg website under Radio Spectrum Licensing Licence Types Radio Amateurs. The society is grateful to ComReg for granting this additional facility to radio amateurs generally.

IARU 2011 Regional Conference

Seamus EI8BP IRTS Vice-President/PRO and Ger McNamara EI4GXB IRTS Hon. Secretary represented the society at the 22nd IARU Region 1 General Conference at Sun City, South Africa 12-19 August. Over 100 papers were discussed over the period of the Conference by three main Committees. The recommendations of these committees goes to Plenary sessions for ratification.

IRTS had submitted a paper on the regulation of transnational remote controlled operation which also raised the question of its use in

contests as well as the use of appropriate call signs that would clearly show the location of the station and the operator if different. The paper was adopted and the HF Committee was mandated to look into the matter. Revised band plans for 50 and 70 MHz were also agreed.

The work of the committees is scheduled in such a way that two delegates can cover the work of the conference.

Many years ago the Society established a fund into which part of the subscription income is lodged each year so as to allow the Society to actively participate in the work of these three yearly conferences.

Bulgaria was voted as the next venue for the 23rd IARU Region 1 conference in 2014 sponsored by the BULGARIAN FEDERATION OF RADIO AMATEURS (BFRA)

ARISSat-1 Presentation

South Dublin Radio Club has now resumed its Tuesday meetings. At the first meeting after the holidays, John EI7BV made a presentation on amateur radio satellites, in particular ARISSat-1, the satellite which was launched earlier this month from the International Space Station.

John's talk focussed on sources of information for the frequencies and pass times of amateur radio satellites in addition to the software available to assist in satellite tracking. He also covered the antenna requirements for satellite operation.

ARISSat-1 was within sight of the club QTH during this talk and an effort was made to monitor some of the downlinks. In the event, nothing was heard; we later learned that the satellite's batteries are failing faster than expected, so its power management system is cutting transmit power from time to time - which is possibly why no signals were detected during John's presentation.

Cork Radio Club

Subject to demand, Cork Radio Club plan to hold theory classes again over the coming months. Interested parties should contact club secretary Dave EI4BZ on 087-6290574 or email to ei4bz at eircom dot net.

The club will be represented at the SSB Field Day at Garbally College in Ballinasloe in two weeks time and would welcome new members who would like to travel and experience field day operating.

North Cork Radio Group

The North Cork Radio Group is pleased to announce their second annual rally and electronics fair at the Blarney Golf Resort, Tower, Co Cork. on Sunday September the 11th 2011.

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel:+353 21 4384477.www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 086-3357100 Email:ei7gtb/ at /gmail/ dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

Shannon Basin Radio Club

Once again the Shannon Basin Radio Club will be hosting the SSB field day on the weekend of 3rd and 4th September 2011. The grounds of Garbally College in Ballinasloe in Co. Galway have again been made available to any clubs or individual operators who wish to take part in the event. The club will also be hosting its very popular barbeque which is one of the highlights of the weekend. Anybody wishing to receive more information may contact Brian ei8iu by email "brianei8iu/ at / eircom dot /net or any club member.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

4W6A TIMOR-LESTE (EAST TIMOR) DXPEDITION SEPTEMBER 16 &#65533; 26, 2011
www.4w6a.com

PRESS RELEASE NUMBER 5 &#65533; August 22, 2011

The 4W6A DXpedition is now less than one month away. Low-band operators will be pleased to hear that the team now has a Titanex V160E 87ft / 26.5m-high vertical antenna for use on 160m at 4W6A. The antenna was shipped from the manufacturers in Germany and has arrived in Darwin, Australia, from where it will be trans-shipped to Dili, Timor-Leste, later this month.

The team had previously planned to use an 18m Spiderbeam pole as the support for a 160m inverted-L. With the arrival of the Titanex vertical, the 18m Spiderbeam pole will now be used for a full-size 80m quarter-wave folded monopole vertical instead.

Other antennas include monoband quarter-wave verticals for 40, 30 and 17m kindly sponsored by Tony Burt, VK3TZ, of Rippletech Electronics in Australia, a 2-element phased array for 40m, an Australian-made Com-an-tena vertical for 10, 15 and 20m, a Butternut HF6V, a 15m vertical dipole, and a G3TXQ Hexbeam made by team member Ant David, MW0JZE. All the antennas will be located on the beach within a few metres of the ocean.

Thanks to the generous sponsorship received from many DX foundations, clubs and individual DXers, it has become possible to ship much of the heavier equipment to Dili, Timor-Leste, in advance of the expedition. The team is very grateful to all DX groups, companies and individuals that have sponsored the expedition. All are listed with thanks on the 4W6A website at www.4w6a.com/sponsors

4W6A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East
Timor), from 16 to 26 September 2011. Activity will be on all bands 10
to 160 metres, using CW, SSB and RTTY with up to four stations
simultaneously. The QSL manager is M0URX, direct (SAE plus 1 IRC /
$2), via the bureau, or LoTW. The entire log will be uploaded to LoTW
as quickly as possible after the end of the operation or, if possible,
also during the DXpedition. Direct or bureau QSLs may also be
requested using the M0URX Online QSL Request Service (OQRS) at
http://m0urx.com/oqrs (there is also a link from the 4W6A website at
www.4w6a.com/qsl-information).

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
15 - 21 August 2011

Solar activity was at very low to low levels. Activity was at low
levels on 15 August, with several C-class flares from Region 1271
(N16, L=059, class/area Ehc/290 on 18 August). Activity decreased to
very low levels on 16 August. Activity increased to low levels on
17-18 August, with several C-class flares from both Region 1271 and
Region 1272 (S21, L=054, class/area Dao/090 on 21 August). No flares
were observed on 19 August. Acitivity increased to low levels during
20-21 August. The largest of these was a C3 flare from Region 1271.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during 15-16 August. Fluxes increased to
normal to high levels on 17-18 August. Fluxes decreased to moderate
levels during 19-20 August. Fluxes ranged from normal to moderate on
21 August.

Geomagnetic field activity was at predominantly quiet to unsettled
levels with an isolated period of active to minor storm levels on 15
August due to a coronal hole high-speed stream (CH HSS). Activity
decreased to quiet to unsettled levels, with isolated active levels
during 16-17 August as the CH HSS subsided. Activity decreased to
quiet levels during 18-19 August. Activity increased to quiet to
unsettled levels during 20-21 August due to a CH HSS.

Forecast of Solar and Geomagnetic Activity
24 August - 19 September 2011

Solar activity is expected to be at very low to low with a chance
for moderate levels during 24 August to 06 September until old
Region 1263 (N18, L=315) departs. Activity is expected to decrease
to very low to low levels for the rest of the period.

No proton events are expected at geosynchronous orbit.
```

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels through 03 September. Fluxes are expected to increase to moderate to high levels during 04-09 September. Fluxes are expected to decrease to normal to moderate levels during 10-12 September. Fluxes are expected to increase to moderate to high levels during 13-14 September. Fluxes are expected to decrease to normal to moderate levels during 15-19 September.

Geomagnetic field activity is expected to be at quiet levels during 24-26 August. Acitivity is expected to be at quiet to unsettled levels on 27-28 August due to a weak recurrent CH HSS. Activity is expected be decrease to quiet levels during 29 August - 02 September. Activity is expected to increase during 03-05 September due to a recurrent CH HSS. Predominantly quiet levels are expected during 06-10 September. Activity is expected to increase to quiet to active levels during 11-12 September due to a recurrent CH HSS. Predominantly quiet levels are expected for the rest of the period.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-08-25
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF is back with a new fresh design - since 19.08.2011 **

After more than 4 years it was time for an update of the website
layout. The change was focussed on getting a smoother, simpler and
more information orientated style. Looking back to the start of
MMMonVHF, where initially everything was quickly mixed together,
I tried now to get a more common design for the different sections.
However, not all functions could be tested in advance, so if you
find anything not working or showing properly, please let me know
and drop me a note. I recommend to reload the page, so that you are
not loading old page contents from your browser cache. I hope that
all of you will welcome the new fresh website design!
SOURCE: Ansgar, DG2KBC on behalf of the Team of MMMonVHF

** DXCC at Bob, ZL3TY **

Yesterday the postie delivered 2m DXCC certificate #69, dated June
22, 2011. This is a first for ZL, Oceania and possibly the Southern
Hemisphere. The list of 2m DXCC recipients can be seen at
http://www.arrl.org/system/dxcc/view/DXCC-2M-20110818-A4.pdf All but
one of the QSOs was made by EME (moonbounce), the exception being a
meteor scatter QSO with VK0MT on Macquarrie Is. My first 2m EME QSO
was with W5UN on 16 June 2002. All but a few CW QSOs were made
using WSJT digital mode (by K1JT). WSJT has revolutionised VHF
DXing and made EME possible for small stations, for example I have
worked many single yagi stations, the smallest 100W to 10el yagi.
My QTH is good for moonset with a clear horizon over the sea, which

gives strong ground gain at times. Activity on 2m EME is very good
with lots of DXpeditions to rare locations, I have lost count of
the number of QSOs with Bob ZL1RS from remote spots. My station
is 4x12el yagis, TS790A with MGF1302 GaAsFET preamp, GU74b amp
500W. Antennas, preamp, TX amp and other bits all homebrew.
SOURCE: Bob, ZL3TY, via MoonNet

** LA8YB Silent Key **

As a close friend of Finn, LA8YB, I am sorry to report the sad news
that LA8YB, probably widely known on 2m EME, passed away saturday
20. august 2011. Finn was an eager EME operator for many years and
managed to work WAS (Worked all 50 US states) on 2m before he got
Canser. His antennasysten was one of the biggest in the world and
he was over 70 years old putting all up by himself. Quite an
achivement. I hope that this info can be spread to his EME friends.

J52EME Team will test its expedition setup on 26 Aug and maybe
some hours on 27 Aug. The Callsign will be IQ3VO, locator JN55LL.
Freq. 144.130, IQ3VO txing 1st. The station will operate with the
setup we'll use at J52EME: same antennas, transceiver, cables,
preamp, amplifier, etc. If IQ3VO is a new init for you, you can
send your QSL now or send it together with that of J52EME.
The Team members will be I3LDP, I3EJ, IK3ESB, IK3RBE, IZ3BUR,
and more! In the coming weeks will be online the web site of the
VERONA DX TEAM, with the news about the expedition. We'll keep you
informed. This is our first EME expedition ! With the passing of
time we hope to operate as well as the ATLETICO TEAM !
Thanks Renï¿½ (PE1L) for your support and hints, we are copying from
you! Give us a call on band ! 73, Ciao, the Verona DX Team

The Team behind Vlad is happy to announce the next expedition to
the rare squares. We are planning our next trip as follow:
Square: KN76JB (Spit Arabatskaya Arrow) Operators: Alex, UR7GO
Anatoly, UY5HF Vlad, US8ZAL. Probably any others OM's from
Henichesk will join to the trip. Equipment: 1kW, 4x9H DK7ZB
Mode: MS, EME - Date: September 20...27 - Depends of the weather
but possible to move and spend few days in KN57KV also. (the
spit often filled with sea).
SOURCE: tnx to US8ZAL, Vlad, direct to MMMonVHF

Hi EME gang, after many works and changes we have ready EME DX
pedition with Zdenek OK3RM and Slawek DL6SH. In first we were
expecting go to Albania ZA, but situation in expected QTH is
still not good enough. Mainly new diesel generator is still not
able support our traffic and due to many black outs we decide to
go visit other place. We will be QRV on 22-23rd of October 2011
from IS0. So during ARRL EME contest you have chance work with
multiplier and for many new DXCC. Our plan is to be QRV all the
time 144 MHz with separate system. Than 432 MHz first window in
contest to Moonset for EU and W. Next Moonrise we will be 1296 MHz
QRV whole window and last Moonrise on Sunday we will be back on
432 MHz for JA,VK,EU etc. Monday after ARRL EME contest we expect
to be QRV 2320 MHz all bands and would like to try also 10GHz.
If all will be o.k. and WX permit I would like to try new tripod
with HB9DRI control system during MW ARRL EME on terrace. Then I
will be on 10GHz with 3,2m portable dish and 2,3GHz with 10m dish.
So keep us cross a fingers and see you via Moon. More details
will follow on my web soon. 73!

The VERONA DX TEAM is happy to announce our upcoming 144 EME
activity from J5 Guinea Bissau (IK45GJ) Hello, after the foundation
of the VERONA DX TEAM is happy to announce our upcoming 144 EME
activity from J5 Guinea Bissau The 144 MHz EME operations are
scheduled for March / April 2012. Simultaneously we'll be also
active with an all-mode station on HF and 50 Mhz, supposedly with
the same or maybe a different call. We'll keep you updated.
The callsign requested is J52EME, locator IK45GJ. EME station setup:
2 x 8 Xpol, gasfet preamp and some power (abt 700w), IC-7000.

Maybe we'll have the possibility of an internet connection.
Freq will be 144.130 and J5 always first. The Team members will be
I3LDP, I3EJ, IK3ESB, IK3RBE, IZ3BUR, and more! In the coming weeks
will be online the web site of the VERONA DX TEAM, with the news
about the expedition. We'll keep you informed. This is our first
EME expedition ! With the passing of time we hope to operate as
well as the ATLETICO TEAM ! Thanks Renï¿½ (PE1L) for your support
and hints, we are copying from you! Give us a call on band !

** D9A qrv from Cheju Island, PM33GM **

Operators Ki-Sun HL4MC, Gyeong HL4CEL, Wang-hyun HL4RBR, Kei HL2UVH,
Eun-Gwang DS4EOI, Nao JA1HGY and Zorro JH1AJT will be active as D9A
from Cheju Island [Cheju Do] (IOTA AS-026, WLOTA 0686, KDN M11,
WW Loc. PM33GM) from 19-26th August 2011. This special callsign
will be used during the 20th Asian Conference on Intellectual
Disabilities from the Ramada Plaza Jeju Hotel. Activity will
be on 160-10 metres, 6 and 2 metres, using CW, SSB, RTTY and FM.
QSL via DS4EOI. SOURCE: ICPO Bulletin (19-26 August 2011)

** PG6HK qrv at International Lighthouse and Lightship Weekend **

During the International Lighthouse and Lightship Weekend (August
20-21st) the special callsign PG6HK will be active from the old
lighthouse in Harderwijk [aka De Vischpoort](ILLW NL0038, ARLHS
NET-162), Netherlands. The team will be active on several modes
on HF and VHF. Operators include Cil PA1RBZ, Gert PA2LO, Michel
PD0JMB, Ben PD0PDB and Jack PD2J. QSL via PA2LO, bureau preferred.
Website: www.PG6HK.com/ SOURCE: [ICPO] ICPO Bulletin

** 5C, MOROCCO (IOTA, LH and WFF Op!) **

Operators Ruggero/IK2PZC (5C2P), Leo/I8LWL (5C2L), Fred/IK7JWX
(5C2J), Simon/IZ7ATN (5C2SG), Ampelio/IS0AGY (5C2B), Mounaim/CN8QY
(CN8QY/p) and Belkaid/CN8QX (CN8QX/p) will be active from the city
of Dakhla and the lighthouse (ARLHS WSA-001), which is part of the
National Park off the coast of Dakhla (WFF CNFF-007), Morocco,
between September 22-29th. Their main purpose of this DXpedition
is to activate Herne Island (AF-068) in South Western Sahara IOTA
Group (CN), using the callsign 5C2/homecall/p. Activity will be on
all HF bands, including 30/17/12m, and 6 meters, using all modes.
The team might try an entry in the CQWW DX RTTY Contest (September

24-25th) using the callsign 5C2P. QSL via their home callsigns, direct or by the Bureau. QSL 5C2SG via IZ7ATN, direct (see QRZ.com) QSL CN8QY/p via I8LWL, direct only. The team is looking for sponsors and contributors to help fund the operation.
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1024

** CN2EI qrv from MOROCCO on HF and 50/144 MHz **

Marko, S55EI, will be active as CN2EI between September 3-20th. Activity will be on mostly on 40/6/2 meters using SSB and PSK31. QSL via his home callsign. SOURCE: Ohio/Penn DX Bulletin #1024

** VI6, AUSTRALIA (Special Event - Big Callsign)**

The Scout Member Amateur Radio Team (SMART) in the VK6 district has been given the special callsign, VI6CHOGM, to be active between October 28-30th. Activity is to celebrate the "Commonwealth Heads of Government Meeting" (CHOGM) in Perth, Western Australia, to discuss global and Commonwealth issues, and to agree on collective policies and initiatives. They plan to operate as much as possible from the Peter Hughes Scout Communications Centre in East Cannington, although other clubs may wish to book a period to operate from their club QTH. Activity will be on 80-6 meters using the "World Scout Calling Frequencies", mostly on SSB, as well as PSK31 and SSTV. There may be some CW. QSL via the Bureau or direct (see QRZ.com). For more details, updates and operating frequencies, see the VI6CHOGM Web page at: http://vi6chogm.com

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5X, UGANDA
Fred,DJ5RT, is going to show up again on the bands as 5X5WR - if the
UCC does not want to have an annual fee of 1.000 US $.
QSL via homecall.

5Z, KENYA
NV7E is active from Kenya as 5Z4EE. QSL via homecall.

7Q, MALAWI
GM3TAL is signing 7Q7MH on the HF bands and maybe also on 6m.
QSL via G0IAS, unfortunately only direct.
See also: http://www.7q7mh.org

9J, ZAMBIA
ZS6RI will be active as 9J2RI several times (for six weeks each) until
2012. QSL via homecall, the log will be uploaded to the LoTW.
For more information visit: http://zs6ri.blogspot.com

9U, BURUNDI
Pierre,ON7CIP, is working as 9U7T from the capital Bujumbura during his
spare time. Operation take place maybe only on 20m in SSB and/or PSK31.
QSL via homecall.

EA, SPAIN
Following special event stations are representing different clubs of
the Spanish soccer league from Aug 23 until Sep 11: EF1AST, EF1DFP,
EF1DR, EF1HLW, EF2RC, EF2TW, EF4GEL, EF4RCH, EF4TD, EF5AR, EF5DM,
EF5DY, EF5FL, EF5GUI, EF7CIN, EF7FT, EF7JB, EF7TV, EF8AKN, EG5DM,
EG5FL, EG5KB.
More information about the special Soccer League award and the
QSL routes can be found at: http://www.wix.com/ea5foxlima/ea-flt2011

EX, KYRGYZSTAN
The special event station EX20ID is celebrating the 20th anniversary of the independence of the Kirghiz Republic between Aug 26 and Sep 4.
See also: www.qrz.ru/awards/detail/2213.html

ER, MOLDOVA
Victor,ER3MM, from Beltsy can be found quite often on 15m, 17m or 20m between 1800 and 2100 UTC. For QSL route see QRZ.com.

F, FRANCE
The special event station TM11NOR is active until Aug 31 and celebrates the founding of the Duchy of Normandy 1100 years ago. QSL via F5UBH.

FK, FRENCH NEW CALEDONIA, OC-032
HAMs from French New Caledonia (OC-032) may use the special prefix TX during the XVI South Pacific Games in Noumea from Aug 27 until Sep 10.

FS, ST MARTIN, NA-105
Gregg,FS/W6IZT, is hitting the airwaves in CW, SSB and RTTY on 40m-10m from Saint Martin (NA-105) from Aug 20-29. QSL via N7XG.

I, ITALY
To remember its founding 55 years ago the ARI Vigevano is going to activate the special event station IR2LV between Aug 27 and Oct 2.
QSL via IK2AGN.

The special event station II4LXV celebrates the 65th anniversary of the ARI Bologna until Dec 31.
QSL via IZ4OUL (all QSOs will be confirmed via bureau automatically).

KH6, HAWAII, OC-019
Five HAMs of the Koolau Amateur Radio Club will activate the rare county Kalawao from the Kalaupapa peninsula on Molokai Island. The team will be QRV with two stations in SSB, CW and some RTTY on 10m-40m from Aug 25-29. They will take part in the Hawaii QSO Party as well but plan to work especially on the WARC bands before and after the contest.
Their callsign will be KH7Q. Send your QSLs via AH6NF or follow the instructions of the operator. E-mail contact is possible before the contest via ah6nf@arrl.net. See also: http://www.karc.net/HQP

LX, LUXEMBOURG
After their successful DXpedition to Jersey the "Low Land DXpedition Team" (LLDXT) members Jo,LX/PA9JO, Alex,LX/PA1AW, Ronald,LX/PA3EWP, and Dennis,LX/PA7FM, are planning a trip to Luxembourg next. They will use several yagis and monoband antennas on 160m-2m from Aug 30 until Sep 6.
Their website is located at: http://lx2011.lldxt.nl
This DXpedition is supported by CQFRIENDS.com, the new internet commu-nity for HAMs. QSLs for all calls via PA1AW.

OJ0, MARKET REEF, EU-053
PA0VHA, PA2A, PA2AM, PA3ALK and PA3BAG will be QRV in SSB/CW/RTTY/PSK on all bands (incl. 4m/6m) signing OJ0CC from Market Reef (EU-053) between Aug 27 and Sep 2. QSL via PA2A.

P2, PAPUA NEW GUINEA, OC-034
Renzo,I2KRR, who is a voluntary worker for the technical support of a catholic mission in Vanimo on the northern coast of the main island, will be active as P29FR mainly in SSB on 40m/20m/15m until March 2012. Operation will be limited to the local evening hours plus the weekend afternoons. QSL via I2RFJ (no IRCs direct), see also QRZ.com.

PA, THE NETHERLANDS
PA3EJE, PA3GON, PA8F, PD0LUR, PD2JAM, PD5EK and PE1MPA will be QRV as PG6MILL from "De Valk" in Montfoort between Sep 30 and Oct 1. They plan to work in all modes on 80m-10m using also a large Quad antenna mounted to a windmill. QSL via PE1MPA.

PJ2, CURACAO, SA-099
PJ2/DH2AK and PJ2/DL1THM are staying on Curacao (SA-099) from Aug 21 until Sep 8. QSLs via homecalls.

UJ, UZBEKISTAN
The special event station UM20Y is celebrating the 20th anniversary of the independence of Uzbekistan in CW, SSB and RTTY on the HF bands from Aug 25 until Sep 10. QSL via UK8AR.

UR, UKRAINE
Ukrainian HAMs are also celebrating the 20th anniversary of the independence of their country and activate the special event station EO20UR from the capital Kiev and other regions (QRZ.com) from Aug 22-28.
QSL via UT7UR.

YA, AFGHANISTAN
IZ8NWA is active as T6FR until November 2011. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
You can request bureau and direct QSL cards for the ZD8D DXpedition via the Online QSL Request System (OQRS): http://www.zd8d.de/index.php?qsl
However, you can still use the classical route via the QSL bureau.
The QSL manager is DL9HO. All QSOs were uploaded to the LotW already.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 27/28: YO DX Contest
Aug 27/28: SCC RTTY Championship

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-030, OZ, Bornholm Island: Horst,OZ/DF6FL, Siegfried,OZ/DL9ZE, and Peter,OZ/DL5FF, will be QRV from Sandvig/Bornholm in SSB, CW and RTTY on 10m-40m from Aug 27 until Sep 10. QSLs via homecalls.

EU-057, DL, Mecklenburg-Vorpommern State group: DG0ERS/p is working from
the Ummanz peninsula on Ruegen until the end of the month.
QSL via bureau or direct to his homecall.

EU-075, SV, Peloponnisos (Argolis) / Attiki region group: OM Steffen,DM3CW,
is active in CW signing SV8/DM3CW respectively J48AL from Aegina until
Aug 30. QSLs via the DARC bureau preferred.

EU-138, SM7, Blekinge County group: OM Fred,SM7DAY, is working in CW and SSB
from Senoren until Aug 28. QSL via homecall (bureau/direct).

IOTA Marathon: With the IOTA Contest behind us, it is time for everyone to
plan their island operations for the upcoming IOTA Anniversary Marathon
in 2012 and 2013. The complete rules can be found at:
http://www.rsgbiota.org/marathon/index.php
SWLs should be pleased to learn that there is also a special SWL
challenge. The organizer of the SWL part is Hans-Juergen,DE3EAR.
The complete rules for SWLs can be found on his website:
http://de3ear.weebly.com

WFF activities DLFF-134, DL: DF0WFF is working in CW/SSB on HF and VHF from
the nature park Wildeshauser Geest from Aug 26-28. They are also
handing out the special DOK WFFDL. QSL via bureau.

-> Archive leads you to the necessary links.
By the way, you can donate your own QSL collection to prevent putting it
in the trash.

CQ DX MARATHON

The CQ magazine introduced a new special contest: the CQ DX Marathon.
You have to work as many DXCCs and CQ zones as possible, regardless of bands
and modes, every year. The marathon starts all over every year on January 1.
It is not possible to earn more than 381 points (at the moment).

OPs NEEDED

II9T is still looking for some OPs (SOP 20m/SOP 80m) for the CQ Worldwide DX
Contest in SSB. If you are interested please e-mail: fabio.grisafi@libero.it

INTANGIBLE CULTURAL HERITAGE: Morse Code

The IARU Region 1 Conference in Sun City decided unanimously and without abstention that the UNESCO should recognize CW as an Intangible Cultural Heritage.

==> + NHC ISSUES HURRICANE WATCH FOR PORTIONS OF NORTH CAROLINA; ARRL
ESTABLISHES HURRICANE IRENE WEBSITE

As Hurricane Irene -- currently a Category 3 storm -- approaches the
US, the National Hurricane Center (NHC) has issued a hurricane watch
earlier this morning for regions north of Surf City, North Carolina to
the North Carolina-Virginia border, including the Pamlico, Albemarle
and Currituck Sounds. A tropical storm watch is also in effect for
north of Edisto Beach, South Carolina to Surf City, North Carolina.

<http://www.arrl.org/images/view/News/Irene_track082511.jpg> In
anticipation of Irene's expected landfall in North Carolina, the ARRL
HQ Emergency Response Team (HQERT) has established a website to keep
amateurs informed of the latest developments. This website will also
provide links to the NHC, WX4NHC -- the Amateur Radio station at the
```

NHC -- the Hurricane Watch Net and the Voice over Internet Protocol Weather Net, where radio amateurs can send in their reports. The HQERT will also be monitoring various nets and providing support to the affected Field Organizations beginning on Friday, August 26 from W1AW, the Hiram Percy Maxim Memorial Station.

The NHC is predicting that it will be issuing hurricane warnings later on Thursday for those areas already covered by the hurricane watch, and is expected to extend the hurricane watch northward along the Mid-Atlantic coast, as well. The NHC advises residents in the Mid-Atlantic States and New England to monitor Irene's progress in anticipation of possible hurricane watches or warnings. Read more here <http://www.arrl.org/news/nhc-issues-hurricane-watch-for-portions-of-north-carolina-arrl-establishes-hurricane-irene-website>.

==> + ARRL MEMBERS NOMINATE CANDIDATES FOR DIRECTOR, VICE DIRECTOR

The policies of the ARRL are established by 15 Directors who are elected to the Board on a geographical basis, with elections for three-year terms held in five divisions each year. At the same time, Vice Directors are elected on the same basis. Responding to solicitations in the July and August issues of QST, ARRL members in the Atlantic, Dakota, Delta, Great Lakes and Midwest Divisions have nominated 15 candidates for the 10 positions of Director and Vice Director.

One candidate for Vice Director was found to be ineligible by the Ethics and Elections Committee, which left one eligible nominee for Vice Director in each of the five divisions. Accordingly, all five have been declared elected to three-year terms beginning at noon on January 1, 2012. Two incumbent Directors were unopposed and have been declared re-elected. There will be balloting for Director in the Atlantic, Delta and Midwest Divisions. Read more here <http://www.arrl.org/news/arrl-members-nominate-candidates-for-director-vice-director-1>.

==> + FCC NEWS: ARRL FILES COMMENTS IN RESPONSE TO ANCHORAGE VEC'S WAIVER REQUEST

In April 2011, the Anchorage VEC -- one of 14 Volunteer Examiner Coordinators -- filed a Petition for Rule Making (RM-11629) that asked the FCC to give permanent credit to radio amateurs for examination elements they have successfully passed. This would, in effect, create a license exam credit that would be valid throughout an amateurs' lifetime, never expiring. On July 6, the Anchorage VEC submitted a Waiver Request with the FCC while RM-11629 is pending. This request asks that the FCC grant a blanket waiver ofSection 97.505 of the Commission's Rules to those radio amateurs whose licenses have expired -- and are beyond the two-year grace period for renewal -- to be afforded credit for examination elements previously passed. On August 11, the ARRL filed comments with the FCC, urging the Commission to dismiss or deny the Waiver Request. Read more here

<http://www.arrl.org/news/arrl-files-comments-in-response-to-anchorage-vec-s-waiver-request>.

==> + SCOUTMASTER ARTHUR ANDERSON, W9WPH, STABBED TO DEATH ON HIKING TRIP

Arthur Anderson, W9WPH, of Kokomo, Indiana, 76, bled to death after being stabbed in what authorities are calling "a senseless act." On Sunday, August 21, Anderson -- together with another man -- was leading two Boy Scouts, ages 11 and 12, on a required five mile nature hike on the Nickel Plate Trail in Bunker Hill, 60 miles north of Indianapolis. According to Indiana State Police Sergeant Tony Slocum, the group had stopped on the trail to discuss a tree when Anderson was attacked from behind. Anderson, a scouting volunteer for 50 years, was an Assistant Scoutmaster of a troop based at Redeemer Lutheran Church in Kokomo. Read more here <http://www.arrl.org/news/scoutmaster-arthur-anderson-w9wph-stabbed-to-death-on-hiking-trip>.

==> + SECTION NEWS: GEORGIA, WESTERN WASHINGTON SEE NO CHANGE IN SECTION LEADERSHIP

Two Section Manager elections this summer were decided by member balloting. In Georgia, incumbent Gene Clark, W4AYK, of Albany, was re-elected to a second term with 820 votes. His opponent Verne Fowler, W8BLA, of Cumming, received 365 votes. In Western Washington, Jim Pace, K7CEX, of Centralia, was re-elected for a third term with 965 votes. His opponent Daniel Stevens, KL7MA, of Kent, received 508 votes. Both men will begin new terms of office on October 1. Read more here <http://www.arrl.org/news/incumbent-section-managers-in-western-washington-georgia-re-elected>.

==> IARU ADMINISTRATIVE COUNCIL HOLDS ANNUAL MEETING IN SOUTH AFRICA

The Administrative Council of the International Amateur Radio Union (IARU) held its annual meeting on August 19-20 in Sun City, South Africa. The AC is responsible for the policy and management of the IARU and consists of the three IARU international officers and two representatives from each of the three IARU regional organizations.

IARU President Tim Ellam, VE6SH/G4HUA, along with IARU Vice President Ole Garpestad, LA2RR, and IARU Secretary Rod Stafford, W6ROD, were in attendance. IARU Region 1 President Hans Blondeel Timmerman, PB2T, IARU Region 1 Vice President Tafa Diop, 6W1KI, and IARU Region 1 Executive Committee Member Colin Thomas, G3PSM, represented IARU Region 1. IARU Region 2 President Reinaldo Leandro, YV5AM, IARU Region 2 Secretary Ramon Santoyo, XE1KK represented IARU Region 2. IARU Region 3 Chairman of Directors Michael Owen, VK3KI, and IARU Region 3 Secretary Ken Yamamoto, JA1CJP, represented IARU Region 3. David Sumner, K1ZZ, attended as recording secretary. Read more here <http://www.arrl.org/news/iaru-administrative-council-holds-annual-meeting-in-south-africa>.

==> + AT THE WORKBENCH: HEATHKIT RETURNS TO THE KIT BUSINESS

A notice on the Heathkit website announces that the venerable kit manufacturer, well-known to all Amateur Radio operators of a certain age, will be reentering the kit business in late August. The notice states, in part: "Heathkit will debut their new line of Do-it-Yourself kits for common around-the-house items. The first kit will be a Garage Parking Assistant (GPA). The Garage Parking Assistant kit lets you build your own system that uses ultrasonic sound waves to locate your car as it enters the garage. The system signals to the driver using LED lights mounted on the wall when the car is detected and in the perfect spot for parking. Read more here <http://www.arrl.org/news/heathkit-returns-to-the-kit-business>.

==> SOLAR UPDATE

Tad "I could feel the Sun on my back <http://www.youtube.com/watch?v=FFthxJKOWok>" Cook, K7RA, reports: Solar activity rose this week, with the average daily sunspot number rising more than 40 points to 66 points, while the average daily solar flux rose more than 13 points to 101.9. The predicted solar flux for August 25-26 is 110, rising to 115 for August 27-30, 110 for August 31, 105 for September 1-3, and 100 for September 4-5. The predicted planetary A index is 5 for August 25-26, 10 on August 27, and 5 on August 28 through September 2, then 8, 10, 10, 10, 7 and 5 on September 3-8. Look for more information on the ARRL website on Friday, August 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Bangles' Something to Believe In <http://en.wikipedia.org/wiki/Everything_%28The_Bangles_album%29>.

==> + SILENT KEY: PETER DAHL, K0BIT (SK)

Peter Dahl, K0BIT, of El Paso, Texas, passed away August 15 of Parkinson's disease. He was 71. In 2007 after more than 40 years, he closed his company -- the Peter W. Dahl Company -- citing health reasons. "I want to thank everyone for their business throughout the years," Dahl told the ARRL upon his retirement. "I have enjoyed making each Amateur Radio transformer." Read more here <http://www.arrl.org/news/peter-dahl-k0bit-sk>.

==> THIS WEEK ON THE RADIO

This week:

- August 26 -- NCCC Sprint Ladder
- August 27 -- ARCI Welcome to QRP
- August 27-28 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party; ALARA Contest; YO DX HF Contest; SCC RTTY Championship
- August 28 -- SARL HF CW Contest

Next week:

- September 2 -- NCCC Sprint Ladder
- September 3 -- Wake-Up! QRP Sprint; GCW Straight Key Party; Russian
Radio WW RTTY Contest
- September 3-4 -- Colorado QSO Party; QCWA Fall QSO Party; All Asian
DX Contest (Phone); CWops Mini-CWT Test
- September 4 -- DARC 10 Meter Digital Contest
- September 4-5 -- Tennessee QSO Party
- September 5-6 -- Michigan QRP Labor Day CW Sprint
- September 6 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out

Tropical Cyclone Information Statements

WOCN31 CWHX 252345
Tropical cyclone information statement updated by the Canadian
Hurricane Centre of Environment Canada at 7:54 PM ADT Thursday
25 August 2011.

Tropical cyclone information statement for:
Atlantic provinces
Southern Quebec.

For hurricane Irene.

The next statement will be issued by 3:00 AM ADT.

This is an updated preliminary information statement to discuss
Hurricane Irene's effect on Canada. Full messaging on this
Storm will begin at 3 AM ADT.

==discussion==
Hurricane Irene is a major hurricane now exiting the Bahamas
With winds near 180 km/h. The hurricane is moving north-northwest at
about 20 km/h. Irene is forecast to track over Eastern North
Carolina on Saturday. Thereafter Irene is expected to track
north-northeastward either through New England or the maritime
provinces late this weekend and into Monday. The track and intensity
will, as always, depend on many changing factors over the next 3
days. Thus, it is too early to meaningfully state how the storm will
affect specific areas. However, it is common that the heaviest
rainfall occurs to the left of the track and highest winds to the
right with this sort of storm. At this point in time we encourage
consulting the bulletins at least twice a day for updates on our
forecast and discussions.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the
latest track information.

Please also refer to the public and marine forecasts and warnings
issued by Environment Canada for your area.

END/FOGARTY

Amateur Radio Newsline(tm) Report 1776 - August 26 2011

Amateur Radio Newsline report number 1776 with a release date of
Friday, August 26th 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A dedicated ham radio operator and scout
leader is murdered in Indiana; some positive words about ham radio
related to the August 23rd Eastern U-S earthquake, hams stand ready as
Hurricane Irene heads toward the US shoreline and honors for a
deserving 11 year old emergency service amateur radio operator at the
Huntsville Hamfest. Find out the details are on Amateur Radio
Newsline(tm) report number 1776 coming your way right now.

RADIO CRIME: HAM RADIO SCOUT LEADER MURDERED IN INDIANA

An Indiana ham radio operator and scouting leader has been brutally
murdered. This, while leading a group of scouts on a nature hike.
Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

Seventy-six-year-old Arthur Anderson, W9WPH, of Kokomo, Indiana, was
simply in the wrong place at the wrong time.

That the assessment from Indiana state police investigating the murder
of the long-time Scout leader from Troop 506 based at Redeemer Lutheran
Church in Kokomo.

They say Anderson was leading two scouts, ages 11 and 12 , on Sunday,
Aug. 21 on a nature walk on the Nickel Plate Trail near the community
of Bunker Hill, about 60 miles north of Indianapolis.

As the group stopped briefly near a tree, authorities say 22-year-old
Shane Golitko leaped on Anderson and stabbed him in the neck with a
12-inch knife.

Investigators say another leader who was along on the hike shielded the
young Scouts from the attacker, who then fled on foot after the
assault.

Despite efforts to stop the bleeding, authorities say Anderson died at
the scene.

Authorities arrested Golitko inside his nearby home where he lived with his mother.

He's now being held in the Miami County jail.

Investigators also learned a short time before the deadly attack on Anderson, Golitko had kicked and punched his mother in an unprovoked assault. She ran to a neighbor's home for help.

An Indiana state police detective who is part of the investigation called it a senseless act. Authorities don't have a motive for the attack.

The Miami County prosecutor confirmed Golitko had a prior arrest for possession of marijuana. He says the man also was charged in an assault case in Ohio in July 2010, but court records show that charge was dismissed.

An official from the Boy Scouts' Sagamore Council in Kokomo, called Anderson a great leader who focused on training young Scouts to lead by example and try to motivate others.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Golitko is charged with murder and two felony counts of battery. He is being held without bond in the Miami County Jail in Peru Indiana pending appearance in the Miami Circuit Court where he will likely be formally arraigned. (Various published news reports and listener provided reports)

**

RESCUE RADIO: EAST COAST QUAKE POINTS OUT FRAGILE CELLPHONE INFRASTRUCTURE

Although amateur radio emergency communications was not particularly needed following a 5 point 8 earthquake that shook most of the east coast on Tuesday, August 23rd, the event did point out how fragile the publics personal communications infrastructure really is. Especially the aspect that deals with cellular telephones.

According to several news reports, cellular telephone service was crippled for a short time following the temblor that was centered near Mineral, Virginia. Verizon Wireless admitted that its service was slow for about 20 minutes after the quake struck just before 2 p.m. Eastern time. AT&T and Sprint also report very heavy call volume as East coast residents dealt with Virginia's strongest earthquake since 1897. The three companies say service was compromised because millions of people were making calls at the same time.

Also, according to K3VSA at least one public announcement went out from the FEMA that said due to overload of cell phone usage, there are

reports of cell phone congestion. As such it was requested by cellular carriers that members of the public use e-mail or text messages if possible to communicate for the next few hours, except in cases of emergency. This so that emergency officials can continue to receive and respond to urgent calls.

However one story reported by KADI radio pointed out that even though the cellular carriers could not deliver the level of service the public expected that ham radio operators had no problems contacting one another. The KADI report also noted that this once again proves that ham radio still works in emergencies when all other means of communication fail. (ARNewsline(tm), K3VSA, K0ADI via the PR Reflector)

**

RESCUE RADIO: HAM RADIO EMCOMM AND HURRICANE IRENE

Ham radio operators involved in emergency communications are making ready for the imminent arrival of Hurricane Irene or her remnants to his the U-S shore. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in our newsroom with the latest:

--

As this newscast is being prepared on Thursday evening, August 25th weather forecasters are calling hurricane Irene an extremely dangerous storm that is set to batter the East Coast from North Carolina to New England over the next several days.

Currently a category 3 hurricane with winds in excess of 115 miles per hour. Irene is centered about 490 miles south of Cape Hatteras, North Carolina, and moving north north-east at 14 miles per hour. Depending on the storms exact track, Irene is expected to make landfall over Eastern North Carolina on Saturday, August 27th and then work its way up the coast with it full force being fely between New Jersey, then across New York's Long Island, across Boston and into New England and possibly the Canadian Maritime Provinces.

Ham radio operators involved in emergency communications and relief support efforts are already geared up for Irene's arrival. At ARRL headquarters in Newington, Connecticut, bulletin station W1AW will be on the air beginning 7:00 AM Saturday, August 27th as a backup communications resource. This at least until the severe weather has passed and it can stand down.

As hurricane Irene advances toward the North Carolina coast, the states ARRL Public Information Coordinator Raymond Woodward, K3VSA, reports that ARES members will be staffing the North Carolina Regional Coordination Center in Kinston. This, beginning at 7:00 AM Eastern Daylight time also on Saturday August 27th. Woodward says that they will also be taking requests for additional support from surrounding counties.

Woodward also says that the National Weather Service office in Newport will utilize hams belonging to the SKYWARN network beginning at 9:00 AM the same day. He adds that because of the mandatory evacuations that are occurring, it's likely that radio amateurs will be asked to serve county emergency services facilities and emergency relocation shelters with backup radio communications support.

Meantime similar preparations are ongoing up the Atlantic coast all the way into New England and beyond. In an e-mail to Amateur Radio Newsline, Steve Schwarm, W3EVE, Wrentham, Massachusetts, who is the District Emergency Coordinator says that a list of hams available to server in this emergency is being created. This, for ARES deployment to serve as National Weather Service Storm Survey Teams.

Schwarn's note says that hams would also be dispatched to various Emergency Operations Centers, Red Cross and Salvation Army operations sites as well as hospitals as they are required. W3EVE tells the hams in his region that it is important to keep their situation awareness level high for any updates from ARES leadership. They do this by checking their e-mail and monitoring local SKYWARN, ARES and RACES frequencies for any updates on this developing situation.

Also ready for activation are several established operations. This includes the Hurricane Watch Net on 14.325 MHz. It provides storm watch communications to and from the National Hurricane Center in Miami, Florida during times of hurricane emergencies.

Also in operation will be the VoIP or Voice Over Internet Protocol Weather Net. This operation uses Echolink and IRLP to provide a similar service.

As hurricane Irene tracks up the Eastern seaboard its intensity will, as always, depend on many changing factors. So right now it is too early to meaningfully state how the storm will affect specific areas.

Lastly, as we go to air we advise all residents in the affected regions, be they hams and non hams alike are advised to keep an ear tuned to their local newscasts and weather bulletins. These could very well save your life.

In the newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, reporting for the Amateur Radio Newsline. Don.

--

More on Hurricane Irene and ham radio involvement in next weeks Amateur Radio Newsline report. (ARNewsline(tm), K3VSA, W3EVE, KC5FM, RAC, ARRL, others)

WITH NEWSLINE: 2011 YHOTY AWARD PRESENTED TO KAITLYN S. COLE, KS3P

Satrurday, August 20th was a big day in the life of 11 year olf Kaitlyn Cole, KS3P. At the 2011 Huntsville Hamfest, Kaitlyn was presented with this years Amateur Radio Newsline Young Ham of the Year Award. Reading from a prepared statement, Kaitlyn had quite a story to tell about her involvement in the tornadoes that ravaged her home state and her decision to try to help those in need:

--

KS3P: "When the tornado struck on April 27th, I was very scared. We had no power and the phone was dead. I did not know how lucky we were until my parents took us out driving around our community.

"Some of my neighbors had lost everything or had their lives cut short by the tornadoes that struck. It was not some far off event on the news. This was personal to me.

"I didn't think a young ham like myself could do much, especially an 11 year old elementary student. My dad took me down to a command post in a Huntsville church. We signed some release forms and were given wrist bands. We then met up with Charlie, W1CST. Charlie gave me a chance to operate and provided guidance. It was really overwhelming at first because I was completely new to doing net control in a real emergency.

"At the time, I knew I was helping out but didn't think much about it because there were so many hams working. For me it was a way to cope with the devastation and to give something back to my community."

--

Kaitlin also shared her ham radio dreams of the future with the assembled crowd:

--

KS3P: "With amateur radio my goals and opportunities keep expanding. I've accomplished some of my goals but not all.

"I hope in the future to act as a DX station and not just work DX at home.

"I hope to do more videos on YouTube to encourage more youth into the hobby and to work some modes I have not yet tried.

"The sky is the limit with ham radio."

--

I had the honor of emceeing this year's award ceremony along with representatives of corporate underwriters Vertex-Standard, CQ Publishing and Heil Sound. And it was likely Rich Moseson, W2VU of CQ, who summed it up best as to why Kaitlyn was chosen as this year's award recipient.

--

W2VU: "Looking over the nomination for Kaitlyn this year the thing that jumped out at me were that an 11 year old -no go back to age 9 -and your typical 8 year old ham going to the Dayton Hamventionr and going to the Dayton Youth Lounge would be going there to do things and be guided by older young hams in things to do. But not Kaitlyn. She was there to help run the booth.

"And this spring with the tornadoes that hit here. Your average young ham might be helping out in the field or something like that, but Kaitlyn was net control.

"So, she is yet another example of those young hams who are head and shoulders above everyone else which has always been the defining qualification for this award."

--

All in all it was a great afternoon to honor a very giving young woman who even though she is only age 11 has proven that hams of any age are ready and willing to serve their community in times of need. As such, we join with our corporate underwriters and with the Huntsville Hamfest in congratulating Kaitlyn S. Cole, KS3P, for her dedication to the hobby, to the community and really to all of mankind. (ARNewsline(tm))

**

RADIO LAW: LA CELLPHONE TICKET GIVEN TO HAM OPERATING 2 METER MOBILE

A California ham has been cited for operating mobile using a 2 meter radio installed in his car and this could become a test case to find out whether the restrictive anti-cellphone law can be used against other two-way radio users.

According to a note from Dick McKay, K6VGP, a member of the Disaster Amateur Radio Network identified as Irving Osser, KE6YR, received a ticket for using his amateur 2 meter radio in his car. According to McKay, the Los Angeles motorcycle officer stated that he saw Osser on his cell phone. KE6YR tried to show the officer the two meter radio with the coil cord microphone and said he was talking to another amateur on the radio. He also tried to show the officer the hands free system he uses on his BlackBerry and finally tried to show him the cell phone log that indicated no calls were made or received.

But the officer was not interested in hearing about any of it and it has now became a tell it to the judge matter. And here is where the possibly becoming a test case for the California law. This is because Osser is an attorney by profession and plans to represent himself in court with the proper knowledge about how to address the subject.

While California does not provide any exceptions for ham radio operators, CB'ers and other non-emergency two-way radio users, by definition, two-way radio gear is not a hand held cellular telephone. None-the-less, KE6YR will still have the burden to prove in court that what he was doing was legal and that he was in fact not using a wireless telephone as defined by law. (K6VGP)

RADIO LAW: FAC AFFIRMS $10,000 FORFEITURE ORDER TO FLORIDA UNLICENSED BROADCASTER

A Florida resident who allegedly operated an unlicensed broadcast radio station has been ordered to pay a ten thousand dollar fine. In an August 22nd release, the Regional Director for the South Central Region of the FCC's Enforcement Bureau ordered Patrick Michael Ford of Fort Myers to pay a previously imposed Notice of Apparent Liability or NAL.

Back on May 5th the Enforcement Bureau's Tampa Office issued the Notice of Apparent Liability for Forfeiture to Ford after it traced illegal broadcasts to him. The FCC says that to date, Ford has not filed a response to the NAL. Therefore, based on the information before it the regulatory agency has now affirmed the forfeiture order and given him 30 days to pay. If he fails to do so the matter can be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: $25000 NAL ISSUED FOR INTERFERENCE TO AIRPORT WEATHER RADAR

The FCC has issued Rapidwave, LLC of Saratoga Springs, Utah, a $25,000 Notice of Apparent Liability for Forfeiture order. This, for operating a 5 Gigahertz unlicensed Part 15 system in a manner inconsistent with rules, and for allegedly causing interference to an FAA Terminal Doppler Weather Radar system serving the Salt Lake City International Airport. Amateur Radio Newsline's Jim Davis, W2JKD, has the details:

--

According to the FCC, on Oct. 27, 2010, an enforcement agent from the Denver office, along with FAA personnel, located emissions at 5600 MHz coming from a Ubiquiti Xtreme Range 5 transceiver located at the Lake Mountain communications site in Saratoga Springs, Utah. The site in question was identified as being operated by Rapidwave LLC. Over the next 24 hours the FCC and FAA personnel established that this system at the Lake Mountain site was the source of the interference.

According to the FCC, all 5 GHz unlicensed national information infrastructure devices operating in the 5.25 to 5.35 GHz and 5.475 to 5.725 GHz bands must contain circuitry known Dynamic Frequency Selection. This is a radar detection capability which allows them to detect the presence of radar systems and avoid co-channel interference. During the Lake Mountain site inspection it was determined that as it was operating, the transceiver did not have Dynamic Frequency Selection functionality. Rapidwave changed the operating frequency to stop the interference to the Salt Lake City Terminal Doppler Weather Radar.

The inspection also revealed that Rapidwave had added a high gain parabolic antenna to the system. Calculations performed by the FCC agent indicated the Effective Radiated Power for this system may have exceeded the maximum permitted by the FCC Rules for operation on the frequency used by Rapidwave. You can read the entire text of this FCC enforcement action at tinyurl.com/fcc-utah-fine.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD.

--

Rapidwave was given the customary 30 days to pay the fine or to file an appeal. (FCC, RW, TVT)

**

RADIO LAW: FCC TO ELIMINATE ANOTHER 80 OUTDATED RULES

The Federal Communications Commission is eliminating another 83 rules from its books. This, as part of its reform agenda and commitment to a request from President Obama earlier this year to improve or remove any rules that were out of date.

Among the eliminated rules is the Fairness Doctrine enacted back in 1949 which was intended to promote balanced discussion of controversial issues. As more broadcast stations and cable channels became available, the need to mandate a diversity of viewpoints was no longer felt necessary and the rule was abolished in 1987. As a result, the FCC has not enforced it in more than two decades, but it was never officially taken off the books.

Other rules deleted included media-related regulations that have not been in effect for years. The FCC said the 83 rules eliminated will not have any significant impact on broadcast businesses. So far more than 50 outdated rules in all services it oversees have already been

eliminated as part of the FCC's reform agenda aimed at removing obsolete regulations and revising others to keep up with new technology. (FCC)

911 COMMERATIVE EVENTS: N0L FROM THE GUARDIANS OF FREEDOM AIR SHOW

Yet another amateur radio club has announced its decision to commemorate the 10th anniversary of the 911 al-Quida terror attacks on the United States. This with news that the Lincoln Amateur Radio Club will be operating special event station N0L in conjunction with the Guardians of Freedom Air Show to be held September 10th and 11th at the Lincoln Airport in the city of Lincoln, Nebraska.

The air show will feature a dazzling performance by the Navy's Blue Angels precision flying team. Meanwhile, station N0LL will be on the air on most High Frequency bands from Septenber 9th thru the 11th. For more information please visit K0KKV.org or lincolnairshow.com on thw World Wide Web. (K0NEB)

HAM RADIO ON THE WEB: QRZ.COM CREATES NEW FORUM FOR HOMEBREW GEAR SELLERS

The QRZ dot com ham radio website has announced the creation of a new Swapmeet Forum called Ham Made Gear dedicated specifically to the sale of home made ham radio equipment. According to site owner Fred Lloyd, AA7BQ, creation of this new area on QRZ is in keeping with the spirit of helping to foster small businesses started by fellow hams.

This forum is designed for hams who build gear themselves to sell to other hams. As explained by AA7BQ, previously, QRZ disallowed such postings as being "commercial" in nature. Cut says Lloyd this new forum solves that problem allowing semi-commercial, part-time, or hobbyist types of sellers to publicize, promote and sell their products on QRZ. There is no charge for this service, and any ham can participate so long as they are engaged in building gear themselves.

Lloyd stipulates that QRZ will not allow resellers of any kind in this area. All products offered must be manufactured by the seller, who must be a ham listed in the QRZ.com callsign database. (AA7BQ)

THE CHANGING OF THE GUARD: TRANSFORMER MANUFACTURER PETER DAHL, K0BIT -S.K.

Transformer designer and manufacturer Peter W. Dahl, K0BIT became a Silent Key on August 15th. According to Radio World magazine, Dahl died after a long illness having been battling Parkinson Disease for a number of years.

Peter Dahl, who founded his company in 1964 while still a college student in Minnesota was best known for his custom-wound transformers. These were particularly popular with ham radio operators, though he also counted radio and TV stations among numerous clients. After retiring in 2007, Dahl sold his designs to Harbach Electronics which continues to supply many of the products K0BIT had designed.

Peter W. Dahl, K0BIT, was age 71 at the time of his passing. He is survived by his wife Clarice, his daughter Tamra and sister, Priscilla. A memorial service was held August 19th in El Paso, Texas. (RW)

NAMES IN THE NEWS: ARRL ANNOUNCES SM ELECTION RESULTS

Two ARRL Section Manager in challenged elections have been re-elected by ballot to serve another term in office. In Georgia, incumbent Gene Clark, W4AYK, of Albany, was re-elected to a second term with 820 votes. In Western Washington, Jim Pace, K7CEX, of Centralia, was re-elected for a third term with 965 votes. Both men will begin new terms of office on October 1st.

Also on October 1st, Colorado will be getting a new Section Manager in the person of Jack Ciaccia, WM0G, of Boulder. He takes over from Jeff Ryan, K0RM, who decided not to run for another term. Ciaccia currently serves as an Assistant Section Manager, Public Information Officer and Official Emergency Station in the Colorado Field Organization.

All other incumbent Section Managers standing for re-election faced no opposition this year. (ARRL)

**

NAMES IN THE NEWS: IARU REGION ONE ELECTS NEW EXECUTIVE COMMITTEE

Meantime, Region One of the International Amateur Radio Union has elected a new Executive Committee. They are Hans Timmerman, PB2T, as President; Hani Raad, OD5TE, as Vice President; Dennis Green, ZS4BS, as secretary and Andreas Thiemann, HB9JOE as Treasurer.

Four other hams from across IARU Region One were also elected to member status of the Committee. The election took place at the 22nd International Amateur Radio Union Region 1 General conference recently held in Sun City, South Africa. (IARU R-1)

**

HAM RADIO ON THE WEB: THE LAST US BASED VOA STATION VIDEO

A fascinating video about the last Voice of America transmitter still operational from the continental United States is now available for viewing on-line. The video not only details the services provided by this VOA transmitter site but also pays respect to the work of the 16 engineers at the Greenville, North Carolina facility that keep the 60 year old shortwave technology operational and on-the air. You can sere the University of North Carolina produced video on line at tinyurl.com/voausanc (G8WGN via Facebook)

**

EMERGING TECHNOLOGY: FCC ISSUES EXPERIMENTAL SPACE LICENSE FPOR 2 METER AND 70 CM OPERATIONS

The FCC has issued a new experimental license with the call letters WF2XSP to one James Cutler to operate in 144 to 146 MHz and 437 to 439 MHz spectrum. This, for testing an image processing algorithm that will be used on a future space flight mobile, Low Earth Orbit operations ranging from 450 to 820 kilometers in altitude.

The FCC announcement made no other reference to the nature of Cutler's experimentation nor why he requested to do so in the amateur 2 meter and 70 centimeter bands. QRZ.com lists six radio amateurs by the name of James Cutler, but its unknown if any of them are the same James Cutler who has obtained the Experimental License from the FCC. (FCC)

WORLDBEAT: MONTREAL TO HOST RAC 2012 AGM

Turning to international news, word that the Montreal Amateur Radio Club will host 2012 Radio Amateurs of Canada's Annual General Meeting. The location of the 2012 Annual General Meeting was announced during the 2011 Annual General Meeting held in St. John's Newfoundland. The exact dates in 2012 will be announced this fall in September or October. (RAC)

**

WORLDBEAT: SLOVOKIA GIVES HAMS EXPANDED 60 METER PRIVILEGES

Slovak Radio Amateurs are now allowed to use the entire 60 meter band 5258.5 to 5410.0 kilohertz band instead of the previous allocation of a single channel on 5260 kHz but with some caveats. Operations are allowed for experimental purposes with a maximum power of 100 Watts Effective Radiated Power. Licenses for this spectrum are valid for only 1 year. (Southgate)

**

WORLDBEAT: RADIO TELESCOPES ASSIST IN STUDY OF BINARY X-RAY STAR

Astronomers from Wales and the Netherlands, in collaboration with five schools, have used eight radio telescopes simultaneously to study the

strange behavior of an X-ray binary star system.

IGR J00291+5934 is a rare X-ray binary system containing a pulsar and a normal star. Only 12 such systems are known.

In September 2008, 00291 increased in brightness at X-ray wavelengths by a factor of at least a thousand times and in visible wavelengths by a factor of around a hundred times. While this type of outburst is not uncommon for this type of system, the timescale is usually months to years. However in this case 00291, was in its outburst for only 20 days and then faded away to its normal faint state but then re-brightened within 30 days.

The results of the study were presented by postgraduate student Fraser Lewis at the RAS National Astronomy Meeting in Llandudno, Wales, on April 18. (Science OnLine)

**

ON THE AIR: KS QSO PARTY AUG 27 - 28

On the air, listen out for the for the Kansas Sesquicentennial QSO Party on August 27-28. this years event celebrates the 150th Anniversary of Kansas statehood and will feature a myriad of 1 by 1 callsigns operating across the state. For additional information please check the Kansas QSO Party web site at www.ksqsoparty.org. (KB0RWI)

DX

In DX, a team of experienced operators are preparing an amateur radio expedition to the island Rotuma. Their goal is to activate the island of on all bands from 160 through 2 meters using CW, SSB, FM, RTTY, SSTV, PSK, and several other modes. They expect the first activity on the amateur radio frequencies on September 27th, and plan to be active the next 10 days. QSL via YT1AD, direct or via the bureau

Listen out for the 20 amateur radio special event stations in Spain to be active through September 11th. Each station represents a football team competing in the Spanish Football League Teams. A special 2011 EA Football League Teams Award is available to those who mare contact. Complete details are available at www dot ea-flt dot com.

A number of operators from South Korea and Japan were on the air using the callsign D9A from the South Korean island of Cheju from August 19th to the 26th. If you made contact with D9A, please QSL via DS4EOI.

EI7CC is in Lesotho for through August 30tth and is active as 7P8PB. He hopes to upload his logs to Logbook of the World on a daily basis.

DH2AK and DL1THM will be active stroke PJ2 from the island of Curacao from through September 8th. They will be using an Icom IC-7000

transceiver, a Buddipole and operating holiday style. QSL as directed on the air.

Rugby enthusiasts look out for ZL4RUGBY operated by ZL4PW through October 31st. This is to celebrate the 2011 Rugby World Cup being played in New Zealand. QSL via ZL4PW.

Lastly, a number of operators from South Korea and Japan were on the air using the callsign D9A from the South Korean island of Cheju from August 19th to the 26th. If you made contact with D9A, please QSL via DS4EOI.

(Above from various DX news sources)

**

THAT FINAL ITEM: SPEED OF LIGHT PRECLUDES TIME TRAVEL

And finally this week word that physicists have confirmed the ultimate speed limit for the packets of light called photons and in doing so have made the concept of time travel even less likely than thought.

The speed of light in vacuum is considered the universe's ultimate speed limit, but experiments in recent years suggested that single photons might beat this. And if that were proven true, then at least in theory time travel might be possible.

Now, a paper in Physical Review Letters shows that individual photons are also limited to the vacuum speed limit. This means that photons maintain the principle of causality laid out in Einstein's theory of special relativity. This appears to mean that an event's effect cannot precede its cause by traveling faster than light. It is violation of this causality that would, in principle, permit time travel.

In ham radio, that would essentially mean that one cannot hold a QSO with a rare DX station until that station is actually on the air. This, even though some radio amateurs have been known to try.

More on this scientific discovery that is bound to annoy believers in warp speed travel is on-line at tinyurl.com/435b833 (BBC via Southgate)

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING AUGUST 28 2011.

International Lighthouse Lightship Weekend - 2011

Kevin vk2ce the Event Organizer has sent a personal congratulation to all
VK amateurs who participated in this year's ILLW event held last weekend.

In 1998 four Australian stations participated in what then was a very young
event. Last weekend saw 66 stations registered with possibly others on the air
who did not send|in an entry form.

This country has around 400 lighthouses which qualify for the event which means
some 17 percent of our lights were on the air.

Some of these lighthouses are in remote locations and require some expenditure
and effort to get there and set up a station. For example a VK3 ham went to
King Island, another amateur walked a long way to get to Wilson's Promontory

lighthouse and no doubt there are others who can speak of similar feats.

VK's were second only to the USA where 80 stations registered which is only a very small proportion of their total number of lighthouses. It was good to see an upsurge in numbers from that country.

Kevin singled out Jim Linton VK3PC for his untiring efforts to promote this event both here and overseas, and hopes to see you all again next year and oh! bring a friend!

ACMA NEWS

Future options for the siting of satellite Earth stations

The Australian Communications and Media Authority has released a discussion paper signalling its intention to develop a long-term strategy for the sustainable siting of satellite Earth stations.

Earth station siting provides guidance on both the establishment of new Earth stations and other space communications facilities as well as the expansion of existing facilities.

The ACMA paper considers the potential options for the siting of Earth stations into the future by taking a band by band approach to the identification of the challenges of using each space frequency band up to 20 GHz. The band by band assessment primarily focuses on Earth receive bands including radio astronomy bands.

The paper also considers each current major Earth station site in Australia, discussing the implications of spectrum demand on the continued viability of that particular site.

The closing date for submissions to the Earth station siting discussion paper is close of business 7 October 2011. The paper is available on the ACMA website.

HOME OF THE GOOD GUYS

A special Request from NZINFOLINE

They have received a request from the son of a silent key, hopefully someone will be able to help, if so please contact Dave directly on the address which you will find when you get the print edition of this news from wia.org.au

It would seem that the SKey was an avid HAM operator in the late 40's and 50's. QTH being Waiheke Island in Auckland until he was drowned in a boating accident in 1957.

His call sign was ZL1MG.

Dave, the Son, remembers he had a lot of QSL cards from other operators and he sent out a few as well, well he was wondering if any listener would happen to

have one of his original ZL1MG cards?

David Parkin.
d.parkin@xtra.co.nz

The Chicago Sun-Times reports on two radio amateurs, Dorothy Truhlar N9ALC (89) and Bob Truhlar W9LNQ (90) who have just celebrated their 70th wedding anniversary. Bob got his ham license in 1938 while Dorothy got her ticket in 1958.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

We radio amateurs like to think that we are comfortable with technology and the new generations of electronic toys are no exception. But some of these developments have taken a long, long time to evolve from the drawing board to large scale production. Others survive for centuries.

For convenience and ease of note taking, there is little better than paper and pencil or pen. For copious records, the capacity of the thumb drive is hard to supplant. The ubiquitous thumb drive took years to become cheaply available even although non-volatile ram was developed in the late 1980's. Both the audio and video tape recorders germinated, bloomed and passed into obsolescence, during this same period.

The lcd screen first made news as part of the personal GPS units used by American soldiers during the Desert Storm campaign. Optical disks, CD to Blue Ray are part of the same age cohort.

When Brisbane was host to the Commonwealth Games, the late '80's, the host broadcaster broke new ground by storing items on Winchester drives. With the coming of digital television, many homes now use a personal video recorder whose heart is indeed a hard drive.

We tend to try the new and adopt those things which work for us. Most radio shacks, I suspect, are a blend of the old and the new.

I'm Geoff Emery and that's what I think....how about you?

Secretary Jim 04 2948 4734
http://www.radarclub.org.au

Greetings from Rockhampton and District Amateur Radio Club, the RADAR Club. I'm Les VK4VIL.

Last weekend our club returned to Cape Capricorn, AU0059, for the International Lighthouse and Lightship Weekend, one of our major events for the year.

Cape Capricorn is situated approximately 50km ESE of Rockhampton and is quite remote, requiring a five hour boat trip each way between the Cape and Rosslyn Bay near Yeppoon. We used a 20ft motor boat and a 40ft motor sailer.

Conditions were great for the journey out, but winds of 25 to 30 knots developed for the return trip. An APRS which was (VK4KLL-9) was installed on one of the vessels, which allowed club members and friends to monitor the trip.

All involved stayed in the old light keeper's cottage, with antennas at the same position as the original communications mast. As well as the usual array of wires and beams erected at the lighthouse for long distance work, a cross band repeater was also installed for local comms.

During the weekend, operators spoke with over 400 other radio stations in about 30 countries including Germany, Namibia, USA, Japan, Spain, England, Chile and Northern Marianas. In excess of 40 lighthouses stations were contacted.

Thanks to our hosts from Cape Capricorn Lighthouse Escape which lease and maintain the Capricorn Lighthouse precinct as a retreat enterprise. And yes, the fish were on the bite again and we've have already registered for 2012.

This is Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club

The Sunshine Coast Amateur Radio Club's annual HAMFEST - SUNFEST 2011 is a an event for Amateur Radio Operators, CB Radio users, Radio and Electronics enthusiasts, Computer bits and pieces.

New gear as well as pre-loved bits of everything on sale.

SUNFEST 2011
Doors Open at 0900 hrs Saturday 10 September 2011
at
Woombye School of Arts Blackall Street, Woombye (UBD Map 66 F12)

Only last week I telephoned the President of the Townsville Amateur Radio club to arrange some audio recordings pertaining to the up coming Far North qld Amateur Radio Convention.

Just a couple of days later the President, Richard VK4FRJG suffered a heart attack at home.

he is very lucky in that his daughter Renee, an intensive care nurse stationed at The Townsville Hospital was home with him at the time and was able to do everything possible to ensure Richards survival.

Richard is currently in the Intensive Cardiac Care ward at The Townsville Hospital.

Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

New WIA Director

Peter Young VK3MV has resigned as a director of the WIA, wishing to reduce his commitments. However, the Board is delighted that Peter will continue to be deeply involved with the WIA's work with the ACMA and government generally.

Under the WIA Constitution, the Board is obliged to appoint a new director for the balance of a retiring director's term. The Board has appointed Trent Sampson VK4TI a director for the balance of Peter's term.

Trent was first licensed as a result of the CB boom of the 70s as VK2NDK/VK2YHA in Tamworth NSW and then progressed through a series of callsigns VK2KTS, VK2ZI, moving to Queensland in 1999 with his current callsign VK4TI. Trent is a keen contester and a member of the VK Contest Club and is on the contest committee for the Oceania Dx Contest as well as being the manager of the VK Shires contest. Trent is an Insurance Adviser and also a qualified Financial Planner.

SILENT KEY

As most would be aware we seldom announce Silent Keys during the National News, unless that Amateur was extremely well known right across Australia.

This Silent Key however is probably only well known in the Sydney, maybe the VK2 area itself but his achievements Ham Radio wise personify a legacy passed down since Ham Radio Commenced. That of providing services to other like minded hams at no charge, utilising his work place facilities!

This Amateur was but 34 years of age when he succumbed to a Heart attack!

Lee Norrish, VK2TLN.

For the amateur radio community, Lee Norrish leaves behind a massive legacy and equal uncertainty among the 70cm community in Sydney.

Lee Norrish was the key person responsible for an exceptional 70cm repeater network which flourished across Sydney over the past few years.

His point access to the best commercial RF sites in Sydney, enabled him to slip into place a mixture of linked amateur repeaters and voting receivers at Horsley Park, Kurrajong Heights, Hurstville, Carlingford, Campbelltown, Razorback and the crown jewel of them all, Governor Phillip Tower.

The result is a remarkable contribution to the Sydney 70cm community and with more sites believed to have been still in the pipeline, a magic era in 70cm repeater experimentation appears lost.

Governor Phillip Tower stands as a monument.

As a powerful reminder of Lee's vision for a peerless 70cm repeater network for the amateur community.

Lee had been very active in assisting volunteer groups, including St John's Ambulance.

Lee Norrish, VK2TLN, you WILL be missed!

Tropical Cyclone Information Statements

WOCN31 CWHX 252345

Tropical cyclone information statement updated by the Canadian Hurricane Centre of Environment Canada at 7:54 PM ADT Thursday 25 August 2011.

Tropical cyclone information statement for:
Atlantic provinces
Southern Quebec.

For hurricane Irene.

The next statement will be issued by 3:00 AM ADT.

This is an updated preliminary information statement to discuss Hurricane Irene's effect on Canada. Full messaging on this Storm will begin at 3 AM ADT.

Hurricane Irene is a major hurricane now exiting the Bahamas With winds near 180 km/h. The hurricane is moving north-northwest at about 20 km/h. Irene is forecast to track over Eastern North Carolina on Saturday. Thereafter Irene is expected to track north-northeastward either through New England or the maritime provinces late this weekend and into Monday. The track and intensity will, as always, depend on many changing factors over the next 3 days. Thus, it is too early to meaningfully state how the storm will affect specific areas. However, it is common that the heaviest rainfall occurs to the left of the track and highest winds to the right with this sort of storm. At this point in time we encourage consulting the bulletins at least twice a day for updates on our forecast and discussions.

Visit weatheroffice.Gc.Ca/hurricane (all in lower case) for the latest track information.

Please also refer to the public and marine forecasts and warnings issued by Environment Canada for your area.

END/FOGARTY

Slovakia gets 150 kHz wide 5 MHz band

Slovak Radio Amateurs are now allowed to use the entire 5258.5 - 5410.0 kHz band instead of the previous allocation of a single channel on 5260 kHz.

5258.5 - 5410.0 kHz is allowed for experimental purposes with a maximum power of 100 Watts ERP and the Slovakian licences are valid for 1 year.

(Slovakia Amateur Radio Association (SARA) http://tinyurl.com/SlovakiaSARA)

MARS ROVER OPPORTUNITY ORDERED BY RADIO TO SPIRIT POINT

NASA's Mars Exploration Rover Opportunity will revisit the rim of Endeavour crater on Mars, where its rover twin Spirit finished its 6-year-long mission in May.

The rover scientific research vehicles had completed their three-month prime missions on Mars in April 2004. Both went on to extended missions and in the process each made important discoveries about the environment on ancient Mars which suggested the possibility for microbial life on the red planet.

Driving commands sent by radio to Opportunity directed the rover to make its final push toward Endeavour crater. This is a 14-mile-wide depression near the Martian equator could be the research vehicle's final destination.

The target for Opportunity is a site on the rim of the Endeavour crater named Spirit Point. It was given that designation by the Mars Rover Controllers in honour of the Opportunity's lost twin.

EI amateurs allowed 1500 watts for contests

A few months ago the Irish Radio Transmitters Society announced that, after some two years of negotiations, Irish regulator ComReg had agreed that EI licensees would be allowed to run high power in specified contests.

Everything then went quiet for a couple of months, but ComReg has now published a document on their web site implementing the change.

Consequently, suitably equipped Irish contesters are now able to run 1500 watts in major HF contests and 1000 watts in VHF/UHF contests.

The list of permitted events is similar to the one in which UK stations may use short contest callsigns, although more contests could be added to the list in due course.

Interestingly, the increased power limit applies to 4m and the whole of the 160m band, but, curiously, not the 10m band.

==========

NEWS FROM ARNEWSLINE USA

DR. LARRY PRICE W4RA NAMED ARRL PRESIDENT EMERITUS

Some words of congratulations to Dr. Larry Price, W4RA, on his being named ARRL President Emeritus.

Dr. Price served as the League's President from 1984 to 1992 and previous to that as a Vice Director, Director and Vice President of the ARRL Board of

Directors. He also served for 10 years as Secretary of the International Amateur Radio Union and another 10 years as that organization's President. In fact, Dr. Price continues to serve the IARU as an expert consultant and has been recognized as President Emeritus by the IARU's Administrative Council.

The naming of W4RA as ARRL President Emeritus was made in celebration of his ongoing dedication to the Amateur Radio Service and in recognition of his 60th anniversary as a radio amateur.

FORD TO ELIMINATE CD PLAYERS FROM ITS VEHICLES

Call this a sign of the times. According to news reports, the Ford Motor Company is eliminating CD players in its new United States vehicle models and opting to instead install USB sockets for iPods and other digital music players. Ford notes that all of its new cars will have a computer hub, which will allow drivers to access their music libraries from the Internet.

==========

WEIRD AND WONDERFUL

PLEASE REMOVE THE BATTERIES BEFORE YOU SHIP ANYTHING THAT TICKS

And finally this week the tale of the ticking box. It comes from Portage, Michigan where an electronic metronome was the cause of a Post Office scare!

It seems that postal workers noticed a ticking noise coming from a package around 5:30 a.m. Fearing the worst, Portage Police along with the Kalamazoo Department of Public Safety's bomb squad were called in to investigate and the Post Office was evacuated.

In this case, authorities were able to get in contact with the owner of the package, who told police that there was nothing more than an electronic metronome inside. Even so, prior to employees being allowed back inside the building, the bomb squad went in and removed the package.

Upon investigation, bomb squad personnel did find nothing more than an electronic metronome inside the package. Postal workers were allowed back into the Post Office just before 8 a.m..

And all this comes with a few words of advice. If you plan to mail a metronome, a clock or anything that makes a ticking noise, take out the batteries before you ship it. That can save your community thousands of dollars spent on an un-needed emergency response and save you a lot of grief.

RD CONTEST

Please make a note that there is only ONE email address to send your
completed RD log to and that is the one shown on the WIA contest page.

rdlogs@wia.org.au

If you send it to ANY other email address it WILL end up in cyber-space!

rdlogs@wia.org.au

IARU REGION ONE IN SUN CITY

On contesting the meeting agreed that the CW contest-preferred segment from
7 000 - 7 025 kHz is withdrawn from the Region 1 band plan.

All Societies should encourage contest organisers to include a rule that
restricts contest activity to a limited frequency range within the CW
allocation. The choice of frequency segment is left to the discretion of the
contest organisers, but should take into account expected activity levels and
show consideration for non-contest operation

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

For rugby enthusiasts, look out for ZL4RUGBY operated by ZL4PW now until the
31st October. This to celebrate the 2011 Rugby World Cup being played in
New Zealand.

The special event station GB4BOB will be active, from September 1-20 each year
to celebrate the Battle of Britain. Look for special event station GB4BOB
next month.
QSL via the Bureau or direct to G0BPK.

4W6A will be QRV from Atauro Island IOTA OC-232, East Timor from 16 to 26 Sept.
All bands 10 to 160 metres, CW, SSB and RTTY.
QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW.

More from the IARU Region One conference held in Sun City is that
The "DX Code of Conduct" was approved and operators were urged to support it:
John VK2JJW has that 'code'.

I will listen, and listen, and then listen again before calling.

I will only call if I can copy the DX station properly.

I will not trust the DX cluster and will be sure of the DX station's call sign
before calling.

I will not interfere with the DX station nor anyone calling and will never tune
up on the DX frequency or in the QSX slot.

I will wait for the DX station to end a contact before I call.

I will always send my full call sign.

I will call and then listen for a reasonable interval. I will not call continuously.

I will not transmit when the DX operator calls another call sign, not mine.

I will not transmit when the DX operator queries a call sign not like mine.

I will not transmit when the DX station requests geographic areas other than mine.

When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.

I will be thankful if and when I do make a contact.

I will respect my fellow radio amateurs and conduct myself so as to earn their respect.

HEATHKIT SAYS IT'S RETURNING TO THE KIT SUPPLY MARKETPLACE.

Heathkit says it is re-entering the kit business that it abandoned almost two decades ago. In an announcement posted to its heathkit.com website, Heathkit Educational Systems, which is the current name for the company, states that in late August, the company debuted its new line of do-it-yourself kits for common around-the-house items.

Don't look for ham radio gear to be a top priority, even though the word on the street is that kits for the amateur radio market, may be down the road! Right now, the company is starting off with more general interest kits with their first entry being a Garage Parking Assistant, or G-P-A for short.

The Garage Parking assistant lets someone build their own system that uses ultrasonic sound to locate a car as it enters the garage. The system signals to the driver using LED lights mounted on the wall, when the car is detected and in the perfect spot for parking. Next on the market will be a Wireless Swimming Pool Monitor kit followed by many more novel items.

For those of you to young to remember, it was on March 30, 1992, that the then managers of Heathkit announced that after some 45 years, the company was closing out its kits and leaving the business.

So why has Heathkit decided to re-enter the kit market?

To hazard a guess you have to remember that the current incarnation of Heathkit, is an educational materials supplier. As such it has likely taken notice of the burgeoning maker and hacker community. This is an ever expanding group of technology hobbyist's world wide, that in recent years has grown into a multi-million dollar business opportunity for those smart enough to recognize it and are ready to fill the void. These are also the people that many believe

will be the next generation of technology leaders and radio amateurs

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

Today in media watch it's to VK3PV with a look at Septembers AR Magazine, and we take a look at ourselves!

A new 40 meter retransmission of this news is on the air!

7.088 at 0000 hours Sunday Morning's that's Moon West Australian time and Bunbury Radio Club, VK6BRC is the callsign.

Barry, VK6WF, a White Stick Operator is putting this all together and sure would like you to have a listen for him, 7.088 at 0000 hrs or Noon WA Time.

Barry's personal call of VK6WF is a very famous call indeed in the West.

The first broadcast station, and it was for a time also on long-wave, was call 6WF for Westralian Farmers. The original 6WF also was one of the first stations in the world to experiment with what was termed then as "palstic radio". It would appear 'plastic radio' was what we now call Stereo! The broadcast 1 channel on MW the other on SW.

This station is now an ABC station and courtesy of the ABC website, lets go back in time to 1924!

(audio re-enactment of 6WF opening)

A look inside Amateur Radio magazine

Editor Peter Freeman VK3PF reflects on the flood of historical articles that has caused a headache, with others needing to be delayed. The Publications Committee needs more input.

WIA President Michael Owen VK3KI touches on Station Inspections and "Possession". Well worth reading as the WIA wants to ensure that the ACMA activity does not become a barrier, to legitimate amateur activities.

The technical articles are building 200 watt band-pass filters by Roderick Wall VK3YC, The Simple Soft Defined Radio from Peter Parker VK3YE, and a simple tuning indicator for a 100 watt HF transmitter by Warren Stirling VK3XSW.

WIA Historian Peter Wolfenden VK3RV, gives us an expose on 100 year old, Honorary Life Member of the WIA, Pierce Healy VK2APQ.

There's GippsTech 2011, a personal view from Roger Harrison VK2ZRH.

You will find regular columns on ALARA, AMSAT, Contests, DX News & Views and Spotlight on SWLing. Amateur Radio magazine, a WIA membership service that's also available at selected news agents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

The seventh GAREC conference at Sun City has been regarded a resounding success.

The contributions from various delegates were informative, varied and interesting!

The South African contributions came from Eddie Leighton, ZS6BNE, who discussed the advantages of 'going digital'. This is a subject that will be looked at in more detail as propagation problems persist!

The other contribution came from Craig Lambinon, who heads up the National Sea Rescue Institute (NSRI).

At the end of his presentation, it was agreed in principal that Hamnet and the NSRI will be looking at a closer working relationship.

The next GAREC will take place in Kuala Lumpur in Malaysia in 2012.

WW SPECIAL INTEREST GROUP --- MILITARY

Amateur Radio at the Armed Forces Weekend and Enigma Re-union

Bletchley Park's annual Armed Forces Weekend will take place on Saturday 3 and Sunday 4 September and amateur radio will be there.

Celebrating the role of the armed forces throughout history and in particular the role of the cadet forces, the two-day weekend event will look at how Bletchley Park assisted the armed forces during World War Two.

It will feature a range of wartime displays and re-enactment groups, Battle of Britain Memorial Flight Flypasts, featuring a Spitfire and a number of entertaining lectures about the armed forces and Bletchley Park.

Other activities during the weekend will be a display by the Vintage Military Amateur Radio Society of radio equipment spanning the last 100 years, showing how communication in the armed forces has changed over time and become ever more vital.

14.070

JOTA

A reminder that JOTA will be held on Sunday 16 October in the North of VK7
at the Kings Meadow Scout Hall commencing at 10.00 am until late afternoon.

Peter VK7KPC would be happy to hear from any members willing to lend a hand in
setting up on the Saturday and assisting on the Sunday.

So please don't be shy.

SCOUTMASTER ARTHUR ANDERSON, W9WPH, STABBED TO DEATH ON HIKING TRIP

Arthur Anderson, W9WPH, of Kokomo, Indiana, 76, bled to death after
being stabbed in what authorities are calling "a senseless act." On
Sunday, August 21, Anderson -- together with another man -- was leading
two Boy Scouts, ages 11 and 12, on a required five mile nature hike on
the Nickel Plate Trail in Bunker Hill, 60 miles north of Indianapolis.
According to Indiana State Police Sergeant Tony Slocum, the group had
stopped on the trail to discuss a tree when Anderson was attacked from
behind. Anderson, a scouting volunteer for 50 years, was an Assistant
Scoutmaster of a troop based at Redeemer Lutheran Church in Kokomo.

LOW DOWN IN THE NEWS

IARU REGION 1 IN SUN CITY

It was agreed at the recently held IARU Conference in South Africa that IARU,
at further ITU World Radio Conferences, should seek to expand the
international amateur radio 160 metre band from its present lower end of
1 810 kHz to 1 800 kHz in ITU Region 1.

IARU should also try to obtain an international secondary allocation for
amateur radio between 1 850 and 2 000 kHz.

GB2RS NEWS

Sunday 28th August 2011

The news headlines:

* RSGB SSB Field Day preparations

* 23rd IARU Region 1 Conference details announced

* Region 1 amateurs asked to be aware of emergency traffic

The first contest in September is a big and popular one, namely RSGB SSB Field Day. SSB Field Day was very much introduced to be a club event and can form a great introduction to SSB contesting for your club's newcomers, or an opportunity for some of the operators who have slogged away on 80m during the club championships to make some DX contacts on the HF bands. Because HF and LF contesting is quite different in terms of the openings that you can experience, SSB Field Day is a super way to introduce people to the fun of HF Contest operating. With Open and Restricted sections, it runs for 24 hours next weekend, 3 and 4 September. If you want to give some points away from home, it's a quick-fire exchange of signal report and serial number. Participants will find it useful to have a suitable number ready to give Asian stations that are taking part in the All Asian DX Contest. The Asians will be looking for your age, rather than a serial number, YL ops may give `00'.

During the 22nd General Conference of IARU Region 1, held last week in South Africa, a new Executive Committee was elected to serve for the next three years. The committee includes RSGB past President Colin Thomas, G3PSM. Also announced at the conference were details of the 23rd General Conference of IARU Region 1. It will be hosted by the Bulgarian Federation of Radio Amateurs in Varna on the Black Sea in September 2014.

The activation of the American Hurricane Watch Net on 22 August in response to Hurricane Irene is a reminder that amateur radio continues to play a part in gathering and distributing information for the weather and emergency services each year. Radio amateurs in Region 1 are reminded that certain frequencies may be in use by nets in North and Central America to track and deal with the consequences of these severe weather events. It is possible for Region 1 amateurs to cause unintentional QRM to these nets so please listen carefully if operating near 14.300MHz, 14.325MHz and 14.265MHz. Frequencies used in Cuba are 3.740, 7.045, 7.080 and 7.110MHz. Frequencies used in Central America

are 3.690, 3.750, 7.060, 7.075, 7.090 and 7.098MHz. Local emergency communications groups may also activate if a hurricane approaches their area and those frequencies would be announced at the time.

In August, Mario Lorenz, DL5MLO, from AMSAT-DL gave a presentation on amateur radio space communications as part of the Hacker Space Program track at the Chaos Communication Camp 2011. The 5 day event, held near Berlin, Germany, attracted hackers and makers from across Europe. Building amateur radio satellites has always been challenging and involves using technology in creative ways, so has great appeal to the hacker community. Mario's talk was entitled, From OSCAR 1 to Mars and beyond - Amateur Space Exploration The last 50 years, Now, and the Future. An hour long video of the talk, in English, is now available on the web at http://tinyurl.com/ChaosCommsAMSAT. Six News, the quarterly magazine from the United Kingdom Six Metre Group is now available in three electronic formats. It has been available in pdf format for several years but now each issue is also published in both epub and mobi format, which are compatible with mobile devices including Kindle. The hard copy magazine is still posted to members but a new Internet Only discounted membership with access to download Six News in all file formats is available at 10 per annum. Six News contains a plethora of information for anyone interested in 50MHz with articles on antenna design, propagation, equipment, operating, DXpeditions, data modes, EME and detailed band reports. Details are on the internet at http://uksmg.org.

The Dutch National Amateur Radio Society headquarters station PI4AA is now a part of that nation's RTVS Media broadcasting. The amateur radio report airs every last Tuesday of the month from 8 to 9pm local Netherlands time. The broadcast area is south-east and east area of Holland on terrestrial stations 105.3 and 107.8MHz FM. Listeners outside of The Netherlands can tune in on the web at tinyurl.com/dutch-hamcast.

Castles And Stately Homes On The Air will be holding a UK and Ireland Heritage event during the month of September 2011 to coincide with the European Heritage Month. This is an opportunity to access locations which may previously have been inaccessible or closed to the public. For more information on regional dates and opening go to www.cashota.co.uk. The dates have been set for Castles And Stately Homes On The Air annual Castles weekend in 2012. The event will be held over 2 weekends on 18-19 May and 25-26 May. The organisers would like to invite both last year's participants and any new activators to apply to be an award station. More details can be found at www.cashota.co.uk, or by contacting Chris, M0DOL on 0772 058 0968.

And now for the details of rallies and events for the coming week

Milton Keynes ARS Rally takes place today, 28 August, at Bletchley Park, Sherwood Drive, Bletchley, Milton Keynes MK3 6EB. There will be trade stands, special interest groups and GB2BP will be on the air. Why

not make this a family day and visit the Bletchley Park museum too? More details can be seen at www.mkars.org.uk.

On bank holiday Monday, 29 August, Huntingdonshire ARS Rally takes place at St Neots Community College, Barford Rd, St Neots PE19 2SH. Doors open at 10am and admission is £2. There will be trade stands, a car boot sale, a Bring & Buy and RSGB bookstall. Contact Clive Burchell, G3NKQ on 01480 810473 for more information.

Next Sunday, 4 September, the Telford Hamfest is taking place at the Enginuity Museum, Coalbrookdale, Telford, TF8 7DU. Doors will open at 10.30am and the usual traders will be present. The organisers have a large number of radio valves for sale. The Bring & Buy will be operating as usual. This year the lecturer will be Roger G4ROJ, with his fascinating talk and demonstration of kites and balloons used as antenna supports. There are two sessions, 11am & 1pm. There is limited seating so be early. The organisers recommend that, if you come to the Hamfest from the North, East or West, use the M54 and leave it at Junction 6. Enginuity is just 7 minutes from there. From the South, via Much Wenlock, take the Telford road. Turn off right for Ironbridge and then left up the hill to Coalbrookdale.

Now for the news of special events Due to an administrative error, the table of special event stations in the September RadCom contains details for August. A corrected version is on the RadCom Plus website at www.rsgb.org/radcomplus. The editorial team apologises for this error.

On the Isle of Wight, Brickfields Amateur Radio Society will be operating GB4AC at Wolverton Manor, helping to support the charity Age Concern on Saturday 3 September and Sunday 4 September. Contact with GB4AC gives a point for CASHOTA G155, The Isle of Wight County Award, IOTA EU120 and WAB square SZ48.

On 3 and 4 September, the Radio club of Binche will activate the special event station ON4WAR to commemorate the Belgian Resistance during WWII. Operation will be from 9am to 6pm local time on Saturday 3 September and from 8am to 4pm on the Sunday. QSL via ON7RY, either direct or via the bureau. More details are available at www.on7ry.be.

Throughout September, Preston ARS will put GB4BOB Battle of Britain on the air operating from the club shack. Then, on 3 September, GB0PH will be on the air for Pontefract Heritage, operating from Pontefract Castle. On 4 September GB4CON will be on the air from the Festival @ The Farm at Farmer Copleys, Ravensknowle Farm. This is a fun day with many attractions.

And now the HF DX news compiled from 425 DX News and other sources

The 4W6A Timor-Leste DXpedition is now less than one month away. Top Band operators will be pleased to hear that the team now has a Titanex V160E vertical antenna for use on 160m that is 87ft, or 26.5m high. Listen out for 4W6A from 16 to 26 September.

OK1XD will be active from Lichtenstein portable HB0 between 1 and 10 September. Operation will be holiday style on 10m through to 80m using mainly RTTY and PSK31, with some SSB and CW. QSL via his home callsign, either direct or via the bureau.

I2KRR is a volunteer technical support person to the Catholic mission in Vanimo and will be active as P29FR in Papua New Guinea until March of 2012. He operates on 40, 20 and 15m SSB with his time on the air limited to the local evenings, plus Saturday and Sunday afternoons. QSL without any IRCs to I2RFJ, either direct or by the Bureau.

George, K3GV, will be active as K3GV/VY2 from Prince Edward Island between 1 and 30 September. Activity will be mainly on 20 and 15m. QSL via his home callsign.

Now the contest news

The IRTS 2m Counties Contest takes place today, 28 August, from 1300 to 1500 using both FM and SSB. For stations outside EI/GI, work EIs and GIs only, giving them a signal report and serial number. In return you can expect to receive a signal report, serial number and County. There are awards for the highest entrant from outside EI in each section. This often results in them going to GI, but not always indeed, some sections often have no entries from outside EI. For a list of the 32 Irish counties, see EI8IC's website at www.mapability.com/ei8ic/contest/eicounty.php.

On 3 September the Bulgarian LZ Open Club has organised a Simulated Emergency Situation Contest. The aim is to improve the ability of the amateur radio operators to act independently in case of distress or natural disasters. The contest simulates what happens when the conventional communications and power mains are broken and there is an immediate need of exchange of information between the place of the disaster and the outside world. The rules are published on http://lzopen.com/lzopenfield20/index.htm. Everybody is invited to participate.

Next weekend, 3 and 4 September, the RSGB SSB Field Day takes place from 1300 to 1300UTC. Operation is on all bands from 3.5 to 28MHz; the exchange is signal report and serial number.

The 144MHz trophy also runs for 24 hours over the weekend 3 and 4 September, from 1400 to 1400UTC. There are five sections to choose between, depending on how much time you can devote, whether you're at home or away, and single- or multi-op. The last three hours of the 144MHz Trophy coincides with the first three hours of the fifth and final 144MHz Backpackers' Contest, which continues for one hour afterwards. In the Backpackers' there are 10 watt `Hilltopper' and 3 watt `Backpacker' sections. Those who operate from or use power from a vehicle, can only enter the Hilltopper section. For those unfamiliar with backpacker contesting, there are antenna and height restrictions in both sections.

And now the solar factual data for the period from the 15th to the 21st of August, compiled by Neil Clarke, G0CAS on the 22nd August.

First this week the latest smoothed monthly sunspot numbers which are for November, December 2010 and January 2011. These are 26.5, 28.8 and 31.0 respectively.

After the spotless day on the 14th, sunspot groups started to appear the following day and again on the 16th. Both these regions produced low strength C class solar flares. On the 20th a further group appeared, this was the return of old region 1260 which produced one M class solar flare on its last rotation. So far this group has remained small and quiet. Solar flux levels increased steadily from 90 units on the 15th to 101 by the 20th and 21st. The average was 97 units. The 90 day solar flux average on the 21st was 96, that's the same level as last week. X-ray flux levels varied little day to day and averaged B2.1 units. On the 15th, geomagnetic activity was slightly unsettled due to a recurring coronal hole. The remaining days were quiet and the average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 650 kilometres per second on the 16th to 320 by the 20th and 21st. Particle densities were low every day. Bz varied between minus 7 and plus 6 nanoTeslas on the 15th, which was the most disturbed day, and between minus 3 and plus 4 nanoTeslas on the quietest day. The 19th saw some good Sporadic-E with an opening to the UK on 144MHz.

And now the solar forecast. A lot will depend this week on how active the returning sunspot groups are. Solar activity could be at moderate levels on some days but only very low to low if the sunspot groups are quiet. Likewise, solar flux levels could be as high as 120 units or as low as around the 100 mark with a quiet Sun. Either way a slight decline should take place towards next weekend. As always, almost anyway, geomagnetic activity is much easier to forecast. The coming week is expected to see a modest rise in activity towards next weekend as a recurring coronal hole takes effect. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to India should have a maximum usable frequency with a 50% success rate of around 23MHz. The optimum working frequency with a 90% success rate will be about 18MHz. The best time to try this path will be between 1200 and 1700UTC. Sporadic-E is still possible on some days, but as every year the end of August signals the end of the summer sporadic-E season. Occasional openings can still take place on the odd days up to the end of October but no more forecasts will be made in this report. Remember though, there is a short but reliable winter season that takes place around the Christmas and New Year period.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 28th August 2011

Two Metres Counties Contest

Today Sunday 28th August a final reminder that this contest takes place this afternoon from 2.00 pm to 4.00 pm local time. This is a great opportunity to meet up with old friends on 2 metres. Expect to hear some portable stations, especially if the WX is favourable!

Both SSB and FM can be used and a station may be worked on both modes. The 32 counties in EI and GI are multipliers, so the rarer counties will be in great demand. The closing date for the submission of the log to the contest manager is 27th September 2011.

Limerick Radio Club

Members from Limerick Radio Club will be operating a special event station today from the Atlantic Airventure site in Shannon, Co. Clare using the callsign EI0A on all bands using SSB & CW. This is the second year that the club have participated in the event. QSL via EI4GXB.

Tipperary Amateur Radio Group

The next meeting of the Tipperary Amateur Radio Group will take place in Raheen House Hotel, Raheen Road,Clonmel on Thursday next the 1st of September at 8.30 pm ,All are welcome

---

The doors open to the public at 11.30 and the rally will run throughout the afternoon. The usual traders will be on hand with some very tasty bargains, South East Communications, Long Communications and JBT Trading.

The Hotel are also offering room deals for the rally a Room Only from 59 and Double Room inc B&B: 79 Please Contact the hotel directly for room bookings on Tel: +353 21 4384477.www.blarneygolfresort.com

Small traders are very welcome but it essential that they contact the events organiser Liam EI7GTB, Tel: 086-3357100 Email:ei7gtb/ at /gmail/ dot/com as soon as possible.

Further details can be found via the group's website, www.ei1nc.com.com

---

Shannon Basin Radio Club

Once again the Shannon Basin Radio Club will be hosting the SSB field day on the weekend of 3rd and 4th September 2011. The grounds of Garbally College in Ballinasloe in Co. Galway have again been made available to any clubs or individual operators who wish to take part in the event. The club will also be hosting its very popular barbeque which is one of the highlights of the weekend. Anybody wishing to receive more information may contact Brian ei8iu by email "brianei8iu/ at / eircom dot /net or any club member.

South Dublin Radio Club

South Dublin Radio club have returned to weekly meetings after the usual short break. Meetings are again taking place in the Ballyoran community centre Tuesdays at 8pm. All welcome

---

NASA Moon Mission in Final Preparations for September Launch

NASA's Gravity Recovery And Interior Laboratory (GRAIL) mission to study the moon is in final launch preparations for a scheduled Sept. 8 launch from Cape Canaveral Air Force Station in Florida.

GRAIL's twin spacecraft are tasked for a nine-month mission to explore Earth's nearest neighbor in unprecedented detail. They will determine the structure of the lunar interior from crust to core and advance our understanding of the thermal evolution of the moon.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.
